

feeding solutions

feeding minds

Nourishing students and their families.

Since its launch in 2018, Feeding Minds has provided over 9 million meals to children in 6 different counties.

Feeding Minds School Pantries bring free, fresh groceries directly to where students learn, removing barriers like time and transportation. Each pantry offers a mix of fresh and shelf-stable items, operates during convenient hours, and gives families the freedom to choose what they need. Many locations also connect families to helpful community resources.

Nutritious food fuels success—in school and at home. By placing pantries in schools where food insecurity is common, Feeding Minds supports students and their families with access to the groceries they need to thrive. Feeding Minds pantries are currently located in elementary, middle, high schools, and colleges across Hillsborough, Pinellas, Pasco, Polk, and Manatee Counties.

We know that food alone won't solve hunger – that's why we're redefining what it means to feed Tampa Bay. We provide food for initial intervention but rely on resources beyond food to create lasting change. Through this process, more people than ever before will have pathways to possibilities, and a thriving future ahead.
