Program Summary

The Manatee County Comprehensive Plan (Objective 10.1.6) requires Manatee County to develop a Capital Improvement Plan (CIP) that provides programming and funding of capital projects consistent with the goals, objectives and policies of the Comprehensive Plan and the Future Land Use Map, to maintain adopted level of service standards and to meet other public facility needs not dictated by level of service standards.

The Capital Improvement Plan meets this requirement by providing a planned and programmed approach to utilizing the County's financial resources in the most responsive and efficient manner to meet its infrastructure, equipment and facility needs. The CIP serves as a "blueprint" for the future of the community's growth and development. It highlights the importance of capital maintenance and replacement, so those needs are addressed in a timely and coordinated manner. The CIP provides a basis upon which the impact of new projects on future operating budgets can be determined. It is a dynamic tool, not a static accounting document. Under direction of the Financial Management Department, the CIP outlines an annual budget for the county's capital projects and a plan for the County's capital investments over the next five years. As defined by the Manatee County Comprehensive Plan, capital improvements include physical assets that are constructed or purchased to provide, improve, or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally non-recurring and may require multi-year financing. Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements. The review and revision of the CIP is consistent with the goals, objectives and policies of the Manatee County Comprehensive Plan.

The CIP differs from the Capital Improvement Element (CIE) of the Comprehensive Plan in that the CIE identifies projects and financing for projects that are required to provide services to areas of the county where growth is occurring, and to maintain levels of services that are required by the Comprehensive Plan. The CIP includes all capital projects, including many that are not related to service levels, such as fixing and maintaining infrastructure, regularly required by the Comprehensive Plan.

The administration of the five-year CIP and the revenue outlook establishes the guidelines for fiscal feasibility for any given project. The CIP identifies revenue sources for each planned project. Those projects for which revenues have not been identified are shown as projects of record. The CIP meets the debt financing policy requirements contained in the County's financial policies and integrates County government projects with state and other local governments when appropriate.

Manatee County's capital planning process begins each November. Departments provide capital project submissions which are reviewed and compiled into the Recommended Budget. In the spring, the Recommended CIP is presented to the Board of County Commissioners in a public work session. After input from the community, the Board considers and adopts the five-year Capital Improvement Plan and a capital budget for the ensuing year is integrated into the annual budget which is adopted after two public hearings. The CIP lists each proposed capital project, the year it will commence, the amount to be spent on the project each year until completion and the proposed sources of funding. Amounts represented in the CIP are estimated project costs and are not intended to serve as precise project budgets. Projects are financed with a combination of utility rate revenues, local gas taxes, impact fees, federal and/or state grants, user fees and general revenues. It is the policy of the Board of County Commissioners that growth pays for itself to the greatest extent possible. The Clerk of Court requires project estimates to be fully funded prior to starting.

The CIP provides adequate time for capital projects to be planned and designed carefully before funding is appropriated and actual construction begins. This process allows professional staff to develop and review the required plans, engineering surveys, and architectural drawings and proceed with purchasing bids and specifications in a timely manner. The lack of a capital plan could result in inefficiencies in service provisions where development exceeds the ability of the government to meet infrastructure needs.

The capital improvement plan serves as a valuable financial tool. It can be used to forecast future capital demands on current revenues. A CIP that includes a forecast of financial resources available for capital purposes will allow public officials and staff to match those requirements. If expected revenues are not

realized, the CIP process enables the county to reassess project priorities and either reduce capital spending in a rational manner or defer certain projects until more funding is available. The ability to amend the capital plan is particularly important when a significant portion of the capital budget is to be financed from current revenues. Implementation of the Capital Improvement Plan serves to enhance the quality of life for both present and future generations of Manatee County.

The FY27-31 Capital Improvement Plan (CIP) reflects $2,288,658,532 of projects with activity within the five-year CIP and $2,547,756,537 of projects already fully appropriated and underway for a total CIP of $4,836,415,069. We have adjusted our CIP to identify two types of categories for our projects which are Governmental and Enterprise projects. To be reflective of the categories with our Infrastructure Sales Tax (IST) Projects, we have further subdivided the CIP projects categories similar to the IST projects. As a result, our CIP is divided into the following:

Governmental

General Government

- Buildings & Renovations
- General Government - Other

General Government - Southwest Tax Increment Finance

Libraries

Natural Resources

- Beaches/Waterways
- Boat Ramps
- Parks & Aquatics
- Preserves

Sports and Leisure

- Treatment

Administration

1. Purpose and Intent

This section is established to provide for the applicability and effect of the Five-Year Capital Improvement Plan for the Manatee County Board of County Commissioners, and to set forth specific requirements and procedures related to the revision and update of the Capital Improvement Plan. It is the intent of this resolution that its prescriptive provisions shall be implemented, in part, through the completion of the Capital Improvement projects as described herein.

2. Applicability

The Five-Year Capital Improvement Plan shall apply to capital improvement and capital maintenance projects undertaken by the County of Manatee, Florida. For the purposes of this section, the term "capital improvement project" shall mean a non-recurring expenditure of $250,000 or more from County funds for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

3. Review and Revision

Each year the Five-Year Capital Improvement Plan shall be updated by resolution of the Board of County Commissioners. Such review and revision of the Capital Improvement Plan shall be consistent with the goals, objectives, and policies of the Manatee County Comprehensive Plan.

4. Consistency of Governmental Development

A. For the purpose of the consistency requirement of the plan, the first year of the Five-Year Capital Improvement Plan shall apply to all capital improvement projects undertaken by the County of Manatee for which funds were or will be appropriated in Fiscal Year 2027, except as provided in paragraph D of Section 5 Administrative Provisions, or in a prior year, if the project has not been started as of October 1, 2026.

B. Year two of the Five-Year Capital Improvement Plan shall apply to all capital improvement projects for which funds will be appropriated in Fiscal Year 2028. Projects for year two are subject to availability

of funds and subsequent appropriation of funds by the Board of County Commissioners.

C. Years three through five of the Five-Year Capital Improvement Plan shall represent general County policy with respect to capital improvement programming, subject to review and revision on a case by case basis during each of the succeeding budget years, and subject to availability of funds.

D. Notwithstanding Paragraphs A, B, and C above, the County of Manatee may undertake other capital improvement projects not shown in the Five-Year Capital Improvement Plan as follows:

(1) Emergencies - Such projects found by the Board of County Commissioners to be of an emergency nature may be undertaken without amendment to the plan.

(2) Other Projects - Or, if not so found to be of an emergency in nature, such projects deemed by the Manatee County Board of County Commissioners to be of higher priority than capital projects shown in the CIP may be undertaken, providing the plan is amended by resolution of the Board of County Commissioners. Budget Amendment resolutions which identify such high priority projects as additions or changes to the CIP may serve as the required resolution to amend the plan. Provided, however, that in all cases, such projects shall be otherwise consistent with the prescriptive provisions of the Plan.

5. Administrative Provisions

A. Capital improvements shall be deemed consistent with the Capital Improvement Plan where they are consistent as to general location, scale and type of facility as provided in the CIP project description, although it need not be consistent in revenue sources or manner of operation.

B. If funding for a project identified in the CIP as a future year project or a project of record becomes available in advance of the year for which it is planned, the Board of County Commissioners may

proceed to implement that project when funding becomes available without an amendment to the Plan.

C. Amounts shown in the CIP as estimated project costs are estimates and not intended to serve as precise project budgets. This also applies to initial appropriations for capital projects. A precise project budget will be established for a project upon completion of the following:

(1) Engineering and architectural plans and specifications upon which the project cost will be estimated.

(2) Adoption of budget amendments subsequent to completion of plans and specifications that may be necessary to properly fund the project.

D. Budgets for projects shall be adopted by the Board of County Commissioners as provided in Resolution R-94-270 which establishes the Manatee County Budget Administration and Implementation Policy. Budget Administration Procedures as provided for under Resolution R-94-270 allow the Budget Officer or his designee to authorize the Purchasing Division to encumber items which require exception to the level of budget control established in the Budget Administration Procedures. This authorization can be given for approved projects, items previously approved for expenditure by the Board of County Commissioners, items required by law, or other expressed priorities of the Board of County Commissioners. Projects included in this CIP and previous CIP's are to be considered "approved projects" for the purpose of encumbering funds in anticipation of a formal budget amendment in order to meet significant time constraints or provide for improved fiscal resource management.

E. To the maximum extent possible, engineering and architectural plans and specifications prepared for roadway projects contained in the Capital Improvement Plan will incorporate landscaping, pedestrian/bicycle facilities and other aesthetic design considerations that enhance the image of

the community and reduce the impacts to adjacent land uses.

F. This Five-Year Capital Improvement Plan is prepared to be consistent with the Capital Improvement Element of the Comprehensive Plan subject to any proposed amendments to the plan presented to the Board of County Commissioners. If any provisions of this resolution are not consistent with the Comprehensive Plan, then the Comprehensive Plan shall prevail over any provisions of this resolution. Projects in the Five-Year Capital Improvement Element of the Comprehensive Plan may require subsequent adoption of ordinances and/or amendments to the Comprehensive Plan before the projects can be initiated.

G. Debt service for projects funded from the proceeds of Transportation Revenue and Refunding Bonds may be paid from Transportation Impact Fee Revenues if all applicable impact fee requirements are met.

6. Funding Sources

A. It is the intent of the Board of County Commissioners that any project included in this plan may be financed and refinanced using bond proceeds. The language in sections 6.B and 6.C below is provided to ensure that the issuance of bonds to finance projects remain as a viable alternative, even if other funding sources are used to initially finance projects.

B. This resolution is an affirmative action of the Board towards the issuance of bonds to finance or refinance the Capital Improvement Plan of the County in accordance with the laws of the State and the applicable provisions of the Internal Revenue Code of 1986, as amended and the rules and regulations of the Internal Revenue Service applicable thereto.

C. Whereby, it is hereby authorized to be issued and this Board hereby determines to issue, to the extent necessary to provide financing for projects identified herein, or refinancing for such projects funded from other sources, its general obligation

and revenue bonds pursuant to the laws of the State of Florida and, if required by the laws of the state, or the Constitution, a referendum vote on such general obligation bonds, for the capital improvements described in “Exhibit B” hereto in the Five-Year Capital Improvement Plan in one or more series and issues in aggregate principal amount of up to $4,836,415,069. The authority established herein shall be implemented by subsequent resolutions of the Board of County Commissioners.

Highlights at a Glance Governmental

Highlights at a Glance - Governmental

In the FY27 Governmental Capital Improvement Plan (CIP), projects total $186,304,280 with $67,086,622 funded by Infrastructure Sales Tax (IST). The Governmental FY27-31 CIP amounts to $790,234,889, representing 34.52% of the total CIP.

Noteworthy highlights in the governmental section of the CIP consist of the following:

General Government category projects receive $18,522,061 funding within the FY27-31 CIP, comprising 0.81% of the total projects.

Featured General Government Projects:

- **Community Center in Washington Park:**
  - Current Funding: $5,693,868
- **Convention Center Multipurpose room:**
  - Current Funding: $38,076,402
- **Public Works Central Stores Warehouse:**
  - Current Funding: $741,800
  - FY27 Funding: $2,610,411
- **Technology Tech Refresh Data Center:**
  - Current Funding: $600,000
  - FY27 Funding: $1,000,000
  - FY28 Funding: $2,000,000
  - FY31 Funding: $900,000
  - Total Funding: $4,500,000

Sports and Leisure Services projects receive $2,828,522 in FY27, funded by Infrastructure Sales Tax funds.

Featured Sports and Leisure Services Projects:

- **Blackstone Park Upgrades:**
  (Pavilion & Batting Cages)
  - Current Funding: $394,900
- **Buffalo Creek Park Athletic Field Expansion:**
  - Current Funding: $3,847,168
- **Country Club East Park Improvements:**
  - Current Funding: $7,924,559
- **Hidden Harbor (Fort Hamer East of New Bridge):**
  - Current Funding: $6,590,658
- **Premier Sports Complex Two Synthetic Turf Fields:**
  - Current Funding: $4,927,352
- **Premier Sports Campus Irrigation System:**
  - Current Funding: $171,478
  - FY27 Funding: $2,828,522
- **Washington Park Phase I Park Amenities:**
  - Current Funding: $4,281,367

Highlights at a Glance - Governmental *continued*

Natural Resources projects receive $10,587,992 in FY27. The remaining funding of $16,233,189 is allocated for projects throughout the plan, with $893,750 funded by Infrastructure Sales Tax funds.

Featured Natural Resources Projects:

- **Crooked River Ranch Projects:**
  (Site Improvements, Pavilion, Trails, Fishing Pier, Restroom, Parking, and Observation Tower)
  - Current Funding: $3,408,931
  - FY27 Funding: $910,000
- **Emerson Expansion Projects:**
  (Restroom & Pavilion, Trail System, Fishing Pier & Overlook, Parking, Gates & Entrance Road and Restoration)
  - Current Funding: $698,200
  - FY27-31 Planned Funding: $4,809,717
- **Gateway Greenway Trail – Phase I & II:**
  - Current Funding: $3,538,370
  - FY27 Funding: $3,000,000
  - FY28 Funding: $2,500,000
  - FY29 Funding: $2,000,000
- **Mixon Farms Projects:**
  (Barn, Garden, Pavilion and Citrus & Food Forest)
  - FY28 Funding: $2,320,064
- **Rye Preserve Tent Camping Loop and Kayak Launch Projects:**
  - Current Funding: $404,500
  - FY27-31 Planned Funding: $1,200,000
- **Rye Preserve Scenic Trail & Amenities Improvement:**
  - Current Funding: $4,047,700

Public Safety projects receive $4,620,766 in FY27. The remaining funding of $106,318,068 is allocated for projects throughout the plan, with $8,342,504 funded by Infrastructure Sales Tax funds.

Featured Public Safety Projects:

- **Animal Community Center Building**
  - Current Funding: $2,598,688
- **Bishop Animal Shelter – Phase I & II:**
  - Current Funding: $14,883,619
- **EMS/MCSO Combined Substations:**
  - Lake Flores:
    - Current Funding: $1,000,000
    - FY31 Funding: $14,972,086
  - Moccasin Wallow Extension:
    - Current Funding: $1,000,000
    - FY31 Funding: $23,775,886
  - South County:
    - Current Funding: $1,688,986
    - FY31 Funding: $23,086,900
- **Emergency Operations Center (EOC) Expansion & Technology Upgrade:**
  - FY27 Funding: $2,049,080
- **Emergency Medical Services Logistics Facility:**
  - Current Funding: $4,318,040
- **MCSO - New Property Evidence Building:**
  - Current Funding: $5,591,390
  - FY30 Funding: $30,000,000
- **Premier Sports Complex Swimming Pool:**
  - Current Funding: $20,792,773

Highlights at a Glance - Governmental *continued*

Transportation projects receive $143,794,656 in FY27. The remaining funding of $476,746,452 is allocated for projects throughout the plan, with $117,623,763 funded by Infrastructure Sales Tax funds.

Featured Road Improvement Projects:

- **63rd Avenue East from US 301 to Tuttle:**
  - Current Funding: $45,753,919
  - FY27-31 Planned Funding: $19,879,128
- **75th Street West from 20th Avenue West to Manatee Avenue West:**
  - Current Funding: $40,544,520
- **Canal Road Corridor (US 301- US 41):**
  - Current Funding: $23,708,469
  - FY27-31 Planned Funding: $25,508,225
- **Gateway Greenway Projects:**
  - Current Funding: $3,233,508
  - FY27-31 Planned Funding: $9,761,753
- **Lena Road from SR 70 to SR 64:**
  - Current Funding: $21,872,216
- **Lincoln Park Pedestrian Bridge:**
  - Current Funding: $1,481,440
  - FY27 Funding: $9,210,283
- **Lorraine Road from SR 64 to 59th Ave East:**
  - Current Funding: $11,201,773
  - FY31 Funding: $74,093,993
- **Moccasin Wallow Corridor:**
  - Current Funding: $153,917,386
- **Upper Manatee River Road North of SR 64 to Fort Hamer Bridge:**
  - Current Funding: $64,051,068
  - FY31 Funding: $11,510,906

Featured Intersection Projects:

- **60th Ave E (Buffalo Rd) - 69th St E:**
  - Current Funding: $4,267,583
- **CR 675 at Rye Road and North Rye Road Extension:**
  - Current Funding: $1,855,186
  - FY27-31 Planned Funding: $10,283,536
- **Ellenton Gillette Road - Mendoza Road (37th Street East):**
  - Current Funding: $6,036,325
  - FY29 Funding: $12,000,000
- **Harrison Ranch Blvd at US 301:**
  - Current Funding: $2,546,974
- **Lockwood Ridge Rd at SR 70:**
  - Current Funding: $1,070,000
  - FY27 Funding: $7,029,239

Featured Sidewalk Projects:

- **26th Street West from Cortez Road to 21st Ave West:**
  - Current Funding: $779,746
- **26th Ave East near 15th Street East Railroad Crossing:**
  - Current Funding: $565,200
- **59th St W - Manatee Ave W - 6th Ave NW:**
  - Current Funding: $58,950
  - FY27 Funding: $334,050
- **Buffalo Road Sidewalk - Imperial Cir to Bobby Jones Ct:**
  - Current Funding: $1,211,355
- **Moccasin Wallow Road – Gillet Drive to Buffalo Road:**
  - Current Funding: $725,255
- **Morgan Johnson Road 13th Ave East Amberly Drive:**
  - Current Funding: $94,627
  - FY27-31 Planned Funding: $489,185
- **Palma Sola from 34th Ave W to 27th Ave W:**
  - Current Funding: $522,000

This project summary includes projects that may appear to be complete but may still require administrative, financial, contractual, or other closeout activities before they can be officially closed in the Capital Improvement Plan (CIP).

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: General Government
Subcategory: Building and Renovations
Project Title: Chiller 3 at District Cooling Plant
Department: Property Management
Project Mgr: Aaron Rawley
Infra. Sales Tax: -
Project #: PJ6005240
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 4 323 9th Street West, Bradenton

Description and Scope

To design engineer and install a new chiller/cooling tower to provide chilled water air conditioning redundancy and expansion of existing and future buildings in the area.

Rationale

The Central Energy Plant (CEP) is located at 323 9th Street West currently has one open bay for a future 500 chiller and cooling tower. The addition of a new chiller will allow for redundancy of the current existing chillers installed in 2013 beginning their end-of-life cycle. This chiller plant services several locations in the downtown government campus, such as the Central Library, Property Appraiser Office, City of Bradenton parking garage storefront, Admin building, and future 920 Manatee Ave building storefronts.

Project Location

District 2 605 39 th St E, Palmetto

Description and Scope

Construct a 4,000 -5,000 sq ft Community Center at Washington Park that would give residents the area for the opportunity for fellowship and support at the park.

Rationale

Washington park area residents do not have a facility where they can gather in large groups for celebrations, learning activities and after school activities.

Project #: PJ6049812 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 3 1501 Manatee Ave W., Bradenton

Description and Scope

The project includes all necessary site design, permitting, and related appurtenances to deliver a complete and fully functional system. The project will install modern, energy#efficient chiller units designed to meet current standards for energy performance, environmental sustainability, and refrigerant compliance. The improvements will provide reliable cooling for court operations, reduce energy use, and lower operating costs, helping ensure the building remains safe and functional for many years.

Rationale

This capital investment ensures the long#term preservation and reliability of a critical facility asset. Replacing the existing, end#of#life chillers with modern, high#efficiency units will reduce energy consumption, minimize unplanned outages, and lower ongoing maintenance costs. The upgraded chiller system will enhance operational performance and support the facility's useful life for an additional 20 years or more.

Project Title: New County Parking Garage
Department: Property Management
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6069902
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance, Deficiency

Project Location

District 3 1112 Manatee Ave W., Bradenton

Description and Scope

To raze and construct a new county parking garage that is larger and more efficient for both the public and county employees. There will be a developed Maintenance of Traffic (MOT) prior to demolition and parking spaces will be located for all displaced users that park daily in the facility.

Rationale

The County parking garage is showing signs of deterioration due to aging and continuous water intrusion. Property Management engaged a professional engineer to perform a complete inspection for the entire structure. The inspection report confirmed there are massive areas requiring repair within the next 18 to 24 months. The estimate to perform only repairs to the aged facility is in excess of $8 million. Property Management suggests to not perform repairs to the structure, but rather raze the entire facility and construct a larger more efficient parking garage for county employees and the general public.

Project Title: Premier Generator Installation
Department: Property Management
Project Mgr: Jeff Anthony
Infra. Sales Tax: -
Project #: PJ6093312
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

To install the previously purchased generator for permanent generator functionality. Installation includes all applicable requirements for functionality for a secondary power supply including but not limited to fuel pump, electrical switch gear, other related electrical components and other appurtenances.

Rationale

The generator was purchased with Cares Act grant funding, but was not installed due to time frame eligibility with the Cares Act deadline. This project is to only install the previously purchased generator at Premier.

FY2027 - FY2031

Category: General Government **Subcategory:** Building and Renovations
Project Title: Community and Veterans Services (CVS) Office - 63rd Avenue East Building Renovation
Department: Community and Veterans Service
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6103051 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Other

Project Location

District 2 1003 63rd Ave E, Bradenton

Description and Scope

Design and engineer the renovation of the recently purchased VMA building to make it a fully functional office facility for Community and Veteran's Services staff. This includes approximately 17-20 offices (offices for leadership and staff dealing with HIPAA regulations), 30 office space/cubicles, a break room, multiple conference rooms that could convert to a multipurpose space all with IT functionality and screens, functional lobby with safety features and a collaborative space. Other considerations include IT infrastructure, security cameras, FF&E, and other appurtenances required for a fully functional office space.

Rationale

The current Community & Veterans Services (CVS) offices are situated on the 5th floor of the Manatee County Administration building, accommodating approximately 50 employees. The divisions housed on the 5th floor include Aging Services, Neighborhood Services, Children Services, Housing and Community Development, Criminal Justice, Homeless Policy Coordinator, 10 Fiscal Management staff, the CVS Director and 2 Deputy Directors. The move aims to address special inefficiencies, enhance privacy and security compliance with HIPAA regulations, and accommodate expansion needs including additional services for Probation and Veterans Services. The move and build out would render the proposed renovations on the 5th floor, aimed at expanding office space and enhancing security, unnecessary, thereby saving the county significant resources and disruption. The new location should provide easy of access for the public and employees, with consideration for parking, public transportation access, and central positioning relative to the community it serves.

This move would align with our commitment to ensuring that our services are readily available to members of the community. The offsite location provides for an opportunity to design a purpose-built facility tailed to the specific needs of the department and its staff.

Project #: PJ6106503
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 5 1707 Lena Rd, Bradenton

Description and Scope

A project for a new PW Central Stores Warehouse facility is requested and will be constructed on the Musgrave Property. The project will include a 10,000 square foot Central Stores/Surplus Warehouse facility for county-wide logistics and asset management. It will also include a loading dock, parking, security measures, hurricane hardened, a generator disconnect, offices, and storage areas. This facility will enhance efficiency and sustainability while ensuring the County can meet increasing demands for operational support in the years ahead.

Rationale

The recent loss of the PW Central Stores Surplus Warehouse due to fire has created an urgent need for a replacement facility to maintain critical county logistics. The centrally located Musgrave property at Lena Road provides an ideal location for consolidated or individual facilities, streamlining operations, improving efficiency, and enhancing security. A potential second-phase footprint for future expansion of facilities will ensure the county is prepared for future growth, safeguarding both public safety and government resources.

Project #: PJ6106504
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 5 SR 64 at Lena Road, Bradenton

Description and Scope

Planning and design of a modernized fleet maintenance facility with administration offices, break room, training space, and storm-rated sheltering capabilities at the County-owned property along Lena Road near the County's landfill.

Rationale

This project involves planning and designing a new Fleet Maintenance Facility and Administration Offices to replace the outdated structure at 1100 26th Ave E, Bradenton, FL.
The new facility will be on County-owned land near Lena Rd. The current 1950s building is in poor condition, with failing systems and outdated equipment, posing safety and operational risks. It lacks essential features like storm protection and space for modern fleet needs. Replacing it will ensure continued support for vital county services, enhance efficiency, and provide resilience during emergencies.

Project #: PJ6106600
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 201 25th St West, Palmetto

Description and Scope

Manatee County Neighborhood Services Department administers an Indigent Burial program. Part of this program entails paying for the cremation of those who have deceased and have no family/friends etc. to claim the body, make arrangements, and burying ashes at the New Memphis Cemetery. There is not enough room to continue this practice and there is a need to create a scatter garden which will solve this problem and along with it a parking area and wall to list the names of those whose ashes will be scattered there.

Rationale

This project will confirm the location of remains. Replacing the markers/plots will allow for families to easily locate their loved ones remains. The project will involve a survey of the ground to find out where there are burials and replace current plot markers so that they are more visible. Once complete a scatter garden will be developed and a wall built to house names of those scattered along with a parking area. A parking area currently does not exist and the property borders animal services and due to the poor condition of the plot markers, volunteer dog walkers are not aware where they are walking.

Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Other

Project Location

District 1 14494 Harlee Road, Palmetto

Description and Scope

Purchase DJJ building knowing future, substantial renovations/remodeling will be necessary. Anticipated renovations are mechanical, electrical, plumbing, sprinkler/fire changes, general repairs, kitchen repairs, and roof repairs. The Manatee County Sheriff's Office intends to use this facility to house programming staff, add class time for juveniles transported from the main jail allowing more efficiency of time by eliminating the process of separating juveniles from adults, and flexibility for new inmate intake for 14 days for COVID quarantine before main jail induction.

Rationale

On July 7, 1997, Manatee County (County) entered into a ground lease with the State of Florida Department of Juvenile Justice (DJJ) for a 3.5 tract of land located in the Manatee County Jail Complex. Under the terms of the agreement, the DJJ was allowed to construct a facility to house juvenile offenders and staff. The lease required that any facilities constructed by DJJ would be surrendered to County at the end of the lease term. The lease provides a formula to utilize in determining the price County will pay for the facilities if the county terminates the lease and indicates that if the DJJ terminates the lease, the purchase price for the facilities will be negotiated.

Category: General Government **Subcategory:** Building and Renovations
Project Title: Florida Maritime Museum Building Renovations
Department: Property Management
Project Mgr: Aaron Rawley
Infra. Sales Tax: -
Project #: PJ6107000 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Other

Project Location

District 3 4415 119th St W, Cortez

Description and Scope

To engage a structural engineer to evaluate a comprehensive building structure status. This is required to be completed prior to any type of repair or renovation due to the facilities age and compliance with all National Historic Preservation Society regulations. Depending upon what is delineated within the structural engineer's findings will drive additional costs for the actual repairs. Other pre-liminary evaluation expenses include retaining a roofing vendor to evaluate the roof and it's underlying structure, material testing, geothermal testing and engaging a construction contractor to provide pre-construction costs. Total cost of this project is unknown until actual repair and other construction upgrade costs are determined at a later date after all pre-liminary findings are reviewed.

Rationale

The Florida Maritime Museum has significant roof leaks, damaged bricks, stucco filled weep holes, standing water around building, buckling floors, soft floor joist issues, parapet caps rotted, scupper drains clogged and damaged beyond repair and the high probability of many more construction issues beyond these items. Any renovations must comply with the National Historic Preservation Society.

Project Need: Other

Project Location

District 2 1 Haben Blvd, Palmetto

Description and Scope

With a convention center headquarters' hotel under construction, the following improvements and enhancements to the existing Convention Center are needed. An approx. 15,000 sq. ft. multipurpose room added to the southeast side of the Convention Center (project 6111901), air conditioned corridor connecting the hotel to convention center, renovation of existing parking lot to include a landscape plan and Parking Deck that would accommodate approximately 100 cars.

Rationale

The convention center opened in January 1985 and was renovated in 2011 at a cost of $6.5 million paid in full by the Tourist Development Tax. With a convention center hotel in construction adjacent to the facility, it is recommended to expand the current convention center by adding approx. 15,000 sq. ft. multi-purpose room (Project 6111901), an air conditioned connector corridor to the hotel, and a 100 vehicle parking deck. Aside from the expansion items, we also recommend interior/exterior improvements to the existing convention center, and the renovation of the existing parking lot that includes a landscape plan. This recommended expansion program would allow us to leverage in small conferences and conventions that would generate approximately $20 million in economic impact annually that would allow us to fully diversify our branding in the marketplace. Without the expansion model of the convention center, the CVB would not have the amenities to attract small conferences/conventions, even though we will have a full-service adjacent hotel open for business.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

District 4 407 57th Avenue East, Bradenton

Description and Scope

Renovating an existing facility into a 33+ room temporary family homeless shelter will require a range of services to ensure the facility is safe, comfortable, and functional for families in need. The scope of services will need to be carefully planned and coordinated to ensure that the project is completed successfully, and will include:
Architectural phased design for renovation to create living spaces, evaluation of facility for hurricane preparedness and resiliency, common areas, and support facilities such as kitchens, bathrooms, and laundry facilities, including demolition, framing, electrical and plumbing work, HVAC, fire protection, site lighting, and security. The design and construction will also include all other appurtenances required for a fully functional ADA-compliant facility.

Rationale

Manatee County is committing to creating solutions to the homeless issues affecting our communities. Renovation of existing facilities to house homeless families can be a cost-effective solution to addressing the issue, providing a safe and secure living environment, and creating opportunities for community involvement and collaboration towards a common goal of ending homelessness. Shelters can also serve as part of a larger strategy to end homelessness. By providing temporary shelter, families can get back on their feet and transition into more permanent housing.

Project Location

District 5 9000 Town Center Parkway, Lakewood Ranch

Description and Scope

Acquire the Tri-Net building located at 9000 Town Center Parkway and perform renovations/improvements to ensure full office functionality. The scope includes, but not limited to: interior renovations such as upgrades to first and second-floor layouts to enhance operational efficiency, IT networking and security access control enhancements, installation of FF&E; building systems and maintenance (generator, HVAC, lighting upgrades) exterior parking and building improvements. Includes all appurtenances for a fully functional facility.

Rationale

The acquisition of the Tri-Net building at 9000 Town Center Parkway provides a strategic opportunity to secure a permanent facility that meets the County's operational needs. This location offers the necessary infrastructure to support current and future County services while optimizing efficiency, accessibility, and long-term cost savings. The purchase aligns with the County's commitment to maintaining a well-equipped and secure facility that supports essential functions.

Project #: PJ6119901
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 2 2525 27th St E, Bradenton

Description and Scope

The land needs to be acquired (39.06 total acres) in order to utilize land to create community garden and fruit forest for educational purposes and public use with opportunity for athletic fields. Hire necessary staff to operate.

Rationale

Manatee County Library system is under built. With the purchase of the Mixon Property, 39.06 total acres, there is opportunity to create a library space utilizing 6 acres and public facility for services. Allow the opportunity of athletic fields if capable. There is also opportunity to create a community garden and agricultural education area and museum.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 2 1022 26th Ave. East, Bradenton

Description and Scope

Remodel of approx. 20,000 sq. ft. of a 30,000 sq. ft. single-story building at 1022 26th Ave East, Bradenton, FL. The building will support a transitional housing and outreach program run by the Manatee County Sheriff's Office. It will feature intake, admin, housing pods, counseling and case management offices, restrooms, showers, laundry, storage, kitchen/dining areas, and outdoor spaces. Security and phased construction are key to the plan. Phase 2 will remodel approx. 14,000 sf.

Rationale

The Fresh Start project is a critical initiative to address the homelessness crisis in Manatee County. Our area has struggled to meet the needs of its homeless population, especially for overnight shelter. This proposal outlines a 24-hour facility offering a safe, supportive space for individuals experiencing homelessness. It also provides diversion options for the Manatee County Sheriff's Office (MCSO), reducing unnecessary justice involvement. The plan follows House Bill 1365 guidelines and involves renovating an existing county office building on 26th Avenue East in Bradenton.

Project Title: Premier Boulevard Entrance Road
Department: Property Management
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6093314 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 895 Post Blvd, Bradenton

Description and Scope

This project would include the design and construction of the entrance boulevard connection of Premier Boulevard to Rangeland and all associated earthwork and underground utilities.

Rationale

During the design phase of the Premier MCSO Substation, approximately $1.2M was identified for necessary earthwork, utilities and the construction of the entrance road, connecting Rangeland to the entrance Boulevard. This road will be shared by all new facilities being built at Premier including the Library, Pickleball, Aquatics Center, etc. Therefore, this project should be separated from the MCSO Substation project. These two individual projects would be started and completed at the same time to allow for a better allocation of resources, not just supervision and management but site preparation and utility services to the project site.

Project Title: Piney Point Deep Injection Well
Department: Public Works Projects
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6107400 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Other

Project Location

District 1 3105 Buckeye Road, Palmetto

Description and Scope

Construction of a Class I industrial injection well (+/- 3200 ft. bls) to dispose of remnant process wastewater at the former Piney Point phosphate facility. Includes permitting, design, and construction of the well, associated monitoring well(s), piping, valves, flow meter, Supervisory Control and Data Acquisition (SCADA) telemetry, pretreatment system, and other required appurtenances.

Rationale

The Florida Department of Environmental Protection (FDEP) has requested Manatee County to design, permit, construct and ultimately operate the well for the disposal of the remnant process wastewater at the Piney Point site. FDEP has agreed to fund the majority of the costs to do so. This well will provide a long term plan for disposing of the millions of gallons of wastewater currently stored in the phosphogypsum stacks and the 30-50 years of seepage that will continue after stack closure.

Description and Scope

Construction of a pretreatment facility to operate in tandem with the Class I industrial injection well currently under construction for the treatment and disposal of remnant process wastewater at the former Piney Point phosphate facility. Includes permitting, design, and construction of the facility, including open top tanks, enclosed building, electrical gear, pumps, piping, controls, covered chemical storage tanks and other required appurtenances.

Rationale

The Florida Department of Environmental Protection has requested Manatee County to design, permit, construct and ultimately operate the well for the disposal of the remnant process wastewater at the Piney Point site. FDEP has agreed to fund a majority of the costs to do so. This facility in tandem with the deep injection well will provide a long term plan for disposing of the millions of gallons of wastewater currently stored in the phosphogypsum stacks and the 30-50 years of seepage that will continue after stack closure.

Project Title: Technology Tech Refresh - Data Center
Department: Information Technology
Project Mgr: Mike Hotaling
Infra. Sales Tax: -
Project #: PJ6109801 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Maintenance, Growth

Project Location

Countywide 1112 Manatee Ave, 7th Floor, Bradenton

Description and Scope

Upgrade core County technology platforms including compute, storage, security and communications infrastructure. Implement, integrate, and validate replacement hardware Migrate users and services to the new infrastructure.

Rationale

In order to provide reliability, performance, capacity and current features, this project will replace technology equipment that has reached its end of useful life, This technology refresh needs to be performed proactively and regularly. Over the past few year, many updates and upgrades have occurred and produced a more dependable system. This is due to the technology refresh program instituted a few years ago. This is the schedule for replacing components in MC data center:
Servers - every 3 to 5 years
Storage - every 4 to 6 years
Security - every 4 to 5 years.
FY26 - Start-up Funding $600,000
To begin research, design phase and gather quotes for equipment and supplies needed for the project.
FY27 - Costs: $3,000,000
To enable IT to purchase the converged Data Center Infrastructure which is a high performance, scalable platform for IT services. This combines servers and storage equipment to ensure performance that meets the needs of the enterprise and all customers who rely upon this comprehensive system. This infrastructure currently runs over 700 virtual servers and provides hundreds of terabytes of storage. It supports critical enterprise functions including the financial system (OneSolution) and document management system (OnBase) that are used throughout the county, as well as line-of-business systems for every department including Utilities, Public Works, and Public Safety. This system also provides the ability to copy all data between two data centers in order to minimize business impact from a failure or disaster. The current system was purchased in FY 2022, so this replacement is at the end of the replacement cycle for this infrastructure.
FY28 - Costs: $900,000
To enable IT to acquire the Unified Communication infrastructure. The VoIP telephone system requires similar replacement schedule when considering the hardware component. There are approximately 50 units or servers that are acquired by a single purchase and does not account for any replacement of the handsets or phone that are placed upon the desk or in an office. The servers are the behind the scenes hardware that support the connectivity throughout the county. This replacement is at the seventh year after purchase and will help ensure the system remains reliable and meets the performance needs of our customers.

Project Title: Manatee County Central Jail Dog Kennel - Sandbag/Storage Building
Department: Community and Veterans Service
Project Mgr: Michelle Wehrle
Infra. Sales Tax: No
Project #: PJ6118101 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 1 14470 Harlee Road, Palmetto

Description and Scope

Manatee County will install two prefabricated 16-kennel buildings, a prefabricated storage/sandbag building, and an air-conditioned storage facility to include concrete slab, utilities, site work, roadway improvements, fill placement and potential stormwater facilities and all appurtenances required for a functional facility. This project is for the prefabricated storage/sandbag building.

Rationale

Due to dog overcrowding at Manatee County's Palmetto Animal Shelter, a new supplemental kennel for the large dogs needs to be built. With the help of the Manatee County Sherriff's Central Jail team, the Animal Welfare Division would like to build two 16- dog kennels at this site, along with a storage facility to house chemicals and sandbags, and an air-conditioned storage facility for dog medicines and food. Dogs will be cared for by the inmates, and this will help with the inmate's rehabilitation.

Project #: PJ6118800 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 5431 Buckeye Rd, Palmetto

Description and Scope

The architectural design of site and civil work for a memorial veterans park which will determine a phasing structure to complete this project over a number of years. This project will include War Memorials to commemorate veterans who have fought in conflicts and wars. These memorials can include statues, plaques, or other installations. Additionally, a visiting center, pavilions, and infrastructure will be designed as a central gathering point for events and activities and will include storm-water facilities and basic infrastructure such as sidewalks, paths, site lighting, restrooms, and parking facilities. Additional amenities to be considered may include outdoor recreational facilities such as walking trails and picnic areas to provide a space for veterans to come and enjoy the outdoors; and all other appurtenances required for a functional facility.

Rationale

Building a Veterans Memorial Park is important as it provides a space where the memory and contributions of veterans can be honored and preserved. It is also a way to recognize the sacrifices of those who served and to educate the younger generations about the importance of serving and defending the country. Additionally, a Memorial Veterans Park can also be a place where veterans can come together, share and connect with each other, and receive support and assistance if needed.

Subcategory: -
Project Title: Wares Creek Flood Mitigation
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6028803
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

Multi-district 301 Blvd E at US 41, Bradenton

Description and Scope

Evaluate, survey, design, permit, and construct stormwater and water quality storage facilities at applicable County-owned properties to allow preemptive stage drawdown of existing stormwater facilities in advance of a forecasted storm/flood event. Improvements to include modification of existing facilities, new improvements, and automated out outfall structures. Scope to include geotechnical explorations and a Environmental Site Assessments (ESA). Phasing the project is to be considered. Excavated material is to be utilized, where applicable, for County benefit allowed by the ESA. Material is to be hauled to receiving stockpile facility or to a capital improvement project in need of fill material.

Rationale

DeSoto Square Mall's parking lot, residential and commercial properties along 9th Street Extension, 9th Street West, 30th Avenue West, and other local streets in East Branch Cedar Hammock/Wares Creek watershed are prone to flooding from high intensity rainfall or daily rainfall totals exceeding 2-3 inches. This project will utilize existing County-owned properties and stormwater facilities to create additional stormwater/floodplain storage to alleviate flooding.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Maintenance

Project Location

District 4 US 41 at 51st Ave Dr W, Bradenton

Description and Scope

Evaluate, design, permit, and construct approximately 8,500 LF of cure-in-place pipe lining throughout the Pic-Town subdivision. Design to include increasing capacity of existing inlets and providing new inlets to improve stormwater conveyance. Obtain necessary drainage easement needed for the improvements.

Rationale

Pic-Town subdivision was established in the 1950's and since there are no established drainage easements within the community, homes have been placed over storm pipelines. These reinforced concrete storm pipelines are reaching the end of their life span and are experiencing joint failures which poses serious risk to the dwellings above them. Field Maintenance staff recommends cure-in-place pipeline rehabilitation of the entire drainage system to stabilize the structural integrity of the pipelines and extend their life span another 40 to 50 years. Also, increasing inlet structure sizes and adding additional inlets will alleviate street flooding that occur during light to moderate rain events.

Project Title: Bowlees Creek Channelization (Lake Brendan to 9th Street East)
Department: Public Works
Project Mgr: Jamarr Norman
Infra. Sales Tax: -
Project #: PJ6106301 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 Danny Drive, Sarasota

Description and Scope

Flowline improvements to Bowlees Creek (approximately 0.97 mile) and two tributary systems (from 15th Street East and from Whitfield Avenue) that include: (i) survey and mapping, (ii) channel widening, (iii) installation of two (2) Automated Outfall Structures (AOS), (iv) provide drainage easements over Bowlees Creek and tributary systems, the stormwater facility within Oakwood Apartments, and the private pond for permitting, construction, inspection, and maintenance of the AOSs, supporting communications, and water quality monitoring equipment, as required.

Rationale

Bowlees Creek Watershed has a history of over-topping its banks and inundation of adjacent properties and roadway thoroughfares. The Shadybrook Condominium and adjacent neighborhoods experienced flooding from the "No Name" flood event of August 2017. The Bowlees Creek Watershed Management Plan (WMP) found a deficit in flood storage is causing the flood inundation. The WMP determined 39.43 to 42.30 acre-feet of additional flood storage, depending upon the draw-down time-frame, could be created between these three existing stormwater facilities. The subsequent Bowlees Creek Feasibility Study determined flood mitigation could be provided within the watershed by means of channel widening and a maintenance dredge to create a uniform flowline slope of Bowlees Creek between Lake Brendan and 9th Street East.

Project Title: Pearce Drain Watershed Flood Mitigation (6525 33rd Street East)
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6115800 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 63rd Ave E and 33rd St E, Sarasota

Description and Scope

Survey, design, permit, and construct an approximate 50 ac-ft stormwater and water quality storage facility at 6525 33rd St E (PID 1876210004). Scope to include geotechnical explorations and a Environmental Site Assessment (ESA) for the parcel. Excavated material is to be utilized where applicable for County benefit allowed by the ESA. Excavated material will be hauled to receiving stockpile facility or CIP in need of fill material.

Rationale

The County recently purchased a vacant parcel located at 6525 33rd St E which is adjacent to the Pearce Drain within the Pearce Drain Watershed, which historically is prone to flooding. The parcel has been identified as a proposed regional flood mitigation facility from a recently completed Pearce Drain Watershed Management Plan. The parcel will provide additional flood volume storage and water quality treatment to the watershed. Additionally, the excavated soil material may be able to be utilized for ongoing Capital Improvement Plan (CIP) projects, landfill cover material, or elsewhere in the County. The property is located within the Southwest Tax Increment Financing District (SWTIF).

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 63rd Ave E and 33rd St E, Sarasota

Description and Scope

Survey, design, permit, and construct an approximate 6 ac-ft stormwater and water quality storage facility at 6209 17th Street East (PID 1843400001). Scope to include geotechnical explorations, Environmental Site Assessment (ESA), topographic survey, and boundary survey for the parcel. Excavated material is to be utilized where applicable for County benefit allowed by the ESA.

Rationale

The County acquired the property located at 6209 17th Street East which experienced repetitive flood losses. The property is located within Bowlees Creek Watershed, which historically is prone to flooding. The general area was identified for a regional flood mitigation facility through the Drainage Improvements Analysis Report included with the Bowlees Creek Watershed Management Plan. The parcel will provide additional flood volume storage and water quality treatment to the watershed. Additionally, the excavated soil material may be able to be utilized for ongoing Capital Improvement Plan (CIP) projects or elsewhere in the County. The property is located within the Southwest Tax Increment Finance District (SWTIF).

Category: General Govt - SWTIFF **Subcategory:** -
Project Title: Holiday Heights Stormwater Improvement
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJST02297 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 51st Avenue West from 21st Street West to 24th Street West, Bradenton

Description and Scope

This project will consist of upgrades/improvements to the existing stormwater system collection and conveyance system within Holiday Heights, 2nd Addition Subdivision, which ultimately drains into West Branch Cedar Hammock. This project will consist of upsizing existing stormwater pipelines; improvements or replacement of existing grate inlet and curb inlet structures; and, if warranted, the installation of a flap-gate at the outlet into West Branch Cedar Hammock Drain. Acquisition of Drainage Easements as warranted for the upgrades/improvements to the existing stormwater pipelines as necessary. Design and permitting associated with referenced improvements. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvements where possible.

Rationale

Maintenance staff repeatedly receives stormwater drainage related service requests in the Holiday Heights community. The area has significant street flooding and some claims of home flooding during extreme rain events. Stormwater Operations has flushed out this stormwater system in the past based upon repeated complaints. The next step is to analyze the drainage system and determine if upsizing the stormwater pipelines, installation of a flap gate and/or inlet improvements would be most effective to improve the system. Note that there is a limit to what can be accomplished without additional storage being created in this system.

Project Title: Palma Sola Boulevard Stormwater Improvement (Senrab Dr)
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJST02298 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 3 Palma Sola Boulevard/Senrab Drive, Bradenton

Description and Scope

This project will consist of upgrading the existing stormwater system from Senrab Drive west towards Palma Sola Boulevard and ultimately draining into Palma Sola Bay. This project will consist of upsizing existing stormwater pipelines; improvements or replacement of existing grate inlet and curb inlet structures; and, if warranted, the installation of a flap-gate at the outlet into Palma Sola Bay. Acquisition of drainage easements as warranted for the upsize of existing stormwater pipelines as necessary. Design and permitting associated with referenced improvements. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvements where possible.

Rationale

This is a flood mitigation project to improve the Level of Service (LOS) for the local roads and reduce flooding on private properties that regularly occurs during typical summer rain events. Additionally, the stormwater system east of Palma Sola Blvd in Senrab Park has reached the end of its life span. Maintenance staff are constantly repairing failing joints, pipe collapses, and blockages due to root intrusion.

Project #: PJ6081402
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 6750 US 301 N, Ellenton

Description and Scope

One of three Library projects in the Infrastructure Sales Tax (IST), this request is to expand the facility up to 8,000 square feet to the north of the teen and children's area. The expansion is needed to accommodate tremendous growth in the north part of the county. Project elements included; replacement heating, ventilation (Cafe area) and air conditioning (HVAC) systems, a friend's meeting room, youth STEAM lab, exterior windows and doors to allow natural light to enter the building and enhancements to the technology area. The project uses both Library Impact Fees and IST funds.

Rationale

The first Rocky Bluff Library was established in a small 4,570 sq. ft. storefront space in Ellenton. In 2013, the County acquired The Roaring Twenties restaurant out of foreclosure and began renovations to the 10,470 sq. ft. structure. To save cost, surplus shelving from the Historic Court House was repurposed. Library staff & Property Management moved books on rolling carts across the parking lot to the new building. Portions of the old restaurant were preserved and still used in the Library today such as; light fixtures, counter tops, and the old bar which is now the "Storybook Cafe".

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 16410 Rangeland Pkwy, Lakewood Ranch

Description and Scope

This would be Phase 2 of the construction of the new library facility in the Premier Sports Campus and would also fulfill to promise to house other County services particularly those within CVS as opposed to County functions that do not require in-person visits to access services. Phase 2 would allow for study and tutoring space, conference/meeting rooms, and additional physical collections. The build-out would include office space for Veterans Services counselors and Probation Officers to better serve their growing caseloads, increasing their effectiveness and efficiency. The ease of access, parking, and location in Lakewood Ranch would be beneficial for our veterans that live and work in the expanding Eastern part of the County.

Rationale

The Library System consists of seven public facilities, each open 62 hours a week. With the addition of the newest branch Manatee Library will reach 56% of the space standard set the Florida Department of State, Library Division of .60 sf per 1000 residents of the library service area. This standard is also expressed in the Comprehensive Plan. The Library anticipates the new branch to be the busiest in the library system, due to ongoing and rapid growth. As the new branch occupies the first floor of a two-story building. The second floor was designed to carry the load of library shelving, which is greater than typical build, presenting an opportunity to expand services, including additional collection space, study rooms, and meeting rooms, which is a priority for the local business community.

This also presents an opportunity to move toward a model of including other CVS services in new and remodeled Library locations, as these predominately public-facing programs are well suited for a public-facing building, with ample parking. Probation Services would be able to place three officers, and Veterans Services would be able to staff two counselors on a rotating basis. Estimated additional staff would be 4FTEs for the Library - one Librarian 1 and three Library Assistants.

Schedule of Activities

Project Title: Manatee County Public Library System Book Mobile
Department: Community and Veterans Service
Project Mgr: Tammy Parrott
Infra. Sales Tax: -
Project #: PJ6117791 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

Countywide 1301 Barcarrota Ave, Bradenton

Description and Scope

To purchase a specialty vehicle to utilize as a Book Mobile to better serve the citizens of Manatee County with more accessible library services.

Rationale

Manatee County's library services infrastructure is at 56% of state recommended levels. Rapid population growth has underlined the deficiency. This project will add a Book Mobile to existing service delivery methods and practices. The Book Mobile will enable the library staff to provide services to residents living in areas of the County that do not currently have services or cannot readily travel to existing Library locations.

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 (R-12-to R-36) 77th street to approximately 360 feet south of 13th Street South (Anna Maria Island)

Description and Scope

Project scope includes Construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for three years.

Rationale

The federally-authorized Manatee County Shore Protection Project area extends from about 77th Street in the City of Holmes Beach south of 13th Street South in the City of Bradenton Beach (FDEP R-Monuments R-12 to R-36) and was nourished originally in 1992/1993, again in 2002/2003, 2005/2006, and 2013/2014. Through supplemental federal funding, the Central Beach Nourishment project has been provided $14.3 million, with a 30-year period for cost-share reimbursement, to refill the beach template to the maximum extent possible within that budget. The County intends to place additional sand needed to fully refill the template. The USACE must construct the project on their expedited schedule, currently set for 2019/2020, or risk losing the funding. The project is currently authorized under an existing FDEP permit; however, a request needs to be made for another one-time use of the Passage Key sand source borrow area. Also, construction plans, and specifications need to be prepared for the USACE to advertise the project. Engineering studies are conducted prior to permitting to gain a full understanding of the existing coastal environment and any potential impacts the proposed project may cause. These studies are typically required by the FDEP prior to submitting a funding application.

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Natural Resources Category **Subcategory:** Beaches/Waterways
Project Title: Coquina Beach Nourishment - Passage Key Sand Source
Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra. Sales Tax: No
Project #: PJ6003417 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 3 (R-33 to R-41+305) 100 Ft S of Bridge St to N end of Longboat Pass, AMI

Description and Scope

The nourishment project requires construction of renourishment, artificial reef for permit mitigation, and a recreational snorkeling reef. Following construction, it is anticipated that the project will require environmental, physical, and biological monitoring for three years.

Rationale

The Coquina Beach project area which extends from south of Bridge Street to the southern end of Anna Maria Island in the City of Bradenton Beach (reference monuments R-33 to R-41). Manatee County is seeking to obtain permits for the Coquina Beach Nourishment Project and mitigative reef. The permits include the Florida Department of Environmental Protection (FDEP) Joint Coastal Permit (JCP) and U.S. Army Corps of Engineers (USACE) Department of the Army (DA) permit to authorize the renourishment of the Coquina Beach project area using sand from the Passage Key Inlet ebb shoal and the construction of a mitigative artificial reef adjacent to Coquina Beach along with a multi bolder recreation snorkeling reef with in the swim zone of Coquina Beach nearest the County concession building location. At the request of the County, the USACE plans to incorporate the Coquina Beach project into the construction event of the Federal Central Beach project. The intent of combining the projects is to reduce costs by $4M - $5M, eliminating a separate dredge mobilization cost. The County must forward fund both the local and State share of construction costs to the Corps. The State share of 50% is fully reimbursable subject to appropriations from the Florida Legislature, competitively awarded. Monitoring and maintenance costs are not forward funded.

Category: Natural Resources Category **Subcategory:** Beaches/Waterways
Project Title: Coquina Beach Stabilization Structures
Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra. Sales Tax: -
Project #: PJ6003418 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 3 (R-36 to R-41) 360 Ft S of 13 St to N end of Longboat Pass, AMI

Description and Scope

The project scope includes completion of a feasibility study, planning, design, permitting, construction phase services, and construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for a period of three years.

Rationale

The Coquina Beach groins are located along Coquina beach (FDEP R-monuments R-36 to R-41) and with 18 groins approximately 100 ft in length. The groins protect the beach fronting Gulf Dr S of 13 St S. The present condition of the existing groins is poor; the structures are degrading and pose a hazard to the beach going community. Manatee County is conducting a feasibility study utilizing numerical modeling to evaluate the effects of rehabilitating, removing and/or replacing the Coquina Beach groins and considering alternative structural stabilization options to assist in reducing erosion on Coquina Beach. The Coquina Beach Structural Alternatives Analysis includes conducting a site visit to document the current condition of the existing groins, a literature and coastal processes review, development and screening of options, preliminary engineering and numerical modeling to evaluate alternatives, and recommendation of the most feasible and effective design for implementation. Once the alternatives have been considered, they will be presented to FDEP for support of the permitting process. Wherein, the final engineering design can be completed with state and federal permitting and construction administration services in support of the project.

Project #: PJ6003419
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 (R-41+405) the north end of Longboat Pass, AMI

Description and Scope

The project scope includes feasibility, design, permitting and construction. It is anticipated that the permit will require environmental, physical and biological monitoring for a period of three years post construction.

Rationale

The jetty on the north side of Longboat Pass reconstruction is required to implement a long-term solution for sand-tightening the structure. As a result, sand from the south end of AMI at Coquina Beach migrates over the top of and through the structure and contributes to shoaling in the inlet. FDEP's response indicated that since sand tightening of the deteriorating jetty would allow the beach north of the jetty to retain sand and stabilize the beach, this would potentially require less fill volume for Coquina Beach. The County agreed to place a temporary geotextile tube adjacent to the jetty at Longboat Pass, which was subsequently installed in 2012. Since then, annual physical monitoring was performed, and the geotextile tube has proven to be effective in trapping sand and preventing losses through the jetty into Longboat Pass. The geotextile tube has been in place for about five years and is at the end of its design life. The current Longboat Pass feasibility study is intended to expand upon previous effort and provide further engineering analysis in support of a permit application.

Project Location

District 3 Passage Key, Anna Maria

Description and Scope

The current project is located between reference monuments V-302 to R-1 at the north end of Anna Maria Island. The specific project activities include geotechnical investigations and borrow area design and permitting.

Rationale

The Florida Department of Environmental Protection's (FDEP) is adopting an updated Passage Key Inlet Management Plan (IMP) for Manatee County. Passage Key Inlet is a relatively deep channel north of Anna Maria Island that includes a shallow ebb shoal complex. The ebb shoal has been used as a sediment source for Anna Maria Island Beach Nourishment Projects on multiple occasions over the past decades, most recently for the 2020 Central Beach and Coquina Beach Nourishments.

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Maintenance

Project Location

District 3 Coquina Beach, Anna Maria Island

Description and Scope

A competitive contract will be secured to place 74,800CY of beach compatible sand obtained from the navigational channel of Longboat Pass and placed onto all of Coquina Beach and roughly 1/2 of Cortez Beach. The project includes the reestablishment of the beach shore profile, dune profile, and revegetation of the dunes. An alternative bid may be included to obtain additional dune plants for coverage of existing dunes within the project area.

Rationale

In 2022 Hurricane Ian and Nicole generated storm surge and wave action that caused beach and dune erosion. Again in 2023 Hurricane Idalia impacted Manatee County causing more beach and dune erosion. Approximately 74,800 CY of beach compatible sand will be dredged from the navigational channel of Longboat Pass and returned to the beach under a FEMA (75%) / FDEP (12.5%) / Manatee County (12.5%) funded partnership. The project will be constructed by a competitively selected contractor in accordance with federal and state procurement requirements.

Project Location

District 3 Central Beach, Holmes Beach, and Bradenton Beach Shoreline

Description and Scope

Manatee County will acquire professional services for the engineering and design of the Project such as coastal engineering analyses, preparation of plans and specifications, physical and environmental surveys, cultural resource surveys, design-level geotechnical services, sediment studies, inlet studies, environmental analyses, orthophotography, plan formulations and for obtaining environmental permits and other Project-related authorizations.

Rationale

The Manatee County Shore Protection Project is located between Department reference monuments R12 and R36. Restoration of the federal project occurred in 1993, and subsequent nourishments occurred in 2002, 2011, 2014, and 2020. The project was impacted by Hurricane Idalia in 2023, and Hurricanes Helene and Milton in 2024, and the next nourishment will be a federal FCCE project scheduled for 2026. The project includes the design, construction, and post-construction monitoring tasks associated with the upcoming FCCE nourishment project.

Project Location

District 3 Coquina Beach/Cortez Beach

Description and Scope

The project consists of design, construction, and monitoring for the continuous protection of subsequent nourishment activities including the reconstruction of a shore revetment and scour pad protecting Cortez Beach and Gulf Drive.

Rationale

The Anna Maria Island Beach Nourishment Project is located between DEP monuments R33 and R41.5 in Manatee County. Five projects are currently active: Coquina Beach Nourishment, Coquina Beach Stabilization (Structures), Longboat Pass Jetty, Mitigation Reef, and the Gulf Drive Stabilization and Scour Protection at North Coquina Beach. In 2021, sand was placed on Coquina Beach to repair damages from Hurricanes Hermine and Irma. The project has been impacted by Hurricane Idalia in 2023 and Hurricanes Helene and Milton in 2024. The next nourishment is scheduled for 2026/2027.

Project #: PJ6081506
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 3 27°31.002' N, 82° 49.025'W

Description and Scope

Manatee County enjoys wide support for the artificial reef program. Natural Resources has a recurring budget for artificial reef projects and uses these funds to obtain matching funding from grants and donations. This program helps grow capacity for the creation of important habitat structures. These projects create an area of quality habitat for marine fish, crustaceans and encrusting organisms that are naturally restricted to relatively scarce areas of sea bottom that have suitable substrate for colonization. This investment to expand the artificial reef structure at this site will enhance recreational fishing and diving opportunities in area waters and in turn, stimulate sectors of the local economy tied to these activities, and reduce user group conflicts (i.e. divers and fisherman). Funding will be used to transport and deploy permitted materials to the Bridge Artificial Reef site.

Rationale

The Natural Resources Department holds State and Federal permits to create the “Bridge Artificial Reef”, a 40-acre site located at Latitude 27° 30.840' N and Longitude 82° 49.026' W, ~4.5 nautical miles west of Passage Key, Anna Maria Island. Multiple deployments consisting of concrete culvert, a steel barge, limestone, and reef modules have occurred inside this permitted location. The FWC has awarded the Natural Resources department grant funding, with a County match, to improve and create hardbottom habitat on the County permitted Bridge Artificial Reef site.

Project #: PJ6071404 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Maintenance

Project Location

District 3 5800 Riverview Boulevard, Bradenton

Description and Scope

This project includes the extension of the northern dock at the boat ramp incorporating a barrier wall to prevent sand deposition into the channel, replacement of sand along the shoreline and planting of native vegetation to stabilize the reconstructed shoreline.

Rationale

The County's Warner's Bayou boat ramp property includes a section of the southern shoreline of the Manatee River. The shoreline has been observed to be eroding and the current is transporting sand east to west towards the Warner's Bayou east navigational channel and boat ramp. This project involves the extension of the northern dock at the boat ramp to include a barrier to sand moving westward and the renourishment and stabilization of the river shoreline using living shoreline components.

Department: Natural Resources
Project Mgr: Sherri Swanson
Infra. Sales Tax: -
Project #: PJTP25059
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 I-275, Skyway Bridge adjacent to Sunshine Skyway Fishing Pier on Manatee County side

Description and Scope

Construct a regional boat ramp on the south side of I-75 adjacent to the sunshine skyway fishing pier. This area requires construction of fill on bay bottom to accommodate up to 200 trailer spaces, 40 additional car spaces and 6 launch lanes. In the feasibility documents and environmental permits the Army Corps has identified the Sunshine Skyway location for placement of dredge material from the planed widening and deepening of the Tampa Bay ship chanel. Staff has worked with the Army Corp project planners to ensure that the dredge spoiled island created by this activity concides with the previously identified county boat ramp location. Because dredge spoil is being depositied at the planned location under "beneficial use" provisisions of the project, this fill placement along with plans and permits are being provided at no cost to Manatee County. In turn Manatee County has agreed to utilize the same fill pad created by the Army Cops atop which to build the planned county boat ramp. County construction costs will include stormwater treatment, sea wall and rip rap break water protection, restrooms and parking/launch pay stations, lighting, utilities, sewer, garbage receptacles, landscaping. Due to the reagional location of this boat ramp, WCIND can participate in all design, permitting, and construction costs associated with the boat ramp. Paid trailer and automobile parking would also be implemented at this location.

Rationale

Manatee County currently has 8 boat ramps which are at capacity during most weekends. We have less trailer parking spots than registered boat users in Manatee County. The need for additional boat ramps to increase capacity is evident based on the high demand in the County. Indeed the shortage was recently heightened by the elimination of 80% of the trailer parking spaces for the city of Palmetto's boat reamp on the Manatee River. Multiple conceptual plans for a boat ramp at the Skyway were developed by Coastal Engineering Consultants Inc. in 2008; however, plans were halted until recently revived.

Project #: PJ6081102 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 3 1206 Alcazar Dr, Bradenton

Description and Scope

Design, permit, and removal of existing seawall and construction of living shoreline.

Rationale

This project consists construction of public use improvements including replacement of a failing section of seawall with a living shoreline at Portosueno Park. A living shoreline will be designed, permitted, and constructed along the northern shore of the boat basin, between the stormwater weir to the east and Palma Sola Boulevard Bridge to the west. The existing seawall is failing in some sections and public access is currently prohibited due to safely concerns. The project also consists of improved native landscaping upslope of the proposed living shoreline and improved user amenities. This will lead to lower long-term maintenance costs, ecological/natural resources improvements and increased sea level rise resilience.

Department: Natural Resources
Project Mgr: Justin Rourk
Infra. Sales Tax: Yes
Project #: PJ6091000
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

Multi-district SR675/Lake Manatee/SR 70/Sarasota County Line

Description and Scope

Multi-purpose, non-motorized paved trail for pedestrian and equestrian use extending from SR 64 north through Rye Preserve and continuing North along combinations of Rye Rd right of way, FPL utility corridors, and lease agreements with adjoining property owners to connect to SR 62. From SR 62 the proposed trail will travel along a westerly direction following atop Gulf Coat Gas Transmission Pipeline right of way and merging with FPL property extending Nort/ Northwest to intercept a rails with trails project along FPL maintained railroad tracks. This project will be constructed in multiple subphases depending upon availability of funding.

Rationale

Conceptual alignment, design, permitting, and construction of the county Gateway Greenway Trail system, as part of the State Sun Trail and Gulf Coast Multi-County trail alignment. Cross Country recreational trails connecting to the parks and preserves utilizing where available utility corridors, road rights of way, and trail use lease agreements where ever possible is part of the implementation of the County's Trail Master Plan approved by the Board in December 2023.

Project Location

District 2 2525 27th Street East, Bradenton

Description and Scope

The 4-H and FFA animal barn supports a concurrent agricultural education project that provides hands-on learning in animal science and livestock management. This project requires a safe, functional facility where students can properly house and care for animals while meeting health and safety standards. Development of the barn is necessary to successfully enhance experiential learning and allow participants to develop responsibility, leadership, and career-ready skills through real-world agricultural practices.

Rationale

The 4-H and FFA animal barn offers students and community members hands-on experiences that build responsibility, leadership, and practical agricultural skills through livestock care and management. The barn provides a safe and structured setting that supports learning in animal science, biosecurity, and humane animal practices. It encourages youth to develop goal setting, record keeping, and teamwork skills while preparing animals for exhibition and serves as a shared space that promotes agricultural education, community involvement, and the continuation of agricultural traditions.

Description and Scope

The approximate 8 acre garden offers educational opportunities on composting, vermicomposting, soil health, and the benefits of apiaries and beekeeping, while providing the community additional gardening opportunities with walking paths for public accessibility.

Rationale

Garden – Offers educational opportunities on composting, vermicomposting, soil health, and the benefits of apiaries and beekeeping, while providing the community additional gardening opportunities.
Pavilion – Serves as a central gathering space for educational programs.
Citrus and Food Forest – Allows the public to explore legacy and new disease-resistant citrus varieties, along with a Florida-Friendly food forest.

Infra. Sales Tax: Yes
Project #: PJ5400018 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 3 1704 99th St, Bradenton

Description and Scope

Repair or replace all wood and hardware components of bridges, boardwalks, overlooks, piers, observation tower, and installed shade features (natural or manufactured) at Robinson preserve, as well as replenishing aggregate materials, erosion control features and stabilization plantings and irrigation, along trails used by the public to access approaching these assets to address erosion as needed/identified in annual inspections.

Rationale

Many of the existing boardwalk, bridge, and tower components have deteriorated over time due to weather, salt water, and general wear and tear. The project will address damage identified in annual inspections by replacing these components with an effort to minimize the inconvenience to patrons. Proactive replacement of these components as they approach the end of their useful lifespan will prevent closures due to developing safety issues/failures of critical structural elements.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Other

Project Location

District 1 2649 Rawls Road, Duette

Description and Scope

Ecological restoration and enhancement of approximately 100 acres of wetland and upland areas impacted by historical agricultural uses at Duette Preserve. The project will include removal of ditches and re-grading to restore wetland hydroperiods and restoration of wetland and upland habitats.

Rationale

FDOT is required to provide mitigation for wetland impacts associated with planned interchanges improvements at various intersections. The habitat restoration will benefit water quality and wildlife by greatly improving the ecological value of the habitat.

Department: Natural Resources
Project Mgr: Alissa Powers
Infra. Sales Tax: -
Project #: PJ6006508 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Other

Project Location

District 1 2649 Rawls Road, Duette

Description and Scope

The project will address hydrologic and nonpoint source pollution from a 127-acre contributing basin which discharges agricultural runoff in the North Fork Manatee River. The construction project will include the following design elements: contouring a 1.25-acre treatment wetland with two sediment removal pools, restoring 575 feet of headwater stream segment with five sediment removal pools, sediment removal from 0.44-acre of impacted floodplain swamp, replanting native vegetation, exotic plant removal, post-construction vegetation and wildlife monitoring and community engagement activities. The project objectives align with the TBEP Comprehensive Conservation and Management Plan (CCMP) and the County Comprehensive Plan's watershed protection goal.

Rationale

Duette Preserve was purchased with the primary intent to protect the drinking water supply, the Lake Manatee Reservoir. As part of the active management activities, NRD staff has undertaken several grant-funded hydrologic restoration projects focused on improving water quality and wetland habitats. In 2020, Manatee County received a grant through Restore America's Estuaries (RAE) to fund the design of the Lake Manatee Watershed Improvement Project - Phase 2B. In May 2023, Manatee County was awarded $172,709 for construction of the project (Partial funding). On December 22, 2023, Manatee County was awarded $272,709 from the FDEP Wetlands Restoration and Protection grant fund for construction.

Project #: PJ6006509
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth

Project Location

District 1 2649 Rawls Rd, Duette

Description and Scope

Design trail route, select stream/river crossings and site parking area and Design and/or purchase pre-fab bridges for delivery and on site assembly at designated crossing points.

Rationale

Duette Preserve has an extensive set of vehicle trails/roads that provide access for Natural Resources land management and Utilities department staff vehicles. Members of the public may also drive a selected set of improved roads with the purchase of an annual pass. These are generally 20-25' wide and provide little to no shade. We believe that a dedicated multi-use pedestrian, trail bike, and equestrian trail should be created. A lack of shade on trails is one of the few common complaints we get about the preserve. A separate designated trail that does not permit vehicles on it would be routed through more heavily forested areas. This trail for the most part, can be constructed in-house by NRD staff. Several new pedestrian bridges and a parking lot will need to be designed permitted and constructed.

Develop contract specifications and work with procurement to develop a solicitation for the design permitting, and construction of restrooms and pavilion including Utilities and septic.

Rationale

The Emerson Point Preserve Expansion purchased in July, 2024 presents an extraordinary opportunity to protect & restore coastal habitats, expand access and recreational opportunities North of the river. The preserve is regionally beloved though space for visitor infrastructure has been limited due to the need to protect cultural resources and preserve critical habitats. This project will restore vital habitats, expand water access, passive recreation, and educational program offerings. The construction of parking, restrooms, a pavilion, trails, water overlooks, and a visitor center are proposed here.

Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra. Sales Tax: Yes
Project #: PJ6012610
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

Site restoration including placement and contouring of approximately 850,000 cubic yards of dredged material obtained and delivered from Port Manatee for filling approximately 30 acres of impaired wetland, enhancement of an additional 46 acres of impaired wetlands as required by permit for mitigation of the filling of the adjacent 30 acres of impaired wetlands and uplands. This project will create a community asset for passive recreation including hiking, biking, and stormwater quality improvements. Washington Park is designed to be completed in three phases. Phase 1 provides recreational amenities, restrooms, playground, and parking over approximately 12 acres in the southwest corner of the parcel (addressed separately in CIP project number 6012627, and 6012628). This project is for Phase II which consists of permitting, final design, storm water infrastructure, contouring of fill placement, and site stabilization with 2 feet of clean fill cover to support landscaping for in-filling the abandoned borrow pit. The project also includes trail construction, pedestrian bridges, and landscaping by Manatee County. The US Army Corps of Engineers (ACOE) are supplying and placing a total of 1 million cubic yards in the borrow pit for an equivalent market value exceeding 16 million dollars. Phase III (CIP project NR01715) will entail the provision of additional recreational amenities on the restored 60 acres of the site.

Rationale

The Natural Resources Department is required to fund permitting associated environmental mitigation and enhancement inside the property associated with the Army Corp Infill project. County will perform restoration activities such as final grading and contouring requiring an additional two feet of topsoil covering for stabilization, landscape plantings, construction of trails, and a trail bridge linking Washington Park Phase I recreational area to the Phase II restoration area. This is the second phase of a three phase project which includes final design and extensive wetland restoration and mitigation, including site stabilization for the park in-fill project, in partnership with the US Army Corps of Engineers who are supplying and placing a total of 1 million cubic yards for an equivalent market value exceeding 16 million dollars.

Category: Natural Resources Category **Subcategory:** Preserves
Project Title: Living Lab at Geraldson Farm - Demonstration Area
Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra. Sales Tax: Yes
Project #: PJ6053920 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 3 1401 99th St NW, Bradenton

Description and Scope

The Land Lab would provide space for: a community composting demonstration site to highlight the variety of ways individuals can reduce food waste, while contributing to their garden and landscape success. Members will be able to drop off food scraps and receive finished compost for use in the Land Lab or elsewhere. A honeybee demonstration area consisting of three demonstration hives utilized to train backyard beekeepers as well as general public on honey bee awareness and potential concerns with beekeeping. Hydroponic stacker demonstration area to highlight types of hydroponic systems for growing vegetables, herbs, and fruits in a compact vertical growing space.

Rationale

In 2005, the Manatee County Board of County Commissioners (BCC) voted to purchase the approximately 20-acre Geraldson's Farm in Bradenton with the intent to protect the property from development and to use it for agriculture education and in demonstration of best agricultural practices associated with food production. A small portion of the property is currently used as office space and equipment storage by the Natural Resources department. The primary goal of this project is to design, construct, and implement an outdoor educational land lab that includes community gardens, a community composting area, backyard beekeeping demonstration area, small farm hydroponic system, 4-H/FFA livestock barn, pasture, and teaching pavilion utilizing approximately 5 acres at the former Geraldson Farm site. The Land Lab will provide youth and adults that would not otherwise have access to land for agricultural projects with a space to participate in hands-on agricultural learning, including crop production, animal husbandry, and community engagement. The Land Lab would also be accessible to school and community groups for agricultural awareness and education programs through field trips, tours, and workshops facilitated by Natural Resources Department/ Ag and Extension Services Division.

Project Location

District 3 1401 99th St NW, Bradenton

Description and Scope

The Land Lab would provide space for: A trail connecting to the adjacent Palma Sola Botanical Gardens and extending through the property would allow visitors to the botanical garden to take an extended walk in a grove of mixed native trees and a large number of hardy edible fruit trees known to thrive in the area including Mango, Lychee, Longan, Starfruit, Avocado, and citrus varieties among others.

Rationale

In 2005, the Manatee County Board of County Commissioners (BCC) voted to purchase the approximately 20-acre Geraldson's Farm in Bradenton with the intent to protect the property from development and to use it for agriculture education and in demonstration of best agricultural practices associated with food production. A small portion of the property is currently used as office space and equipment storage by the Natural Resources department. Project Location

District 3 1401 99th St NW, Bradenton

Description and Scope

The Land Lab would provide space for: A livestock barn for youth to house a range of animal projects The barn would be able to accommodate poultry, rabbit, goat, swine, and cattle projects for up to 30 students. The lab will consist of a 5,400 - 6,000 square foot livestock barn, with concrete floors and an adjustable livestock paneling system that can be reconfigured to accommodate housing needs for a variety of animal species. The barn will also include a washing/grooming area, an enclosed feed room and storage area, small office, restroom, and a teaching and demonstration area for workshops and field trip programs. Outside the footprint of the barn will include 2.5 acres of fenced pasture area, a chicken coop, and an area for temporary manure storage prior to removal.

Rationale

In 2005, the Manatee County Board of County Commissioners (BCC) voted to purchase the approximately 20-acre Geraldson's Farm in Bradenton with the intent to protect the property from development and to use it for agriculture education and in demonstration of best agricultural practices associated with food production. A small portion of the property is currently used as office space and equipment storage by the Natural Resources department. The primary goal of this project is to design, construct, and implement an outdoor educational land lab that includes community gardens, a community composting area, backyard beekeeping demonstration area, small farm hydroponic system, 4-H/FFA livestock barn, pasture, and teaching pavilion utilizing approximately 5 acres at the former Geraldson Farm site. The Land Lab will provide youth and adults that would not otherwise have access to land for agricultural projects with a space to participate in hands-on agricultural learning, including crop production, animal husbandry, and community engagement. The Land Lab would also be accessible to school and community groups for agricultural awareness and education programs through field trips, tours, and workshops facilitated by Natural Resources Department/ Ag and Extension Services Division.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 3 1401 99th St NW, Bradenton

Description and Scope

The Land Lab would provide space for: 15-20 community garden plots for residents/visitors to learn about and engage in vegetable and fruit cultivation.

Rationale

In 2005, the Manatee County Board of County Commissioners (BCC) voted to purchase the approximately 20-acre Geraldson's Farm in Bradenton with the intent to protect the property from development and to use it for agriculture education and in demonstration of best agricultural practices associated with food production. A small portion of the property is currently used as office space and equipment storage by the Natural Resources department. The primary goal of this project is to design, construct, and implement an outdoor educational land lab that includes community gardens, a community composting area, backyard beekeeping demonstration area, small farm hydroponic system, 4-H/FFA livestock barn, pasture, and teaching pavilion utilizing approximately 5 acres at the former Geraldson Farm site. The Land Lab will provide youth and adults that would not otherwise have access to land for agricultural projects with a space to participate in hands-on agricultural learning, including crop production, animal husbandry, and community engagement. The Land Lab would also be accessible to school and community groups for agricultural awareness and education programs through field trips, tours, and workshops facilitated by Natural Resources Department/ Ag and Extension Services Division.

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Deficiency, Other

Project Location

Multi-district Palmetto to Parrish

Description and Scope

This project is for 60% of design of the entire railway length along with completing 100% of design of segment 1 allowing for the completion of construction of segment 1 in East Palmetto. Construction of segment 1 involves a 10 to 12 foot paved trail segment parallelling 17th St East and 21st St Court East intercepting with FPL railroad right of way. Future phases of construction will continue trail segments along FPL rail right of way to Buffalo Rd. Whereupon the trail will continue as a multipurpose pedestrian trail along Buffalo Rd to 69th St East where the trail will return to a rails with trails configuration to rejoin with FPL railroad at the 69th St East/Erie Rd intersection continuing along FPL right of way to the Hillsborough County line. Construction design will include a combination of multipurpose trail construction following road right of way along with a rails with trails methodology providing for trail construction alongside existing railbeds. The existing railway through this segment will remain functional and the project will be built in multiple sub-phases depending upon availability of funds.

Rationale

This Gateway Greenway Trail segment is intended to utilize the existing Florida Power and Light (FPL) railroad track rights of way and other county rights of way where railroad track connections are not available, to provide an uninterrupted multipurpose trial connecting Lincoln Park in Palmetto to the Parrish area including direct connections to Palmetto Community High School and continuing north alongside FPL trackage to the Hillsborough County line. This construction involves a rails with trails methodology providing for trail construction alongside existing railbeds. The existing railway through this segment will remain functional. This project requires extensive discussion and confirmation with FPL in the development of trail design, trail construction, and utilization agreements. By letter agreement executed by the County Administrator, Manatee County is working with Representatives of the Trust For Public Lands (TPO) non-profit organization to assist in negotiations, grant writing, and liaison with the FDEP office of Greenways and Trails and the Sarasota/Manatee MPO.

Department: Natural Resources
Project Mgr: Sherri Swanson
Infra. Sales Tax: -
Project #: PJ6067407
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 1625 Ft Hamer Rd, Parrish

Description and Scope

The first Mitigation Program project proposed on County owned lands is Hidden Harbor Park (HHP). Once the mitigation project is established it would be self-perpetuating, with CIP projects purchasing credits at an established purchase price to sustain the project. The expectation is for the operating-fund to be net-cost-neutral, acting as a revenue source to fund permit compliance and support development of future mitigation sites.

There are two distinct areas associated with the HHP mitigation site, including the "land park" (~ 47 acres) area and the "blue trails" (~ 295 acres) that includes Devil's Elbow and Twin Rivers at Gamble Creek. The conceptual design for the HHP mitigation site assumes: 1). Earthwork to establish suitable elevations for wetland creation (i.e., tidal marsh, mangroves, freshwater marsh and forested wetlands), 2). Land re-contouring to remove agricultural ditches for wetland re-establishment (i.e., freshwater forested), and 3).Nuisance and exotic vegetation management for wetland enhancement on the eastern parcels of Twin Rivers and Devil's Elbow (tidal marsh, freshwater forested, mangrove).

Rationale

Providing wetland mitigation to advance Manatee County's Capital Improvement Program (CIP) has presented challenges for controlling project costs and managing project schedules. One challenge has involved state and federal permitting associated with unavoidable impacts to wetlands as a result of infrastructure development. Nearly all CIP transportation projects, including those planned over the next five years, will involve some wetland impact. Projects with wetland impacts require wetland mitigation. The purpose of establishing an in-house Mitigation Program is to better forecast and manage CIP project costs and schedules by helping to alleviate uncertainties associated with purchasing the right type and quantity of mitigation credits (or lack thereof). Manatee County Natural Resources Department (NRD) evaluated opportunities to reduce wetland mitigation costs associated with CIP projects through optimizing the use of County-owned lands with wetland mitigation potential to advance infrastructure development needs. A proforma analysis was prepared for one of the highest ranked sites, e.g., Hidden Harbor Park (HHP).

Project Title: Hidden Harbor Park Mitigation Site Invasive Vegetation Management
Department: Natural Resources
Project Mgr: Sherri Swanson
Infra. Sales Tax: No
Project #: PJ6067408 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 1 1626 Fort Hamer Road, Parrish

Description and Scope

The Southwest Florida Water Management District (SWFWMD) will allocate funding to Manatee County for vegetation management in the mitigation areas to maintain permit compliance. The Ecological and Marine Resources Division of the Natural Resources Dept will use the funds to manage contractor services in line with the restoration goals for HHP. Invasive vegetation can overwhelm native vegetation, hinder ecological function, and fuel wildfires. The project will manage vegetation designated as Florida Invasive Species Council Categories I and II levels at 5% or less. The funding allows the County to continue vegetation management within the mitigation areas.

Rationale

In 2015 Manatee County partnered with the Southwest Florida Water Management District (SWFWMD) to designate portions of Hidden Harbor Park (HHP) as wetland mitigation. The
mitigation activities were funded through SWFWMD's FDOT Mitigation Program. SWFWMD is obligated to maintain the mitigation areas in compliance with state and federal permits.
This agreement with SWFWMD will designate reoccurring funds to Manatee County for vegetation management within the FDOT mitigation areas over five years. Subsequent agreements will be prepared in five-year increments to fund vegetation management, in perpetuity.

Project #: PJ6067409 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 1625 Fort Hamer Road, Parrish

Description and Scope

The project will include engineering design and permitting followed by on-the-ground implementation. The design expands hydrologic connections to the Manatee River by transforming an eroding agricultural ditch into a tidal creek. The project will require excavation to create wetlands, providing opportunities to beneficially use suitable excavated soils for an observation mound and to fill formally excavated agricultural ditches currently draining Hidden Harbor Park (HHP) Preserve.

Rationale

The project will restore 20 acres of public land within the 229-acre HHP Preserve by reestablishing hydrology, enhancing biodiversity, and providing refuge for aquatic and terrestrial wildlife. Soils excavated from the restoration project will be used beneficially onsite, to fill relic agricultural ditches and create a public observation mound. The project will also provide hiking trails and wildlife viewing opportunities.

Description and Scope

Design, permit, and construct pedestrian trails at Hidden Harbor Park Preserve, either in-house or through a competitive solicitation process. If construction is procured (using permits and bid documents prepared by a consultant), the contract will be awarded through a competitive procurement process.

Rationale

The project will create hiking trails and wildlife vie wing opportunities which will include board walks and observational platforms for the public within the 229-acre Hidden Harbor Park Preserve. These trails are a required unfinished element of the FCT grant awarded in 20 14.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 905 Rye Wilderness Trail, Parrish

Description and Scope

Design, permit, and construct three (3) pedestrian bridges and kayak launch, to include wetland impact mitigation costs (ideally on-site wetland habitat improvement). Also, install campground host site, to include design, permit and construction of 22 concrete R.V. pads, R.V. campground with water, sewer and electric connections, dedicated restroom and shower facility, 8 auxiliary tent only campsites, and R.V. pump out station.

Rationale

This project is needed to address increased demands for East County residents to enjoy passive nature based recreation closer to the shifting population center. Improvements include upgrades to the canoe/kayak launch and internet connectivity along with construction of a new RV campground with amenities and separate tent camping only facility. While all county residents will ultimately benefit, we anticipate central and east county residents north and south of the river will be chief beneficiaries with area population numbers exceeding 100,000.

Project Location

District 1 Rye Preserve- 905 Rye Wilderness Trail

Description and Scope

Develop contract specifications and solicit bids. Hire contractor and oversee construction of roadway and kayak launch improvements.

Rationale

Significant improvements to the existing campground at Rye are being designed including revamped sites for RVs with water and electric hook-ups, a pump-out station, and a restroom w/lift station. These improvements are putting pressure on space within the footprint of the existing campground. We have identified another suitable location for the tent loop directly along the Manatee River that will provide a more compelling tent camping experience that includes a convenient kayak launch.

Project Location

District 3 11700 Manatee Ave West, Bradenton

Description and Scope

Create an approximate 15 acre seagrass mitigation area with access trail and boardwalk at the Perico Preserve on land owned by Manatee County. Transplant sea grass extracted from Perico Bayou into the sea grass mitigation area and monitor for success for a period of 5 years.

Rationale

The seagrass mitigation project will provide two primary benefits. The first benefit will be to provide mitigation credits for a fee paid to Manatee County from the City of Sarasota ,Port Manatee or possibly to another user of the credits, such as Florida Department of Transportation (FDOT), and the second benefit will be to provide 50,000 cubic yards of clean fill for the refurbishment of reclaimed water ponds at the Southwest Regional Wastewater Treatment Plant.

Category: Natural Resources Category **Subcategory:** Preserves
Project Title: Duette Bridge- North Fork Bridge Crossing
Department: Natural Resources
Project Mgr: Michael Elswick
Infra. Sales Tax: Yes
Project #: PJ6104761 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 1 2649 Rawls Rd, Duette

Description and Scope

Determine approach for design and permitting of H20 load rated bridge extending deck to 12' and fitting to existing substructure vehicular bridge 80'x12' on trail 14 at the North Fork of the Manatee River.

Rationale

Duette Preserve is the county's largest preserve and is a well field for the county's drinking water supply. It contains over 50 miles of trails used by Utilities, Natural Resources, visitors, and collaborating researchers. There are many river and creek crossings. This request is for funding to expand two of the vehicular bridges and one pedestrian crossing. This expansion is needed to improve safety and capacity for larger vehicles including Utilities, Natural Resources, FPL, and the public. Utilities uses these bridges to access the potable water wells on the property.

Project Location

District 1 2649 Rawls Road, Duette, FL

Description and Scope

Substantial replacement of the deteriorated metal catwalk/pedestrian bridge with a fully functional pedestrian bridge crossing the East fork of the Manatee River paralleling the well water pipeline along trail 14.

Rationale

Duette Preserve is the county's largest preserve and is a well field for the county's drinking water supply. It contains over 50 miles of trails used by Utilities, Natural Resources, visitors, and collaborating researchers. There are many river and creek crossings. This request is for funding to expand two of the vehicular bridges and one pedestrian crossing. Project #: PJ6118750 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 1 10405 25th St E, Parrish

Description and Scope

Design and permit for site improvements at Crooked River Ranch including kayak launch, primitive campground, electric service panel and meter, electric gates, fencing, and mobilization.

Rationale

The Crooked River Preserve was acquired under the voter-approved Environmental Lands Acquisition Program and with assistance from the Florida Communities Trust program, and National Oceanographic and Atmospheric Administration. It is approximately 65 acres located along the Manatee River. It preserves important habitat provides much needed nature based recreational opportunities in the West Parrish area including water access for paddle craft to the Manatee River. A Successful grant submitted to the Florida Communities Trust for 1.5 million dollars will obligate the county to build a number of basic passive recreational amenities including a kayak launch, picnic pavilion, interpretive kiosk, pedestrian trails with benches, an observation tower, a fishing pier/water overlook, primitive campground and a parking area with restroom.

Category: Sports & Leisure Services
Subcategory: Athletic Fields
Project Title: Blackstone Park Upgrades - Batting Cages
Department: Sports and Leisure Services
Project Mgr: Michelle Wehrle
Infra. Sales Tax: Yes
Project #: PJ6003518
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

District 2 2112 14th Ave. W. Palmetto

Description and Scope

Demo existing softball pavilion and prepare ground for installation of 2 standard softball batting cages with necessary lighting. By playground area, level selected area and grade properly to prepare for installation of new pavilion. New pavilion should be similar to existing playground pavilion (seats 40 people). Power source for lights. Install necessary seating.

Rationale

Blackstone Softball fields saw 5,230 hours of scheduled athletic play from January 2023 to December 2024 with 1,300 total reservations. There has been history of conflict between the pavilion users with the softball players due to the proximity to the softball field. We would like to remove the softball pavilion and replace with softball batting cages. Blackstone softball is the only softball complex at our large athletic facilities that does not have softball batting cages adjacent to their fields. Lastly, we are looking to install a second playground pavilion. This will allow pavilion rentals to continue without the disturbance of being beside a busy softball field as well as giving a more desired location for pavilion rentals, near our recently updated playground.

Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6004522 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 7550 69th St E, Palmetto

Description and Scope

Design and construct up to four additional soccer fields depending on site conditions, including synthetic turf system to stabilize the fields. A synthetic turf system including the enhanced base material provides cost-effective solutions for fields of any size and purpose. This project also includes solar lighting for paths and walkways, LED sports lighting for the new soccer fields; paved parking lot; parking lot lighting; expanded access road to accommodate access needs with overflow grass parking along the drive; restroom building; maintenance/storage building or shed; site utility improvements including potable water supply, sanitary sewer/stormwater conveyance and site electrical improvements; installation of proper drainage, installation of synthetic turf irrigation system, landscaping; bleachers and shade structures, site furnishings, and all appurtenances and amenities required for a functional facility.

Rationale

With the increase of population in Manatee County and the over usage of athletic fields, Buffalo Creek Park needs additional athletic fields to meet the demand of the growing leagues.

Subcategory: Athletic Fields
Project Title: East Bradenton Park - Athletic Fields
Department: Sports and Leisure Services
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6006708
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 2 1119 13th St E, Bradenton

Description and Scope

Demolish the current pool structures and replace the pool with a large splash pad with water features, concrete decking, pump house with pumps, piping, etc., restrooms/showers/lockers, multi-use synthetic turf field with lighting and irrigation, additional parking if necessary, shade structures, and other amenities and appurtenances as needed for a functional facility. A shaded gathering area or community building if space allows. This project is for the synthetic fields and irrigation.

Rationale

Project # 6006706 was approved and funded; however, after conducting community surveys and meetings to discuss the needs and desires of the community for east Bradenton park, the project has changed course. We request that the funding approved for project #6006706 be used for this new project. The pool has been closed for safety concerns and staffing shortfalls. The desire of the community is to replace the existing pool with a large splash pad, a multipurpose field with synthetic turf, additional parking, and security lighting.

Project #: PJ6023512
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Other

Project Location

District 2 501 17th Street East, Palmetto

Description and Scope

Renovate parking lot near restrooms and playgrounds to include additional parking spots. Relocate pavilions to the outer boundary of the property to increase usage space, evaluate playground for removal or relocation.

Rationale

Lincoln Park has undergone a tremendous amount of improvements including a new aquatic center and basketball courts. These new additions are increasing the usage of the facilities causing a tremendous parking issue with swim meets, league play and general usage. When the athletic fields are in use for football, swim meets are occurring and the basketball courts are utilized by the community, parking becomes a safety hazard with no room for emergency vehicles to access facilities and those who may be in need. Evaluating the playground, relocating pavilions to the edge of the property, renovating the current parking lot opens up additional spaces would increase the safety, flow and accessibility to the amenities and ensuring all pertinent items are required to make a functional facility.

Project Title: Lakewood Ranch Irrigation - Phase II
Department: Sports and Leisure Services
Project Mgr: Aaron Rawley
Infra. Sales Tax: No
Project #: PJ6039921
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 5 5350 Lakewood Ranch Blvd, Bradenton

Description and Scope

The scope is for the contractor to finish the installation based on the design blueprints already developed. They will continue from phase 1 and install the remaining irrigation that was not installed in phase 1, which will be installed in the baseball and softball areas, as well as any work that could not be completed on the soccer fields due to the funding provided in FY25. This will complete the park and meet its irrigation needs for the next 30 years.

Rationale

Lakewood Ranch Park has an inefficient and outdated irrigation system that no longer provides the coverage, pressure, and ability to irrigate the fields. It needs replaced to provide effective irrigation and to maintain properly. In FY24, design work for a new irrigation system was approved and completed. In FY25, 1.5 million dollars was approved for irrigation installation. After design was completed, the quote for installation was received at 3.3 million dollars. In the summer of 2025, installation will begin with Phase 1, which consists of installing the pump system, mainlines, and soccer field irrigation. Phase 2 involves installation of the remaining irrigation system on the baseball/softball side of the park.

Project Location

District 5 5895 Post Blvd, Lakewood Ranch 34211

Description and Scope

Construction and installation of two (2) multi-purpose synthetic turf fields to be built on the Premier Sports Complex property, north of the current Premier Sports Campus. The project will include site work, field grading, survey, irrigation, LED sports lighting and all appurtenances and amenities required for functional multipurpose fields.

Rationale

Flexible, multi-purpose synthetic turf fields with lights are needed as the current usage of the fields in all County owned parks creates a lot of wear and tear on the natural grass fields, which is costly to replace and maintain. When grass sod is replaced, it takes several months for the new fields to be ready, thus interrupting local youth sports practices for long periods of time. At the Premier Sports Campus, worn grass turf fields can mean the loss of the majority (if not all) of the elite national and international events coming to Manatee County. These events provide between $40-$50 million of economic impact annually to our destination. Another concern is that many youth are turned away each year due to not enough fields for organizations to expand. Local practices and leagues would benefit from these two synthetic/artificial turf fields, as they can be used as overflow when space is limited or to allow grass turf fields to rest throughout the year to minimize costly repairs and/or replacements.

Project #: PJ6093316
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 5
5895 Post Blvd, Lakewood Ranch

Description and Scope

The scope would be to hire a contractor that can install the Irrigation system based on the Irrigation plans already designed. Materials for the system could be obtained by the contractor or as owner-direct purchase if there is a savings to buy directly. The contractor would be responsible for the installation of Irrigation lines and equipment, testing and making sure it is operational, and restoring the grounds that are damaged during the process. Without an Irrigation system, conditions at the facility will never be at the level expected and moisture management is the key ingredient in providing high-level turf conditions, which will never be properly obtained without an in-ground irrigation system.

Rationale

This desired decision unit request is for the Premier Sports Campus Irrigation System. Premier Sports Campus is a high-end sports facility that welcomes local play and tournaments on a weekly basis. The main amenity the campus offers that draws people to the facility is the 75 acres of playing fields. These fields need to be in top condition to meet the expectations of the clients and that can be challenging given the fact that there is no in-ground irrigation system to water the fields to be able to provide the needed moisture to the grass. In FY23 funding was approved to do the design work for an irrigation system and the goal of this is to implement that design and install the irrigation system. Currently, there is an underground flooding system that is very inefficient, does not put moisture on the surface, and is very costly to operate given the high water bills we receive to run the water. An in-ground system would not be wasteful, apply the water where and when it is needed and pay for itself in savings from water bills.

Infra. Sales Tax: -
Project #: PJ6108404 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 5350 Lakewood Ranch Blvd, Bradenton

Description and Scope

This project involves the design, permitting, construction and installation of two multi-purpose synthetic turf fields at the Lakewood Ranch Park, including necessary site work, grading, irrigation, survey, and lighting. Improvements will also be made to the drainage systems for Lakewood Ranch Park. An additional parking plan will be developed to encompass the area's most frequently used for overflow parking, with structured, low-maintenance asphalt or another approved base, proper lighting, and effective drainage. This project is for the drainage improvements - phase II.

Rationale

Lakewood Ranch Park is rapidly becoming the recreational hub on the East side of the County, hosting over 27,000 hours of scheduled athletic play between June 2023 and May 2024. Forty percent of these scheduled hours are allocated to our soccer and football fields. The identified needs include additional fields, improved irrigation, and enhanced parking facilities. Including are all appetences needed for a fully functioning facility.

To address these requirements, we propose leveling and surfacing currently used parking areas with gravel, along with designing more efficient parking layouts to maximize space and enhance safety. This initiative will focus on areas such as softball, T-ball, basketball, and soccer/football. Additionally, to increase parking capacity on the park's south side, we plan to repurpose underutilized handball courts into additional parking spaces for pickleball/tennis and overflow soccer parking. A prefabricated restroom facility will also be installed in this area.

Furthermore, crucial to our goals is the implementation of a comprehensive irrigation and drainage system across the entire park to ensure effective water management. Finally, to meet the growing demand for field space, we aim to install two regulation-size turf soccer fields for year-round and extended play.

Project #: PJ6108410 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 5 7300 Belleisle Glen, Lakewood Ranch

Description and Scope

Conversion of the existing multipurpose field at Country Club East to accommodate up to 3 fully equipped little league baseball fields with expanded parking. Other improvements include: bleachers, dugouts, backstops, bases, perimeter fencing.

Rationale

Little league baseball play in eastern Manatee County is growing along with the population in the area. The demand for little league fields have surpassed capacity currently at six fields serving developments east and south of the Manatee River.

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

Construction of a playground, two pavilions, parking lot and other park amenities including sidewalks, bike racks, and landscaping. This is the first phase of a three phase project which includes design, permitting, and construction of playground equipment, parking lot, pavilion-restroom combination and a recreational trail. This includes a Community Development Block Grant (CDBG) approved for $600,001 towards construction of the playground, Shade structure, two picnic shelters, and restrooms as identified in the following projects: 6012618,6012619,6012620,6012621,6012622,6012623,6012624,6012625.

Rationale

The local community has been working for many years to convert this area in to a neighborhood park. This is the first phase of the Washington Park development. The Master Plan identifies the need to provide additional interpretive environmental recreation experiences.

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Design and construct necessary off-site roadway improvements required by Manatee County Public Works Transportation. Roadway improvements to provide a widened road with new turn-lanes are required due to the increase to the facility building size and parking lot, and to reduce vehicular stacking at the intersection of State Road 70 and 37th Street East to enter or exit the parking lot. To design this off-site work as required by Manatee County during the Pre-Application meeting, additional scope was required; civil engineering, traffic engineering, topographic surveying and sub-surface utility surveying.

Rationale

Roadway improvements are required due to the increase of the facility building size and parking lot.

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Replace the two restrooms with one ADA compliant restroom at John H Marble park.

Rationale

The John H Marble facility had deteriorated over the years. The County took ownership in the mid 1990's. The John H Marble building housing the restrooms was showing extreme signs of age, deterioration and safety concerns. Therefore, the building was demolished. The opening of a new facility without an updated ADA compliant restroom will cause a need for future improvements.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 4 7101 Cortez Rd, Bradenton

Description and Scope

Develop land complete with access roads, walking path, pavilion, playground, dog park, restroom, shade structures to last at minimum 5-8 years, parking, drive isles, area for a preserve, security lighting, lightning protection, and all appurtenances necessary to be a functioning park for recreational activities. This project is for the dog park and fencing around the park.

Rationale

March 22, 2001 Manatee County engaged in a lease with the State of Florida for a 30 year term with a 20 year extension for 40.01 acres of land on 66th street. This land has yet to be developed. With the growth in the area including new developments, Lake Flores and Aqua by the bay driving additional residents and families, we would like to develop this land as a safe location for a passive park to bring an opportunity to the local residents to have a park close to their homes and make use of these 40 acres to serve our residents and guests.

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 4 7101 Cortez Road, Bradenton

Description and Scope

Develop land complete with access roads, walking path, pavilion, playground, dog park, restroom, shade structures to last at minimum 5-8 years, parking, drive isles, area for a preserve, security lighting, lightning protection, and all appurtenances necessary to be a functioning park for recreational activities. This project is for the playground.

Rationale

March 22, 2001 Manatee County engaged in a lease with the State of Florida for a 30 year term with a 20 year extension for 40.01 acres of land on 66th street. This land has yet to be developed. With the growth in the area including new developments, Lake Flores and Aqua by the bay driving additional residents and families, we would like to develop this land as a safe location for a passive park to bring an opportunity to the local residents to have a park close to their homes and make use of these 40 acres to serve our residents and guests.

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Hidden Harbor, Parrish

Description and Scope

Development/construction to include stormwater improvements; landscaping and irrigation; utilities; entry and circulation road; maintenance access shell drive; entrance sign; parking lot (+/-50 spaces); up to 3 pavilions which should include picnic tables, electrical service and lightning protection; restrooms; fishing/nature observation pier with boardwalk; interpretive signs; site amenities; sidewalks connecting recreational amenities; multi-use nature trail (+/- 2.8 miles) with trail benches and shelters with lightning protection, bike racks, and trash receptacles; exotic plant removal and site work and stormwater ponds; ADA-compliant playground with safety surfacing; shade canopy; up to 3 sand volleyball courts; skate park and pump track; south road extension with approx. 5-space shell parking with a kayak launch facility at Ft Hamer Bridge/Manatee River; FF&E; open play field area for future development to include a performance pavilion with festival infrastructure and shaded shelter.

Rationale

These park elements are either a requirement of the Florida Communities Trust (FCT) grant award agreement or necessary to make the park accessible to the public and expand their recreational opportunities.

Department: Sports and Leisure Services
Project Mgr: Tom Yarger
Infra. Sales Tax: Yes
Project #: PJ6108403 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 5350 Lakewood Ranch Blvd, Lakewood Ranch

Description and Scope

An additional parking plan will be developed to encompass the areas most frequently used for overflow parking, with structured, low-maintenance asphalt or another approved base, proper lighting, and effective drainage. All other appurtenances as needed for a functional facility.

Rationale

Lakewood Ranch Park is rapidly becoming the recreational hub on the East side of the County, hosting over 27,000 hours of scheduled athletic play between June 2023 and May 2024. Forty percent of these scheduled hours are allocated to our soccer and football fields. The identified needs include additional fields, improved irrigation, and enhanced parking facilities. Including are all appetences needed for a fully functioning facility. To address these requirements, we propose leveling and surfacing currently used parking areas with gravel, along with designing more efficient parking layouts to maximize space and enhance safety. This initiative will focus on areas such as softball, T-ball, basketball, and soccer/football. Additionally, to increase parking capacity on the park's south side, we plan to repurpose underutilized handball courts into additional parking spaces for pickleball/tennis and overflow soccer parking. A prefabricated restroom facility will also be installed in this area. Furthermore, crucial to our goals is the implementation of a comprehensive irrigation and drainage system across the entire park to ensure effective water management. Finally, to meet the growing demand for field space, we aim to install two regulation-size turf soccer fields for year-round and extended play.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 3 808 75th Street NW, Bradenton

Description and Scope

This project is for permit, site preparation, and construction of a new playground and other appurtenances needed for a functional facility including FF&E.

Rationale

There has been a formal request for a neighborhood park next to King Middle School. Currently there are tennis courts on this property that are in disrepair. These tennis courts will be removed and replaced by the Neighborhood Park. This project is an addition to the property to provide the neighborhood park for growth.

Project Title: King Middle Neighborhood Park - Parking Lot
Department: Sports and Leisure Services
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6116904 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 3 808 75th Street NW, Bradenton

Description and Scope

This project is for design, permit, site preparation, and construction of a new parking lot; and other appurtenances required for a functional facility.

Rationale

There has been a formal request for a neighborhood park next to King Middle School. Currently there are tennis courts on this property that are in disrepair. These tennis courts will be removed and replaced by the Neighborhood Park.

Category: Sports & Leisure Services
Subcategory: Recreational Buildings & Playgrounds
Project Title: Blackstone Park Upgrades - New Pavilion
Department: Sports and Leisure Services
Project Mgr: Michelle Wehrle
Infra. Sales Tax: Yes
Project #: PJ6003519
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

District 2 2112 14th Ave. W. Palmetto

Description and Scope

Demo existing softball pavilion and prepare ground for installation of 2 standard softball batting cages with necessary lighting. By playground area, level selected area and grade properly to prepare for installation of new pavilion . New pavilion should be similar to existing playground pavilion (seats 40 people). Power source for lights. Install necessary seating.

Rationale

Blackstone Softball fields saw 5,230 hours of scheduled athletic play from January 2023 to December 2024 with 1,300 total reservations. There has been history of conflict between the pavilion users with the softball players due to the proximity to the softball field. We would like to remove the softball pavilion and replace with softball batting cages. Blackstone softball is the only softball complex at our large athletic facilities that does not have softball batting cages adjacent to their fields. Lastly, we are looking to install a second playground pavilion. This will allow pavilion rentals to continue without the disturbance of being beside a busy softball field as well as giving a more desired location for pavilion rentals, near our recently updated playground.

Category: Sports & Leisure Services **Subcategory:** Recreational Buildings & Playgrounds
Project Title: Premier Sports Complex - Pickleball/Racket Center
Department: Sports and Leisure Services
Project Mgr: Michelle Wehrle
Infra. Sales Tax: No
Project #: PJ6093306 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Construct up to 24 pickleball courts, and cover at least up to 10 courts, contingent on the design professionals. Construct a small administration office, with restrooms and the capability to operate a membership based racket facility and aquatics center with fee paying members checking in to use the courts and pool. Lighting, fencing, seating, water fountains, landscaping, sidewalks, a marquee and FF&E are also needed. A shade structure with fans and lighting over at least 10 of the pickleball pods is desired contingent on the design professionals.

Rationale

Premier Recreation Complex adjacent to the Premier Sports Complex. This racket center was envisioned to have a small admin office to accommodate registration of players. The full recreation center was to provide a central building access point providing entry access to recreation rooms for camps, exercise fitness and other social events, a basketball gymnasium and a pass-through entry access point to the competitive swimming pool aquatics center. Other Premier recreation campus amenities included multi-sport athletic fields, a concert or festival event stage and gathering lawn, a dog park and a skate park, and clay and hard tennis courts.

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Public Safety Category
Subcategory: 911 & Technology
Project Title: CAD upgrade to Hexagon On-CALL
Department: Public Safety
Project Mgr: James Crutchfield
Infra. Sales Tax: -
Project #: PJ6083205
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

Countywide 2101 47th Terrace East, Bradenton

Description and Scope

Discussions with Hexagon, and related vendors, for the acquisition and implementation of the Hexagon OnCall On-Prem product. This project would encompass the licensing, software and professional services required to implement the new system in accordance with a Statement of Work (SOW) to be executed under the auspices of an existing Master Agreement with Hexagon. Deliverables within the SOW would be based upon the county's acceptance of project milestones, leading up to a determination (in the county's sole discretion) that the system is ready for production release (Go-Live).

Rationale

Manatee County Public Safety current computer aided dispatch (CAD) system requires regular upgrade and replacement every 5+ years to stay current with technology, security, software, hardware and performance. Upgrading to the next Hexagon computer aided dispatch (CAD) version, "OnCall" offers a modern architecture, streamlined administration and flexibility in configuration and customization. It is built using a modern services-based approach to mapping. It can leverage geospatial services to handle most map-based tasks, such as map rendering, geocoding and routing.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance, Growth

Project Location

Countywide 2101 47th Terr E, Bradenton

Description and Scope

Provide an Emergency Services IP Network (ESInet) for 9-1-1 call routing. Assess and correct all GIS data for addressing errors within Manatee County to the National Emergency Number Association (NENA) i3 standards. Upgrade existing Telecommunicator furniture to larger work stations to handle additional CAD and call monitoring screens associated with Next Generation 911 data. Upgrade to existing 9-1-1 capable call handling equipment known as Vesta as technology advances occur for i3 NENA standards.

Rationale

The legacy infrastructure provided by the Local Exchange Carrier (LEC) Frontier is being phased out. Copper phone lines are at end of life and no longer serviceable due to aging technology. In addition, Manatee County upgraded its 9-1-1 call equipment to accept Next Generation 9-1-1 ESINet call routing in 2015.

Trends in personal communications technologies are accelerating the obsolescence of the current 9-1-1 system. The current circuit-switched infrastructure of the 9-1-1 network cannot receive digital data (e.g. text messages, photographs, and video) from the communications devices commonly used by the public. Because these outmoded networks cannot provide the public with access to 9-1-1 services from newer technologies and devices, 9-1-1 networks and call centers must change.

Project Title: Motorola Mach Alert - Geo Redundant System Core
Department: Information Technology
Project Mgr: John Hamel
Infra. Sales Tax: No
Project #: PJ6099110 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

Countywide 2101 47th Terrace, East, Bradenton

Description and Scope

With the retirement of Genave, the current alerting system, marks a significant step forward in emergency response modernization. This transition solidifies the deployment of the Mach Alert Core, which will serve as the central foundation for rolling out Mach Alert Station components across EMS and Fire Stations throughout Manatee County. The Mach Alert system represents a next-generation alerting solution, offering a robust suite of advanced features aimed at improving operational efficiency and responder safety. This upgrade reflects Manatee County's continued commitment to leveraging cutting-edge technology in support of public safety, first responders and citizens at large.

Rationale

Manatee County Fire and EMS currently operates on an antiquated Dual-Tone Multi-Frequency (DTMF) station alerting system (Genave) that is 20 years old. With the discontinuation of the support for Genave, the legacy system, poses a significant risk to emergency response operations. To address this urgent need, we propose the implementation of the Motorola Mach Alert System, a next-generation, IP-based multi-zone alerting solution designed to modernize and streamline emergency dispatch. The Mach Alert Core works with Computer-Aided Dispatch (CAD) system, allowing alerts to be automatically pushed much faster.

Project #: PJ6111100
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Other

Project Location

District 3 5718 21st Ave W, Bradenton

Description and Scope

The new Bishop Animal Shelter design and construction will be completed in two phases. Phase 1 will include procurement of prefab kennels, design review and constructability review of the kennels and necessary sitework required, permitting, and the purchase of long lead items required to complete the project. Phase 1 will also include a temporary trailer for animal adoptions to be used until the animal adoption building (Phase II) has been completed.

Rationale

To meet the growing demands of Animal Services, Manatee County needs to increase the capacity to house animals that do not have permanent homes. This project will be completed in two phases in order to meet the needs of the community and animal welfare.

Project Need: Growth

Project Location

District 2 17th Avenue West & 4th Street West, Bradenton

Description and Scope

Interior renovation of approximately 4,500 square feet of shell office space to include drywall, insulation, ceiling tiles, flooring, windows, doors, office space build-out, small adoption/retail space, kenneling, meeting room, pet food pantry, small medical room with sink, restrooms, electrical upgrades, HVAC, data, lighting, and potential parking lot upgrades, and all appurtenances required for a functional, ADA compliant animal community center.

Rationale

The objective of the Animal Community Center is to provide a centralized hub of support and services for pets and their owners within the community. The center will offer a range of resources aimed at keeping people and pets together.

Project #: PJ6117200
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

District 5 6615 Greenbrook Blvd, Lakewood Ranch

Description and Scope

Purchasing a 1250 KW permanent generator and two 2,500 gallon fuel tanks to be connected to the current Special Needs Shelter at Nolan Middle School. Connections are already in place due to the rental generator currently used.

Rationale

In order to meet the special needs of persons who need assistance during evacuations and sheltering because of physical, mental, or other disabilities, Emergency Management maintains a registry of such persons and, in coordination with the Department of Health in Manatee County, opens a Special Needs Shelter. This shelter is required to have accommodations to full power throughout the shelter. This requirement gives way to the need of a generator which is large enough to provide that power to the building. Currently, the Emergency Management Program contracts a rental agreement for delivery and setup of a generator at $92,560 annual cost plus additional costs for each activation.

Project Title: PSD Emergency Medical Services Logistics Facility
Department: Public Safety
Project Mgr: Jeff Anthony
Infra. Sales Tax: -
Project #: PJ6117300 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Other

Project Location

District 2 Vicinity of Public Safety Center, Bradenton

Description and Scope

The desired solution includes utilizing the land located at the Public Safety Center designing, permitting, and constructing a new Logistics Storage Facility/Warehouse Building between 17,500-20,000 square feet in Phase II of the EOC Plans. The facility would need to meet the functional needs and increased demands of the Public Safety Department, including the Emergency Medical Services, Emergency Management, Beach Patrol, and Code Enforcement Divisions. Includes all appurtenances required for a functional facility.

Rationale

The Department of Public Safety has requested a dedicated logistics facility for public safety operations, including emergency management, emergency medical services, beach patrol, and code enforcement. The current space utilized is 10,000 square feet. Emergency planning and response have been enhanced through better coordination and communication among agencies, increased use of technology, risk reduction measures, stakeholder partnerships, and improved training and exercises. Since the project was initially submitted, there have been significant additions to the EMS fleet, including 5 BLS units and 1 ALS unit. The department has also added over 40 full-time equivalent (FTE) positions. Through the Capital Improvement Process, the Board of County Commissioners approved several ambulance additions, including four BLS ambulances and three ALS ambulances, to meet the community's increasing demand. These additions increase the total daily frontline ambulances to 28, all requiring state-mandated medical supplies to be delivered daily. Furthermore, multiple stations have been approved for construction on the County's Capital Improvement Plan (CIP) over the next five years, demonstrating a continued commitment to expanding and improving public safety infrastructure while meeting a growing demand. To support the increasing EMS fleet, stations, and public safety employees, it has been determined that the original project no longer meets the needs. This is especially evident when considering the additional requirements for code enforcement, beach patrol, and water safety staff and equipment. The expanded scope of operations across all these public safety divisions necessitates a larger, more comprehensive logistics facility to efficiently manage and support the growing workforce, fleet, and equipment inventory. The growth in code enforcement activities, increased beach patrol responsibilities, and enhanced water safety measures have all contributed to the need for a more expansive and adaptable logistics solution. This facility must now accommodate the expanded EMS operations and the storage, maintenance, and distribution of equipment and supplies for these additional public safety functions, underscoring the critical need for a revised and expanded logistics facility project.

Project Mgr: Eric Ausborn
Infra. Sales Tax: -
Project #: PJ6121000
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 2 1022 26th Ave E., Bradenton

Description and Scope

Remodel of approx. 20,000 sq. ft. of a 30,000 sq. ft. single-story building at 1022 26th Ave East, Bradenton, FL. The building will support a transitional housing and outreach program run by the Manatee County Sheriff's Office. It will feature intake, admin., housing pods, counseling and case management offices, restrooms, showers, laundry, storage, kitchen/dining areas, and outdoor spaces. Security and phased construction are key to the plan. The project will proceed in two phases to expedite opening and begin serving those experiencing homelessness as soon as safely possible. Phase 1 will remodel approx. 6,000 sq. ft.

Rationale

The Fresh Start project is a critical initiative to address the homelessness crisis in Manatee County. Our area has struggled to meet the needs of its homeless population, especially for overnight shelter. This proposal outlines a 24-hour facility offering a safe, supportive space for individuals experiencing homelessness. It also provides diversion options for the Manatee County Sheriff's Office (MCSO), reducing unnecessary justice involvement. The plan follows House Bill 1365 guidelines and involves renovating an existing county office building on 26th Avenue East in Bradenton.

Project Title: Remodeling of the EMS Logistics Location at the Public Safety Complex
Department: Public Safety
Project Mgr: Jeff Anthony
Infra. Sales Tax: -
Project #: PJTP26049 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 2 2101 47th Terrace East Bradenton

Description and Scope

The EMS logistics team and supplies will move to a new building near the Public Safety Complex. Once relocated, remodeling their current space for the growing code enforcement division will improve efficiency and support future growth. The remodel will include storage areas, a conference room for 30, 12 workstations, 4 administrative offices, 4 lieutenant offices, a chief's office, a small kitchen with a sink and refrigerator, and, if possible, separate men's and women's bathrooms.

Rationale

As the scope and demands of code enforcement expand, it is clear that our current location no longer meets our needs. Relocating to a larger facility will improve the effectiveness of operations, boost staff productivity, and enhance service to the public. The current office layout is not flexible enough to accommodate a growing team. A larger space would provide room for additional staff, enable better organization of workstations, and allow for designated areas to address the various aspects of code enforcement more efficiently.

FY2027 - FY2031

Category: Public Safety Category **Subcategory:** Building and Renovations
Project Title: Emergency Operations Center (EOC) Expansion & Technology Upgrade
Department: Public Safety
Project Mgr: James Crutchfield
Infra. Sales Tax: -
Project #: PJTP27002 **Status:** Requested

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Maintenance, Growth, Deficiency

Project Location

Countywide 2101 47th Terrace East, Bradenton

Description and Scope

This request upgrades and expands the Emergency Operations Center's (EOC) technology, infrastructure, and workspace to better support extended activations, trainings, and major emergency responses. Enhancements will improve situational awareness, resource coordination, surge staffing capacity, and overall operational effectiveness. Upgrades include new video walls, mobile displays, improved networking and Audio Visual (AV) systems, updated software tools, ergonomic workstations, and a reconfigured floor plan to optimize workflow and support 24/7 operations.

Rationale

This request upgrades and expands the Emergency Operations Center (EOC) to improve support during activations, trainings, and major emergencies. The project modernizes displays with Light-Emitting Diode (LED) video walls and mobile monitors, strengthens digital and Audio Visual (AV) infrastructure, updates software tools, and expands ergonomic workstations. Reconfiguring the room will improve workflow, visibility, and surge capacity. These enhancements increase readiness, coordination, and the EOC's ability to sustain 24/7 operations during major incidents.

Project Title: MCSO - Jail - New Medical Wing
Department: Sheriff
Project Mgr: Michelle Wehrle
Infra. Sales Tax: Yes
Project #: PJ6005233
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth, Deficiency

Project Location

District 1 14470 Harlee Rd, Palmetto

Description and Scope

If it is not possible to add a second story, it may be necessary to build a wing onto the east end of the building to accommodate additional medical bed space. At the Female Pod/G-1 end of the building, there is the capability to allow for expansion. Any new facility on the current Jail compound would be acceptable.

Rationale

The original POD was built for a bed capacity of 24; our normal medical population is 50 to 60 inmates. The original 1995 building plan for only 24 medical beds was an oversight, based on a jail population of 600. Currently the jail population is between 950 and 1,050 inmates. Additionally, we need to create a mental health ward. There are increasing numbers of inmates with mental health issues, drug abuse and detox needs. Inmates threatening, or indicating attempting suicide are housed in with the medical POD inmates. When juvenile females are brought to jail, they must be housed in Medical because we do not have bed space for them to house them separately from adult inmates as required.

Infra. Sales Tax: -
Project #: PJ6071904
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

Multi-district TBD

Description and Scope

Identify and secure a suitable location for the EMS Base in the University Parkway and I-75 area, ensuring accessibility and proximity to high-traffic zones. Design and construct dormitories to accommodate EMS personnel, ensuring round-the-clock availability. Include a fully equipped kitchen for staff, restrooms, shower facilities, and recreational areas to ensure the well-being and efficiency of on-duty personnel. Construct a garage with adequate bay space to house and maintain ambulances, ensuring their readiness for prompt deployment. Create specialized storage areas equipped to securely house and maintain specialized medical equipment necessary for emergency responses.

Rationale

Upon approval and completion of the EMS base station build-out in South Manatee County, it has become evident that an ambulance addition is necessary with a 10.51 average response time. Currently, the absence of a dedicated location to house additional resources, particularly ambulances, presents a significant challenge in expanding emergency medical services. The EMS Base aims to enhance services and meet the growing demands of South Manatee County, ensuring efficient and timely responses to emergencies in the region.

Project #: PJ6071905
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth, Deficiency

Project Location

District 1 Harlee Rd, Palmetto

Description and Scope

Maintain the planned ambulance addition and eliminate construction of a standalone EMS station. EMS would instead lease space within the Fire District's planned station, subject to lease and tenant improvement requirements.

Rationale

Based on discussions with the Fire District, EMS could lease space within its planned station, avoiding the need for a standalone County facility while maintaining the additional ambulance needed to serve the Buckeye/Port Manatee area. This revision reduces the estimated project cost from approximately $18.3 million to $1.27 million, excluding lease and tenant improvement costs.

Project #: PJ6071906 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance, Deficiency

Project Location

District 4 TBD

Description and Scope

Design a functional and cost-effective EMS and sheriff Sub Station layout that accommodates both Ambulance and Sheriff Operational Needs. To ensure the continuous operation of the combined EMS and Sheriff Sub Station, it is essential to allocate appropriate staffing resources. This includes hiring qualified EMS personnel (8 FTEs) to operate the ambulance (1 Ambulance) and provide emergency medical care, as well as assigning dedicated Sheriff deputies to oversee law enforcement duties within the facility. In addition, it is important to provide adequate vehicle resources to support the operations of the combined station, including the ambulance for emergency medical responses and patrol vehicles for law enforcement activities.

Rationale

The Southwest TIF area is experiencing increasing traffic congestion, which is causing potential delays in emergency response times. There is an urgent need to establish dedicated EMS and Sheriff Sub Stations to mitigate these risks and ensure timely access to critical emergency services. A centralized hub for emergency responders would improve operational efficiency and resource allocation, enabling quicker dispatch and coordination of resources to effectively address emergencies. The presence of these facilities in the Southwest TIF would also serve as a visible and reassuring presence within the community, contributing to overall public safety and well-being.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth, Deficiency

Project Location

Multi-district TBD

Description and Scope

A functional and cost-effective layout for the EMS and Sheriff Sub Station will be designed to accommodate both ambulance and Sheriff operational needs. Staffing and Vehicle Allocation: To ensure continuous operation of the combined EMS and Sheriff Sub Station, it is essential to allocate appropriate staffing resources. This includes hiring qualified EMS personnel (8 FTEs) to operate the ambulance (1 Ambulance) and provide emergency medical care, as well as assigning dedicated Sheriff deputies to oversee law enforcement duties within the facility. Additionally, adequate vehicle resources will be provided to support the operations of the combined station, including the ambulance for emergency medical responses and patrol vehicles for law enforcement activities.

Rationale

The North River area, along with the greater Parrish region, is facing an escalating traffic problem, which is made worse by significant development and upcoming residential areas in North County. This emphasizes the pressing need for dedicated EMS and Sheriff Sub Stations. These stations would serve as essential centralized hubs for emergency responders, reducing risks and ensuring quick access to critical services. By enhancing operational efficiency and resource allocation, they would enable faster dispatch and coordination of resources during emergencies. Additionally, their presence would not only improve public safety but also provide a visible and reassuring presence within the community, contributing to overall well-being.

Project Location

Countywide 2101 47th Terrace E, Bradenton

Description and Scope

Engage with the CAD Locution Server to implement the Locution Station Alerting System, which will bring advanced station alerting capabilities and emergency dispatch automation. The Locution server will connect to the new OnCall CAD system and connect via a closed public safety network to all EMS stations. The scope of this project is limited to the Locution server and its capabilities only for Manatee EMS stations.

Rationale

Existing EMS Station alerting systems is end of life, the new Locution Alerting System will replace and enhance current dated system. The scope of this project is limited to the Locution servers and components only for Manatee County EMS, additional compatible Locution receiving devices are at the discretion of fire stations/districts. Locution roughly estimates $40,000 per station (17 Stations for 20 Ambulances, totaling $680,000) to provide reliable alerting that is compatible with NFPA22l.

Project #: PJ6088501 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 5034 US 301 N, Ellenton

Description and Scope

The rehabilitation project will focus on optimizing space, alleviating the space concern in the current trailer, and ensuring efficient operations. Additionally, the Annex will accommodate a District Supervisor, enhancing management and oversight of EMS services. Currently, the Supervisor is working out of a storage closet with a water heater. Rehabilitating the Annex will also improve safety and functionality, ensuring a safe and functional living environment for EMS personnel and resolving the foundation problems in the current trailer.

Rationale

The vacant BADS Annex, conveniently situated on the same property, has been identified for EMS utilization. This strategic decision involves transforming the annex into EMS's primary station, aiming to provide a significantly safer and more secure environment for the two ambulance crews and their supervisor. This transition serves as a solution to the safety concerns attributed to the trailer's structural issues. Not only will this upgrade mitigate potential hazards, but it will also ensures EMS's ability to consistently deliver services to community.

Project #: PJ6088502 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 5034 US 301 N, Ellenton

Description and Scope

These improvements will support the 24/7, 365-day operation of the ambulances. The rehabilitation project will focus on optimizing space, creating ample room for the placement of two ambulances.

Rationale

EMS Station 6, located at 5034 US 301 North, was originally designed to host a single ambulance crew of three employees. However, due to increased demands, the station now accommodates two ambulance crews, comprising a total of six employees, along with a supervisor, making it a total of seven employees working there daily. To address these issues, the vacant BADS Annex, conveniently situated on the same property, has been identified for EMS utilization. This strategic decision involves transforming the parking area, creating room for the placement of two ambulances.

Project Title: EMS - AMBUbus Mass Patient Evacuation Unit (Bus Ambulance)
Department: Public Safety
Project Mgr: Isaac Hovekamp
Infra. Sales Tax: -
Project #: PJ6100000
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

Countywide Countywide

Description and Scope

This bus will be dispatched on all levels of mass casualty incidents (Levels 1-5) which takes the place of approximately three to eight ambulances. The AMBUbus is outfitted to transport 12 stretcher patients and 16 seated patients. The AMBUbus is deployed with a crew of six (current FTEs) which include an apparatus operator, command position, and four care providers. Additionally, this asset will be utilized to provide rehabilitation for fire fighters at the location of fires or other events. This asset can also be utilized to evacuate large facilities such as nursing homes, assisted living facilities, and hospitals should a life threatening event or disaster occur.

Rationale

As our community continues to grow, so does the demand on our 911 system. Incidents where a large number of patients exist become taxing to our 9-1-1-system and slows our service delivery to emergency calls for service during these times. In the last two years, there were 70 incidents where three or more ambulances were assigned to one event. Additionally, it will be used to rehabilitate firefighters during structure fires. Lastly, we learned from Hurricanes Irma and Harvey that there is a critical need to move large amounts of patients from facilities such as skilled nursing facilities, assisted living facilities, and hospitals. An AMBUbus is the proposed solution to this challenge.

Department: Public Safety
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6105300
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 1 11721 69th St E, Parrish

Description and Scope

Existing EMS Station 20 (Parrish Fire 12132 US 301 N. Parrish FL 34219) will be relocated to this facility, with room for future planned expansion. Certain internal renovations will be required to retrofit the existing facility to house EMS operations. Property Management will manage all construction renovation activities to include a parking pad for employee personal vehicles, covered parking for at least two ambulances and a supervisor vehicle, inside renovations for crew rest areas, office space and medical equipment/medication storage.

Rationale

Northern Manatee County has experienced a significant growth in population due to an increase in approved residential housing. The current service area for Northern Manatee County is covered by one Ambulance (Alpha 20), which is housed at Parrish Fire Department. The North County EMS Base will provide service coverage to Parrish both East of Highway 301 and North of State Rd 675. There are several approved new residential and commercial developments that will increase the future demand for EMS services. For this reason, it will become necessary to obtain space to add additional ambulances to this area of the County, and to ensure current level of service remains uninterrupted.

Project #: PJ6105401
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth

Project Location

District 1 Parrish Fire District Station 2 (Rutland Road/Rye Road)

Description and Scope

To meet the growing demand for emergency medical services in Parrish, one of the fastest-growing areas in our county, we are submitting and recommending an additional 24/7 ambulance to provide coverage in the area. Ambulance response time gaps, which can take up to 18 minutes or more, have become a common issue in this area of Manatee County due to the rapid growth of residential construction. In order to address this problem, we plan to add new staff and an ambulance to the response matrix, which will ensure 24/7 coverage for the area. Our tentative plan is to house the ambulance and crew at Parrish Fire District Station 2.

Rationale

Investing in an additional 24/7 ambulance in Parrish, Florida is crucial to ensure public safety and improve response times. The Emergency Medical Services (EMS) Division needs help to keep up with the increasing demands of the rapidly growing community, even with the recent EMS system improvements and additions. The current response time of over 18 minutes to North East Manatee County is unacceptable. Adding an additional 24-hour ambulance can ease the pressure on our current EMS system and provide efficient and timely care to those in need, even in the most remote parts of Manatee County.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

Countywide TBD by Fleet

Description and Scope

Per Fleet guidelines suggest that for every three new ambulances, a spare unit is necessary to maintain optimal system performance and readiness levels. Therefore, acquiring two more ambulances is imperative to minimize downtime, optimize the current fleet's efficiency, and reduce service interruptions. Fleet's assessment suggests that this systematic approach ensures a balanced ratio between active units and spares, strengthening our emergency response capabilities and reinforcing the resilience of our system.

Rationale

The Emergency Medical Services (EMS) Division is facing a critical situation as our community is expanding rapidly, which has resulted in many challenges. Despite recent efforts to revamp our EMS system, the increasing demands have put a lot of pressure on our resources. One of the major changes we made was to bolster the fleet of ambulances to meet the surging needs. Without an adequate reserve fleet, we risk disruptions in response times, which can compromise the safety and well-being of our community. To ensure reliable, efficient, and high-quality emergency response, it is imperative to urgently increase the number of spare ambulances available to mitigate downtime and uphold our commitment to swift and high-quality care.

Project #: PJ6105404 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 1 1505 Dam Rd, Bradenton

Description and Scope

To meet the growing demand for emergency medical services in East County, we are submitting and recommending an additional 24/7 ambulance to provide coverage in the area. Ambulance response time gaps, have become a common issue in this area of Manatee County due to the rapid growth of residential construction. In order to address this problem, we plan to add new staff and an ambulance to the response matrix, which will ensure 24/7 coverage for the area.

Rationale

Eastern Manatee County has experienced significant population growth due to increased approved residential housing. To address this growth and ensure public safety, investing in an additional 24/7 ambulance in the Lake Manatee area is crucial for improving response times. The Emergency Medical Services (EMS) Division faces challenges in meeting the increasing demands of this rapidly expanding community, despite recent EMS system improvements and additions.

To address this need, the county has approved Capital Improvement Project (CIP) PJ6117900, which is expected to complete in FY2029. This project will enhance EMS capabilities in the area. However, it's important to note that the current lead time for ambulance manufacturing is approximately 30 months. This extended production timeline must be factored into planning and implementation to ensure timely service expansion in line with population growth and the project's completion.

Project Title: PSD Additional 24 Hour Ambulance -Duette
Department: Public Safety
Project Mgr: James Crutchfield
Infra. Sales Tax: -
Project #: PJ6105405
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 35800 SR 62 E, Duette

Description and Scope

To meet the growing response times for emergency medical services in Duette, one of our county's most geographically isolated areas, we are submitting and recommending an additional 24/7 ambulance to provide coverage in the area. Ambulance response time gaps, which can take 22 minutes or more, have become a common issue in this area of Manatee County. In order to address this problem, we plan to add new staff and an ambulance to the response matrix, which will ensure 24/7 coverage for the area. Our tentative plan is to house the ambulance and crew at Duette Fire Rescue District Station.

Rationale

Introducing a 24/7 ambulance addition in Duette, the north east portion of Manatee County, stands as a pivotal measure to uphold public safety and enhance emergency response times. As our community experiences rapid growth, the existing Emergency Medical Services (EMS) Division encounters escalating demands, struggling to meet the needs despite recent system redesign and addition efforts. Presently, the response time of over 22 minutes to North East Manatee County (EMS System Average is 8.42) falls well below acceptable standards. By introducing a dedicated 24-hour ambulance, we aim to alleviate the strain on our EMS resources, ensuring swift and effective care for individuals in need, even in the most geographic remote areas of Manatee County.

Infra. Sales Tax: No
Project #: PJ6105406
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

Countywide TBD by Fleet

Description and Scope

It is essential to acquire new ambulances to meet operational needs. This unit will replace an older truck that is at/past its end-of-life cycle. In FY2025, three ALS units were added without a spare. Fleet guidelines suggest for every three new ambulances, a spare unit is necessary to maintain optimal system performance and readiness levels. A spare will minimize downtime, optimize efficiency, and reduce service interruptions. Fleet's assessment suggests this approach ensures a balanced ratio between active units and spares, strengthening our response capabilities and reinforcing the resilience of our system.

Rationale

As our community is expanding, the EMS Division has many challenges. One change made was to increase ambulances. However, this led to a shortage of reserve ambulances, crucial for addressing mechanical downtime. This deficit threatens our ability to sustain uninterrupted emergency medical services. Without an adequate reserve fleet, we risk increased response times, compromising the safety of our community. To ensure reliable, efficient, and high-quality emergency response, it is imperative to increase the number of spare ambulances, to mitigate downtime and uphold our commitment to swift and high-quality care.

Project Title: Moccasin Wallow Rd EMS Station w Ambulance
Department: Public Safety
Project Mgr: Sidney Seymour
Infra. Sales Tax: Yes
Project #: PJ6105600 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 2950 - 3010 Moccasin Wallow Road, Palmetto

Description and Scope

Construct a new EMS Base to meet functional needs and increased demands of the emergency medical services division. The current EMS Station 10 can be utilized as a standard footprint for this station location. The EMS Base will need to have the ability to house 6 employees (2 ambulances) full time with sufficient parking for shift change (at least 12 parking spaces). This property must allow access for emergency vehicles 24-hours per day 365 days-per-year.

Rationale

Northern Manatee County has experienced a significant growth in population. Public Safety's Emergency Medical Services (EMS) Division continues to struggle to meet the demands of a rapidly growing community, despite the recent EMS System redesign. Adding a 24-hour ambulance and EMS Base to this area of the county will assist with the increasing call volume to ensure current level of service remains uninterrupted.
The current service area for Northern Manatee County is covered by two Ambulances

- Alpha 20 - at Parish Fire Department
- Alpha 18 - at North River Fire Station 2

Through a recent property management land purchase, the desire is to build a new EMS Base and add a 24-hour ambulance. The EMS Base will provide living quarters including a dormitory, kitchen, garage (bay space), office(s), and equipment medical storage for the North County Region.

Project #: PJ6106505
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 1 10207 Wauchula Road, Myakka City

Description and Scope

The fee simple parcel consists of approximately 70,178 square feet or 1.61 acres, more or less and the Easement consists of approximately 24,230 square feet or 0.56 acres, more or less. Additional funding is requested for construction to renovate the old fire station on the northerly 1.61 acres. Construction will consist of roof replacement, interior renovations, and other improvements for a functioning facility.

Rationale

The East Manatee Fire District (EMFD) recently constructed a new fire station at 10215 Wauchula Road, Myakka City on a 4.11-acre site. Manatee County entered negotiations with the EMFD for approximately 1.61 acres (the old fire station) of the land located at 10215 Wauchula Road, Myakka City, for the Manatee County Sheriff's Office (MCSO). The County will acquire in fee the northerly 1.61 acres of the overall site.

Project Location

District 1 1505 Dam Rd, Bradenton

Description and Scope

Existing EMS Station 5 (Quattlebaum Guest House 1505 Dam Rd) will be relocated to the New Lake Manatee EMS Base, with room for needed EMS expansion as outlined in the 2015 impact fee study. Requesting an Architect to design the EMS Base to house at least 2 Ambulances (covered inside apparatus bay) and room for medical equipment storage.

Rationale

Eastern Manatee County, has experienced significant growth in population due to an increase in approved residential housing. Station 5, the current EMS Station, is in need of drastic rehab, and there is no room for growth. Building a proposed Lake Manatee EMS Base (County acquired land, off Dam Rd) will provide living quarters which includes a dormitory, kitchen, garage (bay space), office (s), and equipment medical storage for the Eastern Manatee County Region. The Lake Manatee EMS Base will house 6-9 EMS employees (expansion) and will operate 24-hours a day 365 days a year, with room to add additional resources as growth occurs.

Project Need: Growth

Project Location

District 1 1505 Dam Rd, Bradenton

Description and Scope

Lake Manatee EMS Base - Parking lot project will add additional road improvements and infrastructure required for a functional facility for occupants and to maintain it. These well-designed and well-built road improvements are essential in providing timely and effective emergency services to the community. Lake Manatee EMS Base - Parking lot project will have all appurtenances required for a functional facility.

Rationale

Eastern Manatee County has experienced significant growth in population due to an increase in approved residential housing. Station 5, the current EMS Station has structural issues and EMS building's functionality does not meet the needs of the occupants. But the current EMS station is conveniently located in the area of population growth, so the selected location was based on the variety of factors including accessibility, proximity to major roads, and emergency response requirements. Lake Manatee EMS Base will meet all relevant safety and building standards, addressing energy efficiency, functionality, and structural integrity; and will be operational 24/7/365.

CIE Project: -
LOS/Concurrency: -
Project Need: Growth

Project Location

District 3 2651 Gulf Drive South, Bradenton Beach

Description and Scope

29' Metal Shark that could be used as an ALS unit. To enhance lifeguard services and improve response capabilities for on-water emergencies, we propose the acquisition of a dedicated water rescue boat. There currently is not a vessel of this size to be able to perform these functions.

Rationale

Efficient Response: A specialized water rescue boat allows lifeguards to swiftly reach distressed swimmers, boaters, or individuals in need of assistance. Unlike traditional paddleboards or swim fins, a boat covers larger distances quickly, minimizing response time.

Safety: The safety of both lifeguards and victims is paramount. A rescue boat provides a stable platform for rescuers, reducing the risk of injury during challenging conditions (e.g., strong currents, rough seas). Versatility: The boat can be used for various scenarios, including: Swimmer Rescues: Transporting swimmers to safety. Boating Accidents/Capsizes: Assisting boaters whose vessels have overturned. Medical Emergencies: Transporting injured individuals to shore. Equipment and Supplies: The boat can carry essential equipment such as life jackets, first aid kits, oxygen tanks, and communication devices. It also accommodates multiple lifeguards, ensuring coordinated efforts. Visibility: A marked rescue boat is easily identifiable by beach goers, promoting confidence in our lifeguard services.

Project #: PJTP26056
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 1707 Lena Road, Bradenton

Description and Scope

Addressing challenges in Eastern Manatee County, this aims to promote public health, safety, and welfare by reducing response times and ensuring effective coverage.
Facility Design / Construction: A functional and cost-effective layout for the EMS Station will be designed to accommodate EMS needs.
To ensure continuous operation, it is essential to allocate appropriate staffing resources. This includes hiring EMS personnel for this facility. Adequate vehicle resources will be provided to support the operations, including the ambulance.

Rationale

Eastern Manatee County faces increasing emergency response challenges due to rapid development and worsening traffic congestion. Current response times exceed standards in growing residential areas, creating significant safety risks.
A dedicated EMS Station would position emergency resources where demographic trends show greatest need. This facility would serve as an operational hub, reducing response times and improving coordination during critical incidents.
This investment addresses immediate safety concerns while supporting long-term community growth.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

The building previously occupied in the Lakewood Ranch area had to be closed due to structural issues which impacted the citizens of the Lakewood Ranch area. The growth in the eastern and northern portions of Manatee County has been non-stop and calls for service in these areas continue to rise on a yearly basis due to said growth. The construction of a 5,000 sq ft substation in the Lakewood Ranch area will be of great service to the citizens who reside and work in that area of the county. A new office location in that area of the county would provide much needed MSO presence in the area.

Rationale

The building the Sheriff occupied in Lakewood Ranch became a structurally unsound and had to be vacated. The personnel housed in that building were relocated to various other MCSO locations throughout the county. The closing of this location impacted the Lakewood Ranch community whose residents regularly visited this location for various law enforcement matters. With the continuing growth of the northern and eastern portions of the county, more personnel are being assigned to these areas. The growth of the county has already justified the need of a 5,000 sq ft substation in this area to better service the needs of the county's citizenry.

Project Need: Growth, Deficiency

Project Location

District 1 11910 31st Terrace E, Palmetto

Description and Scope

Move MCSO Fleet Facility Operations upon locating a new site and construct a larger fleet maintenance facility than is currently being utilized.

Rationale

The current Fleet Services Facility is small, out dated and is uneconomical to continue to do more than minor repair to keep vehicles in operation. The property is also too small to allow expansion of the facility and there is not enough area to park vehicles staged for repair. Operations will be more cost effective once upgraded with centralized location.

Project Need: Deficiency, Other

Project Location

District 1 11910 31st Terrace E., Palmetto

Description and Scope

A new MCSO Fleet Facility is proposed to be constructed, the facility will need fuel support for the increased amount of equipment and MCSO fleet using this facility. Additional fuel capacity of 2 - 20,000 gallon tanks with covered fueling area, and future expansion designed into the site will allow for additional tanks to be added later.

Rationale

The current MCSO fuel site is small with limited capacity, outdated, and is in an area that has limited expansion capabilities. With the MCSO fleet facility being built, there will be a need for increased fuel capacity, convenience, and efficiency for the Public Safety work group. This fuel site will also be utilized by BOCC equipment that is providing services in the area, along with fire departments, other constitutional offices, and mutual aid support.

Project Location

District 3 3500 9th Street West, Bradenton

Description and Scope

Construct a 45,000 square foot two story building adjacent to the Child Protection Investigation Division (CPID) office building located at 3500 9th Street West, Bradenton. The building should have freight elevator and ability to add floors in future and meet hurricane requirements. The building would also house the Crime Scene Unit, Fingerprint Unit and Chemistry Lab.

Rationale

The Manatee County Sheriff Office (MCSO) Operations Center facility currently has space allotted for the storing and preserving of property and evidence. Projections for future needs show the inability to store, maintain and process evidence. Construction of an additional building as requested is a priority to comply with Florida State Statutes.

Project Location

District 2 2317 2nd Avenue West, Palmetto

Description and Scope

Various renovations to individual offices, including but not limited to a full renovation of the forensics lab, garage, and morgue, which includes insulation of the garage area and morgue area, and the expansion and renovation of lab capacities to meet Sheriff forensic team standards. Typical renovation of wear and tear items, including flooring, ceiling, paint, tile, and walls. Maintenance and repair work or replacement of HVAC, lighting, plumbing, roofing, and electrical systems, including low voltage security, roof repair or replacement, and other appurtenances required for a functional facility.

Rationale

Following the acquisition of the building, it is imperative to undertake renovations to ensure the facility complies with the essential standards and addresses the functional and aesthetic needs of the facility. Relocating the crime laboratory to a better facility is an opportunity to enhance its services and improve the quality of the lab's work. It is essential to enable the crime laboratory to relocate and serve our citizens with the same efficiency they provided at their previous location. Renovations will help ensure that the facility meets the required standards and create a functional and safe environment where the laboratory's team can carry out their work effectively. These renovations will promote better and more efficient service delivery and help the team to optimize their ability to serve the community.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 2 1119 13th St E, Bradenton

Description and Scope

Demolish the current pool structures and replace the pool with a large splash pad with water features, concrete decking, pump house with pumps, piping, etc., restrooms/showers/lockers, multi-use synthetic turf field with lighting and irrigation, additional parking if necessary, shade structures, and other amenities and appurtenances as needed for a functional facility. This project is for the demolition of pool, splash pad, water features, and pump house.

Rationale

Project # 6006706 was approved and funded; however, after conducting community surveys and meetings to discuss the needs and desires of the community for east Bradenton park, the project has changed course. We request that the funding approved for project #6006706 be used for this new project. The pool has been closed for safety concerns and staffing shortfalls. The desire of the community is to replace the existing pool with a large splash pad, a multipurpose field with synthetic turf, additional parking, and security lighting. A shaded gathering area or community building if space allows.

Description and Scope

Finish Lincoln Splash Pad Phase II by purchasing and installing new features to fill the splash pad.

Rationale

Lincoln Park splash pad has the ability to add additional amenities for Phase II and complete the splash pad. The system is currently built to pump the necessary water load to handle the additional amenities. Due to the growth and popularity of the current splash pad, we would like to finish the splash pad for full use prior to the warm summer months. This is a free amenity for all community users.

Project Title: Lincoln Park Splash Pad Phase II - Shade Structures
Department: Public Safety
Project Mgr: Kimberly Middleton
Infra. Sales Tax: Yes
Project #: PJ6023515 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 715 17th St. E., Palmetto

Description and Scope

Finish Lincoln Splash Pad Phase II by purchasing and installing new features to fill the splash pad with shade structures.

Rationale

Lincoln Park splash pad has the ability to add additional amenities for Phase II and complete the splash pad. The system is currently built to pump the necessary water load to handle the additional amenities. Due to the growth and popularity of the current splash pad, we would like to finish the splash pad for full use prior to the warm summer months. This is a free amenity for all community users.

Subcategory: Parks & Aquatics
Project Title: John H Marble - 25 Meter Pool
Department: Public Safety
Project Mgr: Angela Honts
Infra. Sales Tax: -
Project #: PJ6031108
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Replace the pool at John H Marble park with a new 8-lane 25M pool, including other appurtenances, safety features, and FF&E.

Rationale

The John H Marble facility has deteriorated over the years. The County took ownership in the mid 1990's. The John H Marble Pool is showing extreme signs of age, deterioration and safety concerns. The opening of a new facility without an updated and safe operational pool will cause a need for future improvements and repairs expenses. Renovations to a pool of this age and condition often uncover unknown conditions, such as structural issues, that can impact costs. Additionally, such repairs often only extend the life of the pool for 10 years maximum, whereas a new aquatic facility should last for another 30 years.

FY2027 - FY2031

Category: Public Safety Category
Subcategory: Parks & Aquatics
Project Title: Premier Sports Complex Swimming Pool
Department: Public Safety
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6093307
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 5895 Post Blvd, Lakewood Ranch

Description and Scope

Design, permit and construct two swimming pools: one 25-meter X 50-meter and one therapy pool. The pools will also include associated facilities and appurtenances to have a functional facility to include locker rooms with showers and restrooms, first aid and life guard office, starting blocks, lane lines, in pool and deck lighting, water heating and cooling system, filtration system, pump house, parking lot, deck seating and shade structures, safety equipment, and FF&E.

Rationale

In a Board of County Commissioners work session in FY18, a need for additional facilities was identified in East County to provide services to area residents. In addition, with a lack of competitive swim lanes throughout the county, this will provide the resources currently lacking. The 127 acre Premier Sports Complex was acquired by the County in FY18. An additional 75 acres on the north side of Premier was approved by the Board and for purchase by the County in FY18 to facilitate this new County complex. The concept of this project is to provide accessible amenities in the east county that will accommodate large group programming and competitive level swimming meets, as well as supplement the Premier Sports Campus.

Project Title: Manatee County Central Jail Dog Kennel
Department: Community and Veterans Service
Project Mgr: Michelle Wehrle
Infra. Sales Tax: Yes
Project #: PJ6118100 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 1 14470 Harlee Road, Palmetto

Description and Scope

Manatee County will install two prefabricated 16-kennel buildings, a prefabricated storage/sandbag building, and an air-conditioned storage facility to include concrete slab, utilities, site work, roadway improvements, fill placement and potential storm-water facilities and all appurtenances required for a functional facility. This project is for two prefabricated 16-kennel buildings.

Rationale

Due to dog overcrowding at Manatee County's Palmetto Animal Shelter, a new supplemental kennel for the large dogs needs to be built. With the help of the Manatee County Sherriff's Central Jail team, the Animal Welfare Division would like to build two 16-dog kennels at this site, along with a storage facility to house chemicals and sandbags, and an air-conditioned storage facility for dog medicines and food. Dogs will be cared for by the inmates and this will help with the inmates rehabilitation.

FY2027 - FY2031

Category: Public Safety Category
Subcategory: -
Project Title: Myakka Yard Generator
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: No
Project #: PJ6119400
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 1 36650 Arcadia Avenue, Myakka City

Description and Scope

Design, permit, purchase, install, and construct a new permanent diesel generator with a capacity of 47kW (or adequate size determined by vendor or electrical engineer), to support the Myakka Yard Rural Public Works Facility. This project includes all necessary electrical components including an Automatic Transfer Switch (ATS) and a distribution panel (installed inside the existing building). The generator shall be protected against a 500-year flood event, comply with applicable National Flood Insurance Program (NFIP) requirements, and shall be protected against wind with a rated enclosure and appropriate anchoring based on its location requirements per ASCE 7 standard. The location of the generator at project site shall provide sufficient space to maintain and fuel the generator, and comply with the National Electrical Code working clearance requirements. Activities shall be completed in strict compliance with federal, state and local applicable rules and regulations and the executed Federally Funded Subaward and Grant Agreement (H1072).

Rationale

Federal Emergency Management Agency's (FEMA) Hazard Mitigation Grant Program (HMGP) provides funding to state, local, tribal and territorial governments so they can develop hazard mitigation plans and rebuild in a way that reduces, or mitigates, future disaster losses in their communities. The County received funding through the HMGP for replacing the generator at the Myakka Yard Rural Public Works Facility that was damaged by Hurricane Ian (FEMA Project Number 4673-012-R). The Federal Share for the grant is $400,000.48 ($420,000 with contingency). The county match is $194,114.52 ($203,820 with contingency.) This project is to fund both the County's share of the generator project and the reimbursable amount awarded in the grant.

Project Location

Multi-district Countywide

Description and Scope

Full Public Safety/Emergency redundant communications for North Link, South Link, West Link , Manatee County Jail and Port and Water Treatment Plant - including Bournside to have a seamless approach to emergency efforts.

Rationale

This project focuses on public safety by affording the county with dual-path connectivity between two operational Data Centers. The first is located within the Administration Building in downtown Bradenton while the second is with the Public Safety Center. By providing the missing links or spokes to the fiber loop, it postulates the safety and crucial communications during a declared event. The impact on our citizens could be a life-saving endeavor.

Project Title: Fiber Expansion to the Emergency Operations Center (EOC)
Department: Information Technology
Project Mgr: Drew Richardson
Infra. Sales Tax: -
Project #: PJ6087005 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

Multi-district 2101 47th Terrace E, Bradenton

Description and Scope

The scope of the project is to increase fiber capacity as a dedicated source for enhanced disaster recovery capabilities. To ensure the necessary resources are expanded to improve backup for all emergencies. New fiber lines to maintain high levels of reliability, redundancy and security for critical communications. By adding the new fiber it will minimize disruptions or downtime during any future installations of fiber lines on existing operations.

Rationale

This request outlines the urgent need for additional fiber connectivity to support the Clerk of the Court's growing business requirements. MC ITS is responsible for managing and maintaining the fiber lines running from downtown to the Emergency Operations Center (EOC). However, currently all existing fiber lines are fully utilized, leaving no capacity for expansion. This request is for 3 additional 2-pair fiber lines dedicated for threats posed by hurricanes to ensure continuation of services. To connect downtown to the EOC through a Capital project in 2025 - 2026 solidifies its mission critical needs for disaster preparedness and recovery capabilities.

Project Location

Countywide Countywide

Description and Scope

The County's technology infrastructure relies on servers, storage and networking running in two data centers. There are more than 400 virtual servers, dozens of databases, and hundreds of applications and interfaces. This project upgrades the equipment that provides these services.

Rationale

To ensure reliable operation and expected performance levels, equipment must be replaced/upgraded at the end of its service life. Equipment will provide redundancy and performance to support continued growth and demand for resources.

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Transportation **Subcategory:** Intersections
Project Title: 44th Ave E at Uihlein Road Intersection Improvements
Department: Public Works
Project Mgr: Vishal Kakkad
Infra. Sales Tax: -
Project #: PJ6045664 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 44th Ave E at Uihlein Road, Lakewood Ranch

Description and Scope

Design, permit, and install a span wire traffic signals with concrete assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection from 44th Ave E (at Asolo Blvd) to Uihlein Road.

Rationale

Two thoroughfares, 44th Ave E and Uihlein Road, are four-lane divided roadways classified as arterial and collector, respectively, in the County's Comprehensive Plan. The intersection of 44th Ave E and Uihlein Road currently operates as an all-way stop control. With 44th Ave E extending to Bourneside Boulevard, Uihlein Road connecting two major state roads (SR 64 & SR 70), and with major developments near this intersection, there has been a steady growth of traffic in the area that is expected to continue. Staff recommends installation of a span wire traffic signal at this intersection as an interim condition (10-15 years) before permanent improvement is determined. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.

Project Title: 44th Avenue E and Wood Fern Trail Intersection Improvements
Department: Public Works
Project Mgr: Vishal Kakkad
Infra. Sales Tax: -
Project #: PJ6045665 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 44th Avenue E and Wood Fern Trail, Bradenton

Description and Scope

Design, permit, and install a span wire traffic signals with concrete assemblies and associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements (adding or extending), as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection from Lakewood Ranch Blvd to White Eagle Blvd.

Rationale

The 44th Avenue E thoroughfare is a four-lane divided roadway classified as arterial per the County's Comprehensive Plan. The intersection of 44th Ave E and Wood Fern Trail operates as a stop-control for the side street approaches (Wood Fern Trail/Great Park Boulevard). With 44th Ave E now extended further eastward to Bourneside Boulevard, combined with major developments near this intersection (including elementary and middle schools), there has been a steady growth of traffic in the area that is expected to continue. Staff recommends installation of a span wire traffic signal at this intersection as an interim condition (10-15 years) before permanent improvement is determined. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. Interim signal to be upgraded to mast arm assemblies in the future.

Project Title: University Pkwy at Covenant Way - Roundabout
Department: Public Works
Project Mgr: Jamarr Norman
Infra. Sales Tax: Yes
Project #: PJ6047861 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 5 University Pkwy at Covenant Way, Lakewood Ranch

Description and Scope

Design, permit, and construct a two-lane roundabout at the intersection of University Parkway and Covenant Way.

Rationale

Due to the widening of University Parkway, intersection improvements are required at Covenant Way. A roundabout is being constructed in coordination with the Lakewood Ranch Stewardship District, which is funding the widening. These improvements are necessary to accommodate increased traffic volumes, enhance safety, and maintain efficient operations at the intersection. The project aligns with County roadway design standards and long-term transportation planning goals. The County agrees to pay 35% of the construction cost of the roundabout.

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Transportation **Subcategory:** Intersections
Project Title: 17th St E at US 41 (Palmetto) Intersection Improvements
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: Yes
Project #: PJ6048561 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 17th St E at US 41, Palmetto

Description and Scope

Design and construct an eastbound right-turn lane at the US 41 and 17th Street East intersection, construct pedestrian ramps, crosswalks, and utility relocation. Relocate/modify traffic signal infrastructure and operations to accommodate these changes.

Rationale

This area of the County continues to experience steady growth and is expected to continue this trend in the future. Due to the continuing expected growth, the intersection of US 41 and 17th Street East is in need of additional capacity. Construction of an eastbound right-turn lane at the existing signalized intersection for operation and safety will increase intersection capacity and separate conflicts between right turning vehicles and through traffic.

Schedule of Activities

Activity	Start	End	Amount

Project Title: 53rd Ave W at US 41 Intersection Improvements
Department: Public Works
Project Mgr: Zachary Tarifa
Infra. Sales Tax: Yes
Project #: PJ6048562 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 4 53rd Ave W at US 41, Bradenton

Description and Scope

Design and construct an eastbound right-turn lane at the US 41 and 53rd Avenue West intersection, construct sidewalk, pedestrian ramps, crosswalks, drainage and utility relocation. Relocate/modify traffic signal infrastructure and operations to accommodate these changes. This improvement has been identified as a background improvement needed to achieve adopted levels of Service (LOS) for development in west County.

Rationale

This area of the County continues to experience steady growth and is expected to continue this trend in the future. 2018 county crash rates indicate the intersection of US 41 and 53rd Avenue West has the highest crash rate in the county. Due to the continuing expected growth, and high rate of crashes, the intersection of US 41 and 53rd Avenue West is in need of safety and operational improvements. This corridor also provides an alternate east-west route to Cortez Road. Construction of an eastbound right-turn lane at the existing signalized intersection for operation and safety will increase intersection capacity and improve safety by separating conflicts between right turning vehicles and through traffic.

Project Title: Wildcat Preserve Roadway
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: Yes
Project #: PJ6054760
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Fort Hamer and Golf Course Rd, Parrish

Description and Scope

Construct left and right turn lanes for the entrances to the Wildcat Preserve development. In addition, a traffic separator for the western most entrance on Golf Course Road, associated stormwater improvements, and pedestrian improvements at the intersection of Ft. Hamer and Golf Course Road will be included. Right-of-way dedication will be paid with impact fee credits.

Rationale

On August 8, 2013, the Board of County Commissioners adopted planning ordinance PDMU-12-18(Z)(P) - Wildcat Parrish, LLC/Wildcat Preserve approving the rezone of approximately 89.72 acres for the Developer to construct 242 single family detached residences and a commercial out parcel for 51,346 square feet of retail and office use. The rezone did not include any transportation stipulations for turn lanes at any access since the traffic impact statement concluded that they were not required as the roadways would continue to operate above the County's adopted level of service. The Final Site Plan was approved on August 1, 2014 without turn lanes based on the traffic impact statement. County staff has determined that turn lanes at each access of the development are now warranted for safety and operational considerations with the increased development in the area. An agreement was negotiated with the Developer to participate in constructing the turn lanes and dedicating the required right-of-way to the County as part of the Wildcat Preserve development project.

Project Title: Tuttle Avenue at 63rd Avenue E (Honore Avenue) - Traffic Signal and Intersection Improvements
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: Yes
Project #: PJ6065961 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 4 Tuttle Ave at 63rd Ave E, Bradenton

Description and Scope

Install traffic signal with mast arm supports, construct northbound, southbound, eastbound and westbound left turn lanes, eastbound and southbound right turn lanes, and extend northbound right turn lane. Provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices.

Rationale

A traffic signal warrant study was conducted at this intersection in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met due to the reported crashes and traffic volumes.Tuttle Avenue extension that was completed recently, now connects University Parkway and SR 70. This new connection between major arterials in the County is adding additional traffic volume through this intersection. Based on the result of the study and field observations, an installation of a traffic signal is recommended for this intersection. As part of this project, left turn lanes will be added on all approaches to accommodate the existing and expected future traffic.The project will also add right turn lanes for the southbound and eastbound approaches and extend northbound right turn lane to accommodate existing and future traffic demands.The proposed project will install fiber optic communication and other related infrastructure to connect and monitor the signal from the Regional Traffic Management Center.

Project Title: Lockwood Ridge Rd at SR 70 Intersection Improvements
Department: Public Works
Project Mgr: Andres Hidalgo
Infra. Sales Tax: Yes
Project #: PJ6082362 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 5 Lockwood Ridge Road at SR 70, Bradenton

Description and Scope

Design, permit, and construct modifications to the existing northbound approach lanes on Lockwood Ridge Rd to provide an additional northbound through lane. Design to include pedestrian/bicycle accommodations, striping modifications, drainage and utility adjustments, and traffic signal modifications to accommodate the new approach configuration. All proposed improvements will occur within existing County right of way; therefore, land acquisition will not be required.

Rationale

Lockwood Ridge Rd is a future arterial throughfare that carries a significant amount traffic from University Pkwy to SR 70. With sustained growth of traffic in the area, and being surrounded by numerous attractors, the northbound traffic at this intersection experiences higher delays and long queues during peak hours. This project modifies the existing approach lanes to provide an additional northbound through lane. These improvements are expected to improve traffic operations and safety at the intersection.

Project Location

District 1 69th St E at 60th Ave E (Buffalo Rd) Intersection, Palmetto

Description and Scope

This project is for intersection improvements at 60th Ave E (Buffalo Road) and 69th St E. Whereas, Segment 2 includes intersection improvements at 60th Ave E at Mendoza Road.

Rationale

This project will improve the capacity and operational efficiency of 60th Ave E (Buffalo Road) and 69th St E intersection. With the planned connection of 60th Ave E (Buffalo Road) to the south and increased development in the area, the signal and turn lane improvements for the road network to function at the desired level of service. The improvements for this project are currently included in project #6083160 60th Ave E - US 301 / Outlet Mall Entrance. This segment of the existing project will have a different construction schedule thus is being separated out as a standalone project. These improvements are currently referred to as Segment 3 of the 60th Ave E - US 301 / Outlet Mall Entrance project.

Project #: PJ6083165 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 69th Street E at 51st Ave E, Palmetto

Description and Scope

Design, permit, and install span wire traffic signals with concrete assemblies and associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements (adding or extending), as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection from Buffalo Road to 51st Ave E.

Rationale

The 69th St E and 51st Ave E intersection, is located in an area of the County that is experiencing rapid growth and traffic demand. The northbound and southbound approaches (51st Ave E and 47th Ave E, respectively) are stop-controlled. With expected increases in traffic, road users on these approaches will experience increasingly higher delays. Installation of a traffic signal along with pedestrian crossing features is recommended to alleviate traffic congestion. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends providing Advanced Traffic Management Systems (ATMS) infrastructure such as fiber-optics, CCTV cameras, and Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.

Project #: PJ6083166 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 Harrison Ranch Blvd at US 301, Parrish

Description and Scope

(1) Design and permit mast arm traffic signals for the intersection of US 301 and Harrison Ranch Blvd/Silverleaf Ave; (2) Design, permit, and construct intersection improvements on US 301 and Harrison Ranch Blvd/Silverleaf Ave.

Rationale

Harrison Ranch Blvd and Silverleaf Ave, (southbound and northbound approaches, respectively), are stop-controlled at the US 301 intersection. Road users of this intersection (including the eastbound and westbound left turns on US 301) currently experience delays. To improve safety and traffic circulation of the intersection, it is recommended to construct a traffic signal at the intersection and make certain geometric road improvements to the intersection. This project is to fund the associated developer's agreement for design and permitting of the traffic signal (signal construction to occur through a separate CIP project by the County) and the design, permitting, and construction of geometric road improvements to the intersection.

Project Location

District 5 Lorraine Rd at University Pkwy, Lakewood Ranch

Description and Scope

Install and construct Advanced Traffic Management System (ATMS) improvements along Lorraine Rd from University Pkwy to 59th Ave E. Improvements at various locations include fiber optic cables, close circuit television cameras, microwave vehicle detection system sensors, Bluetooth travel time measuring devices, and advanced vehicle detection and tie into the existing County ATMS fiber infrastructure.

Rationale

This project will construct Advanced Traffic Management System (ATMS) improvements along Lorraine Road from University Parkway to 59th Avenue East under a construction LAP agreement (FPN: 440324-1-58-01). The design was completed under an FDOT Local Agency Program (LAP) agreement. ATMS upgrades will enhance signal coordination, reduce congestion, and improve safety through real-time monitoring and adaptive control, while supporting growth and regional mobility.

Project Title: Ellenton Gillette Road - Mendoza Road (37th Street East) Intersection Improvements
Department: Public Works
Project Mgr: Andres Hidalgo
Infra. Sales Tax: Yes
Project #: PJ6092660 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 1 Ellenton Gillette Rd-Mendoza Rd, Palmetto

Description and Scope

Installation of mast arms signalized intersection to include left and right turn lanes on all four legs of intersection and associated land acquisition.

Rationale

Traffic study data identified future capacity requirements including a fully signalized intersection with safety improvements.

Project Title: Rangeland Pkwy at Uihlein Rd Intersection Improvements
Department: Public Works
Project Mgr: Vishal Kakkad
Infra. Sales Tax: -
Project #: PJ6093861 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Rangeland Pkwy at Uihlein Rd, Lakewood Ranch

Description and Scope

Evaluate, design, permit, and install span wire traffic signals with concrete assemblies assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections from Uihlein Rd to Bourneside Blvd.

Rationale

Two thoroughfares, Rangeland Pkwy and Uihlein Rd, are four-lane divided roadways classified as collectors in the County's Comprehensive Plan. The intersection of Rangeland Pkwy and Uihlein Rd currently operates as an all-way stop control. This intersection is surrounded by major traffic generators (e.g., Premier Sports Campus, Lakewood National and Esplanade communities, the future Lakewood Ranch Library and Aquatic Center, etc.). There has been a steady growth of traffic in the area that is expected to continue. Staff recommends installation of a span wire traffic signal at this intersection as an interim condition (10-15 years) before permanent improvement is determined. The traffic signal is expected to improve the overall operations and safety for all users.. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.

Project Title: Rangeland Pkwy at New Haven Blvd Intersection Improvements
Department: Public Works
Project Mgr: Vishal Kakkad
Infra. Sales Tax: -
Project #: PJ6093862 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Rangeland Pkwy at New Haven Blvd, Lakewood Ranch

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal with concrete assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive radar detection system, CCTV camera, MVDS, fiber-optic interconnection, intersection lighting, and modify the New Haven Blvd approaches to three lane approaches.

Rationale

The Rangeland Pkwy and New Haven Blvd intersection is stop-controlled for the New Haven Boulevard approaches. During peak demands (e.g., AM and PM periods, school pick-up/drop-off, etc.), the intersection does not operate efficiently, as the New Haven Blvd traffic must stop before proceeding. There has been a steady growth of traffic in the area, as the area continues to develop the side street traffic is expected to experience higher delays. With opening of the Lakewood Ranch Charter School and its high school expansion, there is an immediate need to provide a span wire traffic signal at this intersection as an interim condition (10-15 years) before permanent improvement is determined. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. Interim signal to be upgraded to mast arm assemblies in the future.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Rangeland Pkwy at Post Blvd, Bradenton

Description and Scope

Evaluate, design, permit, and install a span wire traffic signals with concrete assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections from Loraine Rd to Uihlein Rd.

Rationale

Rangeland Pkwy and Post Blvd is classified as a collector thoroughfare in the County's Comprehensive Plan that create a t-intersection. Both are a 4-lane divided roadway with Post Blvd being stop controlled. 59th Ave E is a 2-lane undivided facility. This intersection is surrounded by major traffic generators (e.g., Premier Sports Campus, Lakewood National and Esplanade communities, the future Lakewood Ranch Library and Aquatic Center). There is a steady growth of traffic in the area and is expected to continue. Staff recommends installing an interim traffic signal. Staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. The traffic signal is expected to improve the overall operations and safety of the vehicles, bicyclists, and pedestrians at this intersection. Interim signal to be upgraded to mast arm assemblies in the future.

Project Location

District 5 Uihlein Rd at Academic Ave, Lakewood Ranch

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal at Uihlein Rd and Academic Ave with non-intrusive detection system, pedestrian features, CCTV camera and wireless switch improvements.

Rationale

The Uihlein Rd at Academic Ave is a three-legged intersection with stop-controlled approach on Academe Avenue. There has been sustained growth of traffic in the area, as the area continues to develop the side street traffic is expected to experience higher delays. With the upcoming K-8 school on Academic Avenue, there is a need to provide a span wire traffic signal (10-15 year) at this intersection. The traffic signal is expected to improve the overall operations and safety for all users.

Department: Public Works
Project Mgr: Jamarr Norman
Infra. Sales Tax: -
Project #: PJ6094862 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 5 The Masters Ave at Bourneside Blvd, Bradenton

Description and Scope

Design, permit, and construct a two-lane roundabout at the intersection of The Master Avenue and Bourneside Boulevard. Project includes construction phase engineering services. Process reimbursement request pursuant to the reimbursement agreement with the District.

Rationale

The Masters Avenue and Bourneside Boulevard are future collector thoroughfare on the County's 2045 Future Traffic Circulation Map and are located within the Lakewood Ranch Stewardship District (District) which was established for the purpose of planning, financing, constructing, operating and/or maintaining infrastructure improvements. The District is planning on constructing the eastern two-lanes of Bourneside Boulevard. To ensure safe traffic circulation with the District improvements, the staff recommend installing a roundabout at the intersection of The Master Avenue and Bourneside Boulevard. This will be accomplished through a reimbursement agreement with the District for their costs to design, permit, and construct the roundabout.

Project Title: Lakewood Ranch Blvd at Wood Fern Trail Intersection Improvements
Department: Public Works
Project Mgr: Vishal Kakkad
Infra. Sales Tax: -
Project #: PJ6099761 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Lakewood Ranch Blvd at Wood Fern Trail, Lakewood Ranch

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal with concrete assemblies with associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements (adding or extending), as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection to the TMC.

Rationale

Lakewood Ranch Blvd is classified as an arterial thoroughfare in the County's Comprehensive Plan. The intersection of Lakewood Ranch Blvd and Wood Fern Trail operates as a one-way stop control on Wood Fern Trail and at peak demand does not operate efficiently, as the Wood Fern Trail traffic must stop before proceeding. There has been a steady growth of traffic in the area that is expected to continue due to future developments. Staff recommends installing an interim traffic signal to improve safety and operations for all users. Staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. Interim traffic signal will be evaluated in the future for upgrades to mast arms or roundabout.

Project #: PJ6099763 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 5 Lakewood Ranch Blvd at East Manatee Fire District Station 1, Lakewood Ranch

Description and Scope

Design and construct an span wire emergency traffic signal at the East Manatee Fire District Station with concrete assemblies and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

Lakewood Ranch Blvd is a County thoroughfare. There has been a steady growth of traffic in the area and is expected to continue with the ongoing growth throughout the county. As the area continues to develop and experience growth, gaps in traffic are becoming less adequate to permit the timely entrance of emergency vehicles. Staff recommends installation of an emergency span wire traffic signal at this intersection as an interim condition (10-15 years) before permanent improvement is determined to allow for direct emergency vehicle access to Lakewood Ranch Blvd at East Manatee Fire District Station 1.

Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6099764 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Lakewood Ranch Boulevard at Portal Crossing, Lakewood Ranch

Description and Scope

Design, permit, and install a span wire traffic signals with concrete assemblies and associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements (adding or extending), as needed. In addition, modify median openings, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections with the TMC.

Rationale

Lakewood Ranch Blvd and Portal Crossing intersection is operating as stop-control for the Portal Crossing approaches (east and westbound). Steady growth of traffic in the area is expected to continue causing side street traffic to experience higher delays due to increased traffic volume on Lakewood Ranch Blvd. Staff recommends installing an interim traffic signal, to improve safety and operations for all users at this intersection. Staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber optics, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. Raised medians will be required to restrict turning movement associated with the traffic signal. Interim signal to be upgraded to mast arm assemblies in the future.

Project Title: Lockwood Ridge Road at Shopping Center Entrance - Traffic Signal
Department: Public Works
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6099860 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

Multi-district Lockwood Ridge Rd, Bradenton

Description and Scope

Install traffic signal with mast arm supports. Provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices. Includes addition of right turn lane extension in each direction on Lockwood Ridge Road from the new signal at the Shopping Center Entrance in a second phase.

Rationale

Traffic Engineering staff conducted traffic signal warrant study at this intersection (on Lockwood Ridge Road, just south of State Road 70 and at the entrance of Publix/Walmart) in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met due to the reported crashes and traffic volumes. Currently, this intersection operates as a two-way stop control for the shopping center driveways. Based on the result of the study and field observations, an installation of a traffic signal is recommended for this intersection. The proposed project will connect to the existing fiber optic communication and install ATMS related infrastructure to monitor the signal from the Regional Traffic Management Center.

Project Title: Lockwood Ridge Road at 61st Ave E Intersection Improvements
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6099861 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 4 Lockwood Ridge Road at 61st Ave E, Bradenton

Description and Scope

Evaluate, design, permit, and construct a traffic signal with mast arm assemblies with associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements, as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection to the TMC.

Rationale

There has been a steady growth of traffic in the area and is expected to continue with the ongoing growth throughout the County. As the area continues to develop and experience growth, the side street traffic is expected to experience higher delays due to increased traffic volume along Lockwood Ridge Road. Traffic signal control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area. Due to existing constraints, staff recommends installation of a mast arm traffic signal at this intersection to improve safety and operations for all users. In addition, this project also includes designing and constructing fiber-optic interconnect communication network from Lockwood Ridge Road along with other Advanced Traffic Management System (ATMS) devices such as a CCTV camera and Microwave Vehicle Detection System (MVDS) to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

Project Title: Port Harbour Parkway at Kay Road Intersection Improvements
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6104660 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Port Harbour Parkway at Kay Road, Bradenton

Description and Scope

Designed to connect to Kay Road over Cypress Strand Bridge/roundabout at the Port Harbour Parkway and Kay Road intersection, construct pedestrian ramps, crosswalks (with Rectangular Rapid-Flashing Beacons (RRFBs) for a roundabout option), resurface all approach lanes for re-striping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

Port Harbour Parkway and Kay Road are both County thoroughfares. Port Harbour Parkway extension to Upper Manatee River Road was completed recently. With this connection with Upper Manatee River Road, there is more traffic anticipated along Port Harbour Parkway. The intersection of Upper Manatee River Road and Port Harbour Parkway will be signalized soon. Also, as Port Harbour Parkway is going to provide a parallel alternate route to SR 64, it is anticipated to bring more traffic on this corridor. The intersection of Port Harbour Parkway and Kay Road is currently a one-way stop controlled (for Port Harbour Parkway leg). With the anticipated increase in traffic, a traffic signal or a roundabout would provide needed traffic control at this intersection.

Project Title: Buckeye Rd at US 301 Intersection Improvements
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6104961 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 1 Buckeye Rd at US 301, Parrish

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal at Buckeye Rd and US 301 Avenue with non-intrusive detection system, pedestrian features, CCTV camera and wireless switch improvements.

Rationale

The Buckeye Rd at US 301 is a three-legged intersection with stop-controlled approach on Buckeye Road. There has been sustained growth of traffic in the area, as the area continues to develop the side street traffic is expected to experience higher delays. Further, FDOT does not have plans in their 5-year work program to signalize this intersection thus there is a need to provide a span wire traffic signal at this intersection (10-15 years). The traffic signal is expected to improve safety and overall operations at this intersection.

Project Title: Creekwood Boulevard Improvements SR 70 -73rd Street E
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: Yes
Project #: PJ6105160 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Growth, Deficiency

Project Location

District 5 52nd Place E and 73rd St E, Bradenton

Description and Scope

Reconstruct median at the 52nd Place E to restrict the left out movements and construct a roundabout at the 73rd Street E intersection.

Rationale

Creekwood Boulevard at 52nd Place E has a full median opening that serves the shopping center to the east of Creekwood Boulevard. During the peak periods and peak season, traffic has been observed to queue from the SR 70 intersection to the 52nd Place E intersection. Also, traffic is observed to queue on the east leg of 52nd Place E to wait for a gap in the traffic on Creekwood Boulevard. The conflicts create operational and safety concerns at and in the vicinity of this intersection. Due to the proximity of the Creekwood Boulevard and 52nd Place E intersection to the SR 70 intersection, a traffic signal is not feasible. Staff recommends restricting the left out movements at the 52nd Place E intersection and constructing a roundabout at the 73rd Street E intersection. This will allow to separate the conflicting movements at the 52nd Place E intersection and provide a safer alternative to access SR 70 from Creekwood Boulevard.

Project Title: 75th Street W at Manatee Ave - Turn Lane Improvements
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: Yes
Project #: PJ6108261 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 3 75th Street W at Manatee Ave W, Bradenton

Description and Scope

Design, permit, and construct an additional southbound left turn lane on 75th Street W, potentially a dedicated northbound right turn lane, and signal improvements to accommodate southbound dual left turn lanes and potentially the northbound dedicated right turn lane. The design phase should include evaluating whether to construct a dedicated northbound right turn lane or if the combined through/right turn lane option is preferable. Design to include pedestrian/bicycle and stormwater improvements where applicable. Modification of existing approach lanes, as needed, to accommodate the additional turn lanes. Both steel mast arm assemblies may need to be relocated/replaced. Land acquisition will be required.

Rationale

Turn lane improvements are desired at the 75th Street W and Manatee Ave intersection to improve traffic circulation. This is in addition to and will compliment the 75th St W - 20th Ave W to Manatee Ave W (CIP Project #6108260) widening project, south of Manatee Ave. These improvements are expected to improve the level of service at the intersection.

Project Title: Player's Drive at Lorraine Road Intersection Improvements and ATMS
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6109060 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Player's Dr at Lorraine Rd, Bradenton

Description and Scope

Construct a traffic signal with pedestrian crossings on all four legs, along with ATMS equipment (CCTV cameras, MVDS detectors, Bluetooth devices). Work includes the extension of the North bound right, South bound left and right turn lanes on Lorraine Road.

Rationale

Under the existing conditions, the intersection of Player's Drive and Lorraine Road is stop-controlled for the eastbound and westbound (Player's Drive) approaches. There has been a steady growth of traffic in the area and this growth is expected to continue with the ongoing residential developments and new schools in the area. As the area continues to develop and experience growth, the side street traffic is expected to experience higher delays due to increased traffic volume along Lorraine Road. Based on a traffic study, the warrants to install a traffic signal at this intersection were met. Staff recommends installing a traffic signal along with pedestrian crossing features and extend turn lanes as needed. The selected traffic control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area.

Department: Public Works
Project Mgr: Marcenel Joseph
Infra. Sales Tax: -
Project #: PJ6109160 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 4 Tuttle Ave at Whitfield Ave., Bradenton

Description and Scope

Design and construct a roundabout at the Tuttle Avenue and Whitfield Avenue intersection, construct pedestrian ramps, crosswalks with Rectangular Rapid Flashing Beacons (RRFBs) on all approaches, resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

Tuttle Avenue Extension project was completed by the County around two years ago. This project added the fourth leg (south leg) to the intersection of Tuttle Avenue and Whitfield Avenue, while connecting residential neighborhoods to the south. There has been an increase in the traffic volume at this intersection since the Tuttle Avenue Extension was completed. This is an intersection of two County thoroughfares currently operating as a four-way stop intersection. There is some crash history at this intersection in the past few years.

Project Location

District 1 Artisan Lakes Parkway, Palmetto

Description and Scope

Design, permit, and construct roundabout intersection improvements along Artisan Lakes Pkwy at Cobble Park Pl, Seasons Way, and Maidenstone Way. Review, approve and process pay application pursuant to the developer agreement.

Rationale

Artisan Lakes Pkwy is a future collector thoroughfare per the County's 2045 Future Traffic Circulation Functional Classification (Map 5-B). Due to existing and future growth anticipated in the area, traffic demand is expected continue to increase along Artisan Lakes Pkwy. Staff recommend installing roundabouts the Cobble Park Pl, Seasons Way, and Maidenstone Way intersections to ensure efficient and safe traffic circulation for all users. This project is to fund the developer's agreement for the reimbursement of cost incurred for the design, permitting, and construction of the roundabouts by the developer.

Project Title: Artisan Parkway Roundabout - Maidenstone Way
Department: Public Works
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJ6110262 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Artisan Lakes Parkway, Palmetto

Description and Scope

Design, permit, and construct roundabout intersection improvements along Artisan Lakes Pkwy at Cobble Park Pl, Seasons Way, and Maidenstone Way. Review, approve and process pay application pursuant to the developer agreement.

Rationale

Artisan Lakes Pkwy is a future collector thoroughfare per the County's 2045 Future Traffic Circulation Functional Classification (Map 5-B). Due to existing and future growth anticipated in the area, traffic demand is expected continue to increase along Artisan Lakes Pkwy. Staff recommend installing roundabouts the Cobble Park Pl, Seasons Way, and Maidenstone Way intersections to ensure efficient and safe traffic circulation for all users. This project is to fund the developer's agreement for the reimbursement of cost incurred for the design, permitting, and construction of the roundabouts by the developer.

Project Title: 43rd St W at Manatee Ave Intersection Improvement Project
Department: Public Works
Project Mgr: Albert Rosenstein
Infra. Sales Tax: Yes
Project #: PJ6112460 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 3 43rd St W at Manatee Ave W, Bradenton

Description and Scope

Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. The design should account for the future 4 lanes of the south leg of the intersection. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.

Rationale

The operation of the intersection for northbound and southbound left turns is not ideal. This project will analyze the intersection operation; determine recommended improvements; and design, permit, and construct the recommended improvements. This project will improve the capacity and operational efficiency at the 43rd St W and Manatee Avenue signalized intersection.

Project Title: Spencer Parrish Road Realignment (NN Road)
Department: Public Works
Project Mgr: Scott May
Infra. Sales Tax: -
Project #: PJ6113260 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Golf Course Road at Spencer Parrish Road, Parrish

Description and Scope

Design, engineer, permit, and construct roadway and roundabout improvements depicted in the LDA, to include (i) the east-west roadway extending from the residential from the development west to Spencer Parrish Road; (ii) the north-south roadway extending from Golf Course Road to the northern terminus of the roundabout including southbound turn lanes; and (iii) an eastbound left turn lane and a westbound right turn lane at the intersection of Golf Course Road and the realigned Spencer Parrish Road (iv) signalize intersection of Golf Course Road and the realigned Spencer Parrish Road.

Rationale

Spencer Parrish Road is a future collector throughfare per the County's 2024 Future Traffic Circulation Maps (Map 5 Series), from Golf Course Road to FF Road. The County desires to realign Spencer Parrish Road to improve safety and traffic circulation since the road intersects Golf Course Road at a significant skewed angle. A residential development, SM Ranch, proposes to provide its second means of access from Spencer Parrish Road and has entered into a Local Development Agreement (LDA) with the County to accomplish the reconfiguration of the skewed intersection.
Per the LDA, the County is to reimburse the developer one-half of the costs of the proposed realignment/roundabout costs less the estimate for the developer to construct a second means of access to the development to Spencer Parrish Road. The remaining one-half of costs are impact fee credit eligible.

Project Title: Rye Road at Witt Elementary (158th St E) Intersection Improvements
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6115560 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Rye Road at Witt Elementary (158th St E)

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal at the Rye Road/Witt Elementary intersection and an emergency-vehicle traffic control span wire signal at the fire station utilizing concrete strain poles. Design should have wireless communication with copper interconnection between signals, non-intrusive radar detection system, CCTV camera, Microwave Vehicle Detection System (MVDS), pedestrian improvements, and intersection lighting.

Rationale

The Rye Road/Witt Elementary (158th Street E) intersection is inefficient with the entering traffic. Also, immediately north of the intersection the East Manatee Fire District Station 3 is experiencing less than adequate traffic gaps to take access to Rye Road. Installing a traffic signal control is expected to improve operations and safety for vehicles, pedestrians, and bicyclists. The project will include upgrading the existing emergency warning signs to an emergency vehicle traffic control signal to allow for direct emergency vehicle access to Rye Road.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 15th St E at 57th Ave E, Bradenton

Description and Scope

Design, permit and construct a roundabout at the intersection of 15th Street East and 57th Avenue East.

Rationale

The intersection, which is currently signalized, is part of 15th Street East Project Development and Environment (PD&E) study and has been identified as feasible location for a roundabout. The segment comprising this intersection has been the County's MPO priority project for several years. The project will improve intersection safety and efficiency.

Project Title: Whitfield Ave - Pearl Ave - Willow St Roundabout
Department: Public Works
Project Mgr: Phil Catalano
Infra. Sales Tax: -
Project #: PJ6117861 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance, Deficiency

Project Location

District 4 Whitfield Ave & Pearl Ave at US 41, Sarasota 34243 (Manatee County)

Description and Scope

Design, permit, install, and construct (i) pavement resurfacing of Whitfield Ave, from US 41 to 9th St E, and Pearl Ave, from US 41 to Willow St; (ii) buffered bike lanes (in both directions) on Whitfield Ave, from Manatee St to 9th St E, and Pearl Ave, from Manatee St to Willow St; (iii) speed management measures for both vehicles and pedestrians; and (iv) a mini roundabout at the Whitfield Ave/Pearl Ave and Willow St intersection.

Rationale

In addition to the resurfacing needs, the roadways experience significant amount of traffic from US 41 to 9th St E and to address crash trends and speeding concerns from the residents, staff recommend implementing traffic calming measures using the Safe Systems Approach methodology along with installing a mini roundabout at the Whitfield Ave/Pearl Ave and Willow St intersection. This project is expected to improve traffic operations and safety while preserving the neighborhood's character while accommodating all road users.

Project Title: CR 675 at Rye Road Intersection and North Rye Road Extension
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJ6118361 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Rye Road at County Road 675, Parrish

Description and Scope

Evaluate appropriate intersection control for the Rye Road/County Road 675 intersection. Design, permit, and construct improvements based on the recommended intersection control for a four-lane Rye Road and County Road divided typical section that will accommodate up to a future six-lane County Road 675 (if feasible) along with the northern extension of Rye Road to connect to the southern terminus of Rye Road being constructed as part of the Riversong/Lazy C Ranch development. The project will also stormwater, pedestrian, and intersection lighting improvements. Design to include coordination with Riversong/Lazy C Ranch development to for the north leg extension tie-in and evaluation on appropriate means for the ditch crossing. Land acquisition is anticipated.

Rationale

Rye Road and County Road 675 are future arterial thoroughfares per the County's 2045 Future Traffic Circulation Plan (Map 5 Series) and intersect with each other. With the
future widening of North Rye Road there is need to buildout this intersection to improve safety, capacity, and traffic circulation as well as extend Rye Road to the north. This intersection improvement is covered in a Local Development Agreement (LDA) with Rye Ranch for the design and construction of the future buildout of the intersection. This project is to fund the developer's agreement for the design, permitting, and construction of the intersection improvements.

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 4 53rd Ave W and 30th St W, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structure with pedestrian crossings on two legs and implement Flashing Yellow Arrow (FYA) for EB movement, install non-intrusive detection system and a CCTV camera, resurface all approach lanes and install appropriate signing and pavement markings.

Rationale

53rd Ave W is a thoroughfare with an Average Annual Daily Traffic (AADT) of over 23,000 vehicles per day (vpd), and a designated Evacuation Route. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the area. This span-wire intersection is within the Mast-Arm Boundary Map defined by FDOT, which states that signals within this boundary are to be supported by galvanized mast-arm structure to withstand possible high winds from the coast. Staff recommends upgrading the signal with mast-arm supports along with pedestrian crossing features. In addition, this project includes upgrading the existing loop detection system to non-intrusive detection system and addition of a CCTV camera to enhance traffic operations and monitoring capabilities.

Project Location

District 4 53rd Ave W and 34th St W, Bradenton

Description and Scope

Traffic Signal and pedestrian upgrades to add separate ADA ramps in each corner, special emphasis crosswalks, implement LPI, upgrade intersection lighting, implement Flashing Yellow Arrow (FYA) for EB/WB movements, and RT overlap phasing for NB, SB, and EB movements.

Rationale

53rd Ave W is a designated Evacuation Route while 34th St W is thoroughfare that connects 53rd Ave W to two major arterials, Manatee Avenue and Cortez Road. As 53rd Ave W is one of the major routes providing connection to the beaches, this corridor experiences significant traffic through most part of the year, especially during weekends. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the vicinity. Staff recommends upgrading the traffic signal with the recommended safety enhancements including pedestrian ramps and crossing features.

Project Location

District 4 53rd Ave W and 36th St W, Bradenton

Description and Scope

Traffic Signal and pedestrian upgrades to add separate ADA ramps in each corner, special emphasis crosswalks, Leading Pedestrian Interval implementation with overhead blank-out signs, upgrade intersection lighting, implement Flashing Yellow Arrow for all left-turn movements, and RT overlap phasing for exclusive right-turn movements. Construct current standard school zone flasher assemblies adjacent to this intersection. Additionally, traffic signal upgrades will include new internally illuminated signs with block numbers, upgrade detection to non-intrusive radar detection system, and provide Next Signal Guide Signs on 53rd Avenue W approaches.

Rationale

53rd Ave W is a thoroughfare with an Average Annual Daily Traffic of over 23,000 vehicles per day, and a designated Evacuation Route. As it is one of the major routes providing connection to the beaches, this corridor experiences significant traffic through most part of the year, especially during weekends. Project Title: Lakewood Ranch Blvd at East Manatee Fire District Station 1
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTR02281 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Lakewood Ranch Blvd at East Manatee Fire District Station 1, Bradenton

Description and Scope

Design and construct an emergency traffic signal with mast-arm structures and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

Lakewood Ranch Boulevard is a County Thoroughfare. There has been a steady growth of traffic in the area and is expected to continue with the ongoing growth throughout the county. As the area continues to develop and experience growth, gaps in traffic are becoming less adequate to permit the timely entrance of emergency vehicles. Staff recommends installing an emergency-vehicle traffic control signal to allow for direct emergency vehicle access to Lakewood Ranch Boulevard at East Manatee Fire District Station 1 egress only intersection.

Project Title: Lakewood Ranch Boulevard at Gatewood Drive - Roundabout
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTR02283 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Lakewood Ranch Boulevard at Gatewood Drive, Bradenton

Description and Scope

Design and construct a roundabout at the Lakewood Ranch Boulevard and Gatewood Drive intersection, construct pedestrian ramps, crosswalks with RRFBs on all approaches, resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

With the increase in traffic, a roundabout would provide needed traffic control at this intersection along with implementing a safe systems approach. During the peak periods, the intersection does not operate efficiently as the traffic entering the intersection has to stop before proceeding. There has been a steady growth of traffic in the area and this growth is expected to continue with the ongoing developments in the area. Staff is proposing to install a roundabout at this location which expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists.

Schedule of Activities

Project Title: Lakewood Ranch Boulevard at Portal Crossing - Mast Arm
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTR02284 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Lakewood Ranch Boulevard at Portal Crossing, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structures with pedestrian crossings on all legs, add/lengthen turn lanes, modify median opening north of the intersection, install non-intrusive detection system, CCTV camera, MVDS and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

Access management improvements will consist of construction of raised medians to restrict turning movements within the vicinity of the new traffic signal. Traffic Signal control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area. The proposed project will connect to the existing fiber-optic communication network and provide other Advanced Traffic Management System (ATMS) devices such as a CCTV camera and MVDS to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

Project Title: White Eagle Blvd at Serenity Run/Filmore Run Intersection Improvements
Department: Transportation Capital Project
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTR02286 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 White Eagle Blvd at Serenity Run/Filmore Run, Bradenton

Description and Scope

Evaluate a traffic signal or a roundabout option, and design and construct a traffic signal/roundabout at the White Eagle Boulevard and Serenity Run/Filmore Run intersection, construct pedestrian ramps, crosswalks (with RRFBs for a roundabout option), resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

White Eagle Bouldevard is a County Thoroughfare. The White Eagle Boulevard extension to State Road 64 was recently completed. With this connection with State Road 64, there is more traffic anticipated along White Eagle Boulevard. The intersection of White Eagle Blvd and Serenity Run/Filmore Run is currently stop-controlled for the northbound and southbound (Serenity Run/Filmore Run) approaches. With the anticipated increase in traffic due to the recent connection and as the area continues to develop and experience growth, a traffic signal or a roundabout would provide needed traffic control at this intersection.

Project Title: University Parkway at Legacy Blvd/Deer Drive Roundabout
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTR02287 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 University Parkway at Legacy Blvd, Lakewood Ranch

Description and Scope

Design, permit, and construct a two-lane roundabout at the intersection of University Parkway and Legacy Boulevard. Project includes construction phase engineering services.

Rationale

University Parkway is a County maintained thoroughfare that the County has jurisdiction for approving improvements within its right-of-way. Sarasota County has a development of regional impact (DRI), known as Lakewood Ranch Corporate Park, located at the southeast quadrant of the intersection of Interstate 75 and University Parkway (the "Sarasota DRI"). The Sarasota DRI's transportation impact mitigation includes capacity improvements to the signalized intersection of University Parkway and Legacy Boulevard (Deer Drive). This intersection has traffic signal infrastructure approaching end-of-life and requires capacity improvement independent of the Sarasota DRI mitigation, which will prompt the County to reconstruct the intersection. The County and developer agree reconstructing the intersection as a two-lane roundabout in a single undertaking is a desirable and efficient way to address general Intersection needs and Sarasota DRI transportation impact mitigation. The project is to fund the developer's agreement for 50% of the costs to design, permit, and construct the roundabout.

Project #: PJTR02290 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Rangeland Parkway at Post Boulevard, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structure with pedestrian crossings on all legs, install non-intrusive detection system, CCTV camera, MVDS and deploy fiber-optic infrastructure (from Lorraine Road to Uihlein Road) to establish communication with the Traffic Management Center.

Rationale

Surrounded by major generators such as Premier Sports Campus, Lakewood National, Esplanade and other proposed residential and mixed use such as, East County Library and Aquatic Center, there has been a steady growth of traffic in the area and this growth is expected to continue in the future. Staff is proposing to evaluate and install a traffic signal at this location. The traffic signal is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in the vicinity. In addition, staff recommends including ATMS infrastructure such as fiber, CCTV camera and MVDS to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

Project #: PJTR02293 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 SR 64 at 117th Street E, Bradenton

Description and Scope

Design and construct southbound left and right-turn lanes with associated traffic signal upgrades to implement Flashing Yellow Arrow (FYA) for northbound and southbound movements at the SR 64 and 117th Street East intersection. Additional traffic signal indications will be designed to be added to the existing box span wire.

Rationale

SR 64 is one of the major routes within the County and this corridor experiences significant traffic through most part of the year. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the vicinity. Staff recommends upgrading the traffic signal with the recommended capacity enhancements to maximize operations at this intersection.

Project Title: 15th Street E from 63rd Ave E to 59th Ave E
Department: Public Works
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: No
Project #: PJ6001861 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth, Deficiency

Project Location

District 2 15th Street East 63rd Ave to 59th Ave E, Bradenton

Description and Scope

Design and permit functional roadway improvements to 15th St E from south of 63rd Ave E to South of 51st Ave E, updating The Florida Department of Transportation FDOT's current design, including but not limited to: (i) maintaining existing opening drainage system with minimum piping where land is constrained, (ii) provide a multiuse path and sidewalk (no bike lanes), (iii) access management improvements for existing driveway, (iv) review pavement-to-base season high water table (SHWT) clearance and 100-year flood conditions along the corridor, and (v) minimize right-of-way acquisitions to the greatest extent possible while meeting the project purpose. Due to state funding, state standards, regulations, and requirements must be applied.

Rationale

The Florida Department of Transportation (FDOT) completed a Project Development and Environmental (PD&E) study in 2016 for 15th St East (301 Blvd E) from Tallevast Road to US 41. The FDOT's consultant produced 60% plans for the overall project limits with the plan being to move forward with the Segment 2 plans with Segments 1 & 3 being put on hold until future funding is available. Segment 2 was further divided into subsegments 2A, 2B, and 2C. However, because of anticipated business impacts and FDOT's inability to secure right-ofway from an off-network roadway, the project was transferred to the County as Local Agency Program (LAP) project with funding participation by FDOT. The purpose of this project is design and permit roadway improvements to improve mobility, accessibility, and to provide safer travel conditions for all users within the limits of the Segment 2. The overall project is identified as a financially feasible transportation project in the Sarasota/Manatee Metropolitan Planning Organization's (MPO's) 2045 Long Range Transportation Plan (LRTP) and is included the FDOT's 5 Year Work Program (Item Numbers: 431350-6,7,8).

Subcategory: Road Improvements
Project Title: Myakka Rd - Culvert 174149 Replacement
Department: Public Works
Project Mgr: Gil Bullock
Infra. Sales Tax: -
Project #: PJ6021762
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 1 Myakka Rd over Branch of Myakka River, Myakka City

Description and Scope

The scope includes design, permitting, project management and construction of a new culvert on Myakka Rd over Branch of Myakka River. The new culvert will be approximately 30 ft. long x 40 ft. wide. It is anticipated that the new culvert will be built with a full road closure. The roadway geometry will remain unchanged and the structure footprint will be similar to the existing culvert. The new culvert will maintain similar hydraulic capacity and be designed to the current Standards. No Land acquisition is anticipated.

Rationale

The County was notified on 05/25/2023 that an existing culvert under Myakka Rd had severe structural issues. Road plates were installed over the culvert to prevent road closure which would result in a 14 mile detour. Myakka Rd is critical for residential, agricultural and equestrian traffic. Ownership of the culvert was established through an interlocal agreement with Sarasota County. Fifty percent of the project cost will be reimbursed by Sarasota County. This culvert will be replaced with a similar metal pipe structure or concrete box culverts to restore the structural capacity and improve public safety.

Project Title: Lincoln Park Pedestrian Bridge
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6023513
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Deficiency

Project Location

District 2 US 41 at 17th Street East, Palmetto

Description and Scope

Design and permit a pedestrian bridge across the US 41/17th Street East intersection. Per FDOT direction, design is required to have an Independent Project Review (IPR) through a separate firm and contract; foundations outside of FDOT rights-of-way are to be reviewed by FDOT; the design must meet FDM criteria and have full review through FDOT District One. As project is being funded with federal grant award and across a FDOT facility, all federal and state requirements must be followed.

Rationale

The purpose of this project is to provide a safe and effective way for bicyclists and pedestrians to cross the US 41 corridor via a pedestrian bridge to improve access to Lincoln Park, the Lincoln Middle School, and the community in general. The county recently constructed a swimming pool and renovated the park in this underserved community bifurcated by US 41 in Manatee County, Florida. The goal of the project is to improve local mobility and improve access to Lincoln Park and its amenities and the Lincoln Middle School. Providing a safer route and access to Lincoln Park will foster community strong communities, improve local connectivity, and enhance the quality of life for the residents of the underserved area. The design will be partially funded by a $950,000 federal legislative grant through HUD.

Project Location

District 2 US 41 at 17th Street East, Palmetto

Description and Scope

Design, permitting, right-of-way (ROW) acquisition, and construction of some or all of sub-segments B1 through B5 of the PTNP Middle Segment, a shared-use pathway, as identified in FDOT FPID 444857-1 PD&E Study.

Rationale

The Palmetto Trails Network Plan (PTNP) aims to improve multimodal access, safety, and connectivity for an underserved community through Southern, Middle, and Northern segments. The County received $2.9M in HUD funding and recommends applying it to part of the Middle Segment to create trail links to the Palmetto Youth Center, Lincoln Memorial Middle School, and Lincoln Park, and to rehabilitate the historic Lincoln Tunnel under U.S.

FY2027 - FY2031

Category: Transportation **Subcategory:** Road Improvements
Project Title: UMRR Bridge Replacement at Mill Creek Bridge #134023
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: Yes
Project #: PJ6030662 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 1 Upper Manatee River Road - Mill Creek Bridge, Bradenton

Description and Scope

Design and construct a new bridge to replace the existing bridge on UMRR at Mill Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths, allow for bicycle traffic and include sidewalks for pedestrian traffic to improve safety. The project will also include modifying/relocating the 42" water main along the south side of the existing bridge. The estimated dimensions of the new bridge are approximately 150 ft. long x 52 ft. - 2 in. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

This area of the County near Upper Manatee River Road (UMRR) continues to experience steady growth and is expected to continue this trend in the future, particularly with the opening of the Ft. Hamer bridge. As part of infrastructure management to improve traffic and pedestrian safety for the roadway, the bridge on UMRR at Mill Creek (Bridge #134023)is to be replaced to accommodate increased vehicular and pedestrian traffic while bringing the structure up to current standards. The bridge currently has a very low Sufficiency Rating of 20.8 (out of 100) and a Health Index Rating of 80.14 (out of 100). In addition, the capacity rating of the bridge is low with the Inventory Rating at 7.9 tons where the rating standard is typically at 36 tons. As such, the bridge requires weight limit posting at 61% of normal legal load.

FY2027 - FY2031

Category: Transportation **Subcategory:** Road Improvements
Project Title: 51st St. W Extension - 53rd Ave W to El Conquistador Parkway
Department: Public Works
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJ6042761 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 4 51st St W at 53rd Ave W, Bradenton

Description and Scope

(1) Design and permit (i) a four-lane divided thoroughfare road from 53rd Ave W to El Conquistador; and (ii) intersection improvements at 53rd Ave W and El Conquistador Pkwy to supplement the new roadway. Design to include multiuse trail on one side and a five-foot sidewalk on the other side, stormwater ponds, stormwater infrastructure, lighting, etc. (2) Evaluate and determine whether to construct the outside two lanes of the future four-lane roadway or construct all four lanes; (3) Construct the selected roadway improvements and intersection improvements at 53rd Ave W and El Conquistador Pkwy. Land acquisition will be required.

Rationale

51st St. W is an existing urban collector thoroughfare from State Road 64 to 53rd Ave W and is planned to be extended from 53rd Ave W to El Conquistador Pkwy per the County's 2045 Future Traffic Circulation Maps. This extension is within the County's Southwest County Improvement District and will tie together key corridors to enhance economic development and revitalization goals for the Southwest Districts of Manatee County. This will help provide multimodal connectivity to employment centers, educational facilities, tourism destinations, sports venues, and beaches. This County has received state legislative funding in the amount of $2.5 million and federal legislative funding in the amount of $3.5 million for this project.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 44th Ave E-19th St Ct E-30th St E, Bradenton

Description and Scope

Construction of a four-lane divided roadway with bike lanes, sidewalks, and streetlights to provide a future east-to-west thoroughfare.

Rationale

Level of service failures of SR 70 and SR 64 require construction of a new east/west roadway.

Project Location

District 2 44th Ave E - 15th St E - 19th St Ct E, Bradenton

Description and Scope

Construction of a four lane divided roadway with bike lanes, sidewalks and street lights.

Rationale

To provide a future east/west thoroughfare to support anticipated increase in capacity and to relieve demands on SR 70 and SR 64. This project opens up access from 15th Street East into the Manasota Industrial Park to 19th Street Court East, and creates a crossing over the CSX railroad.

Project Title: 44th Ave E - 44th Ave Plaza E - Lakewood Ranch Blvd
Department: Public Works Projects
Project Mgr: Al Neumann
Infra. Sales Tax: Yes
Project #: PJ6045662 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 44th Ave E-44th Ave Plaza E - Lakewood Ranch Blvd, Bradenton

Description and Scope

Includes construction of approximately three miles of roadway improvements from 44th Avenue Plaza East to Lakewood Ranch Boulevard. Includes a four-lane divided roadway with sidewalks, bike lanes/multi-use path, and street lighting, an overpass over I-75, and a bridge crossing over a reclaimed water storage lake, and a bridge over a gas main. This section will include four, 12-foot lanes, a 22-foot median, curb and gutter, four-foot bike lanes, and five-foot sidewalks in each direction.

Rationale

Provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

Project #: PJ6045663 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 44th Ave E at 24th St E, Brandenton

Description and Scope

Construct westbound left and eastbound right turn lane improvements on 44th Ave E at 24th St E in accordance with the approved plans (PLN2212-0049). Process payment applications as outlined in the associated developer's agreement.

Rationale

Due to increase industrial development along this segment of 44th Ave E and the extension of 24th St E to 44th Ave E, increased traffic volume is expected. The County requested the developer of Manatee Industrial to install turn lanes at the 44th Ave E/24th St E intersection with their site development. The project will increase capacity and improve traffic circulation at the intersection.

Project Title: 26th St W over Cedar Hammock Canal - Bridge 134033 Replacement
Department: Public Works
Project Mgr: Jamarr Norman
Infra. Sales Tax: -
Project #: PJ6047761 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 4 26th St W over Cedar Hammock Canal, Bradenton

Description and Scope

The scope includes the design, permitting, land acquisition, project management, and construction of a new bridge on 26th St W over Cedar Hammock Canal. The new bridge will be approximately 28 ft. long x 67 ft. wide. It is anticipated that the new bridge will be built in phases in order to maintain traffic during construction. The project involves minimal roadway geometry improvement to the tie the new bridge into the existing roadway. The project will meet current County Standards while minimizing the project length and impacts to adjacent properties. Minimal land acquisition is anticipated.

Rationale

The 26th St W Bridge (#134033) over Cedar Hammock Canal, constructed in 1963, connects Cortez Rd W to 53rd Ave W and is critical for commercial and residential traffic. In past years, several repairs have been completed to the existing beams and substructure to extend the service life of the bridge. The bridge is posted for weight restriction, functionally obsolete and has a sufficiency rating of 19.7. The bridge is expected to require replacement within the next five years. The goal of the project is to replace the deteriorated bridge with a bridge that meets current standards and improves public safety.

Project Title: Fort Hamer Road - Project Development & Corridor Study (UMRR to Rive Isle Run)
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6054767 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Fort Hamer Road (UMRR to Rive Isle Run), Parrish

Description and Scope

A Project Development & Corridor Study to expand Ft Hamer Rd from two-lanes to four-lanes. The limits are from Upper Manatee River Rd to Rive Isle Run. This will include, (1) evaluating left, center, right, and meandering widening options for alignment, (2) evaluating impacts to adjacent properties, (3) incorporating previous, complete studies for expansion of the Ft Hamer Bridge, (4) determining if the standard typical section or a modified typical section should be used taking into account multi-modal options, stormwater, lighting, and utility needs, (5) construction control line survey/right-of-way map, and (6) additional studies needed to apply for federal grant funding.

Rationale

Widening of the road to support increased traffic and improve the level of service. This includes construction of about 3.87 miles of roadway improvements from Upper Manatee River Rd to US 301 and two more lanes. This is part of the County's Future Traffic Circulation Map and is operating below the adopted level of service. The study will determine the roadway alignment and typical section. Two studies will be completed for the corridor: (1) UMRR to Rive Isle Run and (2) Rive Isle Run to US 301. The project will include additional studies needed to apply for federal grant funding.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Moccasin Wallow Rd - US 301 to W of 115th Ave East, Palmetto

Description and Scope

This project is Segment 1 of a 3 Segment plan, which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301 and is intended to receive 50% funding from the State of Florida. The roadway enhancement for Segment 1 consists of approximately 5,506 LF from US 301 to 115th Avenue East (Copperstone entrance) on Moccasin Wallow Road to support the County's Long-Range Transportation Plan. This project is intended to collaborate efforts with a partnership of State grant funding of $7,200,000 for a total project of $14,400,000. The project, because of cost, is being developed with three segments along the eastern portion of this 4+ mile roadway.

Rationale

Moccasin Wallow is in the very active North County area centered in the northwest of Parrish, wherein thousands of approved single-family homes are under construction. An important east-west connection and evacuation route, this roadway creates an economic opportunity by connecting to the Port of Manatee that will be an important link for Manatee County's economic development. This project leverages a 50% participation by the State of Florida to control the cost to the County. Advancing this project with the outside funds would lay the groundwork for a 4-lane roadway that will act as the backbone for traffic in North County from US41 to US301, similar to University Parkway. This project is not a viable project without the 50% funding participation from the State.

LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Moccasin Wallow Road - I-75 to W of 115th Ave E to W of Sawgrass Rd, Palmetto

Description and Scope

Reconstruct and widen Moccasin Wallow Road to a four-lane divided roadway within a six-lane road right-of-way 115th Ave E to Sawgrass Rd. This will include, 4 travel lanes, bike lanes, sidewalks and street lighting as well as a new signalized intersection at Sawgrass Rd. This project is identified as a concurrency-related improvement, either to mitigate background traffic or project-related traffic impacts, for several developments in the Moccasin Wallow corridor.

Rationale

This project is consistent with the long range need to provide a six lane Moccasin Wallow Rd connection between I-75 and US 301 per the County's adopted Traffic Circulation Plan. Traffic from existing and approved-but-not-yet-built development are expected to exceed the capacity of Moccasin Wallow Rd, and the rural to suburban transition create the need for a multimodal facility. Both of these needs can be addressed by constructing the proposed multi-lane roadway consistent with current County standards.

Project #: PJ6071264
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Moccasin Wallow Road at US 301 N, Parrish

Description and Scope

Complete a preliminary engineering and alignment analysis for the extension of Moccasin Wallow Road as a four-lane section within an ultimate six-lane section from US 301 N to SR 62. The project includes a survey of the recommended alignment.

Rationale

Moccasin Wallow Road is a future arterial throughfare per the County's Future Traffic Circulation Maps (Map 5 Series) from US 41 to SR 62. To support anticipated growth and help alleviate congestion of US 301, there is a need to extend this throughfare to SR 62. The Map 5 Series currently shows this segment as a future four-lane roadway, however it is expected that a map amendment will be initiated to changes to six lanes. The first step is to complete preliminary engineering and alignment analysis for the proposed road corridor.

Project Location

District 4 El Conquistador Pkwy at 34th St W, Bradenton

Description and Scope

Design and construction of safety improvements along El Conquistador Parkway from 49th St W to 34th St W. The project will include safety improvements, potentially including signalization, raised intersections, lane repurposing, bike lane modifications, and striping.

Rationale

This project involves the design and construction of safety improvements recommended after the Project Development and Corridor Study along El Conquistador Parkway from 49th St W to 34th St W. It implements cost effective solutions to address safety deficiencies and improve multimodal mobility along this corridor. Project includes limited design phase as needed for some of the safety improvements.

Project Location

District 1 60th Ave E - US 301 to Factory Shop Blvd, Ellenton

Description and Scope

Design and construct additional lanes as required from US 301 to 29th St E with a new signalized intersection at Factory Shops Blvd. Construct additional/missing sidewalks and/or a multi-use path as required from 29th St E to Mendoza Road. This project also includes the design of 2 lanes with bike lanes and sidewalks from Mendoza Road north to the existing terminus coming south from 69th Street East and signalize the intersections of 60th Ave E at Mendoza Road and 69th St E. (Construction of this section will be under separate project numbers.)

Rationale

This project is expected to improve the capacity and operational efficiency of the existing 60th Avenue East at US 301 signalized intersection and 60th Avenue from US 301 to Mendoza Road.

Project Title: 60th Ave E (Buffalo Road) - Mendoza Road to Buffalo Road Terminus - Segment 2
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: Yes
Project #: PJ6083163 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 60th Ave E (Buffalo Rd) - Mendoza Road to Existing Buffalo Rd, Ellenton

Description and Scope

Includes the extension of 60th Ave E (northward) and intersection improvements at Mendoza Rd/60th Ave E. Of the intersection improvements, signalization with lighting and ITS improvements is to be included. Construct the outside two lanes of the future four-lane roadway with bike lanes and sidewalk from Mendoza Rd north to the existing terminus of Buffalo Rd south of 69th St E along with associated stormwater pond siting and improvements. Construct intersection and signal improvements at 60th Ave E (Buffalo Rd) and Mendoza Rd that include: East leg-WB left and right turn lanes; West leg-EB left and right turn lanes, and intersection signalization with lighting and ITS improvements. Project will require land acquisition. Note: engineering costs are not included as the design will be completed under the current project #6083160.

Rationale

Connects Mendoza Rd to 69th St E and signalize the Mendoza Rd intersection which will improve the capacity and operational efficiency of the Mendoza Rd intersection and road network. Improvements are needed for the road network to function at the desired level of service. Improvements for this project are currently under project #6083160 60th Ave E - US301/Outlet Mall Entrance as part of improvements from US301 to 69th St E. This segment of the existing project will have different construction schedule thus is being separated as a standalone project. Improvements are currently referred to as Segment 2 of the 60th Ave E - US301/Outlet Mall Entrance project.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

Multi-district 44th Ave E - 45th St- 44th Ave Plaza E, Bradenton

Description and Scope

Includes construction of 1.3 miles of roadway improvements from 45th Street East to 44th Avenue Plaza East; to include a four-lane divided roadway with sidewalks, bike lanes, and street lighting, and a bridge crossing the Braden River. This section will include four 11-foot lanes, a 22-foot median, curb and gutter, 6-foot bike lanes, 10-foot sidewalk on northside and 5-foot sidewalks on southside. Morgan Johnson Road and Caruso Road will be realigned to connect at a single intersection on 44th Avenue East.

Rationale

To provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

Project Title: Golf Course Rd over Gamble Creek Bridge Replacement
Department: Public Works
Project Mgr: Albert Rosenstein
Infra. Sales Tax: -
Project #: PJ6090960 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 1 Golf Course Rd over Gamble Creek Bridge, Parrish

Description and Scope

Design and construct a new bridge to replace the existing bridge on Golf Course Rd over Gamble Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and providing sidewalks allowing for bicycle and pedestrian traffic to improve safety. The alignment may also shift slightly and the roadway profile will be raised to provide the necessary clearance over the creek for storm elevation. The estimated dimensions of the new bridge are approximately 200 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

This structure on Golf Course Rd is on a main collector route that carries traffic between Ft. Hamer Rd to Rye Rd. Designing and replacing this structure allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance during the early part of anticipated 75 year life of the new structure. The bridge (FDOT# 134021) was constructed in 1965, has a fair sufficiency rating of 71.5 (out of 100), and has past settlement issues. The bridge is also located along a route that is having growth from various developments.

Project Location

District 1 Moccasin Wallow Road-US 41-Gateway Blvd, Palmetto

Description and Scope

Design and land acquisition for an ultimate build out of a six-lane road. Construct four lanes from US41 to Gillette drive(west of I75), with bike lanes, sidewalks, and street lighting. To realize a cost savings the following two Moccasin Wallow road projects 6093960 (IST TRRI022 - $6,371,000), and 6094460 (IST TRRI021 - $7,390,000) have been closed and combined with 6092560. Contract a right turn lane for the Southpoint (M/I Homes) Development per the PILORI agreement.

Rationale

Expand service by improving existing traffic capacity between I-75 and Port Manatee.

Project #: PJ6094360 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 2 US 301 to 17th St E, Palmetto

Description and Scope

Design and construct four (4) travel lanes between US 301 to north of 17th Street East. Include the realignment of Mendoza Road connecting 37th Street East to 39th Street East at Canal Road.

Rationale

To meet current design standards for thoroughfare roadways. Traffic analysis indicates an increase in traffic volume on Canal Road between US 301 and 17th Street East. Therefore, increasing the scope of work to design and construct four (4) lanes instead of two (2) will increase safety to the motoring public. Further, the realignment of Mendoza Road connecting the eastern segment, 37th Street E, to the western segment, 39th Street E, at one intersection on Canal Road will decrease conflicts at the intersection allowing for a safer traffic movement.

Project Location

Multi-district Canal Rd - 37th St E to 49th St E, Palmetto

Description and Scope

Design and construction of a functional improvement of a segment of Canal Rd generally between 37th ST E and 49th ST E and a realignment of 37th ST E (on the east) north to 39th ST E to form a single intersection.

Rationale

The functional improvement of this segment of Canal Rd from 37th ST E to 49th ST E and the realignment of Mendoza Rd (37th ST E) north to meet 39th ST E at a single intersection with a traffic signal or roundabout. The functional improvements will include minimum 11' travel lanes, shoulders, street lighting and sidewalks and/or a multi-use path on one side in lieu of bike lanes. This segment is part of an overall Canal Rd improvement and the exact boundaries may have small sections of overlap depending on the order of construction to allow for proper transitions from old to new.

Project Location

District 5 Bourneside Blvd at SR 70 E

Description and Scope

Design, permit, and construct a 15-foot multiuse trail, where possible within existing right-of-way, along the east side of Bourneside Boulevard from SR 70 to SR 64.

Rationale

The Gateway Greenway Trail (Greenway Trails) is a planned multi-purpose recreational trail system to extend from Hillsborough/Manatee County line south Sarasota County connecting parks, preserves, and other planned trails systems in the state. This project includes the Bourneside Boulevard North section of the Greenway Trail from State Road 70 to State Road 64. This project is being implemented via a developer's agreement with the Lakewood Ranch Stewardship District.

Project Title: 9th St E North of US301 RR Crossing Replace
Department: Public Works
Project Mgr: Steve Laney
Infra. Sales Tax: -
Project #: PJ6096960 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 2 9th St E - N of US 301, Bradenton

Description and Scope

This project is to work with CSX to replace the traffic wearing surface of the this five lane wide two track crossing just north of US 301.

Rationale

This rail crossing surface has reached the end of its useful life and is degrading rapidly. This crossing is adjacent to the Tropicana processing plant and takes tremendous truck traffic from loaded orange delivery trucks. This route also serves as an easy connection between US 301 and SR 64 for those avoiding the traffic congestion on 1st St. This project is needed soon as experience has shown when rubberized panel crossings such as these show failure they degrade at an alarming rate. This has been shown on the Tallevast Rd crossing repair just last year. It continues to be shown on SR 70 at the Seminole Gulf tracks.

Project Title: 9th St W over Cedar Hammock Canal - Bridge 134076 Rehabilitation
Department: Public Works
Project Mgr: Gil Bullock
Infra. Sales Tax: Yes
Project #: PJ6100461 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

Multi-district 9th St W over Cedar Hammock Canal, Bradenton

Description and Scope

Design, permit, and rehabilitate the existing bridge on 9th St W over Cedar Hammock Canal, Bridge #134076, using spin-cast rehabilitation method.

Rationale

The 9th St W Bridge (#134076) over Cedar Hammock Canal, constructed in 1960, connects SR 684 (Cortez Rd W) to 301 Blvd W and is critical for commercial and residential traffic. The structure was deemed structurally deficient in 2020 and has a current sufficiency rating of 54.1. Based on the current bridge conditions, the bridge is expected to require rehabilitation within the next five years. The goal of the project is to restore the structural integrity of the structure and improve public safety. Rehabilitation methods such as full structural replacement, slip lining, and spin-casting were evaluated with spin-casting being selected due to lower costs and impacts to the roadway. It is expected traffic will remain open during construction. There are no anticipated impacts to adjacent properties.

Category: Transportation
Subcategory: Road Improvements
Project Title: Mulholland Road Extension
Department: Public Works
Project Mgr: Dafne Seeland
Infra. Sales Tax: Yes
Project #: PJ6102161
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 1 Mulholland Road at Rye Road, Parrish

Description and Scope

Evaluate, design, permit, and construct a two-lane, undivided collector thoroughfare roadway from the existing eastern terminus of Mulholland Rd to Rye Rd. The roadway is to include at least closed drainage, sidewalk and trail, and lighting. Additionally, design, permit, and install a span wire traffic signal and associated turn lanes at the Mulholland Rd/Rye Rd intersection. Acquire land as necessary for the project.

Rationale

Mulholland Rd is a two-lane collector throughfare per the County's 2045 Future Traffic Circulation Plan (Map 5 Series). This road currently dead ends approximately one-half mile west of Rye Rd. Due to continued growth and traffic demand in the area, there is a need to extend Mulholland Rd to Rye Rd. With the extension, staff recommend installation of a span wire traffic signal at this intersection pending ultimate buildout when North Rye Rd is widened. Extending Mulholland Rd along with the traffic signal is expected to improve the traffic circulation and safety for all users.

Project Title: 9th Ave NW - 92nd St NW - 99th St NW
Department: Public Works
Project Mgr: Steve Clark
Infra. Sales Tax: Yes
Project #: PJ6102460
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 3 9th Ave NW - 71st St NW - 99th St NW, Bradenton

Description and Scope

This project is to reconstruct the west end of 9th Ave NW from 75th St NW to 99th St NW and install a multiuse trail on the north side of 9th Ave NW from 99nd St NW to 75th St W. The project reconstruction area will include bike lanes, curb, stormwater piping, stormwater ponds and likely wetland mitigation areas and/or flood plain conservation areas. In addition, a five-foot sidewalk will be constructed on the south side of the 9th Ave NW from 75th St NW to 71st St NW, along with drainage improvements to accommodate the installation of the sidewalk.

Rationale

Due to the success of Robinson Preserve and the recent opening of a second access point from 9th Ave NW, the deficiencies of 9th Ave NW from 71st St NW to 99th St NW have become glaring. The road in this area is 17-18 feet wide, with no sidewalks and very close ditches on both sides. There is also minimal shoulder between the edge of the road and the ditch. This makes not only access to Robinson Preserve undesirable because the increased traffic has a difficult time passing two cars at a time in this section. Also bike riders and walkers in this area have no extra space or dedicated area to safely use. Sidewalk has been requested by the School Board along 9th Ave NW from 71st St NW to 75th St NW to provide a safe route to school and in response to multiple requests for sidewalks from the general public.

Project Title: Lakewood Ranch Blvd - SR 70 to University Parkway - Pavement Reconstruction
Department: Public Works
Project Mgr: Phil Catalano
Infra. Sales Tax: -
Project #: PJ6102961 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 5 Lakewood Ranch Blvd at University Parkway, Bradenton

Description and Scope

Design, permit, and construct full base reconstruction and resurfacing of Lakewood Ranch Blvd from University Pkwy to SR 70 (approximately 2.9 miles). Including sidewalk repairs as various location along the roadway, material testing, pedestrian striping enhancements, and install MVDS at all traffic signals.

Rationale

The asphalt condition in this section is poor; recent roadway coring data showed that the base, suffering water intrusion (through the cracked asphalt), is not meeting the Limerock Bearing Value as required per specifications. Staff recommends the pavement be reconstructed (base and asphalt). Additionally, sidewalk repairs (at various locations), pedestrian striping enhancements, and traffic signal upgrades, such as Microwave Vehicle Detection Systems (MVDS) will be included as part of the project.

Project #: PJ6104760
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 1 Duette Rd Bridge over Manatee River, Parrish

Description and Scope

This project begins the process to replace the Duette Rd bridge over the Manatee River. This structure is 60+/- years old. While it is still a very rural road with low traffic volumes, the importance of this road is critical to the economy of the area where the detour is 25 miles or more.

Rationale

The design process must take place first to determine construction as the alignment and construction method will greatly affect the cost. Past discussions and mining permits with Mosaic, there is a potential for a cost share. The design process will include the process to select the alignment and construction method. It must first be determined whether or not to attempt to smooth curve of the road. The process then determines if the road will be closed during construction or if some form of temporary staged construction or route will be used. The results of this project will provide biddable plans and a very accurate construction cost estimate.

Category: Transportation **Subcategory:** Road Improvements
Project Title: 51st Avenue East (Ellenton):US 301 to 17th Street East
Department: Public Works
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6104860 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 2 51st Ave E - US 301 to 17th St E, Ellenton

Description and Scope

Design and widen 51st Avenue East as a four-lane roadway with closed drainage between US 301 and 17th Street East, including improvements to the existing signalized intersection of 51st Ave E at US 301. The improvement will help achieve and maintain adopted LOS for traffic from existing development and the Ellenton Commerce Park.

Rationale

51st Ave E is an existing component of the planned 49th Ave E collector road spine west of I-75 in north County. Existing operational characteristics and increasing traffic prompt a need to widen 51st Ave E and improve the southbound approach to the 51st Ave E at US 301 signalized intersection.

Project Title: Lena Road - SR 70 to SR 64
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: No
Project #: PJ6107561
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 Lena Road at SR 70, Bradenton

Description and Scope

Design, permit, and construct Lena Road as a two-lane urban roadway from its existing terminus (north of SR 70) to SR 64 with associated stormwater and pedestrian improvements. Includes: roundabouts at 44th Ave E and Brower/Musgrave Ranch Road; modification to SR 64 and 54th Drive East (between Lena Road and 87th Street East) as required for the project and land acquisition.

Rationale

This project includes constructing the missing component of the incomplete urban collector throughfare east of I-75, improving the existing undivided roadway to a two-lane divided urban corridor, and improving SR 64 and 54th Drive East, as necessary for the project. This is consistent with the long range need to provide a two-lane collector thoroughfare between SR 64 and SR 70 per the County's adopted 2045 Future Traffic Circulation Plan Maps. With the County's programmed project to extend 44th Ave E through this area, completing the Lena Rd connection will improve mobility, accessibility, and provide a parallel alternative to I-75.

Project Location

District 5 Lorraine Rd - SR 64 to 59th Ave E, Bradenton

Description and Scope

This project is part of the county's Comprehensive Plan Future Traffic Circulation Map and includes construction of approximately 2.76 miles of roadway improvements from SR 64 to 59th Avenue East. The proposed widening will include one bridge, four lanes, a median, curb and gutter, bike lanes, sidewalks in each direction, and street lighting.

Rationale

Manatee County intends to widen this section of Lorraine Road to support an anticipated increase in traffic demand and help maintain the county's adopted levels of service for parallel facilities including Lakewood Ranch Boulevard, White Eagle Boulevard, and Uihlein Road.

Project Title: Lorraine Rd Phase 1 - South of SR 70 to Hidden River Trail
Department: Public Works
Project Mgr: Phil Catalano
Infra. Sales Tax: Yes
Project #: PJ6107661 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 5 Lorraine Road, Bradenton

Description and Scope

Mill & resurface from SR 70 to Hidden River Trail. This is Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year. (1.2 centerline miles).

Rationale

Lorraine Rd is a major N/S connector for Manatee County and extends south of the county line into Sarasota County. This section connects the commercial centers of Lakewood Ranch with multiple neighborhoods and major E/W connectors such as SR 70 and University Parkway. Resurfacing would act as a preventative maintenance treatment in preserving the existing base. Prior maintenance projects have resurfaced the road from University Parkway to a point approximately one mile north, and this project would finish the resurfacing effort up to SR 70. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road has a sidewalk, the project would make repairs in various locations to cracked and/or shatter slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.

Project #: PJ6107760 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 Upper Manatee River Rd N of SR 64 to Ft Hamer Bridge, Bradenton

Description and Scope

Reconstruct and widen Upper Manatee River Road from north of SR 64 to Fort Hamer Bridge from 2 to 4 lanes. This project is identified as a concurrency-related improvement, either to mitigate background traffic or project-related traffic impacts, for several developments in the area.

Rationale

This project is consistent with the long range need to provide a four lane Upper Manatee River Road connection between SR 64 and the Fort Hamer Bridge per the County's adopted Traffic Circulation Plan. Traffic from existing and approved-but-not-yet-built development is expected to exceed the capacity of Upper Manatee River Road. This need can be addressed by constructing the proposed multi-lane roadway consistent with current County standards.

Project Location

District 4 63rd Ave E - US 301 to Tuttle , Bradenton

Description and Scope

This roadway widening project will create additional capacity for about 10,000 vehicles per day in a 1.12 mile corridor and help alleviate congestion on parallel sections of SR 70. Although this link is not currently failing, but it is projected to reach capacity in the near future.

Rationale

Manatee county intends to widen this section of 63rd Avenue East to support an anticipated increase in traffic demand and help maintain the county's adopted levels of service for parallel facilities including SR 70. This project is part of the county's Comprehensive Plan Future Traffic Circulation Map and includes construction of approximately 1.12 miles of roadway improvements from US 301 to 39th Street East (Tuttle Avenue). The proposed widening will include a four-lane divided roadway with sidewalks, bike lanes, and street lighting.

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 3 75th St W - 20th Ave W to Manatee Ave W, Bradenton

Description and Scope

Widen the existing two lane roadway to a four lane roadway with a center left turn lane and/or median from 20th Ave to Manatee Ave (approximately 1 mile). Add and upgrade pedestrian and bicycle facilities, replace and upgrade traffic signals as needed to accommodate the widening, and add lighting. Project will require right-of-way acquisition. Due to right-of-way constraints the improvement will not meet the County's standard typical 4-lane section.

Rationale

The road is proposed to be widened from 2 lane to 4 lane to increase capacity. The section operates below the County's adopted level of service. The project will tie into the existing 4 lane section at 20th Ave and provide a 4 lane road all the way from Cortez Rd to Manatee Ave which will provide improved north south traffic circulation and prepare for future traffic growth.

Project Location

District 3 75th St W - Cortez Rd - Bridge # 134094, Bradenton

Description and Scope

This project encompasses design, bidding and construction of a 7,000 LF of roadway base, asphalt surfacing and repair sidewalks and curbing.

Rationale

Rebase and Resurface 75th St W from Cortez Road to Bridge #134094. Base failures are causing this roadway to fail and cannot be repaired with a typical resurfacing job.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Erie Rd - Martha Rd to US 301, Parrish

Description and Scope

The proposed widening will include four 12-foot lanes, a 22-foot median, curb and gutter, four-foot bike lanes, five-foot sidewalk on the south side, 10-foot multi-use trail on the north side, and street lighting. The intent is to complete this work just before the State College of Florida opens their Parrish Campus at the NW corner of Fort Hamer and Erie Road.

Rationale

Manatee county intends to widen this section of Erie Road along with a multi-use trail to support an anticipated increase in traffic demand, to facilitate traffic operation, vehicular turning movements at Parrish Community High School and to encourage non-motorized mobility options . This project includes construction of approximately 1 mile of roadway improvements from Martha Road to US 301.

Project Title: 28th Avenue East - US301 to 17th St E
Department: Public Works
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJ6109260
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 2 28th Ave E - US301 to 17th St E, Palmetto

Description and Scope

The project plans to relocate the roadway to the east in ROW of the County. The new 24' road will have two different typical sections designated by two phases. Phase 1 from US 301 to the north approx. 800 feet only paving the existing shell roadway and Phase 2 the remaining 1,800 feet north to 17th St E which includes paving, drainage improvements, curb and gutter, and sidewalk. Work will include significant stormwater work to replace road crossings and/or relocate or pipe ditches. This new paved roadway will provide additional access between US 301 and 17th ST E between Canal Rd and Ellenton Gillette Rd.

Rationale

Manatee County intends to relocate and improve a short section of 28th Ave E from US 301 to 17th ST E in the Ellenton/Palmetto area. The existing shell road for half the length of the project lies within the ROW of the FPL railroad. It has been a goal to shift the road to the east for many years. Now, through efforts with new development in the area, the ROW to make this shift to the east has come to fruition. The last piece of the puzzle was the planned location of Manatee County Mosquito Control District facility to this roadway.

Category: Transportation **Subcategory:** Road Improvements
Project Title: Kay Rd over Cypress Strand Bridge Replacement
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6109360 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 5 Kay Rd over Cypress Strand Bridge, Bradenton

Description and Scope

Design and construct a new bridge to replace the existing bridge on Kay Rd over Cypress Strand. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and allow for bicycle and pedestrian traffic to improve safety. Also, will include modifying the roadway profile to decrease overtopping conditions. The estimated dimensions of the new bridge are approximately 45 ft. long x 50 ft. - 8 in. and the design will provide allowances for future widening to accommodate 4 lanes. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

Although the Kay Rd over Cypress Strand is a relatively new bridge, due to the rapid growth in the area, the bridge has become significantly substandard and functionally obsolete. Traffic has increased by about 5000% since about 2006 since Port Harbour pkwy was opened. The bridge has high traffic and pedestrian volume. The bridge was once a dead end location but now has through traffic and is forecast to become a collector route. Designing and replacing this structure allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance with a significant improvement of safety during the early part of anticipated 75 year life of the new structure. The bridge was constructed in 1985, has a fair sufficiency rating of 77.3 (out of 100) but is classified as functionally obsolete. In addition, the bridge is currently classified as a scour critical bridge from the recent unknown foundation scour program.

FY2027 - FY2031

Category: Transportation **Subcategory:** Road Improvements
Project Title: Bobby Jones Court Bridge Rehabilitation
Department: Public Works
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6109361 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 1 Bobby Jones Ct over The Fairways Pond, Palmetto

Description and Scope

The scope includes the permitting, project management, and rehabilitation of the existing structure on Bobby Jones Ct over The Fairways Ponds. The anticipated rehabilitation will consist of slip lining the existing structure with HDPE. The roadway geometry and overall structure footprint with remain unchanged. No road closure is anticipated but sidewalk closure may be necessary. Temporary access for staging and material storage is anticipated at the southeast corner of the structure which involves temporary impacts to the golf course property.

Rationale

The Bobby Jones Ct Structure (Bridge NB3046) over The Fairways Ponds consists of three 8' diameter corrugated metal pipes with each being approximately 101' long with custom decorative concrete headwalls. An initial inspection was completed in February 2023 and found severe corrosion with areas of 100% section loss throughout all three barrels. An underwater inspection was completed in November 2023 that confirmed these deficiencies. Preliminary hydraulics indicated that only 1 of the 3 barrels were required for capacity. However, the preliminary cost analysis indicated that rehabbing all three barrels is still the most cost effective option. Based on the current structure conditions, the structure is expected to require rehabilitation within the next year. The goal of the project is to extend the service life of the structure through rehabilitation and improve public safety.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Erie Rd - 69th St E to Martha Road, Parrish

Description and Scope

Perform a Preliminary Engineering Design to begin land acquisition of Erie Road from 69th St E to Martha Road including a full survey of the corridor, to include the extension of Harrison Ranch Blvd to the north and the Sawgrass Rd connection tie in, to accommodate for future needs of development connections. Project will require right-of-way acquisition and possible eminent domain, therefore, deliverables to include preparation material for legal documentation for eminent domain are to be provided. The Design is to be based on guidance provided in the Florida Department of Transportation (FDOT), as applicable for a non-State roadway. Also, design and construction of roadway improvements from 69th St E to Martha Road based on the preliminary design from the adopted alignment. The project will include widening from two lanes to four lanes, with median, curb and gutter, bike lanes, street lighting and sidewalk along south side of the project.

Rationale

Manatee County intends to widen this section of Erie Road to support anticipated increase in traffic demand, to facilitate traffic operation, vehicular turning movements at Parrish Community High School, to encourage non-motorized mobility options, and help maintain the county's adopted levels of service. This project is part of the county's Comprehensive Plan Future Traffic Circulation Map. The project will include widening from two lanes to four lanes, with median, curb and gutter, bike lanes, street lighting, and sidewalk along the south side of the project corridor limits.

Category: Transportation **Subcategory:** Road Improvements
Project Title: Summerwoods Roadway Participation Agreement
Department: Public Works
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: -
Project #: PJ6114860 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Moccasin Wallow Road at Sawgrass Road, Parrish

Description and Scope

Design, permit, and construct roadway improvements, with associated stormwater retention, and wetland mitigation that results from the construction of the roadway improvements. Also, design and permit the Army Corps of Engineers permits for the mitigation required for off-site wetland impacts related to Sawgrass Road extending north from Erie Road to the South boundary of the Project. All as described in the agreement.

Rationale

A Local Development Agreement (LDA) with the VK Summerwoods LLC ("Developer") requires certain improvements to be made to address concurrency related to the Summerwoods residential development project ("Project"). The improvements create additional capacity above what is required by the Project and therefore the Developer is eligible for impact fee credits. However, due to the current market conditions, the Developer is unable to utilize all the credits contemplated in the LDA. The LDA requires that the if any impact fee credits are not awarded to the Developer, then the County shall reimburse the cash equivalent not credited for improvements. A roadway participation and reimbursement agreement ("Agreement") is to be used to address the remaining amount of impact fee credits and reimbursement to be provided to the Developer. This Agreement requires the creation of a fully funded capital improvement project to serve as the reimbursement account for the improvements.

Project Title: Saltmeadows - Sand Marsh Ave - Thoroughfare Improvement
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6114960 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct a two-lane boulevard thoroughfare roadway as part of the Saltmeadows development in accordance with the approved construction plans for development. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

A preliminary site plan (PSP) for the Saltmeadows (fka Dakin Property/Crosswind Creek) was approved depicting a local two-lane road bisecting the development property. At the time of construction plan review, staff was in the process of revising the Future Traffic Circulation Maps (Map 5 Series) to include a parallel thoroughfare (NN Road) facility to the east of Spencer Parrish Road from Golf Course Road to State Road 62. The new thoroughfare section requires additional construction costs not attributable or required by the development project. This project is to fund the developer's agreement for the reimbursement of additional construction costs incurred by the developer for the construction of a thoroughfare roadway section instead of a local road.

Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Moccasin Wallow Road - I-75 - W of Sawgrass Rd to Buffalo Rd

Description and Scope

Reconstruct and widen Moccasin Wallow Road to a four-lane divided roadway within a six lane road right-of-way from Sawgrass Road to Buffalo Road. The improvements will include four travel lanes, bike lanes, sidewalks, and street lighting, as well as a new signalized intersection at Carter Road and additional signalized improvements along the corridor as needed. Including additional pedestrian, lighting, and signalization improvements between 49th Avenue E and Buffalo Road. Also, this project is identified as a concurrency-related improvement, either to mitigate background traffic or project related traffic impacts, for several developments in the Moccasin Wallow corridor.

Rationale

This project supports the long-range need for a six-lane Moccasin Wallow Rd connection between I-75 and US 301 per the County's adopted Traffic Circulation Plan. Capacity is expected to be exceeded due to existing and approved development, and the rural-to-suburban transition creates a need for a multimodal facility. The project also improves pedestrian connectivity and enhances vehicle operations at the I-75 ramps, as FDOT's ultimate interchange work is beyond its current 5-year program.

Infra. Sales Tax: -
Project #: PJ6118060 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Fort Hamer Road - Moccasin Wallow Road to Fort Hamer Bridge

Description and Scope

Design and construct the widening of Fort Hamer Road from Moccasin Wallow Road to the Fort Hamer Bridge to create a divided four-lane thoroughfare (approximately 5.2 miles). The typical section will include a grass median, turn lanes (as needed), pedestrian & bicycle facilities, and lighting. Modification of four signalized intersections will be required to accommodate the roadway widening. Project will require right-of-way acquisition.

Rationale

Manatee County intends to widen Fort Hamer Road from two-lanes to four-lanes to support current traffic levels as well as an anticipated increase in traffic demand. The widening limits will be from Moccasin Wallow Road southward to the existing Fort Hamer Bridge, that is planned to be expanded to a four-lane bridge concurrently with this project. The road between Moccasin Wallow Road and 301 was built and designed to accommodate this planned expansion to 4-lanes. This roadway segment is part of the County's Comprehensive Plan Future Traffic Circulation Map. The State has approved 2.5 million dollars in design grant funding to support this project.

FY2027 - FY2031

Category: Transportation
Subcategory: Road Improvements
Project Title: Fort Hamer Bridge - 4 Lane
Department: Public Works
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6118061
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Fort Hamer Bridge, Parrish

Description and Scope

Design and construct a two-lane bridge facility parallel to the existing Fort Hamer Bridge. Design to include pedestrian & bicycle facilities and lighting. It is anticipated that a Project Development & Corridor Study will be completed prior to starting the design.

Rationale

Manatee County intends to construct a two-lane bridge parallel to the existing Fort Hamer Bridge to serve as the southbound lanes for the 4 lanes build out. The existing two-lane bridge currently operates below the County's adopted level of service. The bridge expansion will alleviate existing deficiency as well as provide sufficient capacity to accommodate anticipated traffic growth. The bridge expansion, together with planned and underway roadway widening projects north and south of the existing bridge, will ensure a continuous four lane road from University Parkway to US 301, creating a parallel reliever facility to I-75 and add capacity to a crucial bridge over Manatee River. The State has approved 3 million dollars in design grant funding to support this project.

FY2027 - FY2031

Category: Transportation
Subcategory: Road Improvements
Project Title: North Rye Road 4-Lane Widening
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: No
Project #: PJ6118362
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Rye Road south of Rosedown Glen, Parrish

Description and Scope

Evaluate, design, permit, and construct: (i) four-lane widening of North Rye Road from south of Rosedown Glen to County Road 675, (ii) required stormwater, pedestrian, and roadway lighting improvements, (iii) evaluate intersection control at Golf Course Road, Mulholland Road, and Rivers Reach Boulevard/Legacy Preserve Drive intersections and if appropriate design, permit, and construct two-lane roundabout(s) or traffic signal(s). Land acquisition is anticipated.

Rationale

Rye Road is a future arterial thoroughfare per the County's 2045 Future Traffic Circulation Plan (Map 5 Series) from State Road 64 to State Road 62. Due to current and future growth in the surrounding area, there is a need to widen North Rye Road to four lanes from south of Rosedown Glen to County Road 675 to improve safety and traffic circulation. The limits of this project are covered by a Local Development Agreement (LOA) with Rye Ranch for the design, permit, and construction of a two-lane divided roadway that will be partially funded by $5 million in impact fee credits. It is anticipated that the agreement will be amended for the four-lane widening.

Project #: PJTP25038 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 5 Port Harbour Pkwy at Kay Rd, Bradenton

Description and Scope

Design, permit, and construct full base reconstruction and resurfacing of Port Harbour Pkwy from Kay Rd to Golden Harbour Trl. Including material testing, sidewalk repairs at various locations along the roadway, and pedestrian striping enhancements.

Rationale

Port Harbour Pkwy connects Kay Rd to Upper Manatee River Rd and provides access to several residential neighborhoods in the area. The condition of the road from Kay to Golden Harbour Trl has deteriorated to an extent that milling & resurfacing the road is not adequate for rehabilitation. Staff recommends full reconstruction of the pavement (base and asphalt). Additionally, repairs to damaged sidewalks at various locations long the roadway and pedestrian striping enhancements are recommended.

Project Title: State Road 64 PD&E Study - Lorraine Road to Verna Bethany Road
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP25043 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

Multi-district SR 64 (Lorraine Road to Verna Bethany Road)

Description and Scope

Complete a Project Development & Environmental Study to expand SR 64 from two-lanes to four-lanes between Lorraine Road and Verna Bethany Road (approximately 7.75 miles). As this is a state road the PD&E study must follow FDOT guidelines and requirements. The study should also evaluate intersections along the corridor including planned roundabouts by FDOT, widening the bridge crossing over the Manatee River at Lake Manatee, and future water and sewer utility extensions or upsizing needs along this corridor.

Rationale

Due to existing and anticipated traffic growth in this area of Manatee County, there is a need to increase capacity on SR 64 by widening it from two lanes to four lanes from the existing four-lane section near the Lorraine Road intersection eastward to Verna Bethany Road. The first step of this project is to complete a Project Development & Environmental (PD&E) study to determine, among other things, the preferred roadway alignment and typical section.

Project Title: Palma Sola Blvd - Bridge 134015 Replacement
Department: Public Works
Project Mgr: Gil Bullock
Infra. Sales Tax: Yes
Project #: PJTP26030 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 3 Palma Sola Blvd over Palma Sola Bay, Bradenton

Description and Scope

The scope includes the design, permitting, land acquisition, project management, and construction of a new bridge on Palma Sola Blvd over Palma Sola Bay. The anticipated bridge will be 65 ft. long x 43 ft. wide. It is anticipated that the new bridge will be built with a full road closure. The potential for sidewalks for the new bridge will be evaluated during design. The project involves minimal roadway geometry improvement to tie the new bridge into the existing roadway. The project will meet current County Standards while minimizing the project length and impacts to adjacent properties.

Rationale

The Palma Sola Blvd Bridge (No. 134015) over Palma Sola Bay, constructed in 1962, connects SR 684 (Cortez Rd W) to SR 64 (Manatee Ave W) and is critical for residential traffic. In recent years, significant rehabilitation such as pile jackets and fiber wrapping were completed to extend the service life of the bridge. The bridge is posted for weight restriction, scour critical and a sufficiency rating of 61.5. The bridge is expected to require replacement within the next five years. The goal of the project is to replace the deteriorated bridge with a bridge that meets current standards and improves public safety.

Project #: PJTP26032 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 1 Singletary Rd over Branch of Myakka River, Myakka City

Description and Scope

The scope includes the design, permitting, land acquisition, project management, and construction of a new bridge on Singletary Rd over Branch of Myakka River. The new bridge will be approximately 60 ft. long x 43 ft. wide. It is anticipated that the new bridge will be built with a full road closure. Due to flood history, it is anticipated that the new bridge and approaches will need to be raised to provide adequate freeboard and roadway serviceability. The project will meet current County Standards while minimizing the project length and impacts to adjacent properties. Land acquisition is anticipated.

Rationale

The Singletary Rd Bridge (#134055) over Branch of Myakka River, constructed around 1970, connects Betts Rd to SR 70 and is critical for agricultural, residential and future development traffic. Routine maintenance and minor bridge repairs has been completed to extend the service life of the bridge. The bridge is in fair condition, posted for weight restriction and has a sufficiency rating of 60.8. The bridge is expected to require replacement within the next five to ten years. The goal of the project is to replace the deteriorated bridge with a bridge that meets current standards and improves public safety.

Project Location

District 2 26th Ave E over Sugarhouse Creek, Bradenton

Description and Scope

The scope includes the design, permitting, land acquisition, project management, and construction of a new bridge on 26th Ave E over Sugarhouse Creek. The new bridge will be approximately 20 ft. long x 49 ft. wide to accommodate sidewalks. It is anticipated that the new bridge will be built with a full road closure. Due to flood history, it is anticipated that the new bridge and approaches will be raised to provide adequate freeboard and roadway serviceability. The project will meet current County Standards while minimizing the project length and impacts to adjacent properties. No anticipated land acquisition.

Rationale

The 26th Ave E structure (#NB1006) over Sugarhouse Creek, constructed around 1955, connects 27th St E to 39th St E and is critical for residential and future development traffic. Routine maintenance and minor bridge repairs has been completed to extend the service life of the bridge. The bridge is functionally obsolete, posted for weight restriction and has a sufficiency rating of 48.0. The bridge is expected to require replacement within the next five to ten years. The goal of the project is to replace the deteriorated bridge with a bridge that meets current standards and improves public safety.

Project Location

Countywide Countywide

Description and Scope

Perform PD&E, design, permitting, land acquisition, and construction of segments of the East-West Gateway Greenway Trail from SR 789/Gulf Drive to Parrish. The project will include trail construction, stormwater management, signing and marking, road crossing infrastructure, and trail amenities as appropriate. This will be a phased project, with available funding strategically allocated across the various segments and phases.

Rationale

This project is part of the long-planned multi-use recreational trail system, designed to enhance multi-modal connectivity, promote sustainable transportation, and provide recreational opportunities throughout the County. It aligns with the Florida Department of Transportation's SUN Trail Network, which aims to establish a seamless, non-motorized corridor connecting Sarasota County to Hillsborough County.

LOS/Concurrency: No Project Need: Growth

Project Location

Countywide Countywide

Description and Scope

Perform PD&E, design, permitting, land acquisition, and construction of segments of the North-South Gateway Greenway Trail from University Blvd to the Hillsborough County line. The project will include trail construction, stormwater management, signing and marking, road crossing infrastructure, and trail amenities as appropriate. This will be a phased project, with available funding strategically allocated across the various segments and phases.

Rationale

This is part of the long planned multi-use recreational trail system that will enhance multi-modal connectivity, promote sustainable transportation, and provide recreational opportunities across the County. This aligns with the Florida Department of Transportation's SUN Trail Network.

Project Title: 127th St W Over Palma Sola Bay Bridge (#134115) Replacement
Department: Public Works
Project Mgr: Gil Bullock
Infra. Sales Tax: Yes
Project #: PJTP26068 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 3 127th St W over Palma Sola Bay West

Description and Scope

Includes project management, design, permitting, and replacement of Bridge 134115 on 127th St W over Palma Sola Bay West. Work will involve demolishing the existing structure, constructing a new bridge within the same footprint, and maintaining the current roadway geometry. A full road closure will be required during construction, with traffic detoured, due to limited staging areas and site constraints.

Rationale

Bridge 134115, built in 2009 along 127th St W over Palma Sola Bay West, is vital for residential and marine access. An April 2023 inspection found severe corrosion of tiebacks and hardware, compromising the stability of the steel sheet piling. Because these elements are critical to structural integrity, replacement is required to ensure long-term safety, reliability, and continued access for the community.

Category: Transportation **Subcategory:** Road Improvements
Project Title: Carter/Sawgrass Road Extension with Erie Road Roundabouts
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTP26069 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 Carter Road at Erie Road, Parrish

Description and Scope

Design, permit, and construct (i) the outside two lanes of Carter Road, from it current terminus south to Erie Road, (ii) a roundabout at the Sandy Shores Street intersection, (iii) a roundabout at the northeast corner of the property owned by Bradenton Christian School Society, Inc., (iv) street lighting for Carter Road from Moccasin Wallow Road to Erie Road, (v) the "oversizing" of a local road from Carter Road to Sawgrass Road south of Buffalo Canal with a multiuse path along the north side. This project also includes Roundabouts at Carter Rd/Erie Road and Sawgrass Erie Road intersection.

Rationale

Carter Road and Sawgrass Road are future collector thoroughfares per the County's 2045 Future Traffic Circulation Plan (Map 5 Series) from Erie Road to Buckeye Road. Due to current and future growth in the surrounding area, there is a need to extend the existing Carter Road and Sawgrass Road termini to connect to Erie Road to improve safety and traffic circulation. This project request is for a portion of an overall larger developer construction agreement that includes the design, permitting, and construction of roadway improvements for Carter Road and Sawgrass Road and related transportation and stormwater improvements This project is part of an overall project that includes funding via impact fee credit, reimbursement, and CIP Project number PJ6111360. This project request is to fund the reimbursement portion of the developer's agreement for the Carter Road extension to Erie Road (approximately 50% of the costs).

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Transportation
Subcategory: Road Improvements
Project Title: Countywide Bridge Rehabilitation
Department: Public Works
Project Mgr: Gil Bullock
Infra. Sales Tax: Yes
Project #: PJTP26071
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Maintenance

Project Location

Multi-district Countywide

Description and Scope

The Countywide Bridge Rehabilitation will allow for scheduled routine maintenance and minor rehabilitation projects. Routine maintenance include guardrail repair, clearing debris and vegetation and concrete patching. Minor rehabilitation projects includes scour countermeasures, slip lining, paint steel beams and major concrete repairs. When possible, the County bridge crew will perform the work. These activities will maintain and prolong the life of County structures while improving public safety. The cost of major rehabilitation or replacement can be postponed with proper maintenance and repairs.

Rationale

For FY2010-25, the Countywide Bridge Rehabilitation Fund (Account Number: 0019903) has been $500,000 annually. The original funding assumed an inventory of approximately 80 bridges, 130 non-qualifying bridges and 20 pedestrian bridges. The current structure inventory consists of 138 bridges, 183 non-qualifying bridges and 48 pedestrian bridges. A Countywide Bridge Rehabilitation Fund of $1.5 million annually is needed for proper routine maintenance and perform minor rehabilitation projects, accordingly this is a request for the Countywide Bridge Rehabilitation Fund be $1.5 million annually beginning in FY 2026.

Project #: PJTR02069
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Maintenance, Deficiency

Project Location

Multi-district County-wide

Description and Scope

This project encompasses paving 53 miles of existing routinely maintained County shell roads with 2" structural asphalt over a 4-year period beginning in FY27. These projects have been identified and will be allocated into individual roadway projects annually as programmed.

Rationale

It was requested of Public Works staff to bring back a rural road paving schedule. During discussions, it was determined that public works would prepare a report related to our shell roads maintenance program and the conversion of some, or all, of the existing shell roads to paved roads.

FY2027 - FY2031

Category: Transportation **Subcategory:** Road Improvements
Project Title: Wauchula Road - Maple Creek Bridge Replacement
Department: Public Works
Project Mgr: Jamarr Norman
Infra. Sales Tax: -
Project #: PJTR02238 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 1 Wauchula Road at Ballard Road, Myakka

Description and Scope

The scope includes the design, permitting, land acquisition, project management, and construction of a new bridge on Wauchula Rd over Maple Creek. The new bridge will be approximately 80 ft. long x 43 ft. wide. It is anticipated that the bridge will be built in phases to maintain traffic during construction. Due to flood history, it is anticipated that the new bridge and approaches will need to be raised to provide adequate freeboard and roadway serviceability. The project will meet current County Standards while minimizing the project length and impacts to adjacent properties. No anticipated land acquisition.

Rationale

The Wauchula Rd Bridge (#134054) over Maple Creek, constructed around 1955, connects SR 64 to SR 70 and is critical for residential, commercial and agricultural traffic. Detour route is approximately 25 miles. Routine maintenance and minor bridge repairs has been completed to extend the service life of the bridge. The bridge is in fair condition and has a sufficiency rating of 59.1. The bridge is expected to require replacement within the next five to ten years. The goal of the project is to replace the deteriorated bridge with a bridge that meets current standards and improves public safety.

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 3 67th St W - Manatee Ave W - 5th Ave NW, Bradenton

Description and Scope

Construct five foot sidewalk on both sides of road with drainage improvement to accommodate sidewalk installation.

Rationale

This sidewalk has been requested by the School Board to create a safe route to school(s) and to support the needs identified by the general public.

Project Title: Morgan Johnson Road -13th Ave East - Amberly Drive
Department: Public Works
Project Mgr: Jim Shuler
Infra. Sales Tax: Yes
Project #: PJ6049762 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 5 Morgan Johnson Road at 13th Ave E, Bradenton

Description and Scope

Design, permit, and construct approximately 1,200 LF of 5' sidewalk and related drainage improvements along the east side of Morgan Johnson Road from 13th Ave E to Amberly Drive and in front of the commercial property north of Amberly Drive ((PID: 1121710109). Design to include closed drainage and will required land/easement acquisition from the commercial property.

Rationale

Morgan Johnson Road (57th St E) is a federal aid eligible thoroughfare from 44th Ave E to State Road 64 E. There are two gaps in sidewalk along the east side of the roadway between 13th Ave E and Amberly Drive and fronting a commercial property. The Florida Department of Transportation (FDOT) has programmed $71,100 in design funding in their FY26-30 Work Program (FPN: 453422-1). This Local Agency Program (LAP) project will infill the missing sidewalk and improve pedestrian safety and connectivity along the corridor.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: -

Project Location

District 1 Mocassin Wallow Rd at Gillet Dr., Palmetto 34221

Description and Scope

Design, permit, install, and construct a shared use path along the north side of Moccasin Wallow Rd. from Gillet Dr. to connect to the existing sidewalk along Buffalo Rd. including pedestrian signals and striping improvements.

Rationale

The Moccasin Wallow Road corridor is rapidly growing and to plan for future demand staff desire to construct a shared use path from Buffalo Rd to Gillet Dr. to improve pedestrian safety and multimodal connectivity in the area. It is staff's intention to construct this improvement with a proposed seperate project for a reclaim water main extension from Gillet Dr. to Buffalo Rd.

Project #: PJ6102761 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 2 301 Blvd E at 51st Ave E

Description and Scope

Design, permit and construct approximately 6,900 linear feet (≈1.3 miles) of 5-foot sidewalk along 301 Blvd E from 51st Ave E to US 41. Design and permitting is anticipated to be completed with in-house staff.

Rationale

The County received a Community Development Block Grant (CDBG) and would like to construct sidewalk improvements along 301 Blvd E from 51st Ave E to US 41. This corridor serves homes, businesses, and transit but lacks safe pedestrian infrastructure. The project will provide ADA compliant sidewalks that improve safety, mobility, and neighborhood connectivity for the surrounding area.

Project Location

District 2 26th Ave E near 15 St E, Bradenton

Description and Scope

Funding for an agreement with CSX for CSX to design and construct a new enhanced railroad crossing to improve ride ability and to provide a sidewalk crossing.

Rationale

Manatee County is responsible for costs to improve County roadway crossings over rail road tracks. Based on repeated traffic impacts the crossing degrade with time and certain crossings are identified for improvements as needed. The 26 Avenue East crossing over the CSX railroad is in need of enhancement for rideability and sidewalks. This corridor also serves a school route.

Project Title: Wilmerling Ave (65th Ave E) from 5th St E to End of Rd
Department: Public Works
Project Mgr: Andres Hidalgo
Infra. Sales Tax: Yes
Project #: PJ6107265 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 Wilmerling Ave (65th Ave E) from 5th St E to End of Rd, Bradenton

Description and Scope

Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.

Rationale

Sidewalk has been requested from the School Board for a safe route to school, multiple requests from the general public, or infill project within an area that sidewalks already exist.

Project Title: Buffalo Road Sidewalk - Imperial Cir to Bobby Jones Ct
Department: Public Works
Project Mgr: Dafne Seeland
Infra. Sales Tax: Yes
Project #: PJ6115760 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 Buffalo Road at Bobby Jones Ct, Palmetto

Description and Scope

Design, permit, and construct approximately 4,000 LF of 5' sidewalk along the east side of Buffalo Road from Imperial Cir to Bobby Jones Ct.

Rationale

There is a gap in the sidewalk along the east side of Buffalo Road between Imperial Cir and Bobby Jones Ct. This project will infill the missing sidewalk to improve pedestrian safety and connectivity along the road corridor.

Department: Public Works
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: Yes
Project #: PJTP26070
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth, Deficiency

Project Location

Countywide Countywide

Description and Scope

Identify, evaluate, design, permit, and construct sidewalk segments to close gaps in the existing network.

Rationale

Many areas of Manatee County lack continuous sidewalks, creating unsafe conditions and limiting access to schools, parks, transit, and community destinations. This project funds construction of sidewalk segments to close gaps, improving pedestrian safety, ADA accessibility, and network connectivity. Completing these missing links supports the County's mobility goals, encourages walking, and enhances quality of life for all residents.

Project Title: 44th Ave E and Uihlein Rd - Fiber Optic Network Expansion
Department: Public Works
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6045667 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 5 44th Ave E & Uihlein Rd, Bradenton

Description and Scope

Evaluate, design, permit and construct ITS infrastructure on 44th Ave E from Lakewood Ranch Blvd to Uihlein Rd and on Uihlein Rd from 44th Ave E to Lakewood National Parkway. The ITS infrastructure consists of fiber optic-based interconnect communication system, communication hub(s) and MVDS devices. Existing traffic signals and proposed ITS devices will be connected to the fiber optic network.

Rationale

The County's traffic management center (TMC) relies on intelligent transportation system (ITS) infrastructure to adequately monitor, implement changes to traffic signals and devices. With the steady increase of traffic, it becomes paramount to implement real time changes in response to congestion or incidents. This expansion of ITS infrastructure will connect new traffic signals and other ITS devices in the eastern part of the County to the TMC, while providing communication redundancy and strengthening overall network resiliency, ultimately improving traffic system operations.

Project #: PJ6112303
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 SW Quadrant of Premier Complex, Lakewood Ranch

Description and Scope

Premier fuel site project will construct a fuel site that will support Premier Generator, MCSO Substation and other amenities at Premier Campus. This project is for fuel tanks with the capacity of at least 10,000 gallons.

Rationale

Premier Sports Campus, located in Lakewood Ranch area, is a 140 acres of pristine fields used for hosting everything from tournaments, practices, outdoor festivals, movie nights and much more. With the growth in the area, the need arose for the Premier Campus Racquet and Aquatics Complex, Premier Library, MCSO Substation and other amenities. In order to make this a functional facility, the need arose for a Premier Generator project which was approved and is being designed. During design and planning, the need arose for a Fuel Site at Premier to support the generator in order to make Premier a functional facility during hurricanes or other natural disasters.

Highlights at a Glance Enterprise

Highlights at a Glance - Enterprise

In the FY27 Enterprise Capital Improvement Plan (CIP), projects amount to $507,525,637. Funding for FY27-31 Enterprise projects totals $1,498,423,643, comprising 65.48% of the total CIP.

Noteworthy highlights in the enterprise section of the CIP consist of the following:

Potable Water receives $176,603,050 in FY27, with the remaining $548,873,473 is allocated for projects throughout the plan. It constitutes 31.71% of total projects in the FY27-31 CIP.

Featured Potable Water Projects:

- **44th Ave E to 38th Ave E & 24th St E 36" PCCP Replacement:**
  - FY27-31 Planned Funding: $37,598,000
- **DeSoto Bridge Watermain Replacement:**
  - Current Funding: $1,794,000
  - FY27 Funding: $8,960,000
- **Lake Manatee Dam Spillway Replacement Project:**
  - FY27-31 Planned Funding: $20,782,000
- **Lake Manatee WTP D Basin Addition:**
  - FY27-31 Planned Funding: $198,061,000
- **Morgan Johnson Rd to 40th Ave E 36" PCCP Replacement:**
  - FY27-31 Planned Funding: $34,886,000
- **WTP to Upper Manatee River Road 42" PCCP Replacement:**
  - Current Funding: $5,867,000
  - FY27 Funding: $31,556,000
- **Water Treatment Plant to SR64 36" PCCP Replacement:**
  - FY27-31 Planned Funding: $52,601,000

Solid Waste receives $2,876,000 in FY27, with the remaining $2,468,000 allocated for projects throughout the plan. It constitutes 0.23% of total FY27-31 CIP projects.

Featured Solid Waste Projects:

- **Landfill Roadway Improvements:**
  - Current Funding: $1,559,000
- **Lena Road Stage II Gas Expansion Phase III & IV:**
  - Current Funding: $10,619,000
- **Landfill Scalehouse Improvements:**
  - FY27-FY31 Planned Funding: $2,468,000
- **Solid Waste Administration Building Enhancement:**
  - Total Funding: $3,308,000

Stormwater receives $21,103,046 in FY27 with $22,385,136 is allocated for projects throughout the plan. It constitutes 1.90% of the total projects in the FY27-31 CIP.

Featured Stormwater Projects:

- **Bowlees Creek Flood Mitigation (SaraBay/Shadbrook area):**
  - Current Funding: $4,820,638
- **Collins Dairy Drain Urban Stream Restoration:**
  - FY27 Funding: $4,228,965
- **Design and Construction of Stormwater Operations Facility:**
  - Current Funding: $216,000
  - FY27 Funding: $1,620,000
- **Palm Aire Stormwater Pipe Replacement and Rehabilitation**:
  - Current Funding: $1,648,171
  - FY27-31 Planned Funding: $6,957,530

Highlights at a Glance - Enterprise *continued*

- **Rattlesnake Slough Channel Improvements**:
  - Current Funding: $1,142,851
  - FY27-31 Planned Funding: $3,872,225
- **Sylvan Oaks Stormwater Improvement**:
  - FY27-31 Planned Funding: $7,793,604
- **Wade Canal Channel Improvements:**
  - Current Funding: $1,642,920
  - FY27-31 Planned Funding: $5,566,534

Wastewater receives $306,943,541 in FY27, with the remaining funding of $417,171,397 programmed in the Plan. It constitutes 31.64% of total projects in the FY27-31 CIP.

Featured Wastewater Projects:

- **North Regional Water Reclamation Facility Expansion 12.5 MGD:**
  - Current Funding: $27,323,000
  - FY27-31 Planned Funding: $227,680,000
- **Southeast Regional Water Reclamation Facility Capacity Improvements Phases A & B:**
  - Current Funding: $123,190,209
- **Southeast Regional Water Reclamation Facility Capacity Improvements Phase C:**
  - FY27-31 Planned Funding: $14,541,000
- **Southwest Water Reclamation Facility Expansion to 18 MGD**:
  - Current Funding: $55,622,000
  - FY27 Funding: $137,578,000
- **Trailer Estates Restore & Rehabilitation**:
  - Current Funding: $9,859,514
  - FY27-31 Planned Funding: $44,546,950

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Potable Water
Subcategory: Potable Water Distribution
Project Title: Crosley Estate Water Main Relocation
Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: No
Project #: PJ6006370
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Other

Project Location

District 4 8374 North Tamiami Trail, Sarasota, FL

Description and Scope

Design, permit, and construct approximately 1,500 linear feet of 6-inch potable water main within the acquired public utility easement along the perimeter of the transferred parcel. The project will include the removal or abandonment of the existing water main and may also include the replacement of existing fire hydrants and potable water service meter(s) with backflow preventers. All hydrants, valves, and services shall be designed and constructed in accordance with Ten State Standards.

Rationale

On February 13, 2024, the Board approved the execution of a County deed transferring nine acres from the Powel Crosley Estate property—including a 20-foot public utility easement along its perimeter—to the New College of Florida Board of Trustees. The transfer is intended to promote community interest and welfare and to serve the best interests of Manatee County residents. A six-inch water main currently runs through the property and will need to be rerouted to accommodate future development of the parcel.

FY2027 - FY2031

Category: Potable Water **Subcategory:** Potable Water Distribution
Project Title: Artisan Lakes Pkwy - Potable Water Oversizing
Department: Utilities
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: -
Project #: PJ6028171 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 1 Artisan Lakes Pkwy at Buckeye Road, Palmetto

Description and Scope

Design, permit, install, and construct approximately 5,000 linear feet of 16" potable water main along Artisan Lakes Pkwy from 200 ft south of Fieldmoor Ct to Buckeye Road. Review, approve, and process the final pay application for the completed work and reimburse the developer based on the terms of the agreement.

Rationale

The purpose of this project is to efficiently expand the County's potable water distribution system for future development in this area. The County's 2035 Potable Water System Master Plan identifies a 16-inch water main along Artisan Lakes Pkwy from Moccasin Wallow Rd to Buckeye Rd. Staff have requested the developer to oversize the potable water main extension from 8-inches to 16-inches from just south of Fieldmoor Ct to Buckeye Rd. This project is to fund the developer's agreement for the potable water main oversizing, from south of Fieldmoor Ct to Portico Ln, and extending the water main from Portico Ln to Buckeye Rd with the improvements being constructed as part of the Artisan Lakes Eaves Bend and Edgestone North subdivisions.

Category: Potable Water **Subcategory:** Potable Water Distribution
Project Title: Marisol Potable Water Oversizing and Extension
Department: Public Works Projects
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: No
Project #: PJ6028172 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 5 SR 64 E at Uihlein Rd

Description and Scope

Design, permit, install, and construct 12-inch potable water main extension approximately 2,250 linear feet, from the existing 8-inch water main along SR 64, to the 12-inch water main at Uihlein Road.

Rationale

The County's Potable Water Master Plan identifies the need for the extension of a 12-inch potable water main, along SR 64 from Uihlein Road approximately 2,250-feet. To ensure efficient expansion of the potable water system for future development, County requested that the Developer of the Marisol development (Project) to oversize the potable water main along SR 64 by installing a 12-inch water main, rater than an 8-inch required by the Project, from the existing 8-inch to the existing 12-inch on Uihlein Road. Policy 9.6.2.3 of the Comprehensive Plan authorizes the County to pay for the cost of additional materials necessary for oversizing any component of the County's potable water distribution system where a developer is required to increase system capacity greater than that required by a proposed development. This project is to fund the potable water component of the developer agreement.

Infra. Sales Tax: -
Project #: PJ6028271
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 1 Erie Rd-Harrison Ranch Blvd-St. Mary's Mission, Parrish

Description and Scope

This project needs approximately 12,000 feet of 24 inch ductile iron pipe water main. Fire hydrants will be installed every 800 feet and in-line valves every 1,600 feet. Hydrants, services and valves will be installed to County and Ten State Standards.

Rationale

Complete a major looped system for Erie Road and Copperstone Phase One.

FY2027 - FY2031

Category: Potable Water **Subcategory:** Potable Water Distribution
Project Title: Blake Hospital Permanent Potable Water Line
Department: Public Works Projects
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6042771 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Other

Project Location

District 3 51st Street West at 21st Avenue West

Description and Scope

Design, permit, install, and construct approximately 3,650 linear fee of 8-inch water main with restraints along 21st Ave W, from the existing 20-inch water main at 51st St W intersection to Blake Hospital's water supply line, including the removal or abandonment of existing asbestos cement pipe and appurtenances.

Rationale

Potable water quality was impacted from storm surge of recent hurricanes to the City of Bradenton's drinking water reservoir thus affecting the water provided to Blake Hospital. A temporary water line was installed, above ground, as an alternative water supply from the County's potable water distribution system. Failure to have an alternative potable water supply could impacts the hospital's ability to treat certain patients and be supplied with sub-standard water quality. This project will relocate the temporary water line under ground and provide a permanent connection of an alternative water supply to Blake Hospital during emergencies. In addition, the project will remove or abandon existing asbestos cement pipe along 21st Ave W between 59th St W and 51st St W.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Maintenance, Growth, Deficiency

Project Location

District 4 63rd Avenue East from US 301 to Tuttle Avenue

Description and Scope

Remove and replace potable water lines, as needed, along the 1.12 miles of 63rd Avenue East from US 301 to Tuttle Avenue. This utility project will run concurrently with the roadway widening project.

Rationale

Manatee County intends to widen this section of 63rd Avenue East to support increased traffic demand in the surrounding area and help maintain the County's adopted levels of service for parallel facilities including SR 70. Potable utility lines will need to be relocated to facilitate the road widening.

Infra. Sales Tax: -
Project #: PJ6114970 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct approximately 1,900 LF of 12" and 300 LF of 16" potable main along SR 62 from Pioneer Dr to Sand Marsh Ave. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The purpose of this project is to efficiently expand the County's potable water distribution system for future development in this area. Staff has requested the developer to oversize the potable water main extension from 10-inches to 12-inches. This project is to fund the developer's agreement for the potable main oversizing with the improvements being constructed as part of the Saltmeadows development project.

Project #: PJ6116471
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No
Project Need: Growth

Project Location

District 1 Dam Road at SR 64 E, Bradenton

Description and Scope

Design, permit, and construct a 36-inch potable water main along Dam Road from the County's Water Treatment Plant to State Road 64 E.

Rationale

The County's Build Out Water System Master Plan identifies a future need of a 36-inch water main from the County's Water Treatment Plant (Plant) to 44th Ave E. The
Lakewood Ranch Stewardship District (District) is constructing a 16-inch potable watermain along Dam Road from the Plant to State Road 64. To plan for the County's future potable water availability needs, the County requested the watermain to be oversizing to 36-inches. Policy 9.6.2.3, of the County's Comprehensive Plan and Section 2-31-5 of the Code of Ordinances authorizes the County to pay for the cost of additional materials necessary for oversizing any component of the County's potable water distribution system. This project is to fund the associated developer's reimbursement agreement with the District for the additional costs related to the
oversizing.

Category: Potable Water
Subcategory: Potable Water Distribution
Project Title: Advanced Metering Infrastructure
Department: Utilities
Project Mgr: William Koch
Infra. Sales Tax: -
Project #: PJ6120070
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance, Deficiency

Project Location

Countywide 3647 Cortez Road West, Bradenton, FL 34210

Description and Scope

Manatee County will enter into an agreement with the selected contractor to remove and install new water meters throughout the County over a 30-month period. Contractor shall supervise and direct the Work and shall be responsible for construction means, methods, techniques, sequences, and procedures and for coordinating all portions of the Work under this Agreement. Contractor shall be responsible to pay for labor, materials, equipment, tools, construction equipment and machinery, transportation, and other facilities and services necessary for the execution and completion of the Work. Neptune® T-10, TruFlo, Protectus, and HP water meters with Cellular)R900i integrated register and endpoint will have the appropriate FirstNet or Verizon SIM card for the location. Neptune® R900 Cellular Pit and R900 Cellular Wall endpoints for use with Neptune MACH 10 water meters will have the appropriate FirstNet or Verizon SIM card for the location. All water meters, endpoints, and other materials removed from service will be disposed of properly in a manner to be agreed upon between contractor and the County during the installation. Contractor has first right of refusal for all water meters and measuring chamber assemblies removed from service.

Rationale

The Advanced Metering Infrastructure (AMI) program will enhance the net revenues of the Utility System through more accurate meter readings and billings and a reduction of operating expenses. Selected Contractor will provide documentation of the projected and actual savings realized as part of their contract with the County. The meters will be purchased by the County from a meter supplier. The cost for the AMI program is estimated to be approximately $82 million, divided roughly equally between labor and equipment, over a 30-month construction period. The AMI program is estimated to have a 20 year useful life. Project Benefits Summary. Subject to the terms and conditions of the Agreement, the Contractor and the County agree that the County will be deemed to achieve a total of $114,347,209 in Non-Measured Project Benefits and the Contractor guarantees that the County will achieve a total of $93,796,345 in Measured Project Benefits during the term of this Agreement, for Total Project Benefits of $208,143,554.

Project Title: Buckeye Road (73rd Ave E to 77th Ave E) - Potable Water
Department: Utilities
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: No
Project #: PJ6120270 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 Buckeye Road at 73rd Ave E, Palmetto

Description and Scope

Construct approximately 1,600 linear feet of 16" water main along Buckeye Road from 73rd Ave E to 77th Ave E.

Rationale

The County's Potable Water System Master Plan calls for a future 16-inch water main from Artisan Lakes Parkway to 77th Avenue East. The Newport Isles development requires a 12- inch water main to service the project from 77th Avenue E to 73rd Avenue E. To meet future needs, the County requested upsizing of the water main to 16-inch inches. Per Policy 9.6.2.3 of the Comprehensive Plan and Section 2-31-5 of the Code, the County may fund oversizing costs. This project funds a reimbursement agreement with the Newport Isles Community Development District for the added cost.

Project Title: Ranch Oak Parkway Potable Water Main Oversizing - SR 62 to Sunrise Chase St
Department: Utilities
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: No
Project #: PJ6120470 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 State Road 62 at Ranch Oak Parkway (f.k.a. Keen Road)

Description and Scope

Construct approximately 3,700 LF of 16-inch potable water main along Ranch Oak Parkway from State Road 62 to Sunrise Chase Street.

Rationale

To expand potable water service, the County requested that the Ranch Oak Parkway main from SR 62 to Sunrise Chase St. be oversized to 16 inches. The Crosswind Assemblage development installed a larger main than required for its project. Pursuant to Policy 9.6.2.3 of the Comprehensive Plan and Section 2-31-5 of the Code of Ordinances, the County will reimburse the cost of additional materials. This project funds that reimbursement.

Infra. Sales Tax: -
Project #: PJPW01220 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

Countywide Countywide

Description and Scope

Participate in development of the potable water transmission system infrastructure by oversizing any component to the system to increase capacity above required for a particular development or project when such increase in size supports the Utilities Master Plan for system capacity.

Rationale

It is more effective to increase the size of potable water infrastructure as it is being developed, rather than replacing it with a larger capacity system. The systems will be sized to serve the planned customer population.

Project Location

District 3
21st St W & 13th Ave Dr W, Bradenton

Description and Scope

This project is to upgrade aging water mains and add fire protection. This project needs +/- 1400 ft of 4"" and +/- 3700 ft of 6"" water mains, six (6) fire hydrant assemblies, fourteen (14) gate valves, and 120 water services. This project is to replace the water mains and services.
Hydrants, services, and valves should be installed according to County and Ten State Standards.

Rationale

Pine Heights Ct was installed in 1966. We are seeing a rapid number of line breaks and leaks in the area due to soft and brittle mains.

Project Need: Growth

Project Location

District 1
17915 Waterline Road, Bradenton

Description and Scope

This project is to design and construct approximately 20,000 square foot (sqft) Concrete Masonry Unit (CMU) block structure to serve as a satellite distribution facility including offices for the distribution staff and breakroom space. Build an adjacent approximately 20,000 square foot (sqft), high-ceilinged pre-engineered, metal warehouse building with a covered, drive-through unloading bay, rollup doors, and heavy duty material storage racks.

Rationale

The distribution group has grown in number with several new staff being added to support the system. The current space is no longer sufficient to meets the needs of the distribution group. The new facility will be sized to accommodate the needs of the growing staff. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $27,321,000.

Project Title: Utilities Wildewood Building Renovation
Department: Utilities
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6019210
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Other

Project Location

District 4 3647 Cortez Road West, Bradenton

Description and Scope

Miscellaneous renovation to individual offices and a full renovation of a small area of the building for fitness area, showers, restroom, and lockers; also, modular wall renovation of a call center. Typical renovation of wear and tear items including flooring, ceiling, paint, tile, and walls. Small, required maintenance and repair or replacement of HVAC, lighting, plumbing and electrical including low voltage security, roof repair or replacement, and other appurtenances required for a functional facility.

Rationale

Following the acquisition of the new building, it is imperative that we undertake renovations to ensure the facility complies with the essential standards. This is essential to enable Utilities to relocate and serve our citizens with the same level of efficiency they provided at their previous location.

Project Need: Maintenance

Project Location

District 4 14th St W-5th St W-Cortez Plaza-Fairlane Acres, Bradenton

Description and Scope

Replace approximately 12,500 linear feet of 3, 4, and 6 inch water mains, fire hydrants, valves, and services with 6 inch mains and new services installed from main to meter and meters relocated to front right-of-way. The water mains will tie together at 14th Street and Orlando Avenue. All installations will be to County and Ten State Standards.

Rationale

Improve access, water quality and fire protection.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 51st St E and 43rd Ave E, Bradenton

Description and Scope

This Project is a loop system and needs +/- 1,122 ft of water main according to the water master plan. This will help maintain water quality and improve fire flow: 2 fire hydrant assemblies, 2 gate valves, and 19 services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace existing 4" water main with 6" and create a loop system which will improve fire flow and water quality.

Project Location

District 3 Palma Sola Blvd to 82nd St W - 43rd Ave W to 43rd Ave Ter W, Bradenton

Description and Scope

This project is a loop system between Cutrona Subdivision and Frank E Kimball Subdivision (see map attached for location of proposed main). This project needs +/- 3,718 ft of water main. This will help maintain water quality and improve fire flow. Three (3) fire hydrant assemblies, five (5) gate valves, and 62 services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace existing 3" and 4" water mains with 6" & create a looped water system. This will improve fire protection and water quality.

Infra. Sales Tax: -
Project #: PJ6031776
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 26th Ave. E. and 18th St. E., Bradenton

Description and Scope

This project is improving the Oakwood Subdivision area (see map attached for location of proposed main). This project needs +/- 4,232 feet of 6" water main, (6) fire hydrant assemblies, (7) gate valves and (59) services. This will help maintain water quality and improve fire flow. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

There has been constant repairs to existing 4" water main at this location indicating that the pipe has deteriorated to the point of needing replacement. Upsizing to 6" will improve water quality and fire flow.

Project Title: Cortez Booster Pump Station Upgrades
Department: Public Works Projects
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6050771
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Maintenance, Growth

Project Location

District 3 11860 Cortez Rd. W, Bradenton

Description and Scope

Replacement of one existing pump with two pumps (one duty and one standby)sized as inline boosters, including minor piping changes and construction of a dedicated fill line to the ground storage tank (GST).

Rationale

Analysis of updated water model and pump data showed that operating existing pumps as inline boosters causes excess wear and tear due to operating out of their suggested operating ranges. Replacing one of the pumps with one duty and one standby pump, both sized as inline booster pumps, will optimize pump efficiency and operations in order to meet 2025 water demands. Installing a dedicated fill line would allow the tanks to simultaneously fill and be pumped from, making system operations less complex.

Department: Utilities
Project Mgr: Tina Neri
Infra. Sales Tax: -
Project #: PJ6077501 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

Countywide Utilities Administration Building; 4410 66th St W, Bradenton

Description and Scope

Replace current customer information system with a more robust system that meets current needs for the Utilities Department.

Rationale

The current Banner Customer Information and Billing System was deployed by Manatee County Utilities in 1999 and went live in the year 2000. This software was upgraded to version 4.2.1 in July 2011, and to version 4.4 in June 2017. There are many more robust Customer Information System (CIS) systems on the market that include features such as mobile applications, comprehensive business intelligence, GIS interfaces, bar-coded payment stubs, intuitive customer portals, and many more. Additionally, some of the new CIS systems provide cloud-based platforms which can provide potential cost savings on hardware and upgrade costs. With the vast availability of technology, it seems prudent at this time to initiate a search for a more flexible and responsive system - one that is more "user friendly" and easier for the Call Center Reps to navigate, ultimately providing better customer service to County residents as well as potential cost savings over existing options.

Subcategory: Potable Water Renewal/Replacement
Project Title: 69th Avenue Water Main Loop - 63rd Avenue West to US 41
Department: Public Works Projects
Project Mgr: Mike Sturm
Infra. Sales Tax: -
Project #: PJ6078070
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Maintenance

Project Location

Multi-district 5th St-63rd Ave W-US 41-69th Ave, Bradenton

Description and Scope

Replacement of aged (1965) failing pipe with approximately 6,600 feet of 12 inch water main, fire hydrants, six inch gates valves, and 12 x 6 tee services interconnecting between 63rd Avenue East to US 41. Hydrants, services and valves will be installed to County and Ten State Standards.

Rationale

The existing lines have aged and are in poor condition. Access and fire protection are limited and water quality suffers.

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: WTP to Upper Manatee River Road - 42" PCCP Replacement
Department: Utilities
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6086171 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 1 17915 Waterline Rd to Rye Road & Upper Manatee River Rd

Description and Scope

Replace approximately 2.0 miles (10,560 LF) of 42" PCCP with 42" Ductile Iron Pipe (DIP) from WTP north to near intersection of Rye Road and Upper Manatee River Road. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Includes new services, hydrants, and valves as needed. The first phase of this project will include surveying and evaluation of potential land acquisition requirements.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. In addition, many of the larger, critical transmission mains in the system are PCCP. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1995, is one of the largest pipes in the system, and is a direct transmission main from the Water Treatment Plant (WTP). Additional segments of this 42" PCCP pipe will be replaced with future road widening projects along Upper Manatee River Road.

Category: Potable Water
Subcategory: Potable Water Renewal/Replacement
Project Title: Elwood I Booster Pump Station, Pump 1,6,7 Replacement
Department: Public Works Projects
Project Mgr: Dafne Seeland
Infra. Sales Tax: -
Project #: PJ6097370
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Maintenance, Growth

Project Location

District 2 4825 44th Ave E, Bradenton

Description and Scope

Replacement of pumps 1, 6, and 7 with three 3,900 gallons per minute (gpm) @ 145 feet pumps, including yard piping changes, pressure sustaining valve, and electrical instrumentation and controls upgrades. Also, construction of a 36 inch dedicated fill line to the ground storage tank, (GST).

Rationale

Analysis of the updated water model showed that replacement of the existing pipe configuration could be reduced to simplify the inflow and discharge of the GSTs. This simplification of the site will also reduce the long term need for replacement parts and field work. The pumps to be replaced were installed in 1966 and are past their 50 year predicted service life. These will be upgraded to achieve additional pumping indicated by the model as necessary to meet max day demands in 2025.

Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJ6104170
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Maintenance

Project Location

Multi-district 45th St E, Bradenton

Description and Scope

Install approximately 2,400 linear feet of eight inch High Density Polyethylene (HDPE) water main and 300 linear feet of 6 inch water main, three fire hydrants, six - 6 inch gate valves, nine services, and one blowoff. Services and valves will be installed to County and Ten State Standards.

Rationale

Install water main line to proper depth to meet Utilities Standards and for protection and fire flow. Existing water main has a shallow depth and is 50 years old. There is an increased threat of breakage and there is less resistance to external and internal forces due to pipe material being brittle. Pressure surges from nearby Elwood I Booster Pump Station and water hammer are making issues worse.

Project Need: Maintenance

Project Location

District 2 Between 13th St E and 14th St E from 54th Ave E to 54th Ave Dr E , Bradenton

Description and Scope

This Project has thin wall white PVC with glued fittings and some of the lines that are in the ground are not on our Geographic Information System (GIS) or the as built. Installation of 2,281 feet 6" main / 198 feet 4" main / one (1) blowoff, one (1) Relocated Fire Hydrant, nine (9) 6" Gate valves, (39)services plus (19 undeveloped services), one (1) 4" gate valve, one (1) 6" MJ tee.

Hydrant's, Services and Valves should be installed to County and Ten State Standards.

Rationale

Eliminate PVC with glued fittings and install main out of Road where ever possible and a new easement will to be obtained if main is relocated (may have to install with Ducktile Iron (DI) and copper services) Tie in connections at 13th and15th street are 6" main.

Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6110970
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Maintenance, Growth

Project Location

District 3 1525 99th St NW, Bradenton

Description and Scope

Replacement of one existing pump with two 2,600 gallons per minute (gpm) @ 30 feet, 30 horsepower pumps, including electrical instrumentation & controls, pressure sustaining valves and yard piping. The County is looking at multiple options to elevate the chemical skids and electrical systems above the flood plain better protect vital county infrastructure.

Rationale

Analysis of updated water model and pump data showed that when existing pumps are used as inline boosters, they are not operating within their suggested operating ranges causing excess wear and tear on the pumps. Replacing one of the pumps with one duty and one standby pump both sized as inline booster pumps will optimize pump efficiency and operations in order to meet 2025 water demands. After Hurricane Helene the NWBPS had significant flooding as such the county is investigating solutions to avoid future damage.

Project Need: Maintenance

Project Location

District 4 1st St E to 4th St E between SR 70 and 50th Ave Dr E, Bradenton

Description and Scope

This Project includes +/- 1,703 feet of 8 inch watermain, +/- 8,405 feet of 4 inch water main, two fire hydrant assemblies, two 8 inch gate valves, seventeen 4 inch gate valves, and 120 shared services. Hydrant's, services and valves should be installed to County and Ten State Standards.

Rationale

This area is problematic due to the age of the pipe. All services not yet replaced are PVC with no valves (corps.) at the mains.

Project #: PJ6115371
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 2 811 23rd Ave E, Bradenton

Description and Scope

This project intends to replace mains due to numerous breaks (see map attached for location of proposed work). This project would replace approximately +/-1,938 LF of 6" DIP, (15) 6" gate valves, (4) 4" gate valves, (2) new fire hydrant assemblies. It would also include grouting of abandoned water lines, (32) reestablish water service connections, and restoration to include asphalt, sidewalk, etc. All items would be installed to County and Ten State Standards.

Rationale

The watermain in the area of 23rd Ave E from 5th St E to 9th St E has become problematic due to age of pipe and numerous main breaks.

Infra. Sales Tax: -
Project #: PJPW01110
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

Countywide Countywide

Description and Scope

Replace older, failing or targeted distribution system lines based on age and predicted service life to be determined by the 2012 Distribution System Master Plan, subsequent KANEW (database software) model runs and field investigations.

Rationale

Utilities will use the model results from the KANEW analysis that Utility Engineering performed in conjunction with the Distribution Master Plan. The KANEW analysis predicts when pipe elements will reach the end of their service lives based on life-expectancy parameters, and identifies those lines that should be replaced, before they fail.

Project Location

District 2 57th Ave W & 63rd Ave W, Bradenton

Description and Scope

This project to remove or grout old 8 inch asbestos cement line on ditch bank, loop dead ends on 60th Avenue West at 1st Street East and US41 for fire flow. This Project needs +/- 3,800 Feet of 8 inch water main removed or grouted, +/- 700 feet of water main looped with 8 inch crossing, two (2) fire hydrants, eleven (11) gate valves, and fourteen (14) potential water services. Hydrants, services and valves to be installed to County and Ten State Standards.

Rationale

This project will remove the aging asbestos cement (AC) water main on the ditch bank and loop a new line to maintain water quality and improve fire flow.

Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

Multi-district 62nd Ave Dr E from 12th St E to cul-de-sac, Bradenton

Description and Scope

This project needs +/- 85 feet of six (6) inch water main, +/- 355 feet of four (4) inch water main and +/- 85 feet of two (2) inch water main, two (2) fire hydrant assemblies, one (1) gate valve, one (1) blow off assembly and (21) services.

Rationale

This project is to improve fire flow and maintain water quality. Relocate water main and services to right of way. The new waterline down the cul-de-sac will improve fire flow in the area. It would also move the water main and services into the right of way (instead of through backyards). This is for better access and ability to service the line.

Project Title: Elwood Booster Pump Station Upgrades Phase 2
Department: Public Works Projects
Project Mgr: Robby Phillips
Infra. Sales Tax: -
Project #: PJPW02131
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Other

Project Location

District 2 4825 44th Ave E., Bradenton

Description and Scope

Upgrades to the booster pump station to consist of: voltage conversion of station from 2400V (non-typical) to 480V, new pumps with Variable Frequency Drives (VFDs) to replace inline booster pumps (#2, 3, 4, and 5) sized to meet current and future demands, new building with pump room, electrical room, and office space, instrumentation and control (I&C) and electrical, and associated yard piping. Project will also require a new building.

Rationale

Replacement of the inline booster pumps is recommended to improve water quality, simplify station operations, and meet current and future demands. Conversion from non-typical voltage to standard 480V will improve availability of maintenance parts and skilled technicians, as well as improve safety of employees required to perform maintenance. New building will replace current facility which will be over 60 years old, will allow for continued operation of station during construction, and will be designed to for easier access for maintenance and inspections

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 Cortez Rd to 46th Ave W between 87th St Ct W to 86th St W, Bradenton

Description and Scope

This Project is to improve water system (see map attached for location of proposed main). This Project needs +/- 2,505' of 6" water main, +/- 110' of 4" water main and 160' of 2" water main. (5) fire hydrant assemblies, (6) gate valves, (2) Blow off assemblies and 51 services.

Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace 2" water main (of unknown material) built in 1974 in order to ensure replacement prior to end of useful life. Upsizing to 4" and 6" will help maintain water quality and improve fire flow.

LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 11th St. E. & 12th St. E. & 61st Ave. E. & 59th Ave. Ter E, Bradenton

Description and Scope

This Project is to eliminate existing 2' and 4" mains and install accordingly to the water model. (see map attached for location of proposed main) This Project needs +/- 2461 Ft of 6" water main, 100 Ft 2" water main, (4) fire hydrant assemblies, (9) gate valves, (1) reducer, (14) same side services, (12) road crossing services and (1) blow off assembly.

Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This system was installed around 1977 and is approaching end of service life. There are currently no fire hydrants. This project will upsize the lines and create a looped system. This will improve fire flow and water quality.

Subcategory: Potable Water Renewal/Replacement
Project Title: Harbor Crest and Stevens Subdivision
Department: Public Works Projects
Project Mgr: Jamarr Norman
Infra. Sales Tax: -
Project #: PJPW02155
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 2nd Ave NW and 43rd St W, Bradenton

Description and Scope

This project is to upgrade old 4" AC water main and add fire protection (see map attached for location of proposed main). This project needs +/- 7,428 ft of 6" water main, 825' of 8" water main, 7 fire hydrant assemblies, 27 gate valves, 97 services & 3 blowoff assemblies. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

Current water mains are thin wall 4" asbestos cement (AC) that were installed in 1966 and have reached the end of their useful life. Upsizing the mains will improve water quality and fire flow in the area.

Category: Potable Water
Subcategory: Potable Water Renewal/Replacement
Project Title: WTP to SR64 - 36" PCCP Replacement
Department: Utilities
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJPW02260
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Maintenance

Project Location

District 1 Waterline Rd from WTP to Rye Rd, Rye Rd to SR 64

Description and Scope

Replace 3.1 miles (16,368 LF) of 36" PCCP with 36" Ductile Iron Pipe (DIP). Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Old pipe is to be removed from the Right-of-Way (ROW) and not abandoned in place. Includes new services, hydrants, and valves as needed. The first phase of this project will include surveying and evaluation of potential land acquisition requirements.

Rationale

This project is one of several to replace aging large diameter Pre-Stressed Cylinder Concrete Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. In addition, many of the larger, critical transmission mains in the system are PCCP. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1966, is one of the oldest pipes in the system and is a direct transmission main from the Water Treatment Plant (WTP).

Subcategory: Potable Water Renewal/Replacement
Project Title: Morgan Johnson Rd to 40th Ave E - 36" PCCP Replacement
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJPW02262
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Maintenance

Project Location

Multi-district
Morgan Johnson Rd from south of 64 to 40th Ave E

Description and Scope

Replace 1.7 miles (8,976 LF) of 36" PCCP with 36" DIP. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Old pipe is to be removed from the Right-of-Way (ROW) and not abandoned in place. Install 0.7 miles (3,696 LF) of smaller diameter waterline on 40th Avenue East from Morgan Johnson Road to Braden River, along 51st Street East from 44th Avenue East to 39th Avenue East, and on 39th Avenue East to Braden River. Includes new services, hydrants, and valves as needed. The first phase of this project will include surveying and evaluation of potential land acquisition requirements.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This project will replace the 36" PCCP along Morgan Johnson Rd south from SR64 to the new 36" Ductile Iron Pipe (DIP) just south of 40th Avenue East installed with the 44th Avenue East project. Since that project includes a new 36" river crossing and tie-in to the Elwood booster pump station, the old river crossing can be abandoned. New, small diameter, waterline will be installed along 40th Avenue East, 39th Avenue East, and 51st East to 44th Avenue East sized for appropriate water quality and fire flow.

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 2 East of 4119 44th Ave E to 38th Ave E to 24th St E

Description and Scope

Replace approximately 2.0 miles (10,560 LF) of 36" PCCP with 36" DIP from just east of 4119 44th Avenue East north to 38th Avenue East then west to 24th Street East. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Includes new services, hydrants, and valves as needed. The first phase of this project will include surveying and evaluation of potential land acquisition requirements.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. In addition, many of the larger, critical transmission mains in the system are PCCP. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1966 and is one of the oldest pipes in the system. A portion of the PCCP pipe, from the start of this project east to the Elwood 1 booster pump station, was replaced with Ductile Iron Pipe (DIP) as part the 44th Avenue East project. This will replace the remainder of that segment of 1966 installed 36" PCCP pipe.

Project Location

District 2 15th St E, Between 44th Ave E and 49th Ave E, Bradenton

Description and Scope

This project is to relocate a 24" water main outside of the Florida Department of Transportation (FDOT) ditch. This project needs +/- 2,600 LF 24" Ductile Iron Pipe (DIP), 145 LF 8" DIP, 75 LF 4" DIP, three (3) fire hydrant assemblies, two (2) 24" gate valves, (2) 8" gate valves, one (1) 4" tap valve, (1) 2" FIP gate valve, (1) 24"x8" cross, (1) 8" plug, (1) 24"x4" tap sleeve, (1) 24"x2" tap sleeve, (1) 24"x8" tee, (1) 8"x6" reducer, (1) 2" long service, (1) 2" short service, (3) 1" long service, (1) 1" short service. Hydrants, services, and valves should be installed to County and Ten State Standards.

Rationale

This project will replace old 24" Water Main that was installed in 1967 and has reached end of service life. This project will also add fire protection to the area.

Project Location

District 3 From Cortez Rd to 26th Ave W Between 26th St W to 32nd St W

Description and Scope

This project is to replace aging water mains. This project includes +/- 1,900 LF 8" DIP, +/- 3,210 LF 6" DIP, gate valves, 15 fire hydrant assemblies, and 31 services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace end-of-life water mains that were installed in 1965, 1966, 1968, 1978, and 1980. Portions of this project are some of the oldest pipe in Manatee County. The area has become increasingly problematic with leaks and breaks. This project will also improve fire protection with the addition of fire hydrants and 6" DIP needed to meet current requirements. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $4,110,000.

Project Title: Country River Estates (104th Ave E)
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP25006
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: No
Project Need: Maintenance

Project Location

District 1 104th Ave E and 25th St E, Bradenton

Description and Scope

This project is to upgrade an aging 4" water main and add fire protection. This project needs +/- 2,920 ft of 6" water main, two (2) fire hydrant assemblies, five (5) gate valves, one (1) blow-off assembly and six (6) services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace a 4" water main that was installed in 1977 and has reached end of service life as well as add fire protection to the area.

Department: Public Works Projects
Project Mgr: Albert Rosenstein
Infra. Sales Tax: -
Project #: PJ6108870
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 1 Dam Road, Bradenton

Description and Scope

This project will address any potential voids and provide geotechnical stabilization below dam features. This includes the upstream approach walls that extend out into the lake and on the downstream side, training walls, spillway and stilling basin. The approach walls provide strength to the dam, and this project will significantly bolster and reinforce the structure. The tainter gates that control the release of water are being rehabilitated with new controls, various mechanical components and monitoring element upgrades to also improve overall dam operations and safety. The dam will also be equipped with a new embankment stability monitoring system and address the long segments of the dam face that are affected by wave action. This is an operational, high hazard dam that remains in continuous service and includes a secondary spillway system north of the dam to route water downstream during high flows or operational maintenance activities that are being completed.

Rationale

The Lake Manatee Dam was built approx. 60 years ago and it had a clay core which extended down to just below sea level in some areas and was considered sufficient at the time. Current dam designs would include a deep seepage barrier to address seepage and the potential for subsequent void formation. Adding these features will improve the safety and potentially extend the life of the dam.

Category: Potable Water **Subcategory:** Potable Water Supply
Project Title: Lake Manatee Dam Spillway Replacement Project
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJPW02251 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton, FL 34212

Description and Scope

This project is the replacement of the current primary and auxiliary dam spillways with structures, designed applying current dam design geotechnical engineering approaches and technology. The new spillway will be located north of the current primary spillway and will release water to the river channel much as it does now. The design will be an approximately 300-foot wide, passive labyrinth style overflow weir with sections of controllable Obermyer gates and/or sluice gates for dynamic release. The current primary and auxiliary spillways will be abandoned, sealed and raised as needed. This project comprises predesign, design, permitting and construction efforts.

Rationale

The existing spillway for the dam does not reflect current geotechnical/structural design standards and approaches for high hazard dams. The existing dam also has remnants of a failed upstream cofferdam and a heaved approach slab that adds significant risk to doing any refurbishment work in those areas. The County has attempted to bid upstream construction repair work without success because of the risk associated with the current design and past, failed repair attempts. With the importance of public safety, water supply, risk, and cost of repair, it's prudent to replace the current spillway using modern standards and approaches. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $129,288,000.

Category: Potable Water
Subcategory: Potable Water Supply
Project Title: Lake Manatee WTP D Basin Addition
Department: Utilities
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJPW02282
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

This project involves the addition of a new water treatment basin, including all required appurtenances, materials, and equipment (referred to as Basin D). This will also include needed transfer pump capabilities to the Ground Storage Tanks. The existing Basin(s) will be modified to allow for the treatment of additional groundwater through piping upgrades. Exact capacity needs to be determined during the design phase, but anticipated to be in the 30-60MGD range. The project includes engineering, design, and construction of the new facilities. Additionally, the high service pump station at the Water Treatment Plant (WTP) will be expanded, including the installation of two (2) new 8,500 GPM (12.3 MGD) vertical turbine pumps with variable frequency drives (VFDs). This expansion will also incorporate all necessary electrical system components and SCADA integration.

Rationale

The current WTP Ground Storage High Service Pump Station is equipped with three (3) vertical turbine pumps, each with a design capacity of 8,500 GPM at 231 feet of Total Dynamic Head (TDH). This configuration provides a firm capacity of 24.5 MGD (17,000 GPM). With all three pumps running, the station can pump up to 36.7 MGD (25,500 GPM). The station draws water from the two (2) 10.0 Million Gallon (MG) Ground Storage Tanks (totaling 20 MG) and was originally designed with the ability to expand to five (5) pumps. Due to increasing water demands, the addition of two (2) additional pumps is necessary. This will increase the capacity to 61.2 MGD (42,500 GPM) with all pumps in operation. The new pumps will be sized to match the existing ones and will include VFDs to provide operational flexibility. Currently, the WTP has two surface water treatment basins, Basin A and Basin B, with treatment capacities of 24 MGD and 30 MGD, respectively. Groundwater is treated in Basin C, which has a 30 MGD capacity and is divided into two trains. The current water demand has reached a point where the maximum daily demand during peak spring times exceeds the firm capacity of the sedimentation basins. Additionally, during the rest of the year, it can be challenging to meet daily demands if either of the larger basins is offline for maintenance. Given that long-term rehabilitation projects can take between 6 to 18 months, it is increasingly risky to take basins offline for repair and maintenance without potentially jeopardizing the water supply. Furthermore, under the Florida Administrative Code (F.A.C.) 62-555.348, additional treatment capacity must be planned when maximum daily demand exceeds 75% of the maximum treatment capacity. The addition of Basin D will provide the necessary firm capacity, addressing regulatory concerns and ensuring reliable service.

Category: Potable Water **Subcategory:** Potable Water Supply
Project Title: Potable Water Aquifer Storage & Recovery (ASR) Expansion
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJPW02295 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Design and permit an aquifer recharge system at the Lake Manatee WTP to inject excess wet-season surface water into the Upper Floridan Aquifer to support conversion of existing ASR wells to continuous production. The project includes up to five recharge wells with an estimated capacity of 60 MGD, intake, pumping, conveyance, partial treatment (filtration and disinfection), and monitoring facilities to meet regulatory requirements and support development of approximately 12 MGD of groundwater supply. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan.

Rationale

Historical Lake Manatee discharges average 34 billion gallons annually, with most excess flows occurring during a four-month wet season. Modeling indicates a five-well recharge system averaging 15.5 MGD can provide the required 10 percent net aquifer benefit within the Southwest Florida Water Management District SWUCA Most Impacted Area and allow development of at least 12 MGD of additional groundwater supply. This project improves drought resilience, captures lost surface water, and supports long-term potable water reliability. Estimated Construction = $165,031,000.

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Other

Project Location

District 1 East County Wellfield to Water Treatment Plant

Description and Scope

The East County Wellfield currently supplies approximately 1/3 of the County's water supply and is conveyed by a 36" raw distribution pipe that conveys the raw water to the treatment plant. The project will create redundancy by providing resiliency in the event of a storm. During the 2024 hurricanes, there were multiple line breaks throughout the water distribution system and other system impacts caused leakage and higher demands. This redundancy will support the county's ability to provide water during major storm events and allow one pipe to remain operational if the other is damaged.

Rationale

The project will construct two groundwater production wells and place a 20-inch raw water transmission main, parallel to the current water transmission main. The well location and pipeline alignment will be determined in the planning and design phases. The project will also include upgrading degasifiers, internal hydraulic modifications, installation of ground water treatment system and electrical and SCADA, permitting, regulatory and coordinating with other agencies.

Project Location

District 5 44th Ave E from 44th Ave Plaza E to Creekwood Blvd, Bradenton

Description and Scope

Relocation and replacement of existing Potable Water utilities along 44th Ave E from 44th Ave Plaza E to Creekwood Blvd (Phase 1).

Rationale

The widening of 44th Ave E from a 2-lane to a 4-lane divided roadway between 44th Ave Plaza E and Lakewood Ranch Blvd necessitates the relocation and replacement of existing Potable Water utilities that will be located under the new roadway. There are two phases identified for this roadway segment: Phase 1 - from 44th Ave Plaza E to Creekwood Blvd. and Phase 2 - from I-75 to Lakewood Ranch Blvd.

Project Location

District 1 Erie Rd - Martha Road to - US 301, Parrish

Description and Scope

The Erie Rd E/W Phase for roadway functional improvements is being changed to 2-lane to 4-lane widening from Martha Rd to US301. This project aligns to be the potable water relocations for the transportation project.

Rationale

The Erie Rd E/W Phase for roadway functional improvements is no longer being considered. Instead, the transportation project is changed to 2-lane to 4-lane widening from Martha Rd to US301. The original Erie Rd E/W Phase had associated projects for the utility relocations and this one is being changed to match the new transportation project.

Project Location

Multi-district 44th Ave-45th St-44th Ave Plz E, Bradenton

Description and Scope

Replacement and relocation of current 36 inch water main. The road is being widened from two lanes to four lanes divided with a new bridge over the Braden River. In addition to the utility relocations required due to the roadway expansion, the county has requested a new 36 inch water main to be installed crossing the Braden River.

Rationale

The current water main was installed in 1965, with the addition of 44th Avenue, this water main is necessary and will now cross the Braden River.

Infra. Sales Tax: -
Project #: PJ6099270
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Other

Project Location

Multi-district 69th Ave W to Cortez Rd, Bradenton

Description and Scope

Protecting the existing AC 10-inch and 6-inch water mains on US 41 from new shallow foundation light pole installations. This including installing 12 LF of split casing around the existing AC watermain at the new light pole locations. This includes keeping an 18-inch clearance from the new spread footer foundation to the casing pipe. If 18-inch clearance is not met, a 20 LF section of AC watermain will be replaced with ductile iron and installed in 12LF of split casing under the spread footer foundation. Other miscellaneous water main relocations are also included to accommodate a culvert crossing and new signalizations at intersections.

Rationale

The Florida Department of Transportation (FDOT) is completing a sidewalk and lighting safety project in this corridor. The existing Asbestos Cement (AC) water main is old and brittle concrete that is prone to cracking when installing the new lighting spread footings and signalization improvements. The existing pipe will be designed and protected so the County can still maintain and protect their water infrastructure.

Department: Public Works Projects
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6099271
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Other

Project Location

District 4 US 41 from 53rd Ave W. to Cortez Rd, Bradenton

Description and Scope

Replace approximately 5400 LF of 10-inch AC water main with 10-inch Ductile Iron Pipe (DIP). This includes 200 LF of 20-inch water main replacement and 150 LF of 24-inch water main replacement with 3 watermains crossing US 41. Water main, water services, and valves to be installed to County and Ten State Standards.

Rationale

The Florida Department of Transportation (FDOT) is completing a sidewalk and lighting safety project in this corridor. The existing Asbestos Cement (AC) water main is old and brittle concrete that is prone to cracking when installing the new lighting spread footings and sidewalk. The new pipe will be replacing the old main and designed so the County can still maintain and protect their water infrastructure. It will increase fire protection and water quality.

Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6099870
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth

Project Location

Countywide Lockwood Ridge Rd, Bradenton

Description and Scope

Ductile Iron Pipe (DIP) and fittings post restraining (with split restraints) of existing 30 and 36 potable water transmission pipelines due to grade changes associated with the turn lanes resulting in reduced cover over the pipelines. Post-restraining of existing pipelines requires excavation of the existing pipeline joints to allow for the installation of mechanical joint restraints. Enough joints will need to be restrained to provide an overall retrained joint length of pipe to withstand internal pressure forces within the pipelines.

Rationale

Post restraining with split restraints required to protect road where less than 2ft of cover at the Lockwood Ridge Road @ Shopping Center Entrance Intersection (South of State Road 70 - Walmart & Publix). This project is in conjunction with the Transportation Intersection improvement adopted CIP (6099860).

Project Location

District 5 Upper Manatee River Rd N of SR 64 to Ft Hamer Bridge, Bradenton

Description and Scope

Design and construct intermediate sized water line conflict resolutions to accompany planned roadway construction. Design and construct approximately 12,000 LF 42" WM to replace existing aged and failing 42" reinforced concrete pipe.

Rationale

As part of the 4-lane roadway expansion, existing section of water lines must be adjusted and relocated to accommodate new storm water pipes. Within this corridor there is existing aged and failing 42" reinforced concrete water pipes that should be replaced prior to or during the construction of the new 4 lane roadway.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth

Project Location

District 1 Moccasin Wallow Road - US 301 & 115th Ave East, Palmetto

Description and Scope

As part of the road widening project, the water main along with fire hydrants, valves, fittings, and services along the route will be relocated out of the proposed roadway into the right of way or upgrade to DIP. Construction consists of removal and installation of +/- 6,095 linear feet of 30-inch DIP, +/- 799 linear feet of 24-inch DIP, +/- 124 linear feet of 18-inch Steel Casing, +/- 114 linear feet of 24-inch Steel Casing, +/- 189 linear feet of 42-inch Steel Casing, +/- 40 linear feet of 24-inch PVC, +/- 183 linear feet of 12-inch PVC, and +/- 136 linear feet of 8-inch PVC.

Rationale

This project is Segment 1 of a 3 Segment plan, which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301. The project will relocate water mains as a result of the Moccasin Wallow Road widening project (see transportation project #6071261).

District 1 Moccasin Wallow Road - Summerwood to Buffalo Road, Palmetto

Description and Scope

As part of the road widening project, the water main along with fire hydrants, valves, fittings, and services along the route will be relocated out of the proposed roadway into the right of way or upgrade to DIP. Construction consists of removal and installation of approximately 5,950 LF of 30" watermain plus approximately 1,524 LF 8" to 16" water main.

Rationale

This project is Segment 3 of a 3 Segment plan (Summerwood to Buffalo Road), which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301. The project will relocate water mains as a result of the Moccasin Wallow Road widening project (see transportation project #6071262).

Project Location

District 5 Lorraine Road

Description and Scope

Depending on the Florida Department of Transportation (FDOT) design for the road improvements along SR70 & Lorraine Road, the County will coordinate, design, permit and relocate Manatee County Potable Utilities that conflict with the FDOT project.

Rationale

Coordinate, design, permit and relocate Manatee County Potable Utilities that conflict with the FDOT road widening and Round-a-bout project at SR70 & Lorraine Road. A new watermain will be installed from Lorraine Road to Bourneside Blvd.

Project Need: Maintenance

Project Location

District 2 US41 Desoto Bridge crossing

Description and Scope

Work with FDOT to determine if existing watermain is in conflict with bridge replacement. Design, permit, and construct new 16" watermain as appropriate based on bridge replacement.

Rationale

The Florida Department of Transportation (FDOT) wants to replace the US-41 bridge that goes over the Manatee River. The new bridge might go over the existing watermain and interfere with the installation of bridge supports. The County and FDOT will work together to construct a new watermain as appropriate based on the new bridge.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Powder Activated Carbon (PAC) Silo Replacement
Department: Utilities
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6013461 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Install new steel carbon silo with 10,000 ft of working capacity and dimensions of approximately 14ft ID and 85 ft tall. Includes electrical, electrical control, Supervisory Control and Data Acquisition (SCADA) communication, pumping equipment, piping, air compressor, tanks and all equipment required and related for successful operation. The new steel carbon silo will be installed on a new concrete pad at a different location than the older silo at the WTP. Demolish and dispose the older carbon silo and appurtenances once the new carbon silo is placed into operation.

Rationale

The silo holds Powder Activated Carbon (PAC) which is utilized to reduce color and odor from the surface water in the reservoir during extended dry periods that correspond with warmer weather or during other changing weather conditions. Without the PAC, the Water Treatment Plant (WTP) will not meet all drinking water regulations and will not meet the Florida Department of Environmental Protection (FDEP) silo inspection. Manatee County Structural Engineering inspected the older silo on 05/17/2023 and found the corrosion at the silo base was far beyond economical repair. Engineers also found the silo has reached the end of its life and that the silo is structurally unsafe.

Project Title: Water Treatment Plant Alum Sludge Dewatering System
Department: Public Works Projects
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6033072 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Mechanical dewatering system for alum sludge at the Water Treatment Plant (WTP) to consist of two decanter centrifuges, two gravity sludge thickeners, three homogenization tanks, centrifuge building, pumping and associated equipment.

Rationale

The WTP currently uses sludge drying beds to receive and dry the alum sludge generated in the surface water treatment process. The current beds do not have enough capacity for the sludge generated at the plant and are a passive dewatering process that is highly dependent on weather conditions and labor intensive. Mechanical dewatering of the alum sludge will ensure the WTP can manage the amount of sludge produced now and into the future in a more efficient and consistent manner. Decant centrifuges were selected as the best technology to meet the needs of the WTP. The system is sized to meet production at the maximum permitted surface water withdrawal.

Infra. Sales Tax: -
Project #: PJ6108871 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 1 Manatee County Water Treatment Plant

Description and Scope

Add additional piping components and valves to enable the blending of chemicals at sites other than the blend chamber. Make repairs and provide for improvement at Clearwell C.

Rationale

Project 6050470 Lake Manatee Ultra Filtration Membrane Process Upgrade needs to be split into two phases. There is contract work that needs to be removed from Phase I and constructed under a separate CIP. (54" piping and Clearwell C work) Creating a Phase II stops delay costs in the current project, provides the flexibility for the county to drive the date for the work and eliminates future delay cost to the county should the work need to be postponed under the new CIP.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Sedimentation Basins Sludge Collection Upgrade
Department: Public Works Projects
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6109670 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 1 17915 Waterline Rd, Bradenton

Description and Scope

Replace the existing sludge collection systems (traveling bridges) in the treatment basin C with chain and flight. The existing sludge pumps are to be redesigned and replaced.

Rationale

One of the treatment basins at the Water Treatment Plant (WTP), C, is equipped with travelling bridges for sludge collection. These systems are labor intensive and have frequent outages due to operational and maintenance issues. In addition, the equipment is aging, and some components are no longer manufactured or readily available. Replacement of the bridges is recommended. A different technology, chain and flight, is the preferred choice due to its lower capital and operational costs and higher reliability.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: Buffalo Creek Reverse Osmosis Water Treatment Plant
Department: Public Works Projects
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6114070 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 8450 69th St E., Palmetto

Description and Scope

This project is to design and construct a 5 million gallon per day (MGD) reverse osmosis water treatment plant (RO WTP) that will be expandable to 8 MGD. Also included are the associated wellfield, and concentrate disposal system at the Buffalo Creek site. The plant will treat brackish groundwater supplied by a combination of Upper Floridan and Intermediate aquifer wells. Concentrate disposal system to consist of concentrate pump station and piping to connect to Injection Well IW-2, which is located at the North Regional Water Reclamation Facility (NRWRF). Project includes preliminary design, test well drilling, pilot testing, final design, permitting, and construction. Final design activities will include the design for 5 MGD as well for the future expansion to 8 MGD.

Rationale

The Buffalo Creek RO WTP has long represented an important future water supply project for the County to meet growth needs. It was originally conceived nearly two decades ago and is included on the County's consolidated water use permit issued in 2012. Current demand projections indicate the need for this additional supply by 2030 with the plant built to 5 MGD. Early preliminary design phase will allow for submission to the Southwest Florida Water Management District (SWFWMD) for consideration for cooperative funding. Test well and pilot testing is necessary to confirm water quality conditions and inform final design.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Generators and Switchgear Upgrade
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJPW02017 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Upgrades to the Water Treatment Plant (WTP) standby power system to consist of demolition of existing generators, paralleling switchgear, and heat exchangers and the installation of five (5) new engine generators, a new paralleling switchgear, and new fuel storage. The generators will be housed inside weatherproof / soundproof enclosures, while the paralleling switchgear will be housed inside a new prefabricated building.

Rationale

The Water Treatment Plant (WTP) standby power system provides power to operate the plant during a failure of the utility electrical source from Florida Power & Light (FPL). The existing standby generation system (engine-generators and paralleling switchgear) is ay or approaching the end of its useful life, and the WTP has experienced operational and maintenance challenges associated with the existing engine-generators. Due to reliability issues, the WTP requires upgrades to the existing engine-generators, paralleling gear, and associated appurtenances (e.g., cooling system, fuel storage). The new system is sized for the new loads associated with the UF retrofit project and spare for future loads. In the last twenty years, many projects have taken place at the Manatee WTP that impact the total electrical load of the facility.

Category: Potable Water
Subcategory: Potable Water Treatment
Project Title: WTP New Maintenance Facility
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJPW02259
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Design and construct approximately 10,000 square foot (sqft), high-ceilinged pre-engineered, metal warehouse building with a covered, drive-through unloading bay, rollup doors, and heavy duty material storage racks. Build an adjacent Concrete Masonry Unit (CMU) block structure with a 4,000 sqft footprint to include a training room, office and breakroom space, and workstations for technicians to repair and rebuild instruments, radios, and other components.

Rationale

The Water Treatment Plant (WTP) operates and maintains the plant, the dam, and remote facilities (wellfield, storage tanks and towers) with all the associated pumps, basins, generators, electrical components, computers, Supervisory Control And Data Acquisition (SCADA), instrumentation, analyzers, and equipment which require around the clock operation, scheduled preventive maintenance and necessary emergency repairs. The maintenance needs have grown due to aging of the facility and new processes coming online. In addition, this group has grown in number with several new staff being added to support the facility. The current space is no longer sufficient to meets the needs of the maintenance group. The new facility will be sized to accommodate the needs of the growing staff with additional warehouse space to allow for stocking of parts for increased redundancy. The warehouse should include climate controlled space for storage and inventory control of instruments, sensors, radio telemetry, and other sophisticated electrical components to be securely maintained. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $12,045,000.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Ground Storage High Service Pump Station Expansion
Department: Utilities
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJPW02294 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Expansion/build out of the high service pump station at the ground storage tanks at the Water Treatment Plant (WTP). Project to include installation of two (2) - 8,500 Gallons Per Minute (GPM), (12.3 MGD-Million Gallons per Day) vertical turbine pumps with variable frequency drives (VFDs) as well as all electrical system components and Supervisory Control And Data Acquisition (SCADA) integration.

Rationale

The WTP Ground Storage High Service Pump Station consists of three (3) vertical turbine pumps with a design capacity of 8,500 GPM each at 231 feet Total Dynamic Head (TDH). This provides a firm station capacity of 24.5 Million Gallons per Day (MGD) (17,000 gpm). The station capacity with all three (3) pumps running is 36.7 MGD (25,500 gpm). This station pumps water from the two (2) WTP 10.0 Million Gallons (MG) Ground Storage Tanks (total 20 MG) and was designed to be eventually expanded to include five (5) pumps. Due to increased water demands and to maintain redundancy in the high service pumping system, the need exists to add the final two (2) pumps. This will provide a firm capacity of 49.0 MGD (34,000 gpm) or 61.2 MGD (42,500 gpm) with all pumps in service. Pumps will be sized to match existing and will include variable frequency drives (VFD) for operational flexibility.

Infra. Sales Tax: -
Project #: PJTP25014 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Install approximately 6,200 linear feet of new 10-inch sanitary sewer force main and a new sanitary sewer pump station. Includes excavation, pipe material, installation, maintenance of traffic, testing, placing into operation and restoration. The new force main will run from the water treatment plant to State Road (SR) 64.

Rationale

The existing sanitary sewer force main includes 8-inch PVC and 10-inch High-Density Polyethylene (HDPE) pipe. A centrifuge is planned to be constructed at the water treatment plant and this new process will result in additional (500 gallon per minute) of sanitary sewer flows. The existing force main is undersized to handle these additional flows and a new larger force main will be required. Based on engineering calculations, the new force main will need to be 10-inch diameter to transfer the new sanitary sewer flows from the Water Treatment Plant to the tie-in location at SR64.

Project #: PJ6008208 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 5 3333 Lena Rd, Bradenton

Description and Scope

Stage II Phase III Installation of new and enhanced landfill gas collection in Stage II including additional horizontal and vertical collection. Extension of primary header to the North in Stage II. Required system maintenance including replacement extraction wells and condensate management systems on existing gas collection system in Stages I and III. Replacement of existing blower flare station including new controls, blowers and flare stack.

Rationale

As buried refuse deteriorates, the gas collection system collects and controls the emission of methane in to the piping system, which reroutes the gas to be used as energy. This eliminates odor and keeps the landfill in compliance with Title V air permit requirements.

Project Location

District 5 3333 Lena Road, Bradenton

Description and Scope

We will add a new foundation and structure to the North end of the existing building adding approximately 1,000 sq. ft. of space which will house four new offices. This will address the growing needs of the organization as the existing building is already fully utilized, with some rooms even serving a dual purpose. There will be efforts to improve or potentially replace the current conference room (originally a screen porch that was closed in), ensuring that it meets the functional and technological requirements for productive meetings and collaboration.

Rationale

This initiative aims to enhance the working environment, facilitate better communication among team members, and accommodate the evolving demands of the organization's operations.

Project Title: Landfill Scalehouse Improvements
Department: Utilities
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJTP27010
Status: Requested

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 5 3333 Lena Road, Bradenton

Description and Scope

With the solid waste transition in 2025, the existing scale system operates near capacity during peak periods, resulting in congestion, delays, and safety concerns. An additional scale will improve throughput, reduce wait times, enhance safety and provide operational redundancy to support reliable service delivery.

Rationale

This project will add an additional scale (including foundation and electrical), bypass lanes and signage to address increased traffic and disposal volumes associated with the residential drop-off site. Automated scale functions and verification improvements, such as cameras, payment kiosks and potential software, will also be considered with this project. The project would include design, permitting and construction for the improvements and any removal or demolition of existing roadways.

Project Title: Atlas Organics - Automated Outfall Structures
Department: Public Works Projects
Project Mgr: Kenneth Kohn
Infra. Sales Tax: Yes
Project #: PJ6024262 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 3207 71st Ave E, Sarasota

Description and Scope

Install two (2) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.

Rationale

Pearce Drain Watershed has a history of overtopping its banks and inundation of adjacent properties and roadway thoroughfares. A majority of the homes within Centre Lake Subdivision had flood claims due to the "No Name" flood event of August 2017. The Pearce Drain Watershed Management Plan (WMP) found a deficit in flood storage is causing the inundation of adjacent properties along Pearce Drain. The subsequent Pearce Drain Feasibility Study (Study) determined additional flood storage could be created by lowering the design normal water level of the existing stormwater facilities prior to a forecasted flood event utilizing Automated Outfall Structures (AOS). The Study found that 72 acre-feet of flood storage could be created, depending upon the drawdown timeframe, from installing AOS at this stormwater facility. The AOS may also be utilized to release treated runoff to optimize water quality treatment from these stormwater facilities and help meet national and state mandates to protect receiving waters in the Tampa Bay watershed.

Project #: PJ6028801
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

Multi-district Manatee Ave-US 41, Bradenton

Description and Scope

Dredge from the mouth of Wares Creek to 9th Avenue West, clear and snag debris from 9th Avenue West to 17th Avenue West, and excavate for widening the creek from 17th Avenue West to 21st Avenue West. Also, widen seawall from 1st Avenue West to 30th Avenue West, and widen with trapezoidal channel from 30th Avenue West to near Cortez Road.

Rationale

To accommodate expanded peak stream flow capacity, better accommodate heavy rainfall events and limit flood occurrences.

Project Title: Rattlesnake Slough Channel Improvements
Department: Public Works Projects
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJ6028902 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

Multi-district Honore Avenue, Bradenton

Description and Scope

This project will include survey and mapping, drainage easement dedications, and flowline improvements of Rattlesnake Slough (approximately 4.23 miles) and two tributary drainage systems between Lockwood Ridge Road and Whitfield Avenue which ultimately discharge into the Braden River/Evers Reservoir.

Rationale

A large section of this drainage system runs through private property with no defined access. Rattlesnake Slough serves as the outfall conveyance system for the communities of Palm Aire, Mote Ranch, Sarapalms, The Trails, and Quail Run. Given the history of flooding that occurs within Palm Aire, Saraplams, and Mote Ranch, staff recommend taking steps to fully maintain this system (including vegetation removal, establishment of access easements, flowline improvements such as widening/ sediment removal/channel straightening, and culvert upsizing) in an effort to improve overall drainage conveyance and lessen the impacts of future street and property flooding.

Category: Stormwater **Subcategory:** -
Project Title: Governor Ron DeSantis Park Flood Mitigation
Department: Property Management
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6042402 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 7510 Prospect Road, Sarasota

Description and Scope

This would consist of excavation of approximately 10,000 cubic yards (6.25 acre-feet) of material to create flood mitigation storage. This excavation could occur either in open space in the western portion of the park or the northern wetland (Wetland "A"). Excavation of Wetland "A" would improve the viability of this wetland by lowering grade to the determined seasonal high water table of the drainage ditch along the northern boundary of the park. This project will also enhance of both wetlands on the park property (Wetlands "A" and "B") by the removal of exotic and nuisance vegetation and planting of native vegetation. To improve regional water quality in the Pearce Drain/Gap Creek Watershed, a Nutrient Baffle Box would be installed in the drainage system downstream of the culvert crossing on Prospect Road.

Rationale

This project will further utilize the park property to provide regional flood storage and additional water quality treatment within Pearce Drain/Gap Creek Watershed. This watershed has historically experienced flood inundation to the roadway thoroughfare system, including Tallevast Road, Whitfield Avenue, Prospect Road, and 39th Street East, and residential and industrial properties. In addition to the flood and water quality improvements, this project with include enhancement of the existing wetlands located within the park property by the removal of exotic and nuisance vegetation and planting of native vegetation to improve the viability of these wetlands.

Department: Public Works
Project Mgr: Kenneth Kohn
Infra. Sales Tax: -
Project #: PJ6044460 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

Multi-district 4800 - 5300 Block CR 675, Myakka City

Description and Scope

Design, permit, and construct stormwater improvements within the project area to enhance drainage conveyance and reduce roadway inundation.

Rationale

The project area has experienced significant and recurring roadway flooding during rainfall events, resulting in operational and safety concerns. An evaluation of existing stormwater infrastructure determined that the flooding is not attributable to maintenance deficiencies, but rather to inadequate conveyance capacity for the contributing runoff. The existing system does not meet acceptable performance levels for managing stormwater volumes generated within the drainage basin. Based on this analysis, improvements are recommended to increase system capacity and reduce roadway inundations during storm events.

Project Title: Palm Aire Stormwater Pipe Replacement and Rehabilitation
Department: Public Works
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJ6045382 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 Whitfield Ave at University Pkwy, Sarasota

Description and Scope

Design, permit, construct/install stormwater drainage infrastructure or complete the rehabilitation of existing stormwater pipes (varies sizes) within the Palm Aire Community.

Rationale

There are numerous sections of corrugated metal pipe that continuously collapse and cause street flooding. The existing stormwater conveyance systems are easily overwhelmed and could benefit from redesign, pipe upsizing, and/or pipe rehabilitation. The pipe upsizing will require engineering design and property acquisition thus is outside the scope of regular maintenance.

District 1 Erie Road, Parrish

Description and Scope

This project will include survey and mapping, drainage easement dedications, and flowline improvements of Cedar Drain (approximately 2.70 miles) between the headwaters within Ancient Oaks Subdivision to the ultimate outfall of Buffalo Canal.

Rationale

A large section of this drainage system runs through private property with no defined access. Cedar Drain serves as the outfall conveyance system for the communities of Ancient Oaks, Thousand Oaks, Woodlawn Lakes, Oakleaf Hammock, Old Mill Preserve and Sheffield Glen. Given the history of flooding that occurs within Thousand Oaks and Woodlawn Lakes, staff recommends taking steps to fully maintain this system (including vegetation removal, establishment of access easements, flowline improvements such as widening/ sediment removal/channel straightening, and culvert upsizing) in an effort to improve overall drainage conveyance and lessen the impacts of future street and property flooding.

Project Location

District 1 Fort Hamer Road, Parrish

Description and Scope

This project will include survey and mapping, drainage easement dedications, and flowline improvements of Wade Canal (approximately 6.09 miles) between the headwaters east of Fort Hamer Road to the ultimate outfall of Buffalo Canal.

Rationale

A large section of this drainage system runs through private property with no defined access. Wade Canal serves as the outfall conveyance system for the communities of Harrison Ranch, Lexington, and Willow Bend. Given the history of flooding that occurs within this drainage system, staff recommends taking steps to fully maintain this system (including vegetation removal, establishment of access easements, flowline improvements such as widening/sediment removal/channel straightening, and culvert upsizing) in an effort to improve overall drainage conveyance and lessen the impacts of future street and property flooding.

Category: Stormwater **Subcategory:** -
Project Title: Rio Mar at Sarasota Automated Outfall Structures
Department: Public Works
Project Mgr: Kenneth Kohn
Infra. Sales Tax: Yes
Project #: PJ6068362 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 6747 Prospect Road, Sarasota 34243 (Manatee County)

Description and Scope

Evaluate and install three (3) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of AOSs to based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required. Additionally, install an outfall pipe underneath Prospect Road to a lateral drainage ditch ultimately flowing into Pearce Drain.

Rationale

Pearce Drain Watershed has a history of overtopping its banks and inundation of adjacent properties and roadway thoroughfares. A majority of the homes within Centre Lake Subdivision had flood claims due to the "No Name" flood event of August 2017. The Pearce Drain Watershed Management Plan (WMP) found a deficit in flood storage is causing the inundation of adjacent properties along Pearce Drain. The subsequent Pearce Drain Feasibility Study (Study) determined additional flood storage could be created by lowering the design normal water level of the existing stormwater facilities prior to a forecasted flood event utilizing Automated Outfall Structures (AOS). The Study found that 38.72 to 48.56 acre-feet of additional flood storage could be created, depending upon the drawdown timeframe, from installing AOS at this stormwater facility. The AOS may also be utilized to release treated runoff to optimize water quality treatment from these stormwater facilities and help meet national and state mandates to protect receiving waters in the Tampa Bay watershed.

Project Title: Polynesian Village Discharge to Pittsburg Drain
Department: Public Works
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJ6096000 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 Molokai Dr between 5th St W and the Pittsburg Canal, Bradenton

Description and Scope

This project will replace a highly deteriorated 66 inches metal pipe between 5th St W and the Pittsburgh drain between Molokai Dr and 65th Ave W.

Rationale

This project is for the replacement of a failing storm water pipe south of Molokai Dr. between 5th St W and the Pittsburg Canal. This 66 inch pipe is the outfall point for areas east of US 41/ 14th ST W , south of 63rd Ave W, and north of Bowlees Creek. This metal pipe is well past its typical 30 year lifespan, and holes are developing along the entire section of pipe that require annual repairs. If not replaced a full pipe collapse could occur and cause the potential for extensive flooding in the surrounding areas. Replacing with concrete storm drain will not only increase the systems useful life to approximately 50 years or more, the change from corrugated metal to smooth walled concrete makes the drainage system more efficient.

Infra. Sales Tax: -
Project #: PJ6096800 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 3 Hawthorn Park, Bradenton

Description and Scope

The designed capture structure will make a location that captures the material before it gets to the open ditch and the cross pipe. While the structure will require frequent cleaning, the net annual amount of effort will still be less. The capture structure will be cleaned easily with existing equipment.

Rationale

The purpose of this project is to proactively capture sediment that continually comes through this open drainage system. Crews must annually clean the ditch and pipe crossing just down stream of this location because of the large rate of deposition. The designed capture structure will make a location that captures the material before it gets to the open ditch and the cross pipe. The capture structure will be cleaned easily with existing equipment.

Project Title: Mockingbird Hill/Samoset Canal Improvements at 27th St E/34th Ave. E
Department: Public Works
Project Mgr: Al Neumann
Infra. Sales Tax: -
Project #: PJ6101900 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 2 27th St E at the Mockingbird Hill canal, Bradenton

Description and Scope

This project will design and construct a conveyance system to transport storm water under 27th ST E. This will replace an existing system that has been put together in pieces and parts over the last 40 years of development.

Rationale

Mockingbird Hill canal culvert crossing rehab. This is the location of the Mockingbird Hill canal where it must cross 27th ST E. The way it crosses is very in efficient because it is not a direct path for the water to flow. The canal is offset by over 200 feet from the west to east side of the road. During this distance the water must make two 90 degree turns and pass through several structures. The City of Bradenton watershed study showed the water to back up over two feet from east to west because of this situation. This project will design a more efficient conveyance process at this location.

Project Location

District 4 Bowlees Creek, Bradenton

Description and Scope

Design and construction. Removal of two weirs. Addition of automated weirs in Bowlees Creek and extend reclaimed water to Sara Bay Golf Course. Addition of nutrient baffle box for water quality treatment. Dredging portions of Bowlees Creek.

Rationale

Bowlees Creek is a flood prone watershed. A Watershed Study and Flood Mitigation Alternatives Analysis is underway through the cooperative agreement with the SWFWMD. This study identified flood mitigation alternatives which included this project for flood reduction. This flood mitigation alternative was identified at the work session held October 31, 2019 to the BOCC.

Infra. Sales Tax: -
Project #: PJ6114200 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 3 Cortez Village - Sunny Shores, Bradenton

Description and Scope

This project encompasses design, permitting, and installation of stormwater drainage infrastructure or rehabilitation of pipes of various sizes on ten streets in the Cortez Village community and eleven streets in the Sunny Shores Community.

Rationale

These two communities have drainage infrastructure that is extremely old and is plagued by chronic failures. There are numerous sections of small diameter clay and non reinforced drainage pipe that continuously collapse and causes street flooding. Both communities stormwater conveyance systems are easily overwhelmed and could benefit from redesign, pipe upsizing, and some pipe rehab. The pipe upsizing would need property acquisition and engineering involvement and is outside the scope of regular maintenance.

Project Title: Glenn Creek from 15th/Tropicana to Sugar Creek Resort
Department: Public Works
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJ6114400 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 2 15th St to Sugar Creek, Bradenton

Description and Scope

Design and construction. Construction of a 20 ac-ft flood mitigation pond on east side of 15th, additional dual 100 L.F. of 48 inch RCP at 15th and additional equivalent 7 ft RCP (approx. 100 L.F. at 27th), and additional equivalent 7 ft RCP in Sugar Creek Resort.

Rationale

This project is to lower flood stages in Glenn Creek from the Tropicana Area on 15th to Sugar Creek Resort. This project will lower the flood stages in this system up to the 100 year 24 hour storm event. This will be accomplished with widening of existing conveyances on 15th, 27th, and within the Sugar Creek Resort area and will also include a flood mitigation pond.

Project Title: Land for Stormwater Operations Facility
Department: Public Works
Project Mgr: Jeff Anthony
Infra. Sales Tax: -
Project #: PJ6117400 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 5511 39th St E, Bradenton

Description and Scope

This project provides the funding and services need to purchase the additional land needed to construct a new administration building at the 5511 39th ST E facility. The land in question is the 3 acres directly to the north of the facility that is currently undeveloped. It will provide a proper location for the administration building in the long term and allow the construction to proceed while the crew still occupies the existing building.

Rationale

This small addition of land to the already established and accepted neighborhood yard is much more desirable and economical compared to searching for a new site to locate the entire operation. The surrounding neighborhoods were built with this facility in place and have accepted its operation as the norm for the area.

Project Title: Design and Construction of Stormwater Operations Facility
Department: Property Management
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6117401 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 5511 39th St E, Bradenton

Description and Scope

This provides funding for design and construction of a new administration building at the 5511 39th ST E, Stormwater Operations facility. The current building does not provide enough space for the 50+ employees working from this location. It was originally intended for roughly 30 employees. The structure is also antiquated and not storm ready. This facility is one of the main dispatch points of our rapid response teams during weather emergencies. The teams cannot stay at this location due to the unsturdy nature of the facility and must stay at another location, then return to the yard for their equipment to respond following events.

Rationale

This project will provide a building sufficient for the Stormwater Operations crew for the next 20+ years. It will also add another County facility that can be occupied during weather events so crews are available the fastest response possible.

Project Title: Bayshore Gardens Community Stormwater Pipe Rehabilitation
Department: Property Management
Project Mgr: Jeff Anthony
Infra. Sales Tax: -
Project #: PJ6117600 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 Bayshore Gardens, Bradenton

Description and Scope

This project encompasses design, permitting, and installation of cure in place lining rehabilitation and/ or full replacement of pipes of various sizes on eleven streets in the Bayshore Gardens community and/or the select addition of inlets in problem areas.

Rationale

This community has corrugated metal drainage pipe that has surpassed its lifespan and is starting to fail. When these pipe lines fail either by collapsing or rotting through stormwater conveyance is compromised causing street and property flooding to occur.

Infra. Sales Tax: -
Project #: PJ6117601
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 4 Florida Blvd, Bradenton

Description and Scope

Design and Construction. Stormwater improvements include installation of additional inlets to collect runoff and upsizing pipelines within streets and in the vicinity of the marina, Florida Boulevard, American Way, Canada Boulevard, Bay Drive, and Canal Way.

Rationale

This project is to improve local street flooding and flooding of the Trailer Estates area. County requires roadways to be designed to the 10 year 24 hour storm event. The existing drainage system does not meet County requirements for the 10 year storm resulting in high water (overtopping of crown of road) at various locations.

Project Title: Pearce Drain Innovative Water Quality Technology Testing
Department: Public Works
Project Mgr: Kenneth Kohn
Infra. Sales Tax: -
Project #: PJ6118600 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 4 8414 35th Lane East, Campus Cove, Alumni Trail, Sarasota

Description and Scope

This project will consist of the installation of a Nutrient Baffle Box and Automated Outfall Structures within University Village and/or Grady Point Subdivision for the purpose of sampling and testing the pollutant loading with existing stormwater facilities and subsequent removal efficiency of pollutants downstream in the receiving waterbody of Pearce Drain. The water quality sampling and testing will determine the effectiveness of pollutant removal of both systems, such as the removal of suspended solids including organic and inorganic debris, nutrients (nitrogen and phosphorous), and other pollutants such as oils and grease. The Automated Outfall Structure would be utilized to release treated runoff through the residence period within the stormwater facility and created additional water quality treatment volume before a successive rain event.

Rationale

Under the County NPDES MS4 permit, the County is required address nutrient impairment of its waterways and to take proactive measures to reduce pollutant loading. To address this regulatory requirement, this project will evaluate water quality treatment removal using innovative technologies including Automated Outfall Structures (AOS) and Nutrient Baffle Boxes (NBB) to determine their respective pollutant load reduction and cost effectiveness.

Project #: PJST01957 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 Lockwood Ridge - Honore, Bradenton

Description and Scope

Design and construction. This project will lower the flood stages for communities along Rattlesnake Slough in the immediate area between Lockwood Ridge Road and the crossing at Honore Avenue. This will be accomplished with construction of a 50 ac-ft flood mitigation pond.

Rationale

This project is to lower flood stages in Rattlesnake Slough for up to the 100 year 24 hour storm event. This will be accomplished with construction of 50 ac-ft of pond storage (flood mitigation) located between Lockwood Ridge Road and the crossing at Honore Avenue.

Rattlesnake Slough is a flood prone watershed. A Watershed Study has been completed for this area and flood reduction can be realized with additional storage provided by this project.

Project Title: River Club Stormwater Pipe Replacement and Rehabilitation
Department: Public Works
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJTP25021 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 5 River Club Blvd at SR 70, Bradenton

Description and Scope

Design, permit, construct/install stormwater drainage infrastructure or complete the rehabilitation of existing stormwater pipes (varies sizes) within the River Club Community.

Rationale

There are numerous sections of corrugated metal pipe that continuously collapse and cause street flooding. The existing stormwater conveyance systems are easily overwhelmed and could benefit from redesign, pipe upsizing, and/or pipe rehabilitation. The pipe upsizing will require engineering design and property acquisition thus is outside the scope of regular maintenance.

Project #: PJTP25022 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Deficiency

Project Location

District 2 604 6th ST E, Palmetto

Description and Scope

Design, permit, and construct raised internal streets to create additional freeboard above the apparent high-water stages with associated adjustments to existing stormwater structures (e.g., curb inlets and junction boxes) and utility infrastructure.

Rationale

The intent of the project is to elevate the local streets within Sylvan Oaks subdivision to lessen the impact of flood inundation within the community. This project should be considered conceptual until the North County Watershed Management Plan (WMP), which includes this general area, is scheduled to be completed December 31, 2024. The proposed budget includes consideration for both stormwater and utility infrastructure adjustments.

Project #: PJTP27008 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Growth, Deficiency

Project Location

District 2 2525 27th Ste E., Bradenton

Description and Scope

The 2.4-acre project proposes to convert a 1.76-acre citrus field into a floodplain wetland within the Glen Creek corridor. By repurposing legacy agricultural lands for native habitat restoration and enhancement, anticipated outcomes include addressing nutrient pollution loads and providing for landward migration of coastal wetlands in response to sea level rise (SLR).

Rationale

Mixon Farm consists of four parcels totaling 39 acres. It contains various agricultural lands. Glen Creek runs east-west through the central portion of the property for 0.3-- miles, discharging to Sugarhouse Creek to the west. This project aims to maximize the ecological functions along this tributary to the Braden River, including recreating coastal wetland habitats and providing water quality benefits.

Category: Stormwater **Subcategory:** -
Project Title: Collins Dairy Drain Urban Stream Restoration
Department: Public Works
Project Mgr: Alissa Powers
Infra. Sales Tax: -
Project #: PJTP27009 **Status:** Requested

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 2 3225 32nd Way E, Bradenton

Description and Scope

An urban stream design will be applied to the existing ditched stream channel to increase flood storage capacity, provide additional nutrient treatment opportunities, and improve fish and wildlife habitat supporting recreational and commercial fishing industries in Manatee County. Egress to the project area is through 33rd Street East which is an area of known flooding. The project design will evaluate whether reduction of roadway flooding is possible with this project.

Rationale

The Gap Creek watershed occurs in an older area of the County that lacks modern stormwater infrastructure for flood control and water quality treatment. The Collins Dairy Drain segment is approximately 19 ft wide, 05. miles long, and has a drainage area of 0.8 square miles. The Collins Dairy Drain urban stream restoration project is a collaborative effort with Tampa Bay Estuary Program (TBEP) to address high nitrogen and phosphorus loads within the Gap Creek watershed. The design, engineering, and permitting is funded by the Bipartisan Infrastructure Law through a Contractor Agreement with the TBEP.

This project summary includes projects that may appear to be complete but may still require administrative, financial, contractual, or other closeout activities before they can be officially closed in the Capital Improvement Plan (CIP).

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: FM Pipe for Redirection of Flow from Colony Cove 6 LS (RTU 522)
Department: Utilities
Project Mgr: Albert Rosenstein
Infra. Sales Tax: -
Project #: PJ6005687 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: - Project Need: Growth, Deficiency

Project Location

District 1 162 Colony Drive North, Ellenton

Description and Scope

Installation of new 160 LF of 10-inch discharge pipe from Colony Cove 6 (CC6) (RTU 522), Lift Station (LS) to connect to the existing 10-inch pipe along Colony Drive N. (where flow will be reversed). This includes disconnection of CC6 from the force main along US301 (could maintain the pipeline with a closed valve in order to have backup redundancy). Install 1,620 LF of LS CC10 discharge force main along Desoto Drive from LS CC10 (RTU 526) to the manhole upstream of LS N1-C. New 12-inch pipe alignment. Install 2,033 LF of new 10-inch pipe through the development to route flows from Lift Stations CC6, CC8, and Tierra Siesta 1 to the new 12-inch discharge of LS CC10 (and ultimately discharge into LS N1-C). Abandonment of the existing 8-inch discharge of CC10 (which is too small to be reused in reverse flow direction).

Rationale

This project is recommended by the 2023 North Wastewater Collection System Master Plan (NC-201 & NC-202) which calls for the correction of these conditions prior to FY29. This project is designed to correct the wet weather high flow hydraulic overloading on the Tidevue force main by lowering the head pressure condition in the Tidevue force main. The "N1C Upgrade to a MLS & Reroute Tidevue FM Flows to N1C Gravity Main" project must run parallel to this project.

Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6018082
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 Canada Blvd, Bradenton

Description and Scope

The installation of new gravity sewer mains, laterals, and reconnection to homes. All Design will be funded in FY25. The construction phasing will use a master design that is currently being developed at Project Management. From a master gravity sewer construction design awards will be broken into five (5) phases of construction. The first construction phase would start in FY25 and the last construction phase start in FY29. This will complete the total replacement of Trailer Estates.

Rationale

From the Trailer Estates Inflow and Infiltration (I&I) Final Report Summary, it was recommended to replace the aging sewer system from the rear easements to the front roadway. The current system is experiencing a high infiltration rate.

MANATEE COUNTY GOVERNMENT
Capital Improvement Plan
FY2027 - FY2031

Category: Wastewater
Subcategory: Wastewater Collections
Project Title: Lift Station 9-A Force Main Extension
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6021482
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 4 902 Whitfield Ave, Bradenton

Description and Scope

Extend the 12-inch Lift Station 9-A force main from manhole (#14825) located at the intersection of Whitfield Avenue and Persimmon Place to the king manhole wet well of LS 14-A (RTU #434), approximately 1,250 feet. Install a p-trap (dip in the force main) and connect to the existing manhole. Line the inside of the king manhole (#12208). Upgrade the existing approximately 20 linear feet of gravity main from king manhole to the wet well from 18-inch to 20-in.

Rationale

The 9-A Force Main Extension will reroute increasing flows coming from the south along 15th Street E. away from the gravity infrastructure upstream of Lift Station 14-A and equalize the peak flows, thus allowing the pumps to operate within capacity. This project is necessitated by anticipated growth at the Airport Industrial Park (RTU #469), Airport Commercial Park (RTU $491), and Centre Park (RTU #298) Lift Stations. This project recommended in the 2023 South West Wastewater Collection System Master Plan.

District 4 Southwest Service Area, Bradenton

Description and Scope

Replace approximately 765 linear feet (LF) of 4- and 6-inch force main from the flange inside the valve vault at Lift Station 15-A (RTU 402) with new 6-inch pipe and approximately 1,295 LF of 3-inch force main at Palm Aire 6 Lift Station (RTU 446) with new 4-inch pipe. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Includes lining of receiving manhole and the first two downstream manholes for each force main. Grout, fill, and abandon in place the old force main.

Rationale

Replace due to age as recommended in Project Packages 6E and 7C in the Force Main and Valve Asset Management Plan (2014).

Project Location

District 3 5820 Riverview Blvd to 5116 Harbor Dr NW, Bradenton

Description and Scope

Replace approximately 3,655 (Linear Feet) LF of 8 inch force main at Lift Station 7D (RTU 230), approximately 625 (LF) of 6 inch force main at Lift Station 22D (RTU 224), approximately 279 LF (250 LF by jack and bore and 29 LF open cut)of 4 inch force main at Lift Station 21D (RTU 229), approximately 875 LF of 4 inch force main at Lift Station 4D (RTU 231). Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

Replace due to age as recommended in Project Packages 3A through 3E in the Force Main and Valve Asset Management Plan (2014).

Subcategory: Wastewater Collections
Project Title: Priority Group 2-F Gravity Sewer
Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6089784
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

Multi-district North Service Area, Bradenton

Description and Scope

Inspect and replace or rehabilitate as required +/- 15,257 LF gravity sewer main, 68 manholes, 123 sewer laterals. Project includes +/- 1,321 LF of 6" pipe, +/- 13,366 LF of 8" pipe, and +/- 570 LF of 10" pipe.

Rationale

Recommendation from Manatee County Gravity Collection System Desktop Evaluation, Repair and Rehabilitation (R&R) Prioritization, and Asset Management Plan" (2020), Section 7.2: Priority Group No. 2, Project Package 2-F (Appendix B). Many of these pipelines and infrastructure are past their useful life. Additionally, many of these pipelines are located adjacent to environmentally sensitive areas. Failure to this sewer system could impact the bay and the County could face fines from Florida Department Environmental Protection (FDEP). Also these proactive actions will reduce inflow & infiltration (I & I) into the system reducing the potential sewer spills. This could also potentially reduce the treatment cost at the North Regional Water Reclamation Facility (NRWRF).

Project Title: Lift Station 6A and 7A Force Main Replacements and Lift Station 6A Wetwell Expansion
Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6097881 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 4 7678 W Moreland Dr to 8448 Uplands Blvd, Bradenton

Description and Scope

Replace Lift Station 7A (RTU 137) force main (approximately 1,615 linear feet (LF) of 6-inch force main replaced with 8-inch) and Lift Station 6A (RTU 136) force main (approximately 1,900 LF of 8-inch pipe with 12-inch). Remove existing wetwell and install an upsized wetwell at Lift Station 6A, proper size to be determined by the EOR on this project based on storage capacity requirements. Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

The force main upsize at Lift Station 7A is to accommodate additional flows from the USF/Airport areas and prevent high velocities in the force main. The upsize at Lift Station 6A is to prevent high velocities in the force main and prevent surcharging in the upstream gravity system. Recommended Projects SW-5 and SW-6 from the Southwest Wastewater Collection System Master Plan Update (2016). The current Lift Station 6A does not meet the required wetwell capacity (approximately 4 times the pumping capacity).

Project Title: I-75 Parallel Force Main
Department: Public Works Projects
Project Mgr: Albert Rosenstein
Infra. Sales Tax: -
Project #: PJ6097980
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 5 7477 41 St Ave E to Under I-75, Bradenton

Description and Scope

Project includes installing approximately 670 linear feet of 20 inch diameter force main downstream of 428 Booster Station (RTU 666), under I-75, where a hydraulic bottleneck exists. Also, due to the size of the force main and extensive depth needing to drill under the interstate the design calls for a switch from the directional drill method to jack and bore method of installation of the force main.

Rationale

To correct existing capacity deficiency. Recommended Project SE-5 from the Southeast Wastewater Collection System Master Plan Update (2017) and to coordinate with Florida Department of Transportation (FDOT) project timing.

Project #: PJ6101080
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 8720 44th Ave W, Bradenton

Description and Scope

Evaluate the MLS-203 (1-M) collection system basin for infiltration and inflow. Design and construct a sequence of improvements to decrease infiltration and inflow occurring within this system. First phase should include a chloride monitoring study to narrow the areas to receive rehabilitation. Project should include cleaning and inspections of sewer system including laterals, mainlines, and manholes to provide cost estimates, recommendations for improvements, and scope required to complete the work.

Rationale

The 1-M mini-basin (the gravity area that flows directly to MLS 1-M) was one of the highest ranked priority areas for infiltration rehabilitation per the Engineer of Record's Inflow and Infiltration Study Report. Main line gravity pipes, manholes and laterals will be evaluated.

Department: Public Works Projects
Project Mgr: Andres Hidalgo
Infra. Sales Tax: -
Project #: PJ6101180 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

Multi-district 2301 Ave C to 2819 Ave C, Bradenton Beach and Manatee Woods, Bradenton

Description and Scope

Evaluate the following collection system basins for infiltration and inflow: Manatee Woods Lift Station (RTU 319), Lift Station 3-C (RTU 058), and Lift Station 2-C (RTU 057). Design and construct a sequence of improvements to decrease infiltration and inflow occurring within these collection system basins. First phase should include a chloride monitoring study for Lift Station 2-C and inspections including smoke testing for Manatee Woods and Lift Station 3-C to narrow the areas to receive rehabilitation. Project includes cleaning and inspections of sewer system including laterals, mainlines, and manholes to provide cost estimates, recommendations for improvements, and scope required to complete the work. Project also includes design of improvements, preparation of bid documents, and services during construction.

Rationale

The Manatee Woods lift station, Lift Station 2-C, and Lift Station 3-C were identified as high priority areas for rehabilitation in the County's Inflow and Infiltration Study. Improvements will decrease inflow and infiltration to the collection system and treatment plant.

Project #: PJ6104271
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 Harbor Road and 6th Ave NW, Bradenton

Description and Scope

Replace Approximately 2,302 Linear Feet (LF) of existing 4" force main pumping from Lift Station #232, running along Harbor Road and 6th Ave NW, and connecting to an 8" force main along 59th street NW.

Rationale

Replacement due to age (installed in approximately 1976) as recommended in Project Packages 3A through 3E in the 'Force Main and Valve Asset Management Plan (2014)'. This portion of 2,302 linear feet (LF) was originally planned as part of the CIP Project #6089781-Southwest Area D Force main Replacement. The location of this project is also adjacent to the Harbor Hills Waterline Replacement Project # 6104270 which includes water main replacement along Harbor Road as well. For planning and construction purposes it is practical to run the water main replacement project and this portion of force main replacement project concurrently.

Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6110281 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

Multi-district 1355 41st Ave E, Ellenton

Description and Scope

Evaluate the Tidevue Estates portion of the Tidevue Master Lift Station collection system basin for infiltration and inflow (I&I), including an I&I study with potential flow monitoring, smoke testing, and closed-circuit television (CCTV). This includes the gravity collection system within Tidevue Estates upstream of lift station RTU 503. Design and construct a sequence of improvements to decrease infiltration and inflow occurring within these collection system basins. Project to include cleaning and inspections of sewer system including laterals, mainlines, and manholes, recommendations for improvements, and scope of the recommended improvements. Project also includes design of improvements, preparation of bid documents, and services during construction.

Rationale

The Tidevue Master Lift Station service area has been identified by County staff to have high inflow and/or infiltration. This project will include an I&I study evaluation to determine the locations of high I&I and subsequent improvements in the most problematic areas identified in the study.

Project #: PJ6119580
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 1 635 172nd Ct E, Bradenton 34212

Description and Scope

Design, permit, construct, and project management the installation of a 4-inch force main and a 8-inch gravity sewer with at least one manhole, approximately 1,110 feet along 7th Ave E, from Lift Station No. 706 to the existing gravity sewer network locating in the Rye Wilderness Estate subdivision.

Rationale

Lift Station No. 706, located in the Hillwood subdivision off of Waterline Rd, is experiencing issues due to the current configuration of flows in the wastewater collection system which is causing maintenance issues. Staff recommends rerouting flows from Lift Station No. 706 via a force main to the nearby gravity sewer network to more efficiently operate the County's wastewater system.

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: 69th Street Parallel Force Main Extension to NRWRF Headworks
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP26016 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 8100 69th Street East, Palmetto

Description and Scope

Disconnect the existing 12-inch force main alignment that was constructed along 69th Street. Extend the 12-inch FM alignment to the North Regional Water Reclamation Facility (NRWRF) headworks using 6,450 feet of 16-inch diameter pipe to hydraulically disconnect the new alignment from the original 16-inch pipe on 69th Street and the 20-inch pipe from Lift Station N1-C from the south. Add two additional valves for existing 16 inch pipe to isolate in both directions.

Rationale

This project will allow separation of lift stations that need to discharge higher range/peak flows (at higher heads, using their VFDs) from the smaller lift stations that can pump to standard heads only. Recommended in the 2023 North Wastewater Master Plan.

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Redirect Heron Creek Lift Station (RTU 862) Flows
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP26017 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 1 7511 36th Ave. East, Palmetto

Description and Scope

Disconnect the 10-inch Heron Creek force main on 36th Avenue East (Ellenton Gillette Road) from the 16-inch N1B force main on 69th Street East and redirect to the 10-inch gravity sewer stub-out at the northwest corner of 69th & 36th. The gravity stub will be connected to a new polymer manhole and the next two downstream manholes will be lined. Upgrade the Heron Creek Lift Station (RTU #862) discharging piping, existing 4-inch force main to 6-inch force main, and/or pumps for Heron Creek as necessary to accommodate the new head conditions experienced by the station.

Rationale

The Heron Creek Lift Station (RTU #862) experiences operational difficulties due to high force main pressures caused by the N1B Master Lift Station. This project will disconnect the Heron Creek Lift Station from the N1B force main and then connect to the gravity sewer system that flows to N1B. The new lower head conditions will allow for optimal operation of the Heron Creek Lift Station.

Schedule of Activities

Activity	Start	End	Amount

Category: Wastewater **Subcategory:** Wastewater Collections

Project Title: Mills Elementary School Lift Station (RTU #801) and Buffalo Creek Golf Course Lift Station (RTU #559) Force Main Reconfiguration

Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP26018 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 1 7200 69th Street East , Palmetto

Description and Scope

Disconnect discharge 4-inch force main of Mills Elementary School Lift Station (RTU #801) and Buffalo Creek Lift Station (RTU 559) from the 16-inch force main and connect instead to the existing 12-inch force main. This is approximately 80 feet of 4-inch pipe. Grout, fill, and abandon in place the old force main.

Rationale

By Plan Development Build Out (PDBO), this alleviates the overflows at these stations as well as at Fairway Imperial Lift Station (RTU #583) and Imperial Lakes Lift Station (RTU #510). Recommended in the 2023 North Wastewater Collections System Master Plan.

Infra. Sales Tax: -
Project #: PJTP26019
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Growth

Project Location

District 2 2889 16th Ave., Palmetto

Description and Scope

Upsizing of the existing 6-inch force main on 16th Avenue to 10-inch by replacing 2,870 feet of existing 6-inch force main with a new 10-inch force main (consistent with the new design flow for LS N7-A RTU #554) will be necessary by the time that the pumps at LS N7-A are upgraded. Replace from the first flange inside the valve vault at lift station and install a p-trap (dip in the Force Main) and connect to the existing manhole. Includes lining of receiving manhole and the first two downstream manholes for each force main. Grout fill and abandon in place the old force main.

Rationale

Upgrade in force main pipe size is needed due to growth, recommended in the 2023 North Wastewater Collections System Master Plan.

Project Title: Hawaiian Village Force Main Upgrade
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra. Sales Tax: -
Project #: PJTP26020
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 4
102 Molokai Drive, Bradenton

Description and Scope

Replace the 3-inch force main of Hawaiian Village lift station (RTU #403) with 8-inch-diameter pipe, approximately 200 feet. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout, fill, and abandon in place the old force main. Acquisition of easement for the force main is required.

Rationale

Upstream gravity surcharge shall be alleviated by replacing the 3-inch force main with 8-inch-diameter pipe. The 3-inch force main is currently creating a bottle neck. Recommended in the 2023 South West Wastewater Collection System Master Plan.

Project Title: Tidevue Force Main Replacement
Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJTP27012
Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Maintenance

Project Location

District 2 1355 41st Ave East, Palmetto

Description and Scope

Replace approximately 30,300 LF of force main that begins at Tidvue lift station (RTU #501) and terminates near the North WRF by control valve SCV000007.

Rationale

Recommendation from Package 3 of the Wastewater Force Main and Valve Asset Management program updated in 2025. This force main has had two different breaks on it in the past year. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system ccould impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Infra. Sales Tax: -
Project #: PJTP27013 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Maintenance

Project Location

District 3 Southwest Service Area Vicinity of 27A Master

Description and Scope

Replace approximately 3 LF of 14" diameter pipe from valve #SSV001919 to where it intersects the 16" force main on the intersection of 48th Ave W and 26th W, 32 LF of 18" pipe from the intersection of 53rd Ave W and 26th St W to the termination point at manhole #SMH005663, 580 LF of 6" pipe from inside of the valve vault at lift station RTU #132 to the termination point at manhole #SMH025579, 17 LF of 6" pipe from the intersection of 4th St E and 53rd Ave E to manhole #SMH024397 and 20 LF of 6" pipe directly east of the previous pipe terminating into manhole #SMH024396.

Rationale

Recommendation from Package 1 of the Wastewater Force Main and Valve Asset Management program. The force mains in the package are at the end of their service life. The replacement of the force mains is necessary to maintain an operable utility system. If the force mains are not replaced, the lines are at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $1,128,000

Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 (Bayshore Gardens) Southwest Service Area, Bradenton

Description and Scope

Inspect and replace or rehabilitate as required +/- 60,691 linear feet (LF) gravity sewer main, 311 manholes, 690 sewer laterals. Project includes +/- 10 LF of 4" pipe, +/- 38 LF of 6" pipe, +/- 43,418 LF of 8" pipe, +/- 633 LF of 10" pipe, +/- 783 LF of 12" pipe, +/-11,706 LF of 16" pipe, and +/- 4,104 LF of 24" pipe. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan.

Rationale

Recommendation from Manatee County Gravity Collection System Desktop Evaluation, Repair and Rehabilitate (R&R) Prioritization, and Asset Management Plan" (2020), Section 7.2: Priority Group No. 2, Project Package 2-B (Appendix B). Many of these pipelines and infrastructure are past their useful life. They are located adjacent to Sarasota Bay an environmentally sensitive area. Failure to this sewer system could impact the bay and the County could face fines from Florida Department of Environmental Protection (FDEP). Also these proactive actions will reduce inflow and infiltration (I & I) into the system reducing the potential sewer spills. This also will reduce the treatment cost at the Southwest Water Reclamation Facility (SWWRF). Estimated Construction = $22,966,000

Project Need: Maintenance

Project Location

Multi-district Southeast and Southwest Service Areas, Bradenton

Description and Scope

Inspect and replace or rehabilitate as required +/- 15,337 LF gravity sewer main, 103 manholes and 139 laterals. Project includes +/- 40 LF of 6" pipe, +/- 1,375 LF of 8" pipe, +/- 92 LF of 10" pipe, +/- 11 LF of 12" pipe, +/- 8 LF of 16" pipe, and +/- 7 LF of 18" pipe.

Rationale

Recommendation from Manatee County Gravity Collection System Desktop Evaluation, Repair and Rehabilitation (R&R) Prioritization, and Asset Management Plan" (2020), Section 7.2: Priority Group Number 2, Project Packages 2-C and 2-E (Appendix B). Many of these pipelines and infrastructure are past their useful life. They are located on Anna Maria Island and in the Southeast (SE) Service Area. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department Environmental Protection (FDEP). Also these proactive actions will reduce inflow and infiltration (I & I) into the system, reducing possible sewer spills and potentially reducing treatment costs at the Southwest and Southeast Regional Water Reclamation Facilities (SWWRF & SERWRF). Future cost estimate = $1,228,666.

Project #: PJWW02144
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 5932 12th Street East, Bradenton

Description and Scope

Replace approximately 1,420 linear feet of 8-inch diameter pipe from the flange inside the valve vault at lift station RTU # 433 20A to the termination point at the existing manhole # 12614. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout, fill, and abandon in place the old force main.

Rationale

Recommendation in Package 8 from the Wastewater Force Main & Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Subcategory: Wastewater Collections
Project Title: 21A Force Main Replacement (RTU 433)
Department: Public Works Projects
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJWW02146
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 5503 12th Street East, Bradenton

Description and Scope

Replace approximately 1,265 linear feet of 8-inch diameter pipe from the flange inside the valve vault at lift station RTU # 432 21A to the intersection of 57th Avenue East and 12th Street East. Reconnect to the existing PVC pipe at the intersection. Grout, fill, and abandon in place the old force main. Line the inside of the manhole and the next two manholes downstream.

Rationale

Recommendation from Package 7 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Project Need: Maintenance

Project Location

District 2 1560 60th Avenue Drive E, Bradenton

Description and Scope

Replace approximately 750 linear feet of 6-inch diameter pipe from the flange inside the valve vault at lift station RTU # 431 42A to the termination point at the existing manhole # 5677. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout fill and abandon in place the old force main. This project will also require a new jack and bore casing under 15th Street East approximately 75 linear feet.

Rationale

Recommendation from Package 6 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Project #: PJWW02166 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 3 1203 51st Ave Drive W., Bradenton

Description and Scope

Replace approximately 1,935 linear feet of 6-inch diameter pipe and approximately 500 linear feet of 8-inch diameter High-Density Polyethylene (HDPE) pipe subaqueous directional drill under Perico Bay (Total combined pipe replacement of approximately 2,435 linear feet) from the flange inside the valve vault at lift station RTU # 207 and manifolding into the termination point at Lift station RTU # 208. Grout fill and abandon in place the old force main. Approximately 75 linear feet of the 6-inch diameter pipe shall be installed by jack and bore. Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

Recommended from the Wastewater Force main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJWW02167 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

Multi-district 8519 Whitfield Industrial Park and 2821 62nd Ave, Bradenton

Description and Scope

Replace approximately 2,335 linear feet of 4-inch diameter pipe (combined) from the flange inside the valve vault. RTU # 457 1,085 linear feet & RTU # 430 1,250 linear feet of 4-inch diameter pipe. Each force main will require a jack & bore: RTU # 457 approximately 100 LF under the Seminole Gulf Railway and RTU # 430 approximately 75 LF under 63rd Avenue East. RTU # 430 new force main will be installed down the roadway right of way along 628th St E or 29th St E (to be determined by design engineer), abandoning the easement the current force main is on. RTU #457 terminates in manhole # 16450; Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two downstream. Grout fill and abandon both the old force mains in place.

Rationale

Recommendation from Package 9 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Project Location

District 4 63rd Avenue East from US 301 to Tuttle Avenue

Description and Scope

Remove and replace wastewater lines, as needed, along a 1.12-mile corridor on 63rd Avenue East from US 301 to Tuttle Avenue. This utility project will run concurrently with the roadway widening project. Improvements to include lift station capacity upgrades, where applicable.

Rationale

Manatee County intends to widen this section of 63rd Avenue East to support increased traffic demand in the surrounding area and help maintain the County's adopted levels of service for parallel facilities including SR 70. Wastewater utility lines will need to be relocated in order to facilitate the road widening. In addition, there are capacity upgrades needed for existing lift stations along the road corridor.

District 4 63rd Avenue East from US 301 to Tuttle Avenue

Description and Scope

Remove and replace reclaimed water lines, as need, along a 1.12-mile corridor on 63rd Avenue East from US 301 to Tuttle Avenue. This utility project will run concurrently with the roadway widening project.

Rationale

Manatee County intends to widen this section of 63rd Avenue East to support increased traffic demand in the surrounding area and help maintain the County's adopted levels of service for parallel facilities including SR 70. Reclaimed utility lines will need to be relocated in order to facilitate the road widening.

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Erie Road from Fort Hamer Road to 69th St E - Parrish

Description and Scope

Reimbursement for the design and permitting of approximately 15,000 LF of force main along Buffalo Canal from Ft. Hamer Road to the North County Wastewater Treatment Plant as described in the Stantec Professional Services Agreement with Neal Land & Neighborhoods, LLC.

Rationale

The current wastewater master plan shows three force mains (16", 20", and 24") along the Erie Road East-West corridor. In an effort to reduce the amount of utilities in this corridor and ease future maintenance the County Engineer proposed an alternative route along Buffalo Canal for the future 20" force main. The master plan will be updated to reflect this and the needed size will be re-evaluated (likely a 16" based on current projections).To expedite the design of the force main, an agreement between the County and the landowner (Haval Farms, LLC and North Manatee Investment, LLC) will be entered for the reimbursement of the design and permitting costs.

Category: Wastewater **Subcategory:** Wastewater Growth Related
Project Title: Ellenton Gillette Road Force Main - Paddocks
Department: Utilities
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: -
Project #: PJ6111585 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 Ellenton Gillette Rd at Mendoza Rd

Description and Scope

Install approximately 3,000± linear feet of 8-inch (or equivalent) wastewater force main along Ellenton Gillette Road, from the Pepper Grove (f.k.a. Paddocks) development's offsite connection north of 29th Street E to a connection with the existing 10-inch force main on Mendoza Road near Willow Walk Drive. Administer the developer agreement, including review and processing of reimbursement and facility impact fee credit requests.

Rationale

The County's Wastewater Master Plan identifies the need for an 8-inch force main along Ellenton Gillette Road between 29th Street E and Mendoza Road to support ultimate buildout conditions. The improvement will increase conveyance capacity and system reliability to serve planned growth and maintain adequate levels of service. This project funds a developer agreement for the County's participation in construction costs for the build-out force main.

Description and Scope

As part of the road widening project, the force main along with valves, and fittings along the route will be relocated out of the proposed roadway into the right of way. Construction consists of removal and installation of approximately 4,000 of 20" force main, plus approximately 200 LF of 6" to 12" force main.

Rationale

This project is Segment 3 of a 3 Segment plan (Summerwood to Buffalo Road), which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301. The project will relocate force mains as a result of the Moccasin Wallow Road widening project.

Infra. Sales Tax: -
Project #: PJ6114980 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct: (1) approximately 1,900 LF of 18" and 300 LF of 20" force main along SR 62 from Pioneer Dr to Sand Marsh Ave and (2) approximately 4,350 LF of 16" force main along Sand Marsh Ave from SR 62 to CR 675. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The County's wastewater master plan requires an extension of a 18" sewer force main along SR 62 from Pioneer Dr to Sand Marsh Ave and a 16" force main along Sand Marsh Ave from SR 62 to CR 675. The purpose of this project is to efficiently expand the County's sewer collection system for future development in this area. Staff have requested the developer to oversize the force main extensions to meet the master plan sizes. This project funds the developer's agreement for the force main oversizing with the improvements being constructed as part of the Saltmeadows development project.

CIE Project: -
LOS/Concurrency: - Project Need: Other

Project Location

District 1 Parrish Village, Parrish

Description and Scope

Design and construct approximately 3,200 LF of 4-inch force main and approximately 250 feet of gravity sewer. The 4-inch force main runs will be installed in the ROW to allow for commercial properties to connect private lifts stations to the County's system. A railroad permit and easement for the force main or sanitary sewer may be needed. Additional services include the design, outreach, installation and connection of (13) private properties throughout the Village of Parrish to the force main connection through the building of individual lift stations.

Rationale

Installation of force mains and gravity sewer lines for the economic improvement and development for the potential commercial development area located within the Parrish Commercial Village Overlay.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 North Rye Road at Golf Course Road, Parrish

Description and Scope

Engineer, design, survey, permit, construct, construction manage approximately 7,200 linear feet of 12" sanitary sewer force main from the southernmost connection point adjacent to the Rye Ranch development, north to the existing connection pointe at the intersection of Golf Course Road. Process payment requests in accordance with the LDA and developer's agreement.

Rationale

Rye Ranch, LLC (Rye Ranch) entered into a Local Development Agreement (LDA) with Manatee County on 10/26/2021. Section 7.(C) of the LDA, requires Rye Ranch to design, permit, and construct a 12-inch sanitary sewer force main within the Rye Road right-of-way from the southernmost connection point adjacent to the Rye Ranch development, north to the existing connection point at the intersection of Golf Course Road. Rye Ranch is to into an agreement for the reimbursement of construction costs for the force main extension (as defined) less the amount of facility investment fee credits granted pursuant to the LDA. This project is to fund the reimbursement portion of the associated developer's agreement.

Project Location

District 5 Lorraine Road at 44th Ave E, Bradenton

Description and Scope

Install and construct 8-inch force main along Lorraine Road from 44th Ave E to the Project approximately 1,400 linear feet.

Rationale

The County's Wastewater Master Plan requires an 8" force main along Lorraine Road from 44th Ave E to Rangeland Pkwy. To support future development, the County requested the Developer of Nate's Honor Animal Rescue (Project) to install an 8-inch main instead of the 4-inch main needed for the Project. Per Policy 9.1.5.5 of the Comprehensive Plan, the County will fund the oversizing costs when a developer is required to increase wastewater system capacity beyond project needs. This project funds the wastewater oversizing agreement.

Project #: PJ6120380 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 State Road 62 at Ranch Oak Parkway (f.k.a Keen Road)

Description and Scope

Construct approximately 5,800 LF of 16-inch force main along State Road 62 from Sand Marsh Avenue to Ranch Oak Parkway.

Rationale

The County's Wastewater System Master Plan identifies a future 16-inch force main extending along State Road 62 east from Sand Marsh Avenue to Ranch Oak Parkway. As part of the Crosswind Assemblage development project a 16-inch force main was installed in accordance with the plan. Per Policy 9.1.2.2 of the Comprehensive Plan and Section 2-31-5 of the County Code, the County will enter into an agreement with the developer for reimbursement or facility investment fee (FIF) credits. This project funds the reimbursement portion not covered by FIF credits.

Department: Public Works Projects
Project Mgr: Brent Stufflebeam
Infra. Sales Tax: -
Project #: PJ6120390 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 1 State Road 62 at Ranch Oak Parkway (f.k.a. Keen Road)

Description and Scope

Construct approximately 5,750 LF of 12-inch reclaimed main along State Road 62 from Sand Marsh Avenue to Ranch Oak Parkway.

Rationale

To expand reclaimed water use and reduce reliance on groundwater for irrigation, the County requested the reclaimed main on State Road 62 from Sand Marsh Avenue to Ranch Oak Parkway be oversized to 16-inches. The Crosswind Assemblage development installed a larger main than required for its project. Pursuant to Policy 9.1.5.5 of the Comprehensive Plan, the County will reimburse the cost of the additional materials. This project funds that reimbursement.

Project Title: MLS 39A Emergency Generator Replacement
Department: Public Works Projects
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJ6017983 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 5621 39th St E, Bradenton

Description and Scope

Remove existing emergency generator from inside the lift station building, install new, larger generator outside with sound attenuating enclosure, and replace the automatic transfer switch. Convert existing generator into a mobile backup generator by mounting it on a trailer.

Rationale

Current generator is reaching life expectancy, and replacement is needed to prevent downtime due to catastrophic failure. Portable emergency generators would not be able to power all three pumps in this lift station, which could cause a sanitary sewage overflow. The generator also needs to be moved outside to reduce excessive heat in the building where electronics and control equipment are located.

Project #: PJ6017984
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 5621 39th St E, Bradenton

Description and Scope

Replace existing motor control center (MCC) and service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting, and the drywell lighting. Replace and upgrade all equipment as needed to bring the MCC and other electrical components up to current electrical standards. Improve electrical area to be an air conditioned space or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The motor control center (MCC) sections needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects.

Project #: PJ6022386
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 5 SR64 and 117 St E, Bradenton

Description and Scope

Evaluate and upsize wet well and pumps at Missionary Village lift station (RTU 329) due to known capacity issues. Convert the station to a Master Lift Station (MLS) by installing three new pumps, Variable Frequency Drive (VFDs), a building or enclosure for electrical components, back-up power generator or auxiliary pump, flow meter, and new piping and valving associated with the wetwell and valve assembly. Convert the existing generator into a mobile backup generator by mounting it on a trailer. Wetwell sizing and configuration and pump sizing should be determined by project design engineer.

Rationale

Improvements are needed at this lift station to correct existing capacity deficiency. The station is undersized for current peak wet weather flows and needs additional capacity. This station serves a large area and can be considered a Master Lift Station (MLS) and should have permanent stand-by power. The addition of the Variable Frequency Drives (VFDs) will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. This station currently has no flow meter. Installation of a flow meter will assist with more accurately tracking flows. Master Plan project Southeast-3.

Project Need: Maintenance

Project Location

District 2 1355 41st Ave E, Ellenton

Description and Scope

Upgrade existing service entrance breaker, remove transformer; distribution center, lighting panel, equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection and Association (NFPA-70E). Install new above-ground flow meter.

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: MLS N1-B Pumps & Variable Frequency Dr Replacement & Wet Well Rehab
Department: Public Works Projects
Project Mgr: Wen DeSue
Infra. Sales Tax: -
Project #: PJ6022388 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 1 2903 69th St E, Palmetto

Description and Scope

Remove and replace existing Flygt pumps and ABB Variable Frequency Drives (VFDs). Pump hydraulic conditions should be evaluated to account for projected flows from the Wastewater Collection System Master Plan and hydraulic model, including diversion of Lift Station N1-H flows away from MLS N1-B (flows diverted to Artisan Lakes MLS). Install new flow-through mag-meter in appropriate location. Clean and inspect existing wetwell liner and repair as needed. Clean, prepare, and make any needed repairs to concrete structure before application of new liner or repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and mounting plates for corrosion damage, and replace as necessary. Install new comminuter pump.

Rationale

Current pumps and VFDs are reaching their life span and are in need of replacement. Pumps are showing signs of wear and aging due to the corrosive atmosphere. In addition, the hydraulic conditions of the station will change resulting from diversion of Lift Station N1-H flows to a different MLS (flows at N1-B expected to decrease). Current flow meter has reached its life expectancy and is in need of replacement with high repair costs. Wetwell lining repairs or replacement is anticipated to be needed by this time.

Remove and replace existing 250 hp pumps with submersible pumps. MLS 13A will be upgraded to new submersible standard in FY27.

Rationale

Replacement recommended from the Master Lift Station (MLS) Condition Assessment Report and Asset Replacement Plan completed in 2020. Current pumps are reaching the end of their useful lifespan and are in need of replacement.

Project Location

Multi-district Various MLS locations

Description and Scope

Install new crane assemblies above wetwells to facilitate raising pumps at Heritage Harbour (RTU 640), Lakewood Ranch (RTU 362), and Rye Road (RTU 892), Master Lift Stations.

Rationale

Master Lift Stations (MLS) located at: Heritage Harbour (RTU 640), Lakewood Ranch (RTU 362), Rye Road (RTU 892), do not have cranes and it is difficult to remove pumps for inspection and service.

Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 2 1721 17th St E, Palmetto

Description and Scope

Rehabilitate existing Lift Station Memphis Road. Convert the existing station to a Master Lift Station (MLS), including installation of three new pumps, new Variable Frequency Drive (VFDs), building of enclosure for and valving associated with the wet well and valve assembly. Rehabilitation of wet well shall include: cleaning and inspecting the existing liner and making repairs as necessary, inspection of the drop pipe and support brackets and repair or replacement as necessary, inspection of floor and bench for signs of corrosion, and repairs to the concrete where needed. This station has an existing backup generator and will remain in service.

Rationale

The existing station is beginning to fail internally due to age and corrosion. This station serves a large area and should be considered an MLS. It is considered a high risk station due to the flow volume and location. The addition of the Variable Frequency Drives (DFD's) will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. This station currently has an inoperable flow meter. Installation of a new flow meter will assist with more accurately tracking flows.

Project Need: Maintenance

Project Location

District 3 6504 5th Ave NW, Bradenton

Description and Scope

Rehabilitate existing Lift Station 9D. Convert the existing station to a Master Lift Station (MLS), including installation of three new pumps, new Variable Frequency Drive (VFDs), building or enclosure for new electrical components, new flow meter, and replacement piping and valving associated with the wetwell and valve assembly. Replace fence to enclose entire lift station property and components. Rehabilitation of a wetwell will include cleaning and inspecting the existing liner and make repairs as necessary, inspection of the drop pipe and support brackets and repair or replacement as necessary, inspection of floor and bench for signs of corrosion and repairs to the concrete where needed. Install a stand-by auxiliary pump with diesel engine, with sizing appropriate for the new VFDs. Existing generator shall be saved for relocation to a different station or trailer mounting for backup.

Rationale

The existing station is beginning to fail internally due to age and corrosion. This station serves a large area and should be considered a Master Lift Station (MLS). The addition of the (Variable Frequency Drives) VFDs will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. This station currently has no flow meter. Installation of a flow meter will assist with more accurately tracking flows.

Project #: PJ6089783
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 1801 55th Ave. W., Bradenton

Description and Scope

Construct new Lift Station (LS) 29A located 50 feet north of the existing LS. Furnish and install two new 10 hp submersible pumps, new 12 ft diameter, 20 ft deep lined wet well, new piping and valving associated with the wet well and valve assembly, new electrical instrumentation and control components including 80 kw emergency generator, and all piping and valving necessary to transfer service to the new LS. Remove existing LS and construct new manhole adjacent, first three upstream manholes will be polymer concrete. ARC flash study required since this is a new lift station. Need to purchase land for at least an 40' x 40' in size in Fiscal Year 2023.

Rationale

Relocating the lift station 50 feet north will improve access to the site and safety to the lift station. The current lift station is on the edge of the roadway. This creates a risk of being damaged by vehicular traffic. The current lift station was installed in 1976. By constructing a new lift station to the North. We can gain access, upgrading the station to newer technologies.

Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6089785
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 3 4150 Gulf Drive, Holmes Beach

Description and Scope

Remove the existing generator, enclosure, and fuel tank. Supply new generator with enclosure and subbase fuel tank. Construct a new elevated concrete platform to 13.00 feet for the new generator with the subbase fuel tank. Reroute electrical and alarm signal conduits and conductors to a new platform. Relocate the generator docking station to a new elevated platform. Provide stairs to a new platform to access equipment.

Rationale

The existing generator and fuel tank is currently installed at ground level (roughly 6.00 feet above sea level), making this equipment vulnerable to flooding. Flooding could lead to equipment failure, fuel tank leaks, and/or a Sanitary Sewer Overflow (SSO) which would have a detrimental impact to the environment. This generator was installed in 2009 but is in poor condition caused by sewer gas and saltwater in the air and it is reaching the end of its usable life. By installing a new generator and fuel tank on an elevated platform, this will protect the equipment from flood waters during a storm or coastal flooding event.

Description and Scope

Upgrade existing service entrance breaker, remove transformer; distribution center, lighting panel, equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection and Association (NFPA-70E).

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Project #: PJ6097580 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 5 11600 Clubhouse Dr, Bradenton

Description and Scope

Install new above ground flow through Magmeter. Remove and replace existing liner. Clean prep and make any needed repairs to concrete structure before application of new liner system. Install new in-line grinder system. Replace discharge piping, guide rails, pipe bracing, base ells, and/or mounting plates. Also replace the influent force main pipe restraints.

Rationale

Current strap-on flow meter is not functional. Due to the heavily corrosive atmosphere, the existing fiberglass liner is beginning to delaminate from the concrete structure allowing hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The base elbows are worn and need replaced to prevent leaks or blow by from developing and causing additional damage. The old pipe is C900 PVC and needs to be replaced with our current Utility Standard DR11 High Density polyethylene (HDPE). Pipe restraints are corroded and need to be replaced with 316SS restraint system.

The new electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The MCC and main breaker need to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. The generator needs to be replaced with a newer appropriately sized unit, or with an auxiliary pump with diesel engine that can provide reliable backup pumping during electrical outages. The project should include an evaluation of the feasibility, costs, advantages, and disadvantages of using an auxiliary pump versus a standby generator. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Project Title: Lift Stations 33A, 36A and Bayshore on the Lakes Improvements
Department: Public Works Projects
Project Mgr: Eddy Zappacosta
Infra. Sales Tax: -
Project #: PJ6097882 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 3 Vicinity of 26th St W and 38th Ave W, Bradenton

Description and Scope

Furnish and install approximately 2,100 linear feet (LF) of new 21-inch and 24-inch influent gravity main into Lift Station 36A. Sizing to be confirmed by design engineer based on latest flow projections considering site redevelopment. Install new connections as needed. Replace Lift Station 36A in a new location with upsized and lined wetwell, new pumps, and all necessary electrical and instrumentation components per the County's standards. Apply wetwell liner and replace wetwell top slab at Lift Station 33A. Replace the Bayshore on the Lakes Lift Station in a new location including upsized and lined wetwell, new pumps, upsized 8-inch discharge piping, and all necessary electrical and instrumentation components per the County's standards. First three upstream manholes will be polymer concrete for 36A and Bayshore on the Lakes. Install the Data Flow Systen (DFS) bubbler level control systems at all three locations. Conduct ARC Flash study for all three lift stations.

Rationale

Improvements based on Project SW-7 from the Southwest Wastewater Collection Master Plan to address capacity issues at 36A and Bayshore on the Lakes and corrosion issues at Lift Station 33A.

LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 3 8720 44th Ave W, Bradenton

Description and Scope

Upgrade existing service entrance breaker, remove transformer, remove distribution center, remove lighting panel, remove the equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 112 63rd Ave E, Bradenton

Description and Scope

Remove existing fiberglass liner, make repairs to concrete structure where applicable, apply new liner, repair or replace platform/grating/stairs/handrail where applicable, replace stop gate channels and inspect aluminum stop gates, install new LED lighting system, inspect Muffin Monster for wear and replace if needed.

Rationale

Due to the heavily corrosive atmosphere, the existing fiberglass liner is beginning to delaminate from the concrete structure allowing hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The stop gate channels are becoming inoperable and need to be replaced to allow for isolation of the flow channels. The lighting system is subpar and needs to be upgraded to make work within the confined space safer and easier.

Project #: PJ6101680 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 2007 Bay Dr, Bradenton

Description and Scope

Remove and replace existing pumps and variable frequency drives (VFDs). Project includes evaluation of hydraulic conditions to correctly size new pumps. Bypass pumping will likely be necessary during construction.

Rationale

Current pumps and VFDs are reaching their life span and are in need of replacement. Pumps are showing signs of wear and aging due to the corrosive atmosphere.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Artisan Lakes Master Lift Station Rehabilitation
Department: Public Works Projects
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJ6110280 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 1 9760 Gillette Rd, Palmetto

Description and Scope

Install new above ground flow through Magmeter. Clean and inspect existing wetwell fiberglass liner, repair as needed. Clean prep and make any needed repairs to concrete structure before application of liner repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage, remove and replace as necessary. Remove and replace submersible pumps. Evaluate and replace Heating Ventilation and Air Conditioning (HVAC) system for climate control inside the station. Install new crane assembly above wetwell to facilitate raising pumps.

Rationale

The flow meter at this station regularly requires maintenance and needs replaced. Due to the heavily corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks which would allow hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The hardware needs to be inspected for corrosion damage before catastrophic failure could occur. Pipe restraints are beginning to corrode and need to be replaced with 316SS restraint system. At the time of this project the pumps will have reached their useful life. Currently this master lift station (MLS) does not have a crane and it is difficult to remove pumps for inspection and service.

Project #: PJ6110380 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 5 12405 44th Ave E, Bradenton

Description and Scope

Install new above ground flow through Magmeter. Clean and inspect existing wetwell fiberglass liner, repair as needed. Clean prep and make any needed repairs to concrete structure before application of liner repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage, remove and replace as necessary. Remove and replace submersible pumps. Evaluate and replace HVAC system. Install new crane assembly above wetwell. Engineer should evaluate addition of 4500 single-family units from outside of current service area to this master lift station (MLS). Perform analysis to determine what improvements to MLS pumps, wetwell, etc. and forecmain are necessary for this additional service, including downstream.

Rationale

The flow meter at this station regularly requires maintenance and needs to be replaced. Due to the heavily corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks which would allow hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The hardware needs to be inspected for corrosion damage before catastrophic failure could occur. Pipe restraints are beginning to corrode and need to be replaced with 316SS restraint system. Currently this MLS does not have a crane. The area served by this MLS is experiencing new residential construction.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: N1C Upgrade to a MLS & Reroute Tidevue FM flows to N1C Gravity Main
Department: Public Works Projects
Project Mgr: Zachary Tarifa
Infra. Sales Tax: -
Project #: PJ6111881 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth, Deficiency

Project Location

District 1 3800 Erie Road, Palmetto

Description and Scope

To convert Lift Station (LS) N1C to a Master Lift Station (MLS), including furnishing and installation of a new wet well, four (4) 92-hp pumps with Variable Frequency Drives (VFDs), a new building for/with electrical upgrades, odor control, and slab, new piping, valving, and appurtenances, a 400kW generator, docking station and slab, site demolition/preparation/restoration, flow meter, vaults, crane, and force main and manhole improvements (First three (3) upstream manholes will be polymer concrete). Upgrade LS N1C discharge force main to 20 inches.

Rationale

This project is designed to correct the wet weather high flow hydraulic overloading on the Tidevue force main by lowering the head pressure condition in the Tidevue force main. The "FM Pipe for Redirection of Flow from Colony Cove 6 LS (RTU 522)" project must run parallel to this project.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 5 1010 Upper Manatee River Road, Bradenton, FL

Description and Scope

Remove existing electrical equipment and piping associated with the wet well. Remove riser pipes and bases from wet well. Remove and replace wet well lid and hatches. Remove underground valve vault. Remove existing liner and install new liner in wet well. Install new bases, riser pipes, and pipe supports. Install new valve assembly and flow meter above ground. Install new electrical service, transfer switch, and control panel. Existing generator is to be reused. Reroute conduits to new locations and install new conductors. Rework fencing and driveway to accommodate new design.

Rationale

This Lift Station is located on a main road that is scheduled for a road widening project. The equipment and structure at this location has reached its expected life span and is due for rehabilitation. Repairing this structure and replacing equipment will ensure proper and reliable operation. Creating a thoroughfare driveway at this site will allow staff to safely access the site and avoid additional traffic on this roadway.

Subcategory: Wastewater Lift Stations
Project Title: 13A Master Lift Station Upgrade
Department: Utilities
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJTP25025
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 4 112 63rd Ave East, Bradenton

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove the grinder system, lighting fixtures, and all fiberglass platform and railings from the wetwell and demo the above-ground level and the concrete dividing wall between the wetwell and drywell to create one open concrete pit. Utilize the open structure to construct a new concrete wetwell within that open cavity and backfill the remaining voids. Install discharge piping, guide rails, pipe bracing, base ells, and riser piping per our current Manatee County Detail converting this station to a submersible configuration. Install above-ground valve assembly with new flow through the Mag meter per County Detail, install a new gantry crane system over the wetwell, and install new security fencing around the new lift station site. Upgrade electrical, instrumentation, and control components as required. Repair/replace driveway as needed. Conduct Arc Flash study.

Rationale

The station does not meet the new standards for this type of structure. This project will bring the station up to the new standards. This Master Lift Station (MLS) upgrade project would be the final stage of bringing MLS 13A into the current design standards for our Master Lift Stations. In addition, by converting this station to a submersible application and eliminating the wetwell / drywell configuration, we will increase the safety of our operation by eliminating the requirement of routine entry into a permit-required confined space to do weekly checks. This project is anticipated to start toward the end of the 5-year CIP Plan with Construction occurring outside of the plan. Estimated Construction = $12,880,000.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Lift Station RTU #104 EL Conquistador 1 Permanent Generator
Department: Utilities
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJTP25026 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 3790 El Conquistador Pkwy, Bradenton

Description and Scope

Design and construct a stationary generator with at lift station RTU # 104 EL Conquistador 1. This will include a concrete pad, an Auto Transfer Switch (ATS), and anything else needed to complete the turnkey. EL Conquistador 1 RTU 104, 800 GPM. Elevate generator pad since it is close to a flood plain. May need to replace existing white PVCfwncw.

Rationale

Installing a stationary generator will increase the resiliency of lift station operations. The generator will harden our operations in the ability to convey wastewater during emergency (storm) events.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 3 1001 Palma Sola Blvd, Bradenton

Description and Scope

Design and construct a 50 KW stationary generator with a at lift station RTU # 218 15D. This will include a concrete pad, an Auto Transfer Switch (ATS), and anything else needed to complete the turnkey. 15-D RTU 218, 600 GPM. May need to elevste the generator higher than the standard pad since the lift station is within the flood plain, or consider installing a portable generator with tie-downs, May need to replace the existing shadow box wooden fence.

Rationale

Installing a stationary generator will increase the resiliency of lift station operations. The generator will harden our operations in the ability to convey wastewater during emergency (storm) events.

Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 4
5303 25th Street West, Bradenton

Description and Scope

Demo the existing structure and utilize the open structure to construct a new polymer concrete wetwell within that open cavity and backfill the remaining voids. The Engineer of Record (EOR) needs to determine the wetwell size. Redirect gravity flow to the newly constructed wetwell. First three (3) upstream manholes will be polymer concrete. Install discharge piping, guide rails, pipe bracing, base ells, and riser piping per our current Manatee County Detail converting this station to a submersible configuration. Install above-ground valve assembly with new flow through the Mag meter per County Detail, install a new gantry crane system over the wetwell, and install new security fencing around the new lift station site. Upgrade electrical, instrumentation, and control components as required. Repair/replace driveway as needed. Install restroom with associated lighting and water/sewer connections. Eyewash station and shower to be provided on the exterior of the restroom. Conduct Arc Flash study.

Rationale

This station was originally constructed in 1976 and the structure is nearing the end of its useful life.

Schedule of Activities

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Southeast SCADA Tower Replacement - Wastewater
Department: Utilities
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJTP27015 **Status:** Requested

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 3525 Lena Road, Bradenton

Description and Scope

Install a new Lattice type SCADA tower with a minimum height of 250 feet and new concrete foundation. Tower shall include lightning protection and all required aviation lighting to meet FCC/FAA requirements. Construct new SCADA equipment building with 200 square feet of climate controlled space.

Rationale

The existing Southeast SCADA Communication Tower is 100 feet tall. Due to the recent growth east of the current tower, several lift stations are no longer able to communicate with the tower. This upgrade will ensure that these lift stations, as well as future lift stations located in this region, are able to communicate with the tower. Additionally, this replacement will ensure that Utilities remains in compliance with Department of Environmental Protection (DEP) regulations.

Category: Wastewater
Subcategory: Wastewater Lift Stations
Project Title: Master Lift Station 1D Upgrade
Department: Utilities
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJWW02027
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 3 1806 51st St W, Bradenton

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove grinder system, lighting fixtures, and all fiberglass platform and railings from wetwell and demo the above ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Utilize the open structure to construct a new concrete wetwell (size to be setermined by design EOR) within that open cavity and backfill remaining voids. Redirect gravity flow to the newly constructed and lined wetwell. First three upstream manholes will be polymer concrete. Pumps in 1D MLS were installed around 2005 and are reaching the end of useful life very soon. Install new pumps, discharge piping, guide rails, pipe bracing, base ells per our current Manatee County Detail converting this station to a submersible configuration. Install above ground valve assembly with new flow through Magnetic flow meter per County Detail, install new gantry crane system over the wetwell, and install new security fencing around the new lift station site. Install Variable Frequency Drives (VFDs) and upgrade electrical, instrumentation, and control components as required and conduct Arc Flash study. Repair/replace driveway as needed. Install restroom with associated lighting and water/sewer connections. Eye wash station and shower to be provided on the exterior of the restroom.

Rationale

This project would be the final stage of bringing Master Lift Station (MLS) 1D into the current design standards for master lift stations. In addition, by converting this station to a submersible application and eliminating the wetwell/drywell configuration, this will increase the safety of the operation and eliminate routine entry into a permit required confined space to do weekly checks. Other improvements will be easier interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wetwell.

Project Need: Deficiency

Project Location

District 3 4150 Gulf Drive, Holmes Beach

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove grinder system, lighting fixtures, and all fiberglass platform and railings from wetwell and demo the above ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Utilize the open structure to construct a new concrete lined wetwell (size to be determined by design Enginer of Record (EOR)) within that open cavity and backfill remaining voids. Redirect gravity flow to the newly constructed and lined wetwell. First three upstream manholes will be polymer concrete. Install discharge piping, guide rails, pipe bracing, base ells and riser piping per our current Manatee County Detail converting this station to a submersible configuration. Install above ground valve assembly with new flow through Mag meter per County Detail, install new gantry crane system over the wetwell, and install new security fencing around the new lift station site. Upgrade electrical, instrumentation, and control components as required and conduct Arc Flash study. Repair/replace driveway as needed. Generator upgrade and associated improvements are included in a separate CIP and scheduled for FY 28. Install restroom with associated lighting and water/sewer connections. Eye wash station and shower to be provided on the exterior of the restroom.

Rationale

This station and structure is nearing the end of its useful life. A project to move the motor control center (MCC) out into its own climate-controlled building on an elevated platform is in process. Converting this station to a submersible application, will increase the safety of our operation by eliminating the requirement of routine entry into a permit required confined space. Other improvements will be easier interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wet well.

Status: Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No
Project Need: Deficiency

Project Location

District 4 5621 39th Street East, Bradenton

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove grinder system, lighting fixtures, and all fiberglass platform and railings from wetwell and demo the above-ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Utilize the open structure to construct a new concrete wetwell (to be determined ny Engineer of Record (EOR)) within that open cavity and backfill the remaining voids. Redirect gravity flow to the newly constructed and lined wetwell. First three upstream manholes will be polymer concrete. Install discharge piping, guide rails, pipe bracing, base ells and riser piping per our current Manatee County Detail converting this station to a submersible configuration. Install above-ground valve assembly with new flow through Mag meter per County Detail, install a new gantry crane system over the wetwell, install new security fencing around the new lift station site and conduct Arc Flash study.

Repair/replace driveway as needed. Install restroom with associated lighting and water/sewer connections. Eye wash station and shower to be provided on the exterior of the restroom.

Rationale

The Department has two projects; one, to move the motor control center (MCC) into its own climate-controlled building on an elevated platform, and two, to move the generator outside of the control room. This Master Lift Station upgrade project would bring MLS #39A to current design standards. Converting this station will increase safety by eliminating the requirement of weekly entry into a permit required confined space. Other improvements: interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wetwell.

Project Title: 11th Ave W and 75th St W Reclaimed Water Main Improvements
Department: Public Works Projects
Project Mgr: Justin Rourk
Infra. Sales Tax: -
Project #: PJ6002294
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 3 11th Ave W and 75th St W, Bradenton

Description and Scope

Upsize existing 10" reclaimed water main along 11th Ave W from 68th Street W to 75th St W continuing north along 75th St. W from 11th Ave to Manatee Avenue and then on the north side of Manatee Avenue for approximately 70 ft by removing the existing 10" and furnishing and installing a total of approximately 4,600 LF of new 12" reclaimed water main. There is an existing section of 12" under Manatee Ave that can remain.

Rationale

An increase in pipe size is necessary for the 10" reclaimed water mains along 11th Ave W from 68th Street West to 75th Street West and along 75th Street West from 11th Avenue West to Manatee Avenue to decrease velocities in excess of 6 feet per second (fps) and resulting high head loss within the existing pipelines. The high head loss is causing low pressures in the Palma Sola and Wisteria Park area that is served by the existing 10" and 12" mains along 75th St W and 11th Ave W. Increasing the diameter of these pipelines to 12" will decrease the velocity and head loss, resulting in increased pressure for customers.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Golf Course Road (near Ft. Hamer Road), Parrish

Description and Scope

Design, permit, and construct a 24" reclaimed water main from the existing stub at 127th Ave E to the western boundary of the Windwater residential development. Reimburse developer based on monthly invoices submitted in accordance with the agreement with the developer. The design and construction of this improvement has been approved under the construction plans for the Windwater (fka Wildcat Preserve) development (PLN2109-0030, as revised).

Rationale

To further expand the County's reclaimed water system infrastructure to provide more availability to communities in accordance with the adopted reclaimed water master plan. This project has an associated developer's agreement with terms and conditions related to the funding of this project.

Project Location

District 1 Erie Rd - Martha Road to US 301, Parrish

Description and Scope

Install approximately 4,900 linear feet of 16" DIP reclaim water line from Martha Rd to US301.

Rationale

With the modification of the Erie Rd E/W transportation project, it was determined to separate this project into two portions. First being the 16" DIP reclaim water line from Martha Rd to US301 to align with the transportation project. The remaining segment from Martha Rd to Harrison Ranch Blvd will be become a Project of Record until funding is available.

Project Title: Golf Course Road Reclaimed Extension
Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra. Sales Tax: -
Project #: PJ6090991
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 Golf Course Rd at Ft Hamer Rd, Parrish

Description and Scope

Design, permit, install, manage and construct approximately 4,800 linear feet of 24" reclaimed water main from the existing 6" reclaimed water main located at 127 Avenue East eastward and connecting to the existing 30" reclaimed water main near Spencer Parrish Road. Review, approve, and process monthly pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The County's reclaimed water master plan includes the extension of a 24" reclaimed water main from Buffalo Creek Canal south along Fort Hamer Road then east along Golf Course Road to an existing 30" reclaimed water main at Spencer Parrish Road. This project is to efficiently expand the County's reclaimed water system for future development in this area. Staff have requested the developer to install and extend a 24" reclaimed water main from 127th Avenue East to Spencer Parrish Road in accordance with the County's master plan. Also, this project is to fund the associated developer's agreement for the reclaimed main extension.

Project Location

District 4 Corner of 53rd Ave and 66th St W to El Conquistador Pkwy, Bradenton

Description and Scope

Installation of 3,000 LF of 16-inch reclaimed water distribution line from southwest corner of 53rd Avenue and 66th Street West south to El Conquistador Parkway.

Rationale

Replaces aging 14 inch pipeline serving IMG Academy and allows for the consolidation of master meters for this user from 3 to 1. Will also serve new customers once the Lake Flores Community is completed.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth

Project Location

District 4 66th St W - SWRWFR to 53rd Ave W and E to 65th St W, Bradenton

Description and Scope

Install approximately 3,900 LF of new 24" reclaimed water main along 66th Street West from existing 42" reclaimed water main from Southwest Water Reclamation Facility (SWWRF) south to 53rd Avenue West and east to existing northern 24" reclaimed water main along 53rd Ave W at the intersection with 65th St West.

Rationale

The existing 24" reclaimed water main along 66th Ave from SWWRF will be limited in capacity and as a result will experience high velocities and head loss in the future based on the Reclaimed Water Master Plan model evaluations. The new parallel main from just outside of SWWRF will connect to the existing parallel main on 53rd Ave W and provide additional capacity for transferring reclaimed water to the Southeast Regional Water Reclamation Facility (SERWRF) and North Regional Water Reclamation Facility (NRWRF) service areas in the future while maintaining a minimum pressure of 40 pounds per second (psi) in the Manatee County Master Reuse System (MCMRS).

Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: -
Project Need: Growth

Project Location

District 1 Erie Rd - 69th St E to Martha Road, Parrish

Description and Scope

Install reclaimed water line to complete a major looped system for Erie Road and Copperstone. This project was originally part of Project #6085590 but was separated due to the Martha to US301 transportation project. This will be for the remaining portion to complete the major looped system from Martha Rd to Harrison Ranch Blvd and will be constructed along with the related Erie Road E/W Roadway widening project from 69th St E to Martha Road.

Rationale

Construct reclaim water line from Martha Rd to Harrison Ranch Boulevard using approximately 9,350 liner feet of 16 inch ductile iron pipe. The project includes miscellaneous relocations/adjustment of existing reclaimed water infrastructure from 69th to Harrison Ranch Blvd as needed to accommodate proposed roadway improvements. Design and construction to run concurrent with the related roadway project from 69th St E to Martha Rd.

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct approximately 1,900 LF of 12" and 300 LF of 16" reclaimed main along SR 62 from Spencer Parrish Road to Sand Marsh Ave. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The purpose of this project is to efficiently expand the County's reclaimed water availability for future development in this area. Staff has requested the developer to oversize the reclaimed extension from an 8" to 12" along SR 62. This project is to fund the developer's agreement for the reclaimed main oversizing with the improvements being constructed as part of the Saltmeadows development project.

Project #: PJ6082880
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 1 Erie Rd - Martha Road to US 301, Parrish

Description and Scope

The Erie Rd E/W Phase for roadway functional improvements is being changed to 2-lane to 4-lane widening from Martha Rd to US301. This project aligns to be the wastewater lines relocations for the transportation project.

Rationale

The Erie Rd E/W Phase for roadway functional improvements is no longer being considered. Instead, the transportation project is now 2-lane to 4-lane widening from Martha Rd to US301. The original Erie Rd E/W Phase had associated projects for the utility relocations and this one is being changed to match the new transportation project.

Department: Public Works Projects
Project Mgr: Al Neumann
Infra. Sales Tax: -
Project #: PJ6086980
Status: Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

Multi-district 44th Ave E - 45th St - 44th Ave Plz E, Bradenton

Description and Scope

Addition of 8 inch Ductile Iron Pipe (DIP) and PVC wastewater force main along 44th Avenue East from 45th Street East to Morgan Johnson Road with force main stubs for future connections at 45th Street East and 51st Street East. The dry force main will be placed on the deck of the proposed bridge over the Braden River. Caruso Road will be realigned to intersect with 44th Avenue East at the existing intersection with Morgan Johnson Road. At this location, the existing active force main on Morgan Johnson Road will be reconstructed to connect to a proposed force main that will connect to an existing active force main at the intersection of the existing Caruso Road. In addition, a new DIP force main stub will be constructed to the north under 44th Avenue East at 65th Street East, a new dry DIP force main will be constructed under Caruso Road adjacent to the existing force main from the Dude Ranch lift station, and gravity wastewater mains will be constructed to extend the existing active gravity system along the east side of Caruso Road.

Rationale

Project will extend wastewater service in the area.

Project Location

District 5 State Road 70 - Lorraine Road to Bourneside Blvd

Description and Scope

Depending on the Florida Department of Transportation (FDOT) design for the road improvements along SR70 & Lorraine Road, the County will coordinate, design, permit and relocate Manatee County Wastewater Utilities that conflict with the FDOT project.

Rationale

Coordinate, design, permit and relocate Manatee County Wastewater Utilities that conflict with the FDOT road widening and Round-a-bout project at SR70 & Lorraine Road. A new force main will be installed from Lorraine Road to Bourneside Blvd.

Project Title: Factory Shops Apartments - Gravity Sewer Reroute
Department: Public Works Projects
Project Mgr: Steve Clark
Infra. Sales Tax: -
Project #: PJ6116280
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 60th Avenue East at Factory Shops Blvd, Ellenton

Description and Scope

Design, engineer, permit, install, construct, and provide required utility easement for approximately 564 linear feet of 10-inch gravity sewer main from sewer manhole (SMH015848) northward, through the development's property, connecting to sewer infrastructure located on the Springs at Ellenton's property in accordance with the construction plans for the Factory Shops Apartments. Process payment requests in accordance with the developer's agreement.

Rationale

An existing gravity sewer main is located within the limits of a capital improvement project for the widening of 60th Ave East (#6083160) in Ellenton. The County has requested the developer of the Factory Shops Apartments project (PLN2208-0057) to reroute the existing gravity main through their development outside the limits of the capital project and upsize the main to accommodate existing flows in the area. This project has an associated developer's agreement with terms and conditions related to the funding of the improvements.

Project Title: SEWRF Belt Filter Press Rehab
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6013982
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Completely rehab belt press #2. Installation of additional belt press (#4). Addition of dry polymer mixing system and two new storage tanks. Relocation of booster pumps and water heater. Replacement of sludge feed piping. Modify and rehabilitate the existing sludge conveyor and truck load-out system. A sludge pumping system is preferred to replace augers.

Rationale

These original control panels were installed in 1989 and are deteriorating, become obsolete. The rehab of belt press #2, the addition of a belt press, and the addition of polymer mixing and storage systems are to address deficiencies and the ability to have redundancy in the system. The booster pumps and water heater relocation are to move them to a more protected environment.

Project Title: SWWRF Oil Storage Building
Department: Public Works Projects
Project Mgr: Jim Renneberg
Infra. Sales Tax: -
Project #: PJ6017184
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Other

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Modify existing Co-generation building where generator is housed for use as a new oil and waste oil storage area. Construct a new 30 feet x 40 feet metal building on north side of Co-generation building. Demolish existing oil storage and equipment storage areas adjacent to existing maintenance facility. Construct an approximately 60 feet x 40 feet pole barn with concrete floor next to maintenance facility after existing oil storage area and equipment storage area are demolished. Installation of two electric roll up garage doors on South side of Maintenance Building, replacing the current tall hinged doors (similar to roll up doors on Southeast Maintenance Building).

Rationale

To protect equipment from the elements. Current oil storage area and disposal station has poor cover, poor containment, and poor drainage.

Project #: PJ6036085
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Re-establish plant yard and swales to historical grades or grade per new design to convey stormwater to existing or new stormwater features for treatment and/or conveyance off site. Rehabilitate stormwater piping, inlets and outlets. Re-establish stormwater pond volumes, litoral zones and banks to historical or new permit conditions. Eliminate ponding in roads, yard and parking lots. Inspect North Lake toe drain and recommend maintenance. The boundaries of the project are the area inside and adjacent to the SWWRF fence including the Wastewater Laboratory. All permitting and modifications to the SWPPP are to be included.

Rationale

Over years of SWWRF operation numerous projects, traffic and natural weathering have changed the stormwater system, making it not as functional as it could be. This project is needed to restore the system's functionality, especially for summer weather events.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SERWRF Third Sludge Holding Tank & Gravity Belt Thickener
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6041982 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Construction of a third sludge holding tank with associated aeration, sludge transfer capability, polymer system and other appurtenances. The repair/replacement of two existing gravity belt thickeners (GBT) is also included. Piping and controls shall also be added, so more than one GBT can operate at a time. Includes demolition of existing mixing/aeration systems in the existing two sludge holding tanks, and removal and disposal of solids from existing tanks. Alternate mixing/aeration is to be considered for the three tanks. Supervisory Control And Data Acquisition (SCADA) programming shall also be included.

Rationale

The Southeast Regional Water Reclamation Facility (SERWRF) service area continues to grow requiring additional sludge processing capability. Additionally, another sludge tank and Gravity Belt Thickener would allow for greater operational flexibility that is needed for maintenance, supplying the Biosolids Dryer and possibly deferring capital expense (by allowing operation at lower sludge ages decreasing oxygen requirements in the aeration basins).

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SWWRF Equalization System Rehabilitation & Cover Addition
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6071781 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

The project will include rehabilitation of the existing EQ tank. The rehabilitation will consist of performing structural improvements and a new interior coating system, replacing the pump recirculation system, and installing a new floating cover. It is anticipated that the air compressors for the new recirculation system can be located within the existing DAF Blower Building. Modifications to DAF building to house the new air compressors. Replace the existing return pump station with a new station including a permanent hoist for removing pumps. Supervisory Controls and Data Acquisition (SCADA) programming should also be included.

Rationale

The Flow Equalization (FEQ) tank receives and stores raw influent during the day and returns it to the plant at night to equalize the incoming flow. The FEQ tank cover is near the end of its life span, and it has proven difficult to keep the top of the cover clear of vegetation; settling solids are also an issue. A mixing system is required to keep solids in suspension, making it easier to pump them back to the plant. The existing FEQ return pump station has been in constant use for over 25 years and needs numerous upgrades or replacements. Also, the wet well for the pump station was modified for prior construction causing one of the pumps to be blocked from retrieval or repair. Power should be supplied per the electrical master plan to facilitate installation reliability and minimize possible rework.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southeast Water Reclamation Facility – Laboratory Improvements
Department: Utilities
Project Mgr: Sidney Seymour
Infra. Sales Tax: -
Project #: PJ6085081 **Status:** Existing

Comprehensive Plan Information

CIE Project: No
LOS/Concurrency: No Project Need: Deficiency

Project Location

District 1 Lena Road, Bradenton

Description and Scope

To plan, design, and construct a single, consolidated Water Quality Laboratory that combines Manatee County's Drinking Water Laboratory (DWL) and Wastewater Laboratory (WWL), along with supporting Natural Resources and administrative functions, into a unified facility located at the Southeast Water Reclamation Facility (SEWRF) campus. The project will address current capacity limitations, future regulatory requirements, environmental control needs, and long-term operational efficiency.

Rationale

Both laboratories were constructed in the 1990s and no longer meet industry standards for space, environmental control, or workflow efficiency. Workload trends show increasing analytical demands and future regulatory requirements will increase testing. Combining the Drinking Water Laboratory (DWL) and the Wastewater Laboratory (WWL) and admin spaces into a single building shows significant efficiencies in storage, equipment, staffing, and workflow.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southwest Water Reclamation Facility Electrical Distribution System Rehab/Enhancement
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6101780 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Replace/upgrade electrical distribution components to include air conditioning for electrical rooms, remove substations 1, 2, 9 & 10 replace motor control centers E1 & E2, replace switchboards 11 & 12, and replace main 5 kV switch gear, wiring, breakers and controls.

Rationale

Much of the equipment at the Southwest Water Reclamation Facility (SWWRF) is more than 25 years old, some is obsolete, and most is nearing the end of it's useful life. Each of these factors make the whole system inefficient and unreliable, and this rehabilitation will increase the safety and productivity at the SWWRF.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SERWRF Capacity Improvements - Phases A & B
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6106080 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

Considerable study revealed a more optimal pathway for this project. The passage of time and inflationary cost pressures of the past few years significantly increased the estimated cost as well. The project has been designed and is approaching the Guaranteed Maximum Price (GMP) phase with the selected Contract Manager At Risk (CMAR). A GMP proposal has been solicited for the first phase which will include the Headworks/Flow Splitter, improved aerators and related improvements. Construction of Phase 2 will follow in several years and will include additional Biological treatment units and other related work.

Rationale

The Southeast Regional Water Reclamation Facility (SERWRF) serves one of the fastest growing portions of Manatee County - it receives wastewater from Lakewood Ranch and adjacent new developments eastward south of the Manatee River. The existing facility is permitted for 11 Million Gallons per Day (MGD) but only has biological nutrient removal capacity to handle about 8 MGD. Flows are currently about 8 MGD and rising. The facility was also constructed in the mid 1980's and several processes and systems require refurbishment. To manage cash flow needs but to still have improvements online in time, the work needed to refurbish and expand the capacity of this facility has been divided into two subsequent phases.

Category: Wastewater
Subcategory: Wastewater Treatment
Project Title: SEWRF Slide & Sluice Gates Replacement
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6110180
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

This project has been included in the SEWRF Capacity Improvements Phase A project. Work includes replace underground chlorine feed pipelines with new dual wall pipelines, including leak detection system. Construct a containment curb around the sodium hypochlorite storage area in the existing chemical building. There Is also some yard piping associated with the containment curb in the chemical feed building.

Rationale

These sluice gates and slide gates were installed in 1989 or before and have exceeded their life expectancy. They are difficult if not impossible to exercise without breaking. These gates are necessary to allow operations to direct the flow of water to the appropriate system for treatment and to allow maintenance to direct the flow away from an area where they would need to work. They are critical to the operation and require ongoing maintenance.

Project #: PJ6110182 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

Replacement of 1989-90 original 480V Electrical Switchgear M1 and M2 with new Switchgear at the Southeast Regional Water Reclamation Facility (SERWRF). Incorporate the Feeder Breakers into the M3 and M4 Switchgear lineup that were installed in 2000. Incorporate the Occupational Safety and Health Administration (OSHA) Arc Flash safety requirements into design.

Rationale

The original electrical equipment installed in 1989-90 is at the end of its useful life and is due for replacement per the Electrical Master Plan. There have also been numerous issues surfacing with the power distribution at the Plant because of the Tie Breaker that is obsolete. Capital Improvement Projects are more difficult to perform due to their connection to this obsolete and unsafe equipment.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Clarifiers 1 and 2: Re-grout clarifier floors. Replace rakes, sludge box and draft tubes with spiral rake systems. Additionally, replace weirs, stilling baffle, stilling well and skimmers. Install stamford baffles. Re-coat interior clarifier parts and structure. Paint exterior.

Rationale

Some of this equipment will be thirty plus years old. Replacing it will minimize unplanned failure necessitating unplanned spending and possible avoidance of Florida Department of Environmental Protection (FDEP) noncompliance. Stamford baffles will improve clarifier performance, which will improve filter/plant performance.

FY2027 - FY2031

Category: Wastewater
Subcategory: Wastewater Treatment
Project Title: SWWRF Second Cloth Filter
Department: Public Works Projects
Project Mgr: Albert Rosenstein
Infra. Sales Tax: -
Project #: PJ6110780
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: Yes
Project Need: Growth, Deficiency

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Convert one existing sand filter to a cloth filter. This will include demolition of the existing sand filter components, installation of the equipment needed for the new cloth filter, and any modifications in piping and channels to ensure proper distribution of water between filters and chlorine contact chambers. Supervisory Control and Data Acquisition (SCADA) modifications will be included. Provide canopy over Automatic Back Wash filters including hoists and trolleys for removal of filter equipment. The filters shall be able to be drained through connection to the plant drain.

Rationale

The County's engineer of record in the wastewater plant's master planning effort identified a deficit in the plant's effluent filtering capacity. Basically, with the existing cloth filter down there is not enough filter capacity to handle wet weather peaks, which is not compatible with Class 1 Reliability, which is a condition of our Florida Department of Environmental Protection (FDEP) operating permit. Replacing a sand filter with a cloth filter will increase filtering capacity, which will make the plant Class 1 Reliable, will minimize risk of contaminating the reclaimed water storage lakes, and will minimize risk of possible off specification effluent discharge. In addition, Filters #1 and #2 are not capable of being fully drained. This project is necessary for permitting the plant to 18 million gallons a day (mgd), annual average daily flow.

Project Title: Southwest Water Reclamation Facility Rehab Storage Pond Stations,Lake Filter Pump,Backwash Diversion
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6110781 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Inspect the structures for Lake stations #1, #3 and the North Lake. Demo station #2 and grout fill piping as needed. Evaluate pump curves and sizes for the current use and demand of the lake return system, including individual station lake recirculations. Replace all electrical components, panels, and add variable frequency drives to the station pumps and pest deterrents to the electrical enclosures. Add magnetic flow meters and ensure good communication with the SCADA system. Modify existing piping to redirect lake filter backwash to the 54 inch line between the wetwell and Middle Lake. SCADA programming shall be included in the project.

Rationale

These stations were built around 2000 and the equipment is showing its age. In addition to the age the stations were engineered and built to be used in a different way with a different process. Re-evaluating its current use and demand may change how many stations we need and what they are designed to do. The lake filter effluent may be put directly in the 10 MG storage tanks, which may potentially simplify operation of the recharge well. Sending backwash back to the lake minimizes plant throughput.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southwest Water Reclamation Facility Expansion to 18 MGD
Department: Utilities
Project Mgr: Daniel Velazquez
Infra. Sales Tax: -
Project #: PJ6110783 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

The SWWRF expansion will address several components of the treatment plant to provide enhanced biological treatment as well as increase hydraulic capacity of those processes. The improvements will include: flow splitter box improvements, rerouting internal recycle, equalization tank and pump station improvements, Modified Ludzack-Ettinger (MLE) process improvements including addition of a swing zone in the anoxic tanks, simultaneous nitrification – denitrification (SND) with ammonia based aeration control (ABAC), Return Activated Sludge (RAS)/Waste-Activated Sludge (WAS) piping improvements, installation of up to 3 MGD of Aerobic Granular Sludge (AGS) treatment system on the north side of the plant with new feed pump station, turbo blowers and buffer tanks, filter improvements including conversion to cloth media, new chemical storage and feed system adjacent to the filters, capacity improvements to the effluent pump station, electrical system improvements to support the plant modifications, standby power improvements, upgrades to the associated instrumentation and Supervisory Control and Data Acquisition (SCADA) systems to include process monitoring and control and network system improvements to support the plant improvements.

Rationale

Influent flows and loadings have increased at an accelerated rate over the past several years and the Southwest Water Reclamation Facility (SWWRF) is nearing its Average Annual Daily Flow (AADF) capacity. The expansion will provide the necessary improvements to expand facility capacity to 18 Million Gallons per Day (MGD) AADF.

Project Location

District 4 5101 65th St. W, Bradenton

Description and Scope

Replace the secondary clarifier confluence box "The Missile", at the Southwest Water Reclamation Facility (SWWRF). All required bypassing shall be included.

Rationale

The existing confluence box needs to be replaced to eliminate operational risk. Some years ago it had to be weighed down with supplemental concrete. Its underground condition is unknown and its inspection is problematic. Its above ground appurtenances are degraded.

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

Design and construct a new plant drain station and associated piping. Near the existing station with interconnection between the old and new station. Replace/upsize piping from the drain stations to the headworks and provide for energy dissipation of flow emanating from the filter backwash. Project includes all necessary electrical instrument and control work.

Rationale

This will add reliability of Southwest Water Reclamation Facility (SWWRF) drain station function and decrease the probability of sanitary sewer overflows during storm events. The drain station piping to the headworks needs replacement for age and capacity. Filter backwash into the existing drain station causes station wear.

Project #: PJ6110880 **Status:** Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: - Project Need: Other

Project Location

District 1 8500 69th St E, Palmetto

Description and Scope

Build a 58 feet x 38 feet metal maintenance building where the existing concrete slab is that was used for the Everfilt filters adjacent to the existing maintenance building. The building is to be outfitted to be used as a mechanical and electrical shop.

Rationale

With the expansion of the North Water Reclamation Facility (NWRF) and all the new equipment being added, there is a need for a bigger work shop for the electrical team and mechanical team. There is also an expanding inventory with the growth of NWRF. The existing 42 feet x 32 feet parts, tool, electrical and mechanical shop is getting crowded and in need of a bigger work shop.

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes
Project Need: Growth

Project Location

District 1 8500 69th Street East, Palmetto

Description and Scope

As a result of lab testing conducted and operational changes implemented at the plant a revised scope (not utilizing Nuvoda process) was deemed necessary. This project will now include Return Activated Sludge System evaluation and improvements to meet required flow rates. The work may include upgrading or replacement of pumps, hydraulic assessment and improvements of the RAS system (piping modifications to the new headworks). Waste Activated Sludge Pump Station upgrades to include valve and pump replacement. The required electrical and I &C improvements to be included also. These improvements will enhance the RAS and WAS system reliability and operator efficiency.

Rationale

These improvements should assist with plant operation and provide much needed improvements in advance of the plant expansion from 7.5 MGD to 9.5 MGD.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: North Regional Water Reclamation Facility Expansion 12.5 MGD
Department: Utilities
Project Mgr: Paul Haas
Infra. Sales Tax: -
Project #: PJ6110890 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: Yes Project Need: Growth, Deficiency

Project Location

District 1 North Regional WRF 8494 69th St E Palmetto, FL 34221

Description and Scope

This project will result in a 5 MGD expansion to the NRWRF. The north service area has a comp plan level of service of 80 gpd/capita. With the recent census, occupancy for Manatee County was found to be about 2.5 people per household, therefore, that translates to 200 gpd per Equipment Residential Unit (ERU). Since the NRWRF has about 2.5 MGD of capacity unused, it can support another 12,500 ERUs before reaching capacity. The numerous developments approved in this service area collectively will exceed that capability without additional treatment capacity being brought online. Adding 5 MGD extends the facility by another 25,000 ERUs. Includes replacement of all obsolete/unreliable electrical equipment identified in WW01931:- MCC's, Main Switch Gear, Transformers, Generator and Panelboards/Panels.

Rationale

The North Regional Water Reclamation Facility (NRWRF) has a permitted capacity of 7.5 million gallons per day (MGD) based on the 3-month, rolling average flow. Recent flows have exceeded 5 MGD based on the 3-month rolling average, so we are closing in on 70% of capacity. This wastewater collection area includes the fast-developing Parrish area between I-75 and US 301 and bounded by Erie Rd to the south and Buckeye Rd to the north. This project will expand the rated capacity of the facility to 12.5 MGD to accommodate growth.

Subcategory: Wastewater Treatment
Project Title: SERWRF Dryer Building Improvements
Department: Utilities
Project Mgr: Michelle Wehrle
Infra. Sales Tax: -
Project #: PJ6114180
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Add additional space onto the north side of the dryer building to accommodate an operations room, administration office, supply room and employee shower. Include new Heating, Ventilation, and Air Conditioning (HVAC) in the Motor Control Center (MCC) room.

Rationale

More space is needed at the Biosolids Dryer. Currently, operating supplies are stored in its Motor Control Center (MCC). The facility also lacks shower facilities. Space needs to be added to the Dryer as the Southeast Regional Water Reclamation Facility (SERWRF) Administration Building is already fully utilized, and the SERWRF Maintenance Building is remote from the Dryer, and not always manned concurrent with the Dryer. Additionally, the Dryer MCC needs a new HVAC unit.

Infra. Sales Tax: -
Project #: PJTP26024 **Status:** Existing

Comprehensive Plan Information

CIE Project: Yes
LOS/Concurrency: No Project Need: Growth

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

The SEWRF Capacity Improvements Project (Phase "C") is designed to enhance the biological treatment and increase the hydraulic capacity to 14MGD AADF. While the ongoing CMAR project addresses critical capacity improvements, value engineering efforts identified additional work that could be deferred and is now incorporated into this CIP project. This project ensures that all treatment processes align with the required 14MGD AADF capacity by upgrading essential components, including Headworks, Equalization Return Pumps, Enhancements to the Biological Treatment Processes, and additional Reject Storage Capacity.
By implementing these improvements, the county aims to optimize wastewater treatment efficiency while maintaining compliance and regulatory standards and protecting environmental quality. The addition of AquaDimond filtration systems, a new Sodium Hypochlorite Building, and Screening and Grit Removal equipment further strengthens system reliability. These upgrades are crucial for sustaining Manatee County's wastewater management infrastructure, safeguarding public health, and ensuring long-term environmental stewardship.

Rationale

The ongoing CMAR capacity improvements project for SERWRF is a critical initiative aimed at enhancing wastewater treatment infrastructure to support public health, regulatory compliance, and environmental sustainability in Manatee County. By upgrading Headworks, Equalization Return Pumps, and enhancements to the biological processes, the project ensures improved efficiency in handling increased wastewater loading. The installation of AquaDiamond filters, a new sodium hypochlorite facility with expanded storage, and 4 new pump skids. An 8MG reject storage pond with a Return Pump Station including all yard piping to insure that we meet request requirements.
This Capacity Expansion Phase ""C"" CIP addresses deferred improvements, including the addition of screening and grit removal equipment at the new Headworks, to further optimize operations and protect equipment. These enhancements are essential in mitigating potential environmental risks and ensuring the safety and well-being of Manatee County residents. By implementing these upgrades, the project promotes sustainable water management practices, reinforcing the county's commitment to public health and environmental stewardship. Future cost estimate = $96,944,000.

Project #: PJWW01936
Status: Existing

Comprehensive Plan Information

CIE Project: -
LOS/Concurrency: -
Project Need: Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

Replace digester sludge transfer pumps and piping in the digester building. Remove old piping that is no longer in use. Remove recirculation pumps as they are no longer in use. Replace room ventilation fans. Replace all lighting with Low Energy Downlights (LEDs). Make needed repairs to walls, ceiling, and floor in this room. Paint walls, ceiling and floor. Paint and label piping. Replace current auger system at the belt filter presses with a pumping system. Replace Motor Control Center (MCC's) D1 and D2, and air condition them. Replace associated panel boards and transformer. Replace street lighting in the area. Supervisory Control And Data Acquisition (SCADA) programming is to be included.

Rationale

The digester sludge transfer pumps are due for replacement. Their pump efficiency has diminished over the years. The recirculation pumps are no longer in use and therefore no longer needed. The current auger system for the belt filter press has many moving parts which fail often and require a lot of maintenance. A pumping system would eliminate some of the issues and allow for a better, more uniform filling of the trailers. MCCs D1 and D2 are not in a climate controlled room and are difficult to make any improvements or changes to due to them being upstairs. Moving them downstairs and installing climate control will allow better operation ability and upgradability for future installations, as well as improve maintenance and the life cycle of the equipment.

Appendix I - Projects of Record

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Buildings & Renovations

Project Count	Project		Amount	District
1	Convention Center Parking Garage	Design, engineer, and construct a new aesthetically pleasing multi-story parking structure with +/- 300 parking spaces. The structure would be ADA compliant and include but is not limited to: signage, striping, cameras, interior and exterior lighting, elevators, stairs, lightning protection, loading docks and retail frontage space for shops. Site design and permitting along with related appurtenances to provide a complete facility is required.	27,979,490	1
2	Fleet Main Workshop Facility and Administration Office Renovation	This project will provide for a full renovation / replacement of the main Fleet Maintenance Facility and Fleet Administration Offices located at 1100 26th Ave East, Bradenton Florida, 34208. The original building built in the 1960's requires substantial repairs and upgrades to modernize the aging / failing structural, electrical, plumbing, and fire protection. All the equipment lift, hoists, environmental recovery systems, and safety systems are at the end of useful life cycle. The building was evaluated by an engineer August 20, 2020 and the report indicated the building is in poor condition and will require complete renovation within 2 years. The current building has no space to expand work areas to provide a higher level of customer service, and the space required to diagnose and repair modern equipment. Pricing opinion includes complete replacement of the current 10 bays, with the addition of 10 bays to expand asset service repair work and maintenance, fleet administration offices, and to be built in parallel with the current building so we do not have any service level interruptions.	10,000,000	2
3	Judicial Center LED Lighting Retrofit	Converting the lighting to super efficient mercury free LED bulbs will reduce energy consumption and curb maintenance costs.	1,500,000	3
4	Premier Campus Parking Garage	Design and construct a new ADA compliant aesthetically pleasing multi-story (up to 5 levels) parking garage which will accommodate 500 +/- parking spaces to serve the planned construction per the general development plan and the existing library. The parking garage will be equipped, with exterior and interior lighting, signage, striping, stairs, elevators, security cameras and lightning protection. Site design and permitting along with related appurtenances to provide a complete facility is required.	51,851,100	5
4	PSC Building Mechanical and Electrical System Redundancy	Critical need for redundancy and reliability of heating, ventilation, and air conditioning in the Public Safety Complex Critical Data Rooms.	925,000	2
5	Public Works Foreman's lean to/warehouse/maintenance area replacement	Replace the existing facility located behind the foreman's section of the Public Works administration building complex.	1,187,000	2
6	Public Works Storage Shed Replacement 26th Avenue East	Total replacement of the Field Maintenance storage shed. Asset is beyond useful life and is uneconomical to repair.	750,000	2
7	Public Works Supply Warehouse and Fuel Administration Office	This project will provide for a full renovation / replacement of the Public Works Supply Warehouse and Fuel Services offices located at 2908 12th Street Court, Bradenton Florida, 34208. The original building built in the 1980's requires substantial repairs and upgrades to modernize the aging / failing structural, electrical, plumbing, and fire protection. All the equipment and safety systems are at the end of useful life cycle. The building was evaluated by an engineer August 20, 2020 and the report indicated the building is in poor condition and will require complete renovation or will soon be non-occupiable. The current building has no space to expand work areas to provide a higher level of customer service. Pricing opinion includes complete replacement of the current building.	2,500,000	2
8	Public Works Tile Yard Replacement Building	Replacement of the road maintenance storage shed at 26th Ave E. The storage facility incurred damaged from the no name storm in 2017.	200,000	2
		Buildings & Renovations Total Amount	**$ 96,892,590**

Natural Resources Projects

Project Count	Project		Amount	District
1	Emerson Expansion Visitors Center	Develop basic specifications for contractor to design and build an approximately 25,000 sq ft visitor center to be run using a mix of staff and volunteers Design and construct high quality exhibits showcasing the history of settlement of the area spanning thousands of years from indigenous cultures to present day living off the abundant natural resources. Focus will be on local history, native wildlife, and env stewardship.	2,388,150	3
2	Environmental Protection Lab	Construct a new hurricane hardened lab in combination with a utilizes infrastructure project for a water and wastewater lab at Musgrave property.	1,500,000	1
3	Fort Hamer Boat Ramp Expansion	Expand the Ft Hamer boat ramp by an additional 2 launch lanes to the west of the current lanes.	750,000	1
4	Mill Creek Lorriane Channel Improvements	Design and build a chain of wetland marsh/creek sequences within County-maintained channel COW-AG-4 east of Lorraine Road that increases water retention and residence time to provide water quality treatment through instream processes, bank stabilization and floodplain capture.	12,206,772	Multi-District
5	Palmetto Green Bridge Fishing Pier	Demolition of current fishing pier. Design, engineer and construct a brand-new stabilized fishing pier to a sound a safe condition and include a water taxi launch point providing access to the City of Palmetto and Communities North of the Manatee River. This project will have multiple funding components: RESTORE Act ($4,100,000).	18,000,000	2
6	RV Campground Jiggs Landing	Develop agreement with City of Bradenton to acquire or lease this parcel located on the Northern shore of Ward Lake adjacent to existing County owned Jiggs landing property. *Develop Work assignment with CMAR to develop plans, obtain permits, and construct RV campground with water and electric hookups at each campsite.	1,254,925	5
7	Ungarelli Preserve Recreational Improvements	Construct a boardwalk and trail system. Kayak launch, parking areas, signage, and a pavilion. Cost and funding source park impact fees, grants, and WCIND (Kayak Launch).	TBD	3
		Natural Resources Total Amount	**$ 36,099,847**

Sports & Leisure Projects

Project Count	Project		Amount	District
1	Blackstone Park Upgrades - Synthetic Multi Purpose Soccer Field #1	Construction and installation multi-purpose synthetic turf field to be built on the Blackstone Park Sport Complex near 14th Ave W. The project will include site work, field grading, survey, irrigation, and amenities required for functional multipurpose fields.	2,350,000	2
2	Blackstone Park Upgrades - Synthetic Multi Purpose Soccer Field #2	Construction and installation of 1 multi-purpose synthetic turf field to be built on the Blackstone Park Sport Complex near the softball field. The project will include site work, field grading, survey, irrigation, and amenities required for functional multipurpose field.	2,350,000	2
3	Braden River Park Three Synthetic Turf Fields	Construction and installation of three (3) multi-purpose synthetic turf fields to be built on the Braden River Park Sport Complex. The project will include site work, field grading, survey, irrigation, LED sports lighting and amenities required for functional multipurpose fields.	5,995,688	5
4	G.T. Bray Little League Fields	Complete removal of current tee ball area and installation of little league sized baseball fields in its place, this includes all backstops, benches, bleachers, bases, clay and grass from area. Install irrigation, fencing, clay, proper turf, bases, dugouts and bleachers. Install LED lighting.	2,450,000	3
5	G.T. Bray Park Improve Trail System	Add outdoor lighting along the trail path of GT Bray as well as signage and fixed exercise equipment.	250,000	3
6	G.T. Bray Park Relocate Outdoor Basketball Court with Light	The new basketball court will be located adjacent to the new skate park. This will allow us to utilize the existing slab. We will construct one full sized basketball court, with fencing and lights that will be open, free to the public.	156,079	3
7	G.T. Bray Synthetic Soccer Field	Construction and installation of multi-purpose synthetic turf field to be replace the current natural turf. The project will include site work, field grading, survey, irrigation, fencing, drainage, and amenities required for functional multipurpose fields.	2,068,918	3
8	Greenbrook Park Parking Lot Install	Install parking lot.	100,000	5
9	GT Bray Park Renovate T-Ball & Add Baseball Fields	Renovate and expand the two t-ball fields into little league fields to accommodate more users. Cost TBD.	TBD	3
10	Lakewood Ranch Park -2 Synthetic Turf Fields	Construction and installation of two (2) multi-purpose synthetic turf fields to be built at Lakewood Ranch Sports Complex property. The project will include site work, field grading, survey, irrigation, and lighting.	4,343,375	5
11	Lakewood Ranch Park Drainage Improvements - Phase II	This project involves the design, permitting, construction and installation of two multi-purpose synthetic turf fields at the Lakewood Ranch Park, including necessary site work, grading, irrigation, survey, and lighting. Improvements will also be made to the drainage systems for Lakewood Ranch Park. An additional parking plan will be developed to encompass the area's most frequently used for overflow parking, with structured, low-maintenance asphalt or another approved base, proper lighting, and effective drainage. This project is for the drainage improvements - phase II.	1,074,904	5
12	Lakewood Ranch Park Restroom and Water Fountain for Pickleball/Tennis	Construction of an ADA restroom facility, including sufficiently sized male, female and family facility and a chilled water fountain, within the LWR Tennis/Pickleball area. Investigation into factory built and delivered modular rest-room facilities should be investigated for cost savings.	749,000	5

MANATEE COUNTY GOVERNMENT

1	Anna Maria Island Lifeguard Towers, Equipment, & Staff	Work with the city of Anna Maria to add lifeguards and a tower in currently unstaffed beach areas. A	268,000	3
2	Bradenton Beach Lifeguard Towers, Equipment, & Staff	Work with the city of Bradenton Beach to add lifeguards and a tower in currently unstaffed beach areas. A new state statute permits the use of Tourist Development funds to cover lifeguards, equipment, and towers. The plan includes 1 new tower and requires 2 additional lifeguards and their equipment including tower costs $80k, lightning rod w/installation is $20k, fully equipped John Deer gator is $30k, and each FTE's salary is $69k.	268,000	3
3	Community Health Vending Machine North Manatee County	Placement of more health focused vending machines into the community in North Manatee County.	375,000	2
4	Community Health Vending Machine South Manatee County	Placement of more health focused vending machines into the community in South Manatee County.	375,000	4
5	ECC Remodel and Acoustic Treatment of Communications Center	Relocate 4 MSO/ECC consoles and create two additional offices for supervisors who currently have no office space. Replace ceiling and lighting consistent with acoustic evaluation to reduce echo and change to indirect lighting for 24/7 operation. Acoustic wall treatments added to walls and windows and replace console plexiglass and lighting.	350,000	2
6	ECC/911 Backup Center Expansion - Mobile	Outfit a trailer capable of being an independent mobile expansion of the current backup center and use at large events. Includes 2 radio dispatch positions and 3 call taking positions. This would be kept at the PSC to minimize down time while other staff commute to backup center downtown. Current backup center only has 7 positions for 11 staff.	600,000	2
7	GT Bray Splash Pad Features, Kiddie Pool, and Small Pump Room	Replace outdated splash pad features at GT Bray with more durable equipment and remove the small kiddie pool, which currently requires a dedicated lifeguard. Removing the pool would allow the splash pad to operate without lifeguard staffing. Upgrade all equipment and replace the old wooden pump room with a modern pump facility, potentially an open-air structure.	1,000,000	3
8	Health Department - Old Morgue Renovation	Remodel the old morgue into a usable functional space for Health Department operations. This was a Project of Record at some point in time.	950,000	2
9	Holmes Beach Lifeguard Towers, Equipment, & Staff	Work with the city of Holmes Beach to add lifeguards and a tower in currently unstaffed beach areas. A new state statute permits the use of Tourist Development funds to cover lifeguards, equipment, and towers. The plan includes 1 new tower and requires 2 additional lifeguards and their equipment including tower costs $80k, lightning rod w/installation is $20k, fully equipped John Deer gator is $30k, and each FTE's salary is $69k.	268,000	3
10	Manatee County Sheriff's Office (MCSO) - Aviation and Forensics Generator	The purpose of this project is to design, supply, install, and commission a full building backup generator system for the Manatee County Sheriff's Office Aviation and Forensics, ensuring uninterrupted power supply for critical operations, including emergency communications, lighting, HVAC, and other essential systems. The generator system will comply with the Florida Building Code (FBC), National Electrical Code (NEC), and Manatee County Development Services requirements.	1,085,953	5

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Public Safety

Project Count	Project		Amount	District
11	Manatee County Sheriff's Office (MCSO) - District 3 Generator	The purpose of this project is to design, supply, install, and commission a full building backup generator system for the Manatee County Sheriff's Office District 3, ensuring uninterrupted power supply for critical operations, including emergency communications, lighting, HVAC, and other essential systems. The generator system will comply with the Florida Building Code (FBC), National Electrical Code (NEC), and Manatee County Development Services requirements.	847,097	5
12	Manatee County Sheriff's Office (MCSO) - Driving Pad	Construct a driving pad encompassing approximately 10 acres at the new MSO Fleet Maintenance Building located at 11910 31st Terrace E., Palmetto. The pad will be 400' x 800'. There will be a 24' x 36' classroom trailer with a co-ed restroom. Site work to include retention pond, electrical, sanitary sewer, potable water, fire line and fencing.	5.154.699	1
13	Manatee County Sheriff's Office (MCSO) - Jail Gatehouse	This project will involve the following site improvements: demolition of current gatehouse structure, installation of a pre-assembled gatehouse structure, addition of two travel lanes around the structure, electrical and plumbing improvements to the structure and a fence/gate reconfiguration.	1,735,850	1
14	Manatee County Sheriff's Office (MCSO) - Operations Center Generator	The purpose of this project is to design, supply, install, and commission a full building backup generator system for the Manatee County Sheriff's Office Ops Center, ensuring uninterrupted power supply for critical operations, including emergency communications, lighting, HVAC, and other essential systems. The generator system will comply with the Florida Building Code (FBC), National Electrical Code (NEC), and Manatee County Development Services requirements.	940,061	2
15	Manatee County Sheriff's Office (MCSO) - Outdoor Gun Range	Construction of an outdoor gun range at the MCSO jail facility . In order to meet the firearms training and qualification requirements set by the State of Florida (FDLE) as well as agency policy, MCSO law enforcement personnel must qualify with all issued firearms once a year. Due to not having a gun range operated and maintained by the MCSO, we rely on our partnership with the Manatee Gun and Archery Club in Myakka City to provide such a location. The MCSO is restricted to specific days of the week that training can occur as this gun range is privately owned and open to the public.	10,389,133	1
16	Manatee County Sheriff's Office (MCSO) - Substation Parrish	The growth in the eastern and northern portions of Manatee County has been non-stop and calls for service in these areas continue to rise on a yearly basis due to said growth. The MCSO presently have no hardened buildings that are hurricane rated that can be occupied safely by personnel who are required to work during a hurricane event. The building of a 20,000 sq ft substation in the Parrish area will be of great service to the citizens who reside and work in that area of the county. This scope also includes all FF&E and appurtenances for the project.	44,972,183	1
17	Old Jail Remodel	To design/renovate/construct for transitional VA housing.	2,000,000	3
18	Satellite Medical Building East Manatee County	Satellite medical building in East Manatee County targeting those with accessibility issues and high need areas.	5,000,000	Multi-District
19	Satellite Medical Building North Manatee County	Satellite medical building in North Manatee County targeting those with accessibility issues and high need areas.	5,000,000	Multi-District
		Public Safety Total Amount $	**76,424,277**	

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
1	1st Ave E from 17th St E to North DE	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	547,000	2
2	14th St W - 26th Ave W to 39th Ave W	Construct pedestrian crossings.	130,000	3
3	15th St E - 38th Ave E	Construct signal and turn lane improvements.	385,418	2
4	15th St E (301 Blvd) - Tallevast Rd to 1st St (US 41)	Construct a three lane roadway with bike lanes and sidewalks.	63,000,000	Multi-District
5	17th Avenue NW Complete Street - 99th St NW to 83rd St NW	Construct two mini-roundabouts at 83rd Street NW and 91st Street NW, provide raised pedestrian crossings at critical locations, and completing the sidewalk network on 17th Avenue NW.	6,445,000	3
6	18th St W - Cortez Rd to 38th Ave	Construct sidewalk on east side.	36,900	4
7	21st St W & E from 4th Ave W to US 41	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	319,000	2
8	24th Ave - US 301 to 29th St	Construct a new two lane road.	12,182,882	2
9	26th St W at Bayshore Gardens Pkwy	Add turn lane(s).	654,000	4
10	26th Ave E - 15th St E to 45th St E	Widen roadway to 24 feet and resurface over entire width. Construct closed drainage and re-grade to provide 8 feet shoulders.	3,500,000	2
11	26th St W - 9th Ave W	Extend left turn lanes and add right turn lanes.	1,242,246	3
12	26th St W at 57th Ave W	Upgrade to mast-arm supports and add turn lane(s).	1,599,000	4
13	26th St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.	3,293,708	3
14	27th St E - 13th Ave E to 26th Ave E	Reconstruct and widen from 2 lanes to 4 lanes.	16,748,517	2
15	27th St E - 9th Ave E	Construct separate left-turn lane on all approaches.	523,617	2
16	27th Street E - 26th Avenue E / 38th Avenue E	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards.	12,209,918	2
17	27th Street E - SR64 / 13th Avenue E	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards.	9,292,798	2
18	27th St E - SR 64 - 20th Ave E Rebase and Resurfacing	This project encompasses design, bidding and construction of a 5,300 LF of roadway base, asphalt surfacing and repair sidewalks and curbing.	1,223,500	2
19	27th Street East - SR 64 to 26th Avenue East	Reconstruct road base and resurface with asphalt from SR 64 to 26th Avenue East. Make sidewalk repairs at selected locations. (1.31 centerline miles). 27th St E that connects to SR 64 on the north and 38th Ave E on the south is a heavily travelled road that is in poor condition and services neighborhoods, schools, a golf course, and the Pirate City Spring Training Baseball Complex. The road has deteriorated to an extent that a simple mill & resurface project would not be adequate to rehabilitate the section; therefore, this project encompasses reconstructing the base and then resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road also has sidewalk, the project would make repairs in various locations to cracked and/or shattered slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.	3,261,000	2

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
20	301 Blvd from Tallevast Rd to University Pkwy	Add sidewalk on west side. Complete sidewalk gaps on east side.	643,000	4
21	30th Ave E from 9th St E to 15th St E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	5,189,000	2
22	35th St W from 9th Ave W to 13th Ave W	Add sidewalk on one side.	103,000	3
23	37th St E - 38th Ave E - SR 70	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	12,971,000	4
24	37th Street E (Mendoza Rd) - 69th St E to Victory Rd Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	576,800	1
25	43rd St W at 9th Ave W	Upgrade to mast-arm supports and add right turn lane.	449,000	3
26	43rd St W from 36th Ave W to 9th Ave W	To meet current design standards for thoroughfare roadways. Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	15,876,000	3
27	43rd St W from Cortez Rd to 53rd Ave W	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	11,207,000	Multi-District
28	44th Ave E at Uihlein Road Intersection Improvements	Design, permit, and install traffic signals with mast arm assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection from 44th Ave E (at Asolo Blvd) to Uihlein Road. Two thoroughfares, 44th Ave E and Uihlein Road, are four-lane divided roadways classified as arterial and collector, respectively, in the County's Comprehensive Plan. The intersection of 44th Ave E and Uihlein Road currently operates as an all-way stop control. With 44th Ave E extending to Bourneside Boulevard, Uihlein Road connecting two major state roads (SR 64 & SR 70), and with major developments near this intersection, there has been a steady growth of traffic in the area that is expected to continue. Staff recommends installation of a traffic signal at this intersection. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.	2,405,700	5
29	45th St E from 44th Ave E to 26th Ave E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	10,377,000	Multi-District
30	45th St E from 4th Ave E to End of Street	Road drainage and add sidewalk on one side.	173,000	2
31	49th St E (Experimental Farm Rd) over Terra Ceia Creek Bridge Replacement	Design and construct a new bridge to replace the existing bridge on Experimental Farms Rd (49th St E) over Terra Ceia Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and providing sidewalks allowing for bicycle and pedestrian traffic to improve safety. The alignment is also to be adjusted north to maintain the parallel channel to the south. The estimated dimensions of the new bridge are approximately 40 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.	2,836,355	1
32	4th Ave E from 45th St E to 49th St E	Road drainage and add sidewalk on one side.	200,000	1
33	51st Ave E from US 301 to 33rd ST E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	5,500,000	2
34	51st St W - 53rd Ave W	Construct southbound left turn lane.	543,300	4

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
35	51st Street W - El Conquistador Pkwy to 53rd Avenue E	Design, permit, and construct the outside two lanes of a future four-lane divided thoroughfare extension of 51st St W from El Conquistador Pkwy to 53rd Ave E. Project to include associated intersection improvements at 53rd Ave W and El Conquistador Pkwy, and land acquisition to accommodate the road extension. The County's 2045 Traffic Circulation Functional Classification (Map 5-B) identifies 51st St W road as a proposed collector thoroughfare from El Conquistador Pkwy to 53rd Ave W. Due to future anticipated growth in the surrounding area, traffic demand is expected to increase. The project expected to support the County's economic development and revitalization goals for the area while providing increase roadway capacity and connectivity to employment centers, educational opportunities, tourism destinations, sport performance venues, and beach resorts.	21,100,000	4
36	51st St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Improving the offset for the east-west left turns should also be evaluated. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.	3,517,865	Multi-District
37	51st St W from 21st Ave W to Cortez Rd	Reconstruct an existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	13,386,000	3
38	51st St W from 32nd Ave Dr W to 26th Ave W	Add sidewalk on one side.	163,000	3
39	51st St W from 47th Ave W to Cortez Rd	Add sidewalk on one side.	143,000	3
40	53 Ave W from 26 ST W to 30 ST W	Upgrade road to current standards for travel lanes, sidewalks, bike lanes (or trail), and lighting.	3,743,000	4
41	53rd Ave W - 20th St W	Upgrade to mast arm support and construct right-turn lane on westbound approach.	533,996	4
42	53rd Ave W at 34th St W	Upgrade to mast arm support, construct right-turn lane on westbound approach, and left turn lane on eastbound approach.	1,645,000	4
43	53rd Ave W from 25th St W to US 41	Add sidewalk on one side.	282,000	4
44	53rd Ave W from US 41 to 26th St W	Reconstruct existing four lane road to include standard lane widths, pedestrian and bicycle facilities and lighting.	10,797,000	4
45	55th Ave W from 26th St W to US 41	Road drainage and add sidewalk on one side.	556,000	4
46	59th St W - Riverview Blvd. - Manatee Ave W	Reconstruct existing two-lane road to include standard lane widths, pedestrian and bicycle facilities.	10,169,000	3
47	5th Street E - 32nd Ave E to 22nd Terrace E Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	333,200	2
48	61st E Palmview from Country Lakes Blvd to Bayshore Rd Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	286,800	3
49	61st St E from Bayshore Rd to 16th Ave E	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	759,486	3
50	63rd Avenue E from Tuttle Avenue to Lockwood Ridge Rd	Widen from 2 to 4 lanes with bike lane, sidewalks and lighting (1.1mi).	11,000,000	4
51	69th Ave E (Whitfield Ave) over Pearce Canal Bridge Replacement	Design and construct a new bridge to replace the existing bridge on Whitfield Ave (69the Ave E) over Pearce Canal. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and allow for bicycle and pedestrian traffic to improve safety. The estimated dimensions of the new bridge are approximately 60 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.	2,497,564	4
52	69th Ave West (Bay Dr.) from American Way to US 41 Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps. The project may be constructed in phases due to potential utility conflicts and permitting on the west side of the project.	280,000	4

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
53	69th St - Erie Rd - US 41 to US 301	Widen from two lanes to four lanes.	54,584,453	1
54	69th St E at 51st Ave E Intersection Improvements	Design, permit, and install traffic signals with mast arm assemblies and associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements (adding or extending), as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection from Buffalo Road to 51st Ave E. The 69th St E and 51st Ave E intersection, is located in area of the County that is experiencing rapid growth and traffic demand. The northbound and southbound approaches (51st Ave E and 47th Ave E, respectively) are stop-controlled. With expected increase in traffic, road users on these approaches will experience increasingly higher delays. Installation of a traffic signal along with pedestrian crossing features is recommended to alleviate the problem. The traffic signal is expected to improve the overall operations and safety for all users. In addition, staff also recommends providing Advanced Traffic Management Systems (ATMS) infrastructure such as fiber-optics, CCTV cameras, and Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.	2,334,000	1
55	69th Street E - US 41 / Ellenton Gillette Rd	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards. This project includes IST Project TRRI017.	13,817,034	Multi-District
56	69th St E from Ellenton-Gillette to I-75	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	8,405,000	1
57	75th St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.	2,829,735	Multi-District
58	80th Ave Cir E from 55th St E to 55th St E	Add sidewalk on one side.	112,000	1
59	9th Ave W - 51st St W Intersection	Install traffic signal.	250,000	3
60	9th St E - 37th Ave E Intersection	Install traffic signal.	328,358	3
61	9th St E - US 301	Construct a new sidewalk.	TBD	Multi-District
62	9th St E at 30th Ave E	Upgrade to mast-arm supports and add right turn lanes on all four approaches.	2,000,000	2
63	9th St W - Cortez Rd to 301 Blvd	Construct a sidewalk on east side.	102,200	Multi-District
64	9th St W at 30th Ave W	Upgrade to mast-arm supports and add turn lanes on all four approaches.	2,500,000	2
65	9th Street East Rebase and Resurfacing CIP	Re-base large sections of 9th Street East from US 301 to 9th Ave East.	1,870,348	2
66	Advanced Traffic Management System(ATMS) Countywide	Countywide construction of ATMS infrastructure.	500,000/year	Countywide
67	Baywalk Trail from USF/Crosley	Construct trail from USF to Crosley, (North/South).	150,000	4
68	Bicycle System Improvements Countywide	Placing of bike racks and route signs throughout the county where needed.	100,000/year	Countywide
69	Buckeye Road - US 41 to US 301	Widen from two lanes to four lanes.	33,543,026	1
70	Buffalo Road - 69th Street E / Moccasin Wallow Rd	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards.	33,905,992	1

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
71	Canal Rd - 49th St E - US41 - Segment 4	Design and construction of a functional improvement to the existing roadway from 49th ST E north to US 41 with a traffic signal at US 41 (pending FDOT approval).	3,316,806	1
72	Carter Rd - Erie Rd to Buckeye Rd	Widen from two lanes to four lanes.	16,023,178	1
73	Chip Seal Paving Fund	This project encompasses designing and constructing 4 miles a year of a Double Chip with Fog Seal, completing all 13 miles over a 5 year period to eliminate the need for rebasing under developed roads.	1,387,775	Countywide
74	Clay Gully Phase 1 - from Communications Tower to Sandy Ct.	Reconstruct road base and resurface with asphalt from Communications Tower to Sandy Ct. This is Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year (2.2 centerline miles). Clay Gulley is the major E/W connector in the southeast portion of the county. The condition of the road has deteriorated to an extent that a simple mill & resurface project would not be adequate to rehabilitate the section; therefore this project encompasses reconstructing the base and then resurfacing with 2" structural asphalt and 1" of friction course asphalt. Several small phases of Clay Gulley have already been reconstructed over the years, and this project would continue that effort. The base reconstruction would also allow the roadway to be widened to allow easier passage of traffic. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.	2,910,000	1
75	Clay Gully Phase 2 - from Sandy Ct to Sugar Bowl Rd	Reconstruct road base and resurface with asphalt from Sandy Ct to Sugar Bowl Rd. This is Phase 2 of 2 phases. (1.9 centerline miles). Clay Gulley is the major E/W connector in the southeast portion of the county. The condition of the road has deteriorated to an extent that a simple mill & resurface project would not be adequate to rehabilitate the section; therefore this project encompasses reconstructing the base and then resurfacing with 2" structural asphalt and 1" of friction course asphalt. Several small phases of Clay Gulley have already been reconstructed over the years, and this project would continue that effort. The base reconstruction would also allow the roadway to be widened to allow easier passage of traffic. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.	2,559,000	1
76	Clay Gulley Rd Repaving	Repave two lane road - 10 miles.	2,320,000	1
77	Clay Gully Road Rebase and Resurfacing	This project encompasses design, bidding and construction of a 27,000 LF of roadway base, asphalt surfacing and reworking shoulders.	3,918,115	1
78	Complete Streets Tuttle Avenue Phase I - INTERSECTIONS	Design and construct a single-lane roundabout with pedestrian crossing features at the Tuttle Avenue and 72nd Avenue East intersection.	1,047,000	4
79	Complete Streets Tuttle Avenue Phase II - INTERSECTIONS	Design and construct a roundabout with pedestrian crossing features at the Tuttle Avenue and 72nd Avenue East intersection.	1,191,000	4
80	CR 39 - Hillsborough Countyline - SR 62 Rebase and Resurfacing	This project encompasses design, bidding and construction of a 20,000 LF of roadway base, asphalt surfacing and reworking shoulders.	3,870,390	1
81	CR 39 Hillsborough Co Line to SR 62	Re-base sections of CR 39 from SR 62 to Hillsborough County Line.	3,964,759	1

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
82	CR 39 Phase 1 - N of SR 62 to 126th Ct E	Mill & resurface and add shoulders from SR 62 to 126th Ct E. This is Phase 1 of two phases. Phase 2 would be requested in a subsequent year. (2.5 centerline miles). CR 39 is a N/S connecting road which runs from the Hillsborough County line to SR 62. The road is one of only 2 N/S routes in the northeastern rural portion of the county. Traffic consists of both rural (residential) and industrial (mining & steel fabrication plant) traffic. The asphalt in this section is poor, but the base has only localized failures and the roadway is not in need of complete base reconstruction; resurfacing would act as a preventative maintenance treatment in preserving the existing base. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As these sections do not have shoulders, the project would also construct outside shoulders in both directions. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.	2,793,000	1
83	CR 39 Phase 2 - 126th Ct E to S of Carlton Rd	Mill & resurface and add shoulders from 126th Ct E to S of Carlton Rd. This is Phase 2 of 2 phases. (1.2 centerline miles). CR 39 is a N/S connecting road which runs from the Hillsborough County line to SR 62. The road is one of only 2 N/S routes in the northeastern rural portion of the county. Traffic consists of both rural (residential) and industrial (mining & steel fabrication plant) traffic. The asphalt in this section is poor, but the base has only localized failures and the roadway is not in need of complete base reconstruction; resurfacing would act as a preventative maintenance treatment in preserving the existing base. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As these sections do not have shoulders, the project would also construct outside shoulders in both directions. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.	2,091,000	1
84	CR 675 - US 301 to Rye Rd	Widen from two lanes to four lanes.	35,215,776	1
85	Creekwood Blvd - SR 70 E to 44th Ave E - Pavement Reconstruction	Design, permit, and construct full base reconstruction and resurfacing of Creekwood Blvd from SR 70 E to 44th Ave E. Including material testing, sidewalk repairs at various locations along the roadway, and pedestrian striping enhancements.	6,355,372	5
86	Desoto and Green Bridge Dynamic Message Signs	Provide electronic signs on bridges to provide traffic and emergency information.	990,000	Countywide
87	Dynamic Message Sign Replacements	Design and construct 4 new dynamic message signs to include foundation, structures, sign, control, power and communication connections.	1,340,500	Countywide
88	Ellenton Gillette Rd - US 301 to Moccasin Wallow Rd	Construct four lane roadway with five feet sidewalk, curb and gutter.	49,709,130	Multi-District
89	Ellenton-Gillette Rd at Mendoza Rd	Installation of mast arm signalized intersection to include left turn lanes on all four legs of intersection.	484,000	1
90	Experimental Farm Rd Bridge Replacement (134005)	Replace aging steel structure.	1,000,000	1
91	Ft. Hamer Rd - Golf Course Rd / Old Tampa Rd	Design and construct the widening of Golf Course Road from Old Tampa Road to the Ft. Hamer Rd to create a divided four-lane thoroughfare (approximately 5.2 miles). The typical section will include a grass median, turn lanes (as needed), pedestrian & bicycle facilities, and lighting. Modification of four signalized intersections will be required to accommodate the roadway widening. Project will require right-of-way acquisition. It is anticipated that a Project Development & Corridor Study (PD&C) will be completed prior to starting the design.	71,492,738	1

92	Ft. Hamer Rd - Old Tampa Rd / Upper Manatee River Rd	Design and construct the widening of Fort Hamer Road from Old Tampa Road to the Upper Manatee River Rd to create a divided four-lane thoroughfare (approximately 5.2 miles). The typical section will include a grass median, turn lanes (as needed), pedestrian & bicycle facilities, and lighting. Modification of four signalized intersections will be required to accommodate the roadway widening. Project will require right-of-way acquisition. It is anticipated that a Project Development & Corridor Study (PD&C) will be completed prior to starting the design.	62,767,361	Multi-District
93	Fort Hamer Road Extension from FF Road to IA Manatee southern boundary	The project will involve construction of the east pair of lanes of a future north-south four-lane road with 11-foot wide travel lanes, 4-foot wide bicycle lanes, west side 10-foot wide multi-use trail, and east side 5-foot wide sidewalk.	563,530	1
94	Golf Course Rd - Ft. Hamer Rd / Rye Rd	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards.	47,579,989	1
95	Golf Course Rd from Fort Hamer Rd to Twin Rivers Trail	Construct five feet sidewalk with drainage improvements.	3,421,000	1
96	Greenbrook Blvd from Lorraine Rd to Royal Turn Cir	Add sidewalk on north side.	115,000	5
97	Harbor Woods Curb Replacement	Remove and replace 50,000 linear feet of Type "D" curb. Phase I - from 55th St. W. to 51st St. W., Manatee Ave. to 1st Ave. W. Phase II - from 51st St. W. to 43rd St. W., Manatee Ave. to 1st Ave. W.	1,541,000	4
98	Harrison Ranch Blvd - US 301 to Erie Rd	Widen from two lanes to four lanes.	16,727,493	1
99	I-275 - US 19 / Pinellas County Line	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 1: This is a major interstate project that is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and scope will be determined by the FDOT.	See Note 1	1
100	I-75 - SR 64 / US 301	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 1: This is a major interstate project that is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and scope will be determined by the FDOT.	See Note 1	Multi-District
101	I-75 - SR 70 / SR 64	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 1: This is a major interstate project that is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and scope will be determined by the FDOT.	See Note 1	5
102	I-75 - US 301 / I-275	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. See Note 1	1
103	Honore Ave from 83 Ave E to Cooper Creek Blvd	Add two lanes to existing two lane roadway.	4,277,000	4

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
104	Lakewood Ranch Blvd Phase 1 - S of SR 70 to Bullrush Terrace	Mill and resurface roadway with asphalt from S of SR 70 to Bullrush Terrace. Make sidewalk repairs at selected locations. This would be Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year. (2.0 centerline miles). Lakewood Ranch Blvd is a major N/S connector for Manatee County. This section connects the commercial centers of Lakewood Ranch with multiple neighborhoods and major E/W connectors such as SR 70 and University Parkway. The asphalt condition in this section is poor, but the base has only localized failures and the roadway is not in need of complete base reconstruction; resurfacing would act as a preventative maintenance treatment in preserving the existing base for several more years. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road has sidewalk, the project would make repairs in various locations to cracked and/or shatter slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.	3,729,000	5
105	Lakewood Ranch Blvd - Rangeland Pkwy to SR 64	Widen from four lanes to six lanes.	33,933,230	5
106	Lakewood Ranch Blvd - River Club Blvd - SR 70 Rebase and Resurfacing	This project encompasses design, bidding and construction of a 2.3 mile section of Lakewood Ranch Blvd for base repairs in selected locations, resurfacing, and rework of shoulders.	3,149,000	5
107	Lakewood Ranch Blvd - SR 70 to SR 64 - Inside Lanes Pavement Reconstruction	Design, permit, and construct full base reconstruction and resurfacing of inside (passing) lanes of Lakewood Ranch Blvd from SR 70 to SR 64. Scope to include material testing, sidewalk repairs at various locations along the roadway, and pedestrian striping enhancements. Lakewood Ranch Blvd connects SR 70 to SR 64 and provides access to a residential neighborhoods, commercial centers, educational institutions (grade schools and colleges). This section of Lakewood Ranch Blvd has deteriorated to an extent that milling & resurfacing the road is not adequate for rehabilitation. In 2019, the pavement of the outside travel lanes was reconstructed (base and asphalt). This project will reconstruct the pavement of the inside (passing) lanes. Additionally, repairs to damaged sidewalks at various locations long the roadway and pedestrian striping enhancements are recommended.	13,765,550	5
108	Lena Rd - SR 64 to SR 70	Widen from two lanes to four lanes.	45,678,660	5
109	Lockwood Ridge Rd at Whitfield Ext	Add turn lane(s).	1,307,000	4
110	Lorraine Road - SR 70 - Players Dr Rebase and Resurfacing	This project encompasses design, bidding and construction of a 1.6 mile section of roadway, repair areas of base, resurface, rework shoulders.	2,681,000	5
111	Malachite Rd at New Haven Blvd-Central Park Blvd Intersection Improvements	Design, permit, and install traffic signals with mast arm assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections from Lakewood Ranch Blvd to New Haven Blvd.	2,195,950	5
112	Mendoza Rd - US 19 to Victory Rd	Widen from two lanes to four lanes.	39,265,590	1
113	Mendoza Rd from Ellenton-Gillette to I-75	Widen from two lanes to four lanes.	10,999,000	1
114	Morgan Johnson - Caruso Rd - SR 70 to SR 64	Widen roadway to 24 feet and resurface over entire width. Construct closed drainage and re-grade to provide eight feet shoulders.	7,200,000	Multi-District
115	Neighborhood Reconstruction Program - Pilot	The full replacement of curb when the roads are resurfaced.	600,000	Countywide
116	"NEXT SIGNAL" Guide signs at Major County Intersections	Design and install 50 multi-post Advance Intersection Guide Signs on approaches to 20 major intersections in the County (see location map).	590,000	Countywide
117	Old Tampa Road from 89 Ave E to Chin Rd	Add sidewalks to both sides of the road.	811,000	1

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Transportation

Project Count	Project		Amount	District
118	Permanent Speed Feedback Signs - Countywide	Design and install 46 Permanent Speed Feedback Signs at 14 throughfare corridors in the County (see location map). These solar powered units shall display a static speed limit sign on the top and a radar driven LED sign showing real-time speed feedback under the static sign.	662,000	Countywide
119	Piney Point Rd Ext. (Port Connector) - US 41 to I-75	Construct four lane limited access roadway.	57,865,692	1
120	Preliminary Engineering Studies	This project is a program that is expected to support scoping and feasibility analysis for several future capital projects that may or may not be concurrency-related.	1,337,500	Countywide
121	Rangeland Pkwy at Uihlein Rd Intersection Improvements	Evaluate, design, permit, and install traffic signals with mast arm assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections from Uihlein Rd to Bourneside Blvd. Two thoroughfares, Rangeland Pkwy and Uihlein Rd, are four-lane divided roadways classified as collectors in the County's Comprehensive Plan. The intersection of Rangeland Pkwy and Uihlein Rd currently operates as an all-way stop control. This intersection is surrounded by major traffic generators (e.g., Premier Sports Campus, Lakewood National and Esplanade communities, the future Lakewood Ranch Library and Aquatic Center, etc.). There has been a steady growth of traffic in the area that is expected to continue. Staff recommends installing a traffic signal at this intersection. In addition, staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber, CCTV cameras Microwave Vehicle Detection Systems to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities. The traffic signal is expected to improve the overall operations and safety of the vehicles, bicyclists, and pedestrians at this intersection.	2,371,450	5
122	Red Rooster Rd from US 301 to Major Turner Run	Road drainage and add sidewalk on one side.	350,000	1
123	Rye Rd - Golf Course Rd / Upper Manatee River Rd	Reconstruction & widening from 2 to 4 lanes with pedestrian & bicycle facilities and roadway lighting. To provide capacity for existing traffic and planned growth and to update the typical section to be consistent with throughfare standards.	36,492,965	1
124	Sawgrass Rd - Erie Road to II Rd	Widen from two lanes to four lanes.	26,816,877	1
125	School Drive from Lakewood Ranch Blvd to Mustang Alley	Add sidewalk on one side.	161,000	5
126	Sidewalk Improvements Countywide	Sidewalk improvements as needed - countywide.	300,000/year	Countywide
127	Spencer Parrish Rd from 57th St E to Golf Course Rd	Widen from two lanes to four lanes.	19,762,636	1
128	Spencer Parrish Rd from 57th St E to Golf Course Rd	Construct sidewalk.	870,000	1
129	SR 64 - 27th St E to Carlton Arms	Construct sidewalks.	144,578	2
130	SR 64 - Lakewood Ranch Blvd to Lorraine Rd	Widen from four lanes to six lanes.	19,898,702	Multi-District
131	SR 70 - 30th St E intersection	Construct northbound & southbound dual left turn lanes and separate right turn lane.	575,000	2
132	SR 70 - 33rd St E	Traffic signal upgrades.	400,000	2
133	SR 70 - 87th Street E / Braden Run	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 2: This is a state road that has already has the number of lanes anticipated in the 2045 Traffic Circulation Map. The project is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and capacity increasing scope will be determined by the FDOT.	See Note 2	5
134	SR 70 - Caruso Rd	Traffic signal upgrades.	400,000	5

MANATEE COUNTY GOVERNMENT

Projects of Record

Transportation

Project Count	Project		Amount	District
135	SR 70 - River Club Blvd / Lakewood Ranch Blvd	Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 2: This is a state road that has already has the number of lanes anticipated in the 2045 Traffic Circulation Map. The project is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and capacity increasing scope will be determined by the FDOT.	See Note 2	5
136	SR 70 - Tara Boulevard / I-75	Project Description: Corridor capacity improvements for State facility. To provide capacity for existing traffic and planned growth. Note 2: This is a state road that has already has the number of lanes anticipated in the 2045 Traffic Circulation Map. The project is anticipated to be completed by the State and is included here for tracking purposes. Specific cost and capacity increasing scope will be determined by the FDOT.	See Note 2	5
137	Tallevast Rd - US 41 to 301 Blvd	Widen from two lanes to four lanes.	12,766,852	4
138	Tara Boulevard Complete Street Phase II - Tara Preserve Lane to Linger Lodge Road	Construct traffic calming measures with intersection improvements constructing two single lane roundabouts at Tailfeather Way and Linger Load Road and incorporate street lights, and additional traffic control devices to enhance pedestrian safety.	3,605,000	5
139	Tara Blvd Traffic Calming (Phase 1) - Stone River Rd to Tara Preserve Ln	Evaluate, design, permit and construct traffic calming measures that include the repurposing Tara Blvd from a four-lane divided roadway to a two-lane roadway with a buffered multi-use lane for golf carts and cyclists in both directions from Tara Preserve Ln to Stone River Rd. In addition, evaluate, design permit, and construct single lane roundabouts (using low-cost modular materials) at Drewrys Bluff and Tara Preserve Lane along with additional traffic control devices to provide enhance pedestrian safety. Tara Boulevard is currently a two-lane divided road from Linger Lodge Road to Tara Preserve Ln and a four-lane divided road from Tara Preserve Ln to SR 70 with a posted speed limit of 30 mph. The Board of County Commissioners recently approved an update to the County's Traffic Circulation Plan removing Tara Blvd, from Honore Ave to Linger Lodge Rd, thus eliminating the section that included a bridge over the Braden River. Tara Blvd is also a designated road to be used by golf carts pursuant to Sec. 2-22-9(g)(1)(d), Code of Ordinances. The purpose of this project is to implement Safe Speed (Safe System Approach) traffic calming measures to accommodate all road users (e.g., golf carts, cyclists, etc.) on Tara Blvd while preserving the community's character. The project will also include intersection single lane roundabouts at Drewrys Bluff and Tara Preserve Ln along with traffic control devices to enhance pedestrian safety.	1,515,000	5

Transportation

Project Count	Project		Amount	District
140	Traffic Signal Infrastructure Resiliency Upgrades (West Bradenton)	Evaluate, design, permit, replace, and install traffic signals with mast arm assemblies and associated pedestrian crossing for all legs with lighting at the following intersections: (i) 301 Blvd at 9th St E; (ii) 53rd Ave W at 20th St W, 26th St W, and 30th St W; (iii) 59th St W at 11th Ave W, 17th Ave W, and 21st Ave W; (iv) 26th St W at 9th Ave W, 17th Ave W, 25th Ave W, 38th Ave W, 57th Ave W, and 60th Ave W; (v) 9th St E at 26th Ave E and 30th Ave E; (vi) 43rd St W at 9th Ave W; (vii) 9th Ave W at 39th St W; (viii) 51st St W at 38th Ave W. Design shall meet mast arm structural design standards near coastlines and include new controller cabinets, power backup systems, underground infrastructure, and power supply. For all intersection install CCTV cameras and MVDS with connection to TMC. The Public Works Department owns and maintains over 40 signalized intersections which use span wire assemblies (i.e., suspension cable systems) to support traffic signals, signal conductors, and detection hardware. Span wire assemblies are more prone to damage during hurricanes or strong wind events which cause hardware and equipment damage that required emergency repair response. In addition, many of the older span wire intersections no longer meet current structural design standards for near coastlines. Staff have identified 18 locations where these span wire intersections have met or exceeded their useful design life. All subject intersections are within the FDOT Mast Arm Boundary Map, which designates areas that signals are to be supported by galvanized mast arms. This project will improve the structural resiliency of these signal assemblies, promote overall intersection safety, and reduce maintenance demand. Also, staff recommends include Advanced Traffic Management Systems (ATMS) infrastructure such as CCTV cameras, Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.	44,129,000	Countywide
141	Tropical Harbour Curb Replacement	Remove and replace 5,000 Linear Feet (10,000 square feet) of Miami Curb.	636,656	2
142	Uihlein Rd at Lakewood National Pkwy Intersection Improvements	Design, permit, and install traffic signals with mast arm assemblies and associated pedestrian crossings for all legs. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connections from Rangeland Blvd to Lakewood National entrance. Uihlein Rd is a four-lane divided thoroughfare classified as a collector in the County's Comprehensive Plan and connects two major state roads (SR 70 and SR 64). Lakewood National Parkway is a four-lane divided private roadway that connects two major collector thoroughfares, Uihlein Rd to Bourneside Blvd, and provides connection to several residential communities. The intersection of Uihlein Road and Lakewood National Parkway operates as a two-way stop-control for Lakewood National Parkway. Steady traffic growth in the area is expected to continue due to existing and future developments in the area. Staff recommend installing a traffic signal at this intersection. Staff also recommends including Advanced Traffic Management Systems (ATMS) infrastructure such as fiber optics, CCTV cameras Microwave Vehicle Detection Systems (MVDS) to provide connection to the Traffic Management Center (TMC) to improve operational and monitoring capabilities.	2,612,500	5
143	Upper Manatee River Rd from Ft Hamer Bridge to Rye Rd	The existing two lane road will be reconstructed to include standard lane widths, pedestrian and bicycle facilities, and lighting.	21,000,000	5
144	University Parkway - Lakewood Ranch Blvd - Lake Club Blvd Rebase and Resurfacing	This project encompasses design, bidding and construction of a 15,000 LF of roadway base, asphalt surfacing, repair sidewalks, rework shoulders and repair curbing.	5,957,000	5
145	University Parkway Lakewood Ranch Blvd to Lake Club Circle	Re-base large sections of University Parkway from Lakewood Ranch Blvd to Lake Club Blvd.	6,391,600	1
146	US 301 - 41st Ave E to 51st Ave E	Construct sidewalk.	460,000	1
147	US 301 - 60th Ave to Moccasin Wallow Rd	Widen from four lanes to six lanes.	68,850,033	1

155	US 41 - Bayshore Gardens Pkwy	Construct traffic separator on south leg of intersection.	326,000	Multi-District
156	US 41 - Edwards Dr to Braden Ave	Construct pedestrian crossings.	130,000	4
157	US 41 - Florida Blvd	Upgrade to mast arm support, and construct right-turn lane on all approaches.	87,600	4
158	US 41 - Orlando Ave	Upgrade to mast arm support, and construct right turn lane on all approaches.	917,992	4
159	US 41 - US 301 to 69th St	Widen from four lanes to six lanes.	45,244,397	Multi-District
160	Victory Rd from Mendoza to US 301	Upgrade road to current standards for travel lanes, sidewalks, bike lanes (or trail), and lighting.	8,094,000	1
161	Waterline Rd from Rye Rd to Dam Rd	Add sidewalk on one side.	1,028,000	1
162	Whitfield Avenue Complete Street - University Parkway to Lockwood Ridge Road	Construct traffic calming measures which consist of repurposing Whitfield Avenue to provide 1 vehicular travel lane with a multi-use lane for golf carts and cyclist, separated with raised curb, in each direction from University Parkway to Lockwood Ridge Road. Intersection improvements consist of constructing five single lane roundabouts at West Country Club Lane, West Country Club Drive N, Country Club Way, Palm Aire Drive and Timber Lake Drive with additional traffic control devices provided to enhance pedestrian safety.	12,265,000	4
163	Willow Ellenton Greenway	Construct multi-use trail (Regional).	2,700,000	1
164	Gateway Greenway - Segment 3	Construct an asphalt trail 12' wide, cement treated base, compacted subgrade from the SR64 to Chance Preserve. Initial trail construction my consist of compacted shell.	2,108,000	1
165	10th St W - Bridge 130007 Rehabilitation	Design, project management, and rehabilitation of the existing bridge on 10th St W over Snead Island Cutoff. The rehabilitation, completed in phases, will consist of the removal of unsound concrete, restore deteriorated areas and apply an epoxy concrete overlay over the existing concrete deck. The roadway geometry and overall structure footprint will remain unchanged. Maintenance of traffic will consist of maintaining one lane with two way traffic using temporary traffic signals for the duration of the project.	749,041	3
166	49th St E over Terra Ceia Creek - Bridge 134005 Replacement	Design, permit, land acquisition, project management, and construction of a new bridge approximately 50 ft. long x 53 ft. wide with bike lanes, shared use path and sidewalk. Road closure is anticipated for construction. The existing road profile appears to provide adequate freeboard and roadway serviceability. The new bridge will be widened towards the north due to the proximity of the existing channel. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated on the north side.	3,474,185	1

Project Count	Project		Amount	District
167	63rd Ave E over Bowlees Creek - Bridge 134095 Rehabilitation	Design, project management, and rehabilitation of the existing bridge on 63rd Ave E over Bowlees Creek. The rehabilitation will consist of installing articulating block (4" thickness) within the channel under the bridge to protect the abutment toes at Bents 1 and 2. The roadway geometry and overall structure footprint will remain unchanged. Maintenance of traffic may consist of a lane closure for equipment and material but traffic is anticipated to be maintained for the duration of the project.	372,146	Multi-District
168	Magellan Dr over Bowlees Creek - Bridge 134070 Replacement	Design, permit, land acquisition, project management, and construction of a new bridge approximately 35 ft. long x 31 ft. wide. No proposed bike lanes, sidewalks or curbs. Road closure is anticipated for construction. The proposed road profile will match the design storm frequency to provide roadway serviceability. Adequate freeboard will not be provided since it requires raising the road significantly. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated on the southwest corner.	2,389,900	4
169	Palma Sola Blvd over Palma Sola Creek - Bridge 134034 Replacement	Design, permitting, land acquisition, project management, and construction of a new bridge approximately 35 ft. long x 36 ft. wide. Bike lanes/sidewalks will be evaluated during design. Anticipate full road closure during construction. The proposed road will be slightly raised to provide roadway serviceability matching design storm frequency. Freeboard will not be provided since it requires raising the road significantly. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated.	2,634,911	3
170	Kay Rd NE - SR 64 E to Port Harbor Pkwy Resurfacing	Design, permit, and construct pavement mill and resurfacing Kay Rd NE from SR 64 E to Port Harbor Pkwy including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	2,931,318	Multi-District
171	Mulholland Rd - Fort Hamer Rd to East Terminus Resurfacing	Design, permit, and construct pavement mill and resurfacing of Mulholland Rd from Fort Hamer Rd to its East Terminus including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	3,798,250	1
172	Rangeland Pkwy - Lakewood Ranch Blvd to White Egale Blvd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Rangeland Pkwy from Lakewood Ranch Blvd to White Eagle Blvd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	4,483,821	5
173	Tallevast Rd - US 41 to Lockwood Ridge Rd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Tallevast Rd from US 41 to Lockwood Ridge Rd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	13,041,238	4
174	White Eagle Blvd - Rangeland Pkwy to Malachite Dr Resurfacing	Design, permit, and construct pavement mill and resurfacing of White Eagle Blvd from Rangeland Pkwy to Malachite Dr including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	2,748,499	5
175	Whitfield Ave - US 301 to Lockwood Ridge Rd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Whitfield Ave from US 301 to Lockwood Ridge Rd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	3,589,278	4
176	57th Ave W - 34th St W to 15th St E Roadway Improvements	Design, permit, and construct roadway and multimodal safety improvements along 57th Avenue West from 34th Street West to 15th Street West. Improvements include raised medians to consolidate access, add left-turn lanes at intersections, and reduce conflict points; construction of missing sidewalks; and installation of raised crosswalks and raised intersections to enhance pedestrian safety and manage vehicle speeds. The project will also evaluate the traffic signals at 34th St W and 5th Street East and replace it with a mini-roundabout if warranted.	3,852,000	Multi-District

177	Old Tampa Road - US 301 to Fort Hamer Road	Design and construct multimodal and intersection improvements along Old Tampa Road from U.S. 301 to Fort Hamer Road. Improvements roundabouts at 89th Avenue East, Riverwoods Drive/Silverleaf Avenue, and Kingsfield Drive/Wilderness Boulevard intersections to improve safety and traffic operations. The project also includes construction of missing sidewalk segments and installation of raised crosswalks at strategic locations to enhance pedestrian safety and connectivity.	6,553,750	1
178	Palm View Road - US 41 to Ellenton Gillette Road Roadway Improvements	Design, permit, and construct traffic calming and safety improvements along the corridor, including installation of speed tables at strategic locations to manage vehicle speeds. Improvements also include construction of either a mini-roundabout or a raised intersection at 28th Avenue East to enhance intersection safety and operations, construction of sidewalks and raised crosswalks where feasible to improve pedestrian connectivity, and construction of a mini-roundabout at the Ellenton Gillette intersection.	2,364,700	1
179	El Conquistador Pkwy - 34th St W to 75th St W Widening	Design, permitting, right-of-way acquisition, and construction of improvements to widen El Conquistador Parkway from 34th Street West to 75th Street West from two to four lanes, consistent with the preferred alternative identified in the completed Project Development and Corridor Study and incorporating Safe System Approach principles.	6,420,000	4
180	10th St W - Bridge 130007 Rehabilitation	Design, project management, and rehabilitation of the existing bridge on 10th St W over Snead Island Cutoff. The rehabilitation, completed in phases, will consist of the removal of unsound concrete, restore deteriorated areas and apply an epoxy concrete overlay over the existing concrete deck. The roadway geometry and overall structure footprint will remain unchanged. Maintenance of traffic will consist of maintaining one lane with two way traffic using temporary traffic signals for the duration of the project.	749,041	3
181	49th St E over Terra Ceia Creek - Bridge 134005 Replacement	Design, permit, land acquisition, project management, and construction of a new bridge approximately 50 ft. long x 53 ft. wide with bike lanes, shared use path and sidewalk. Road closure is anticipated for construction. The existing road profile appears to provide adequate freeboard and roadway serviceability. The new bridge will be widened towards the north due to the proximity of the existing channel. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated on the north side.	3,474,185	1
182	63rd Ave E over Bowlees Creek - Bridge 134095 Rehabilitation	Design, project management, and rehabilitation of the existing bridge on 63rd Ave E over Bowlees Creek. The rehabilitation will consist of installing articulating block (4" thickness) within the channel under the bridge to protect the abutment toes at Bents 1 and 2. The roadway geometry and overall structure footprint will remain unchanged. Maintenance of traffic may consist of a lane closure for equipment and material but traffic is anticipated to be maintained for the duration of the project.	372,146	1
183	Magellan Dr over Bowlees Creek - Bridge 134070 Replacement	Design, permit, land acquisition, project management, and construction of a new bridge approximately 35 ft. long x 31 ft. wide. No proposed bike lanes, sidewalks or curbs. Road closure is anticipated for construction. The proposed road profile will match the design storm frequency to provide roadway serviceability. Adequate freeboard will not be provided since it requires raising the road significantly. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated on the southwest corner.	2,389,900	4

Project Count	Project		Amount	District
184	Palma Sola Blvd over Palma Sola Creek - Bridge 134034 Replacement	Design, permitting, land acquisition, project management, and construction of a new bridge approximately 35 ft. long x 36 ft. wide. Bike lanes/sidewalks will be evaluated during design. Anticipate full road closure during construction. The proposed road will be slightly raised to provide roadway serviceability matching design storm frequency. Freeboard will not be provided since it requires raising the road significantly. The project will meet current County Standards while minimizing project length and impacts to properties. Land acquisition anticipated.	2,634,911	3
185	Port Harbour Parkway at Kay Road Intersection Improvements	Designed to connect to Kay Road over Cypress Strand Bridge/roundabout at the Port Harbour Parkway and Kay Road intersection, construct pedestrian ramps, crosswalks (with Rectangular Rapid-Flashing Beacons (RRFBs) for a roundabout option), resurface all approach lanes for re-striping for appropriate lane designation and appropriate signing and pavement markings.	5,056,648	5
186	Mulholland Rd - Fort Hamer Rd to East Terminus Resurfacing	Design, permit, and construct pavement mill and resurfacing of Mulholland Rd from Fort Hamer Rd to its East Terminus including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	3,798,250	1
187	Rangeland Pkwy - Lakewood Ranch Blvd to White Egale Blvd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Rangeland Pkwy from Lakewood Ranch Blvd to White Eagle Blvd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	4,483,821	5
188	Tallevast Rd - US 41 to Lockwood Ridge Rd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Tallevast Rd from US 41 to Lockwood Ridge Rd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	13,041,238	4
189	White Eagle Blvd - Rangeland Pkwy to Malachite Dr Resurfacing	Design, permit, and construct pavement mill and resurfacing of White Eagle Blvd from Rangeland Pkwy to Malachite Dr including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	2,748,499	5
190	Whitfield Ave - US 301 to Lockwood Ridge Rd Resurfacing	Design, permit, and construct pavement mill and resurfacing of Whitfield Ave from US 301 to Lockwood Ridge Rd including sidewalk repairs, as needed along the roadway, material testing, and pavement striping.	3,589,278	4
191	57th Ave W - 34th St W to 15th St E Roadway Improvements	Design, permit, and construct roadway and multimodal safety improvements along 57th Avenue West from 34th Street West to 15th Street West. Improvements include raised medians to consolidate access, add left-turn lanes at intersections, and reduce conflict points; construction of missing sidewalks; and installation of raised crosswalks and raised intersections to enhance pedestrian safety and manage vehicle speeds. The project will also evaluate the traffic signals at 34th St W and 5th Street East and replace it with a mini-roundabout if warranted.	3,852,000	Multi-District
192	Old Tampa Road - US 301 to Fort Hamer Road	Design and construct multimodal and intersection improvements along Old Tampa Road from U.S. 301 to Fort Hamer Road. Improvements roundabouts at 89th Avenue East, Riverwoods Drive/Silverleaf Avenue, and Kingsfield Drive/Wilderness Boulevard intersections to improve safety and traffic operations. The project also includes construction of missing sidewalk segments and installation of raised crosswalks at strategic locations to enhance pedestrian safety and connectivity.	6,553,750	1

193	Palm View Road - US 41 to Ellenton Gillette Road Roadway Improvements	Design, permit, and construct traffic calming and safety improvements along the corridor, including installation of speed tables at strategic locations to manage vehicle speeds. Improvements also include construction of either a mini-roundabout or a raised intersection at 28th Avenue East to enhance intersection safety and operations, construction of sidewalks and raised crosswalks where feasible to improve pedestrian connectivity, and construction of a mini-roundabout at the Ellenton Gillette intersection.	2,364,700	1
194	El Conquistador Pkwy - 34th St W to 75th St W Widening	Design, permitting, right-of-way acquisition, and construction of improvements to widen El Conquistador Parkway from 34th Street West to 75th Street West from two to four lanes, consistent with the preferred alternative identified in the completed Project Development and Corridor Study and incorporating Safe System Approach principles.	6,420,000	4
195	Lockwood Ridge Road at 61st Ave E Intersection Improvements	Evaluate, design, permit, and construct a traffic signal with mast arm assemblies with associated pedestrian crossings for all legs. Evaluate, design, permit, and construct turn lane improvements, as needed. In addition, install non-intrusive detection system, CCTV cameras, MVDS, and install fiber-optic connection to the TMC.	6,647,350	4
196	44th Avenue E and Wood Fern Trail Mast Arm	Construct a traffic signal with mast-arm structure with pedestrian crossings on all legs, add/lengthen turn lanes, install non-intrusive detection system, CCTV camera, MVDS and install fiber-optic connection (from Lakewood Ranch Boulevard to White Eagle Boulevard) to establish communication with the Traffic Management Center.	2,423,000	5
197	75th St W at Manatee Ave W Northbound Right Turn Lane	Design, permit, and construct a northbound right turn lane at the 75th St W/Manatee Ave intersection. Design to include pedestrian/bicycle and stormwater improvements, utilities relocations, and tree removal. Modification of existing approach lanes to accommodate the turn lane. Mast arm assemblies may need to be relocated/replaced. Land acquisition will be required.	1,183,482	3

Potable Water

Project Count	Project		Amount	District
1	Cortez Road Pipe Replacement (NEW)	31,000 feet of 24" watermain replacement.	10,850,000	4
2	Lake Manatee WTP Repurpose Lab for Ops & Admin Use	Lake Manatee WTP Repurpose Lab for Ops & Admin Use (NEW).	1,200,000	1
3	Peace River Manasota Regional Water Supply Authority Regional Integrated Loop Phase 3C and 3C Extension Pipelines (PW02009) FIF's	The 3C and 3C extension pipelines will complete a 66 mile linkage between the PRMRWSA's facility and Manatee County. They will bolster flows between Sarasota and Manatee Counties and provide operational resilience and flexibility in serving growth in the region. Based on current demand projections, Manatee County will begin purchasing water from the PRMRWSA around the year 2038. Manatee County must also pay $65M to purchase hydraulic capacity in earlier pipelines. That has been included in the total cost of 88.6M.	88,600,000	Multi-District
4	PTSW ASR at Lake Manatee WTP	Conversion of ASR from Potable to Partially Treated Surface Water, this is mutually exclusive to the project above, we would only do one, not both.	30,000,000	1
5	PTSW at East Lake Manatee	Implementation of an Aquifer Recharge Project on the east end of Lake Manatee near the fish camp, this is mutually exclusive to the project below, we would only do one, not both.	37,500,000	1
6	Third Party Provider Water Supply Project	This represents the Capital Investment required to take advantage of a 3rd Party Wholesale Agreement with a Private Entity who Approached the County Offering to Sell Potable Water.	20,000,000	Multi-District
7	WTP to Port Pipe Replacement - Leg 1 WTP to 675	29,000 feet of 30" watermain replacement.	12,325,000	1
8	WTP to Port Pipe Replacement - Leg 2 Foxbrook to US 301	23,000 feet of 30" watermain replacement.	9,775,000	1
9	WTP to Port Pipe Replacement - Leg 3 US 301 to I75	24,000 feet of 30" watermain replacement.	10,200,000	1
10	WTP to Port Pipe Replacement - Leg 4 I-75 to Port Manatee	23,000 feet of 30" watermain replacement.	9,775,000	1
11	Bach Subdivision - WM Replacements Phase II (PJTP26001)	This project is to replace aging water mains. This project includes +/- 4,650 LF 6" DIP, 17 gate valves, 15 fire hydrant assemblies, and 78 services. Hydrants, services and valves should be installed to County and Ten State Standards.	4,615,000	3
12	Bach Subdivision - WM Replacements Phase III (PJTP26002)	This project is to replace aging water mains. This project includes +/- 4,650 LF 6" DIP, 17 gate valves, 15 fire hydrant assemblies, and 78 services. Hydrants, services and valves should be installed to County and Ten State Standards.	5,702,000	3
13	Bach Subdivision - WM Replacements Phase IV (PJTP26003)	This project is to replace aging water mains. This project includes +/- 1,960 LF 8'' DIP, 3,230 LF 6" DIP, 14 gate valves, 15 fire hydrant assemblies, and 88 services. Hydrants, services and valves should be installed to County and Ten State Standards.	6,090,000	3

Stormwater

Project Count	Project		Amount	District
1	Bowlees Creek Automated Outfall Structures (AOS)	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. This project consists of modification of existing stormwater facilities along the mainline system of Bowlees Creek and secondary systems.	17,510,000	2, 4
2	Bowlees Creek Flood Mitigation Areas	This project consists of acquisition of properties and utilization of existing county property to construct flood storage facilities.	27,981,591	2, 4
3	Cabbage Slough Channel Improvements	This project will include survey and mapping, drainage easement dedications, and flowline improvements of Cabbage Slough (approximately 2.82 miles) between the headwaters north of Moccasin Wallow Road to the ultimate outfall of Buffalo Canal.	3,349,553	1
4	Cedar Creek Channel Improvements	This project will include survey and mapping, drainage easement dedications, and flowline improvements of Cedar Creek (approximately 2.66 miles) and two tributary drainage systems between Whitfield Avenue and Country Club Way, to Honore Avenue, and ultimately discharging to the Braden River.	1,457,968	4
5	Construction of Bay Drive Storm Pipe Improvements, Sidewalks, and Utility Adjustments	Construct drainage improvements, sidewalk, driveways and ADA curb ramps. The project may be constructed in phases due to potential utility conflicts and permitting on the west side of the project.	2,485,118	``
6	Copperstone Automated Outfall Structures	Evaluate and install eight (8) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of AOSs to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	3,737,682	1
7	Cow Pen Slough Drainage Improvements, Segment 1 of 3	The first segment begins at the County line just east of Lorraine Rd. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the Concession subdivision at University Parkway to the east side of the Concession. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,837	5

Project Count	Project		Amount	District
8	Cow Pen Slough Drainage Improvements - Segment 2 of 3	The second segment begins at the County line just east of the Concession. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the east side of the Concession to SR 70. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,836	5
9	Cow Pen Slough Drainage Improvements - Segment 3 of 3	The first segment begins at the north side of SR 70. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the north side of SR 70 north to 65th Ave E. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,836	5
10	Crystal Lakes Automated Outfall Structures	Evaluate and install four (4) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of AOSs to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	2,104,011	1
11	Design of Bay Drive Storm Pipe Improvements Sidewalks and Utility Adjustments	Design and permit drainage improvements, sidewalk, driveways and ADA curb ramps.	425,453	4
12	Easement Acquisition Countywide	Identify and obtain necessary easements for our stormwater canal and pipe systems throughout Manatee County.	1,462,500	Countywide
13	Fountain Lakes Automated Outfall Structures	Evaluate and install two (2) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of AOSs to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOSs, supporting communications, and water quality monitoring equipment, as required. Additionally, replace and lower the invert elevation of an existing stormwater outfall pipe discharging towards 57th Avenue West.	1,675,206	2, 4
14	Glen Lakes Automated Outfall Structures	Evaluate and install eight (8) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of AOSs to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	3,865,212	4
15	Glen Creek Stormwater Pipe Relocation	Evaluate, design, permit, and construct approximately 700 LF of 36" RCP storm drain, collection boxes, headwall, and bank revetment. Obtain necessary easement(s) required for access and maintenance of the pipe at its new location. Abandoned or remove stormwater infrastructure in conflict with the City of Bradenton project. Replacement to be of like size with no modification in flow capacity.	821,925	2

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Stormwater

Project Count	Project		Amount	District
16	Greenfield Plantation Stormwater Pipe Replacement and Rehabilitation	The Greenfield Plantation community has drainage infrastructure that is prone to failures. The existing stormwater conveyance systems are easily overwhelmed and could benefit from redesign, pipe upsizing, and/or pipe rehabilitation. The pipe upsizing will require engineering design and property acquisition thus is outside the scope of regular maintenance.	2,738,917	5
17	Lakeside Village Automated Outfall Structure	Evaluate and install one (1) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	1,121,328	4
18	Longbay Area Drainage Improvements	This project will replace 7,000 feet of aging storm water conveyance pipe and associated drainage infrastructure. The project would include Bernard Ave, Somerset Ave, Suwanee Ave, Hernando Ave, and Braden Ave.	12,696,909	4
19	Moss Creek Automated Outfall Structures	Evaluate and install three (3) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	1,506,141	4
20	Mote Ranch - Chaparral Automated Outfall Structures	Evaluate and install five (5) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	2,559,843	4
21	Palm Aire Automated Outfall Structures	Install seven (7) Automated Outfall Structures (AOS) to create additional flood storage in this watershed. Location of AOSs to based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	3,281,850	4
22	Palmetto Point Drainage Improvements	Evaluate, design and permit the reconstruct/improvement of the existing drainage system. This includes approximately 17 miles of roadside ditches and associated stormwater infrastructure including but not limited to, upsizing culverts, installing mitered end section at driveway crossings, and outfall modifications. Obtain necessary drainage easement needed for the improvements or existing infrastructure. A wetland or water quality permit element is anticipated with this project in the modern permitting era, that will add additional cost for additional pond sites or a wetland mitigation credits.	5,747,500	2
23	Pearce Drain Automated Outfall Structures (AOS)	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. The project limits are 63rd Avenue East northward (downstream) to the confluence with the Braden River.	29,355,000	2, 4, 5

Projects of Record

Stormwater

Project Count	Project		Amount	District
24	Pearce Drain Flood Mitigation Areas	Modification of existing stormwater/floodplain mitigation facilities to primary drainage systems by the removal of berms and/or embankments or the installation of spillways or equalization culverts.	29,622,977	2, 4, 5
25	Poinsettia Avenue Drainage Improvements	Evaluate, design, permit, and construct approximately 1,200 LF of Type A curb & gutter along east side of Poinsettia Avenue with associated collection box, and outfall pipe. Acquisition of access/maintenance easement will be required.	1,096,875	2
26	Rattlesnake Slough Regional Storage Design and Permitting	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. An existing County floodplain mitigation facility would be designed and permitted for modification and excavation to create additional flood storage volume. A proposed channel/culvert system would connect Rattlesnake Slough to the existing County floodplain mitigation area under Honore Avenue, though the existing County Floodplain Mitigation Area to the Evers Reservoir. Automated Outfall Structures would be utilized in this system to prevent backflow from Evers Reservoir. In addition, design and permitting would be included for flood storage areas along Rattlesnake Slough on private property and City of Bradenton property.	700,000	4, 5
27	Regional Storage Drainage Improvements - Bowlees Creek	Design and construction. This project will lower the flood stages and remove 91 structures from the 100 year floodplain. This will be accomplished with construction of 41.5 ac of ponds, modification of existing weirs and modifying neighboring pond control structures for additional storage.	7,405,003	2, 4
28	Saraplams Automated Outfall Structures	Evaluate and install eight (8) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	3,642,912	4
29	Slaughter Drain Segment 1 - Canal Maintenance Establishment	Acquire access easements as needed, clear and grub access and canal banks, remove blockages, establish appropriate flow line elevations.	1,457,425	1
30	Slaughter Drain Segment 2 - Canal Maintenance Establishment	Acquire access easements as needed, clear and grub access and canal banks, remove blockages, establish appropriate flow line elevations.	711,274	1
31	Storm Pipe Asset Mapping	Map our current storm pipe system and identify GIS locations, pipe type and diameter and any associated structures.	638,500	Countywide
32	Summerwoods Automated Outfall Structures	Evaluate and install four (4) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required.	1,914,471	1

33	Terra Ceia Bay Stormwater Improvement	This project will consist of construction of a new stormwater conveyance system from 64th Street Court East to Terra Ceia Bay. This proposed conveyance system will consist of either an open drainage ditch or a stormwater pipeline. Acquisition of a drainage easement through private property will be necessary for construction of the proposed stormwater conveyance system and perpetual maintenance. A drainage-maintenance access easement will also need to be acquired for maintenance vehicle access to an open drainage ditch option. Design and permitting associated with the proposed stormwater conveyance system. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvement where possible.	907,569	3
34	Waterford at Imperial Lakes Automated Outfall Structure	Evaluate and install two (2) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required. Additionally, lower outfall from stormwater facility at the intersection of Buffalo Road at Willis Road. Utility adjustments, as needed, to the existing water mains for downstream outfall system at Buffalo Road.	5,507,190	1
35	Trailer Estates - Area A	Construction of rear yard swale improvements, inlet repairs, and pipe upsizing.	292,500	4
36	Trailer Estates - Area B	Construct rear yard swale improvements, inlet repairs, and pipe upsizing, increase of outfall capacity as well as CMP pipe replacement on Bay Drive west of Canada Blvd.	479,700	4
37	Trailer Estates - Area C	Construct rear yard swale improvements, inlet repairs, pipe upsizing, and increase of outfall capacity.	659,880	4
38	Whitfield Estates Sidewalk, Curb and Drainage Improvements	Remove and replace sidewalk and curb and tree removal causing damage to both, drainage improvements including utility adjustments and resurfacing for Wee Burn, Chevy Chase, St. Andrews, McArthur, and Meadowbrook.	6,432,646	4
39	Willis Road, Palmetto	This project will consist of construction of a new stormwater conveyance system from Willis Road south to Buffalo Canal. This proposed conveyance system will consist of either an open drainage ditch or a stormwater pipeline. Acquisition of a drainage easement through private property will be necessary for construction of the proposed stormwater conveyance system and perpetual maintenance. A drainage-maintenance access easement will also need to be acquired for maintenance vehicle access to an open drainage ditch option. Design and permitting associated with the proposed stormwater conveyance system. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvement where possible.	1,313,208	1
40	Woods of Moccasin Wallow Automated Outfall Structures	Evaluate and install three (3) Automated Outfall Structures (AOS) to create additional flood storage for this watershed. Location of the AOS to be based upon accessibility to public right-of-way. Provide a drainage easement(s) over the stormwater facilities for permitting, construction, inspection, and maintenance of the AOS, supporting communications, and water quality monitoring equipment, as required. Utility adjustments, as needed, for the installation of automated outfall structure along 52nd Avenue East.	1,837,836	1

1	66th Street Lift Station Building	Replicate the Sewer Collections Building design that was constructed in 2018. This is an 8,000 sf mixed use facility with office space, training rooms, kitchen, showers and locker rooms. Retrofit office space in the existing 1980's era building to maximize use of storage with a goal to demobilize sea-pack containers from the site.	4,200,000	3
2	69th Ave Parallel Force Main (6097780)	Project completed Design @ 60% - on hold pending the construction of the other Developer projects in the area within the next 10 years.	900,000	4
3	Bollettieri Blvd W Reclaimed Water Main Improvements	Upsize existing 10" reclaimed water main to 16" along west side of Bollettieri Blvd W from the existing 14" (ending approximately 1,300 LF from 53rd Ave W) south for approximately 1,200 LF to IMG Academies Park, by removing the existing 10" reclaimed water main and furnishing and installing approximately 1,200 LF of new 16" reclaimed water main. Will need to acquire easement	1,539,000	4
4	Braden Pines Sewer Conversion	To convert the current homes in this area from septic tanks to the County sewer system by using possible grant funding with the County only paying a percentage of the project cost. The type of conversion as in gravity, grinder stations, and vacuum systems will be determined after an assessment is completed identifying homes on a septic system in this area. Also, decommission the old septic tanks and connect the property to the new County sewer system.	29,336,000	5
5	Braden River LS Yard	Construct a field service office on existing County property, relocate staff and equipment from Ellwood 1. Provide electric automated gate on site approx. 2 acres total to include: 1,500 sf multiuse office/restroom/showers/kitchen, 2,000 sf warehouse space, 2,000 sf covered pad for pump and generator storage, 300 sf building for flammables/oil storage, material stockpiles and stormwater treatment. Compound will need fencing, card reader access gate, access spur off of Natalie Way and stormwater management.	2,500,000	5
6	Braden Woods Sewer Conversion	To convert the current homes in this area from septic tanks to the County sewer system by using possible grant funding with the County only paying a percentage of the project cost. The type of conversion as in gravity, grinder stations, and vacuum systems will be determined after an assessment is completed identifying homes on a septic system in this area. Also, decommission the old septic tanks and connect the property to the new County sewer system.	102,207,000	5
7	Central County Field Operations Depot	Use 6 acres of land that is already cleared and establish a warehouse, field operations building, covered lift station pump storage, paved parking for up to 100 vehicles, material stockpile areas, inventory warehousing, covered storage for lift station pumps and shop space. Use east of the current SERWRF Maintenance Building. Enclosed spaces envisioned include: 7500 sf of office space and 1000 sf of interior warehousing (40% under AC). Include fuel island and connection to 44th Avenue. This will also provide an entrance for the SERWRF that will not involve the main landfill gate. This is not intended to accommodate landfill traffic which will continue from SR 64, but an emergency secondary entrance may be helpful.	12,860,000	5
8	City of Bradenton Reclaimed Water to the MCMRS	Pipeline and Booster Station for the County to take the City of Bradenton's reclaimed water for wet season disposal. Pipeline, metering, booster station and any required appurtenances that the County and/or Florida Department of Environmental Protection (FDEP) might require for the County to take the City of Bradenton's reclaimed water. Telemetry of the system to the Southeast Regional Water Reclamation Facility (SERWRF) would also be required. Most of this system would be constructed at Braden River Park.	6,420,000	5

MANATEE COUNTY GOVERNMENT
FY26-30 Adopted Capital Improvement Plan
Projects of Record

Wastewater

Project Count	Project		Amount	District
9	Colony Cove Pipeline Replacement Plan and Phase II Replacements (WW02235)	Due to the magnitude of the project, the construction will be funded and completed in phases. The first task in the project is to conduct a study of the area and to develop a phased Colony Cove Pipeline Replacement Plan and Preliminary Design Report. After the Plan and Preliminary Design are complete, Phase I will be designed and constructed. It is anticipated that there will be additional future phased construction packages. This is a current project that the current funding is inadequate. We are asking for more funding for the design and construction of Phase II.	24,289,000	1
10	Colony Cove Pipeline Replacement Plan and Phase III Replacements (WW02246)	Due to the magnitude of the project, the construction will be funded and completed in phases. The first task in the project is to conduct a study of the area and to develop a phased Colony Cove Pipeline Replacement Plan and Preliminary Design Report. After the Plan and Preliminary Design are complete, Phase I will be designed and constructed. It is anticipated that there will be additional future phased construction packages. This is a current project that the current funding is inadequate. We are asking for more funding for the design and construction of Phase III.	23,776,000	1
11	Cortez DIW Replacement	The new Class 1 well shall be complete with new 24" piping, appurtenances, and booster pump station with a canopy. It shall be capable of injecting 18 MGD. The well shall be built at the Southwest Water Reclamation Facility, by the existing well on Cortez Road or across the street from the existing well on County property.	20,187,000	4
12	CR 675 Force Main	Install new force main per master plan along C.R. 657	1,225,000	1
13	Erie Rd - Martha Rd to Harrison Ranch - MARS	Construct reclaim water line from Harrison Ranch Boulevard to Copperstone Phase 1 using approximately 7,800 linear feet of 16 inch ductile iron pipe.	4,500,000	1
14	Harrison Ranch Force Main	Install new force main per master plan along Harrison Ranch Blvd.	1,305,000	1
15	Landfill Class I Industrial Injection Well	Study and develop design criteria for a small treatment system to collect and treat a liquid waste stream to make it suitable for injection. Leachate is the primary concern, however, there are other liquid residual waste streams from processes on this site (FOG and the Pelletizer) that burden or represent risk for the biological treatment processes. Site, drill and construct a Class 1 industrial injection well and monitoring well system. Site and construct the collection and treatment system and secure an operational testing permit.	20,676,000	5
16	MCMRS Booster Pump Station Improvement	Replacement of Pumps at the MRS Booster Pump Stations.	5,700,000	Multi-District
17	North Regional Water Reclamation Facility Administration & Maintenance Bldg. (WW01852)	Replace the Administration Bldg. and add a Maintenance Bldg. to accommodate the NR Water Reclamation Facility Management staff offices.	5,700,000	1
18	North Regional Water Reclamation Facility Reclaimed Water Storage Lake Improvements (WW01421)	Reduce slope to 3.1 where necessary on the Golf Course Lake. Remove all peninsulas in the Golf Lake Course.	8,000,000	1
19	Rye Rd BPS to Spencer Parrish Rd PS Parallel Water Main Improvements (NEW)	Construct 16" reclaimed water main to parallel the existing 30" reclaimed water main along Rye Rd E from Rye Rd Bypass (BPS) north to Golf Course Rd, northwest along Golf Course Rd to Spencer Parrish Rd continuing to Spencer Parrish Pump Station (PS), by furnishing and installing approximately 49,000 LF of new 16" reclaimed water main.	29,000,000	1
20	North Regional Water Reclamation Facility10 MG Reclaimed Water Storage Tank & HSPS (WW01422)	Installation of a 10 million gallon reclaimed storage tank with a new high service pump station.	25,400,000	1
21	Rye Road Reclaimed Pump Station Upgrade (NEW)	Remove three existing pumps and furnish and install three 150 hp and one 75 hp horizontal split-case pumps and required electrical upgrades. Inspect discharge piping, pipe bracing, base ells, influent main brackets, and mounting plates for corrosion damage and replace as necessary.	2,800,000	1

Projects of Record

Wastewater

Project Count	Project		Amount	District
22	SERWRF to Rye Road BPS Parallel Reclaimed Water Main Improvements (NEW)	Construct 24" reclaimed water main to parallel the existing 30" reclaimed water main from the south end of 81st Ct E outside of Southeast Regional Water Reclamation Facility (SERWRF) north to State Road 64 east to Rye Rd E and along Rye Rd E to the Rye Rd BPS, by furnishing and installing approximately 28,000 LF of new 24" reclaimed water main.	21,000,000	1
23	Southeast Regional Water Reclamation Facility Administration Building (WW01622)	Replace the Administration building to accommodate the SER Water Reclamation Facility management staff offices.	1,700,000	1
24	Southeast Regional Water Reclamation Facility Second 10 MG Reclaimed Water GST and MCMRS Chlorination System	Construction of a second 10 million gallon reclaimed water storage tank and addition of a Manatee County Master Reuse System chlorination system.	6,200,000	1
25	Southwest Water Reclamation Facility ASR New Piping (NEW)	Design and install new piping for the Aquifer Storage and Recovery (ASR) well.	3,600,000	4
26	Southwest Water Reclamation Facility New Administration Building (WW01856)	Site and build a new 2 story administration bldg. with vital components above projected storm event water levels.	3,000,000	4
27	Spencer-Parrish Reclaimed Pump Station Upgrade (WW02029)	Remove three existing pumps and furnish and install four 200 horse power (HP) horizontal split-case pumps. Inspect piping, pipe bracing, pedestals, and other appurtenances for corrosion damage and replace as necessary. Install four Variable Frequency Devices (VFDs) and complete necessary power, electrical, and Supervisory Control And Data Acquisition (SCADA) improvements. Project cost includes a new electrical building. Design engineer to confirm need for a new building.	4,500,000	1
		Wastewater Total Amount	**$ 372,520,000**

Infrastructure Sales Tax Fiscal Years 2027 - 2031

Program Summary

Manatee County Infrastructure Sales Tax:
Overview and Purpose

In 2016, the Manatee County Board of County Commissioners determined that investing in safer neighborhoods, easing traffic congestion, and improving roadways and public facilities would serve the long-term interests of the community. To fund these infrastructure improvements, the Board adopted Ordinance 16-35, which established a one-half percent (0.5%) Infrastructure Sales Tax (IST) for a period of 15 years, as permitted under Section 212.055(2) of the Florida Statutes.

This local sales surtax was placed on the November 8, 2016, general election ballot and was approved by a majority of Manatee County voters. The tax took effect on January 1, 2017, and is set to expire on December 31, 2031, unless extended by voter referendum.

Purpose and Use of Funds

Revenue from the Infrastructure Sales Tax is collected by the Florida Department of Revenue and distributed to Manatee County and its municipalities. In accordance with state law, these funds are dedicated solely to planning, financing, and constructing public infrastructure projects. Eligible uses include, but are not limited to:

- Roadways, sidewalks, and intersections
- Street lighting
- Infrastructure for law enforcement and emergency response
- Libraries, parks, and public buildings
- Waterways and stormwater systems

All expenditures must comply with the requirements set forth in Section 212.055(2), Florida Statutes, and must be used exclusively for qualifying infrastructure purposes.

Oversight and Governance

To ensure transparency and public accountability, the County established a Citizens Oversight Committee through Resolution R-16-128, as amended by Resolution R-18-130. This seven-member committee, appointed by the Board of County Commissioners, serves as an advisory and reporting body. It is responsible for reviewing expenditures and submitting an annual report on the use of Infrastructure Sales Tax proceeds no later than December 31 of each year.

The Committee and its activities are governed by applicable state laws, including:

- The Florida Government in the Sunshine Law (Chapter 286, Florida Statutes)
- The Florida Public Records Law (Chapter 119, Florida Statutes)
- The Florida Code of Ethics for Public Officers and Employees (Chapter 112, Florida Statutes)

Funding Framework

The County utilizes two guiding documents to manage how IST funds are allocated and spent:

1. **Infrastructure Sales Tax Funding Categories List** – Establishes budget categories and corresponding percentages for how tax proceeds are distributed. Any changes to this list require a public hearing and formal amendment to the resolution.

2. **Infrastructure Sales Tax Project and Equipment List** – Identifies specific projects and equipment to be funded through the sales tax. Updates to this list must be made through the County's Five-Year Capital Improvement Plan (CIP) process or by resolution at a public hearing.

Through this framework, Manatee County remains committed to responsibly managing public funds and ensuring that Infrastructure Sales Tax revenues are invested in projects that benefit the community today and into the future.

Glossary

Appropriation

Legal authorization given by the County Commission to make expenditures and incur obligations using county funds.

Arterial Road

A route providing service which is relatively continuous and of relatively high traffic volume, long average trip length, high operating speed and high mobility importance. The primary purpose of arterials is to provide service to major traffic movements; access to abutting property is a subordinate purpose.

Beginning Fund Balance

The Ending Fund Balance of the previous period. (See Ending Fund Balance)

Bond

Written evidence of the issuer's obligation to repay a specified principal amount on a certain date (maturity date), together with interest at a stated rate, or according to a formula for determining that rate. Bonds are sometimes used as a source of financing for large scale or expensive projects to allow projects to proceed rather than wait until the funds can be accumulated.

Capital Budget

Financial plan of capital project expenditures for the fiscal year beginning October 1. It incorporates anticipated revenues and appropriations included in the first year of the five-year Capital Improvement Plan (CIP), and any anticipated unspent appropriation balances from the previous fiscal year. The capital budget is adopted by the Board of county Commissioners as a part of the annual county budget.

Capital Improvement

Physical assets constructed or purchased to provide, improve or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally nonrecurring and may require multi-year financing. Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements.

Capital Improvement Element (CIE)

The Capital Improvement Element of the Comprehensive Plan identifies projects and financing for projects that are required to provide services to the areas of the county where growth is occurring in order to maintain levels of service that are required by the Comprehensive Plan.

Capital Improvement Plan (CIP)

A proposed plan, covering each year of a fixed period of years, for financing long-term work projects that lead to the physical development of county infrastructure. Manatee County develops a five-year CIP.

Capital Project

A non-recurring expenditure of $250,000 or more for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

Capitalized

Term used to classify assets which have a useful life greater than one reporting period.

Comprehensive Plan

A document adopted by the Board of County Commissioners that sets forth goals, objectives and policies for future land use, and establishes level of service standards that will be needed to meet the infrastructure needs of the county.

Collector Road

A route providing service which is of relatively moderate average traffic volume, moderately average trip length, and moderately average operating speed. Traffic movement is a priority but there is a higher degree of land access than with an arterial road, allowing such a route to collect and distribute traffic between local roads or arterial roads and serve as a linkage between land access and mobility needs.

Concurrency

Level of service that is required to meet the specified level of service required by the Comprehensive Plan.

Contingency Funds

Monies set aside, consistent with statutory authority, which subsequently can be appropriated to meet unexpected needs.

Community Redevelopment Areas (CRAs)

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Tax Increment Funds (TIFs).

Current Year Appropriation

The current year adopted budget adjusted to reflect any budget amendments done during the current fiscal year.

Debt Service

Payment of interest and principal on an obligation resulting from the issuance of bonds.

Deficit

Excess of expenditures over revenues.

Department

Manatee County's organizational structure groups programs or divisions into departments by functional similarities. Departments report to the County Administrator.

Designated Funds

Funds that are set apart for a specific purpose to fund on-going or one-time expenditures. Examples are bond proceeds, reserves or "pay-as-you-go" reserves for future facility renewal and replacement projects found mostly in the Enterprise Funds.

Division

Divisions are the units of government which provide services directly to the public and other agencies. Divisions are organized within departments by functional similarity.

Ending Fund Balance

Funds carried over at the end of the fiscal year. Within the fund, the revenue on hand at the beginning of the fiscal year, plus revenues received during the year, less expenses equals ending fund balance. The Ending Fund Balance becomes the Beginning Fund Balance in the next fiscal year.

Enterprise Fund

A fund which pays for its cost of operations from user fees and does not generally receive property tax or general revenue support. County Enterprise Funds include Manatee County Public Utilities, Landfill, Golf Course, Civic Center, Port Authority, Stormwater Utilities, and Mass Transit.

Expenditure

Decrease in net financial resources. Expenditures include current operating expenses which require the current or future use of net current assets, debt service and capital outlay.

Fiscal Year

A twelve-month period (October 1 through September 30) at the beginning of which the county implements a new budget based on expected revenues and expenditures, and at the end of which the county determines its financial position and the results of its operations.

Fixed Assets

Accounting classification of assets such as property, plant, and equipment which are capitalized.

Fund

A self-balancing set of accounts designated and accounted for separately for the purpose of restricting specific revenues that are then spent for specific activities.

Fund Balance

Amount available within a fund at the close of a fiscal period which can be carried over as non-recurring revenue for the upcoming fiscal period.

Funding Sources

Type or origination of funds to finance ongoing or one-time expenditures. Examples of CIP funding sources include, but are limited to, user fees, general revenues, gas taxes, grants, impact fees, contributions and bonds.

Generally Accepted Accounting Principles (GAAP)

Uniform minimum standards and guidelines for financial accounting and reporting as authorized by the Governmental Accounting Standards Board (GASB). The standards and guidelines include details practices and procedures and broad guidelines of general application.

General Revenue

The revenues of a government other than those derived from and retained in a proprietary, special revenue, or trust and agency fund. In Manatee County, the majority of general revenues come from ad valorem taxes.

Governmental Funds

Funds used to account for the acquisition, use and balances of expendable financial resources and the related current liabilities – except those accounted for in proprietary funds and fiduciary funds.

Impact Fees

Impact fees are a fee that is imposed by the County on new or proposed development projects to pay for all or a portion of the costs of providing public services to the new development. Impact fees are a charge on new development to help fund and pay for the construction or needed expansion of offsite capital improvements. These fees are implemented to help reduce the economic burden on the County associated with population growth within the area.

Infrastructure Sales Tax (IST)

The levy and collection of a one half-cent sales surtax collected by the Florida Department of Revenue and distributed to the County and the municipalities within the boundaries of the County, used to finance, plan, and construct infrastructure (as defined in Section 212.055(2), Florida Statutes), and limited to the following types of projects and equipment: roadways, sidewalks, intersections, street lights, infrastructure for law enforcement, emergency response, libraries, parks, waterways, public buildings and stormwater.

Interfund Transfers

Transfers of cash between funds without requirement for repayment.

Intergovernmental Revenues

Revenues received from other governments including the federal, state, and other local governmental entities.

Level of Service

An indicator of extent or degree of service which is, or will be, provided by a facility. Level of service standards, as used in the comprehensive plan, are targets or objective with which compliance is required. Levels of service are established using one or more infrastructure standards and may also include use of one or more performance standards.

Local Road

A roadway providing service which is of relatively low traffic volume, short average trip length or minimal through traffic movements and high-volume land access for abutting property.

Mandate

A requirement imposed by a legal act of the federal, state or local government.

Mass Transit

Passenger services provided by public, private or non-profit entities such as the following surface transit modes: commuter rail, rapid rail transit, light rail transit, light guideway transit, express bus and local fixed route or demand-response bus.

Operating Budget Impacts

Expenditures directly related to the cost of operating and/or maintaining the capital improvement upon completion of the project.

Paratransit

Transit service, including ridesharing, car or van pools, demand responsive buses, and other public transit services, which are characterized by their nonscheduled, non-fixed route nature.

Personal Services Expenditures

Expenditures for county employees including regular wages, overtime, contributions to the State Retirement System, Social Security, health and worker's compensation insurance premiums, and unemployment compensation costs.

Potable Water

Water which is satisfactory for drinking, culinary, and domestic purposes and which meets the appropriate requirements of the Florida Department of Environmental Regulation.

Potable Water Facilities

A system of structures designed, constructed or used to collect, treat or distribute potable water, which includes water wells, treatment plants, reservoirs, and distribution mains.

Preserve

Resource based preserve operated by the county for the primary purpose of environmental preservation and public enjoyment of environmentally sensitive lands.

Prior Year Appropriation

Includes funds budgeted for projects in prior years or through a budget amendment done during the current year prior to the date of the Proposed CIP.

Project

See Capital Project.

Property (Ad Valorem) Taxes

Revenue which is collected on the basis of a tax rate applied to the taxable valuation of real property.

Proposed Budget

The budget submitted by the County Administrator to the Board of County Commissioners within 15 days after the certification of the ad valorem tax roll by the Property Appraiser.

Proprietary Fund

A set of segregated revenue and expenditure accounts set up for the purpose of showing net income, financial position, and changes in financial position. Enterprise funds and internal service funds are proprietary funds.

Reserves

Included in this category are funds required to meet both anticipated and unanticipated needs; the balance of anticipated earmarked revenues not required for operation in the budget year; those required to be set aside by bond covenants, and accumulated funds set aside to finance capital construction on a pay-as-you-go basis.

Revenue

Taxes, fees, charges, special assessments, grants, and other funds collected and received by the county to support the services provided.

Right of Way

Land in which the state, county or municipality owns the fee simple title or has an easement dedicated or required for a transportation, utility or other use.

Solid Waste

Sludge from waste treatment works, water supply treatment plant or air pollution control facility; or garbage, rubbish, refuse or other discarded material, including solid, liquid semisolid, or contained gaseous material resulting from domestic, industrial, commercial, mining, agricultural or governmental operations.

Solid Waste Facilities

Structures or systems designed for the collection, processing or disposal of solid waste, including hazardous waste, and which includes transfer stations, processing plants, recycling plants and disposal systems.

Special Revenue Fund

A fund used to account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

Stormwater

The flow of water which results from a rainfall event.

Stormwater Runoff

Portion of precipitation, which is not passed into the soil by infiltration, evaporated into the atmosphere, or entrapped by small surface depressions and vegetation, and which flows over the land surface during, and for a short duration following any rainfall.

Surplus

Excess of revenues over expenditures.

Taxes

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. Does not include user fees or special assessments.

Tax Increment Fund (TIF)

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Community Redevelopment Areas (CRAs).

Tourist Development Tax

A tax collected on hotel rooms and other lodging rentals of six months or less. In Manatee County, one penny of the five cents collected is reserved for beach renourishment and beach improvement projects. Tourist tax monies other than this cent may be used for other tourist related projects or facilities.

Transfer

A movement of monies from one fund to another fund for the purpose of accurately accounting for expenditures. Transfers are expenditures to the fund they are being transferred from and revenues to the receiving fund. Because transfers are again budgeted as expenditures in the receiving fund, they are not included in the net budget to avoid counting the monies as expended twice.

User Fees

The payment of a fee for direct receipt of a public service by the person benefiting from the service.

Unincorporated Municipal Services Taxing Unit (UMSTU)

Unincorporated areas within Manatee County are within the Unincorporated Municipal Services Taxing Unit. Residents of the district are assessed a millage rate by the county to provide services which would be provided by a municipality if the areas were incorporated.

Voted Millage

Property tax levies authorized by voters within a taxing authority. Bond issues that are backed by property taxes are a common form of voted millage in the State of Florida. Such issues are called general obligation bonds and may be used to finance large capital projects.
