

GENERATOR SUBMITTAL CHECKLIST

Electrical:

- ☐ Provide **Electrical one line or Riser Diagram** of all **service equipment**: (Example: Grounding, Transformer(s), Meter(s), Main Distribution Panel, and Sub Panel(s) with conductor size/type and conduit size/type. (Note the **Existing and New Equipment**). **Information listed on the equipment should include:** Volts, Amps, Phase, and **AIC Rating**.
- ☐ Provide a summarized **load calculation** of the home or building. If load shedding is required, provide **load shed calculations** for the actual load(s) that will be shed. If there will be a separate emergency panel, designate the load(s) for this panel.
Note: Load calculations must show fuel source **LP** (Liquid Propane) or **NG** (Natural Gas), as this **will determine the power rating of the generator**.
- ☐ Provide **Factory Spec Sheets** for any **load shedding Modules** that will be used with the ATS.
- ☐ Provide **Factory Spec Sheets** for the ATS (Automatic Transfer Switch).
- ☐ Provide **Factory Spec Sheets** for the Generator.
- ☐ Show all wiring methods and materials.

- ☐ Gas type - LP or Natural Gas
- ☐ Isometric of piping layout (Including location of regulators).
- ☐ Longest run of gas pipe (from source to farthest outlet).
- ☐ Pipe type, size(s) and gas pressures.
- ☐ Appliance(s) BTUH rating.
- ☐ Gas table used for sizing.

- ☐ Commercial generator requires concrete slab detail.

Site plan with setbacks required.
