DESCRIPTION OF PROJECT (Include written description of project scope).

If different phases are anticipated, please provide relevant information.

As part of the Perico Robinson Connector Project trees are needed to provide a screen between the adjacent homes and a future trail that will be constructed to connect the trail systems at Robinson and Perico Preserves. This proposed vegetative buffer will accomplish the need for neighbor privacy and facilitate a better trail experience. This will also serve to physically exclude access to a stormwater pond owned by the adjacent property owners that would be illegally used for recreational fishing unless physical exclusion is achieved. Trees selected are 400 buttonwood trees. Selection of this species is based on the success in providing the desired functions and nearly 100% survivorship rates on past projects.

<u>Type</u>	<u>Size</u>	<u>Quantity</u>	<u>Unit Cost</u>	<u>Total Cost</u>
